

***New York State Law 2805-t***  
***Hospital Clinical Staffing Committee***

**North Shore University Hospital**

**PFI Number: 541**

**HOSPITAL CLINICAL STAFFING COMMITTEE CHARGE**

The New York State Hospital Clinical Staffing Committee (NYSHCSC) law enacted in June 2021 requires hospitals to collaboratively develop and implement a clinical staffing plan for registered nurses (RNs) and other members of the frontline team. The hospital clinical staffing committee (HCSC) is charged with creating a forum to give frontline workers, RNs, licensed practical nurses (LPNs) and nursing assistive staff, including certified nursing assistants (CNAs), patient care attendants (PCTs), medical assistants

(MAs) and unit clerks a role/voice in developing unit level staffing plans—while preserving management’s role in designing and implementing the staffing plan. The HCSC’s primary responsibilities are to develop and oversee implementation of the hospital’s annual clinical staffing plan.

Northwell Health **[PFI 541] [NORTH SHORE UNIVERSITY HOSPITAL]**  
**Acute Care Inpatient Units**  
**3 DSU – 40 Beds**

Date of Services Budgeted: FY 2024

A well-staffed unit is not only defined by the number of caregivers included in the team, but by the carefully chosen members of each team depending upon the needs of each patient and the unit overall.

Average Number of Patients Per Day:	40

## Acute Care Inpatient Units

### Labor and Delivery

Outpatient

L&D Capacity: 33

Maternal Child Health

#### **Description:**

MATERNAL CHILD PATIENT CARE SERVICES

Labor and Delivery is a 33 bed unit. It consists of 12 LDRs, 13 Triage Bays and 8 bed obstetrical post anesthesia recovery room. There are 4 Operating Rooms. All services are available 24 hours a day / 7days a week.

The family centered care philosophy is to allow the patient to experience the entire birth process in one room if volume permits, and to encourage family support according to the patient's wishes. To meet the standards for safety, this unit is included in the Maternal Child Service's Infant Security System. Entrances to this unit are locked and under camera surveillance to ensure newborn safety. Our mission is to deliver Family Centered Quality Patient Care via a comprehensive, multidisciplinary managed care approach to all patients. We promote continuing education in the Care of the Obstetrical Patient. We participate in the New York State Perinatal Safety Collaborative in the continuing pursuit of patient safety initiatives in obstetrical care. Our unit is responsible for the Multidisciplinary Quality Care of the High Risk and Low Risk Pregnant Patient. All members of the patient care team are educated in the TeamSTEPS skills to assure communication and patient safety. We have an interdisciplinary Collaborative Care Council which supports staff involvement and participation in the functioning of the unit and the pursuit of evidenced-based care standards in the care of the obstetrical patient.

Obstetrical care is provided to women at any gestational age. The L&D team triages, treats, and discharges patients from the unit or transfers to other locations such as the emergency room for further medical care as indicated. This unit also provides care for patients in need of same day admit procedures such as cerclage insertion and removal. We participate in initiating care for the normal newborn immediately post-delivery, which is inclusive of skin to skin and breastfeeding as soon as the newborn is assessed and stable. Care and support is provided to the preterm infant at delivery and newborns with anomalies utilizing an inter-disciplinary methodology. Care is given to patients and families experiencing a fetal loss at any gestational age with bereavement support by the delivery room team inclusive of the social work and pastoral care departments. All patient care is carried out utilizing a collaborative interdisciplinary approach with Obstetrical, Nursing, Pediatric, Anesthesiology, and Social Work participation.

**Additional Unit Information:**

There are many variables to consider in establishing safe, efficiently staffed hospital units. Patient care units differ based upon the types of patients cared for on a given unit, and the way in which care is organized and delivered there. Education and experience levels of unit staff, support from nurse educators and nurse managers also factor into unit staffing decisions, as does the unique characteristics and mission of each hospital.

It is also important to look at patient outcomes (including fall rates, pressure ulcer rates, and Hospital Compare measures related to heart attack care, heart failure care, pneumonia care and surgical care)
