Notes: ^a Rates are calculated using 2001, 2002, and 2003 data, except Teen Pregnancy which uses 2000, 2001, and 2002 data. Refer to Table 1.2 for variable definitions and for additional information on rate calculations.

^b H, M, and L designate high, moderate, and low CNI letter scores respectively. Refer to Section 1 for details.

^c County rates do not correspond to the average of the aggregated ZIP code total because ZIP codes do not follow county boundaries.
