Motor Vehicle Traffic Injuries Essex County Residents 2005-2007

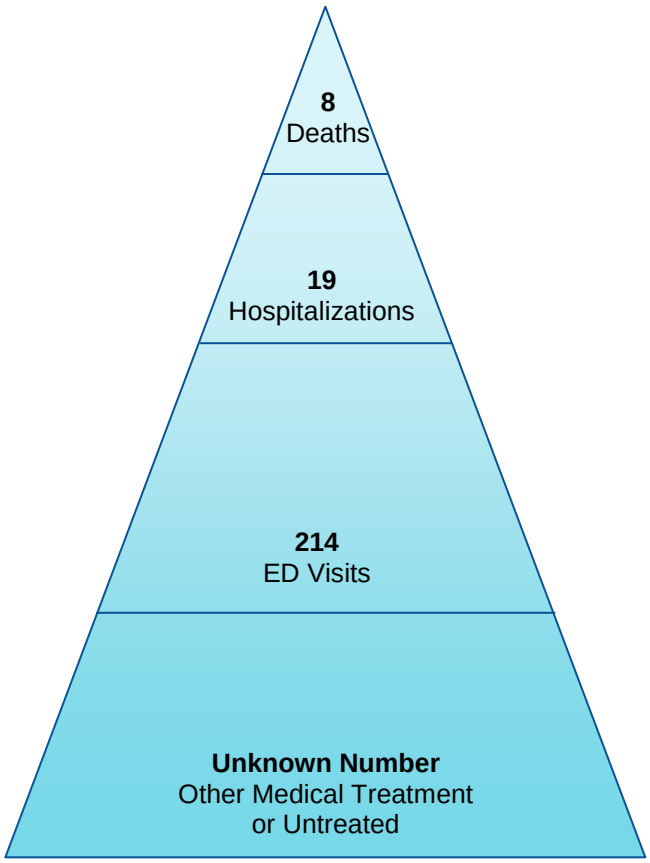
The Concern

Motor Vehicle Traffic Injuries are the leading cause of injury related death in Essex County. Crash related injuries are the 3rd leading cause of injury related hospitalization and a leading cause for injury related emergency department (ED) visits in Essex County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **two months**, because of a traffic-related crash, an average of:
  - → 1 Essex County resident died
  - → 3 Essex County residents were hospitalized
  - → 36 Essex County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
  - → $389.9 thousand in hospitalization charges
  - → $310.1 thousand in ED charges
- 13% of hospitalized crash victims are released to another hospital, rehabilitation center or long-term care, **incurring additional costs.**



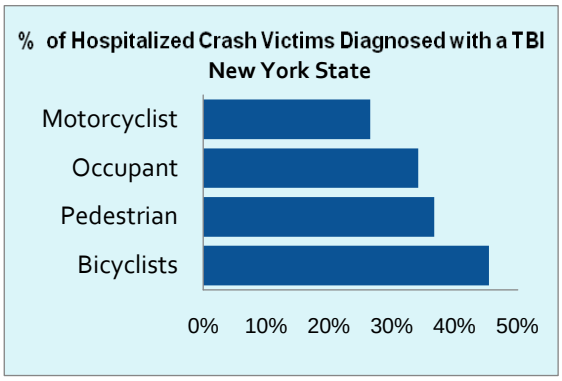
Yearly Average Number
Motor Vehicle Traffic Crash-Related Injuries
Essex County Residents, 2005-2007

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of independent function, requiring long-term care, and increased life-long expenses.

⇒ Among Essex County Residents that were hospitalized following a traffic crash **30.4% were diagnosed with a TBI.**

⇒ The risk of TBI can be reduced by wearing your seat belt!

⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!



Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Essex County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash
