

## **Section 3: Statewide Risk Indicator Table**

### **Description**

The Statewide Risk Indicator Table provides the nine CNI indicator rates for all 62 counties in New York State. This table serves as a reference for readers interested in comparisons by county within each region. Comparisons can also be made across the eight report regions, as this is the only table in the report that lists county data for every region. Statewide rates are also provided for each indicator, allowing for comparisons to be made between county and state rates.
