

Motor Vehicle Traffic Injuries New York State Roadways 2014

The Concern

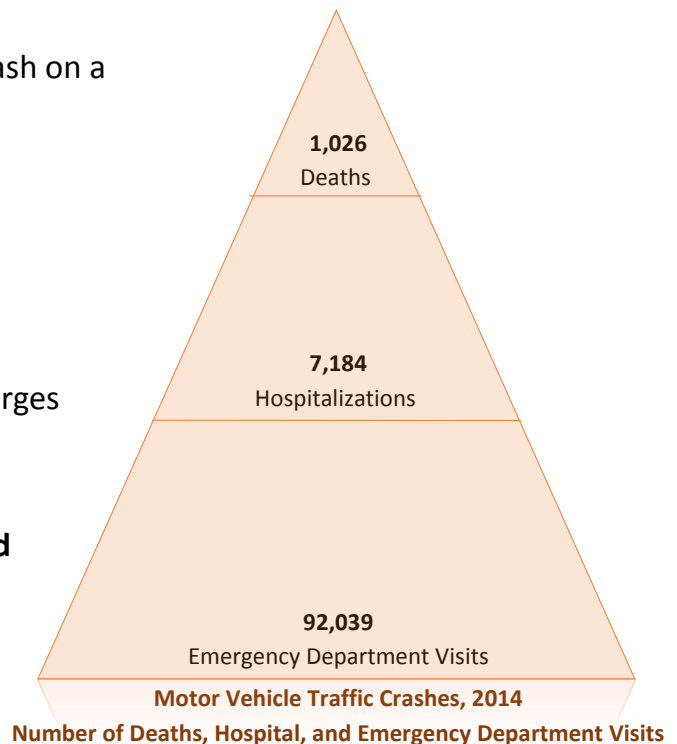

Motor Vehicle Traffic Injuries are a serious public health problem in New York State.

They are the fourth leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to New York. In 2014, the crashes on New York State's roadways resulted in \$808.1 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every day, because of a traffic-related crash on a New York State road, an average of:
 - 3 people died
 - 20 people were hospitalized
 - 252 people were treated in an ED
- In 2014, crashes on County roadways resulted in:
 - \$499.3 million in hospitalization charges
 - **Approximately \$44.3 million charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$308.8 million in ED charges

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of independent function, requiring long-term care and increased lifelong expenses.

Crashes on New York State roadways in 2014:

- ⇒ Unrestrained vehicle occupants were three times more likely to sustain a TBI than vehicle occupants that buckled-up!
- ⇒ Alcohol and Speed related crashes were associated with the highest risk of a TBI.

Risky Driving Behaviors Help to Identify Crash Patterns and Associated Risks

Vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:

- ⇒ Four times more likely to require hospitalization.
 - Resulted in average hospital charges over \$35,300 higher than those buckled up.
- ⇒ Three times more likely to be diagnosed with a TBI.
- ⇒ Six times more likely to be diagnosed with a serious injury.

People involved in alcohol and speed related crashes:

- ⇒ Were more likely to have medically diagnosed serious injuries
 - Resulting in some of the highest hospitalization charges among those injured in a motor vehicle crash

In 2014, crashes on New York State roadways resulted in \$808.1 million in hospital and ED charges for treatment of injuries

- ⇒ Average hospital charge = \$69,501
- ⇒ Average ED charge = \$3,356
- ⇒ Highest average hospital charges were for:
 - Motorcyclists
 - Pedestrians
- ⇒ Highest total hospital and ED charges were for:
 - Failure to Yield Right of Way
 - Speed-Related
 - Driver Distraction

In New York State 2 of every 100 people involved in an alcohol-related crash are seriously injured
