**Childbearing Women:**

2007 data from the NYS Comprehensive Newborn Screening Program indicate that women giving birth who resided in Staten Island had a prevalence of 0.11% (n=6) or approximately one in 909 women giving birth had a positive HIV test result.

**Data Notes**

- HIV/AIDS data are as of April 2009. Case numbers for 2007 may increase due to delayed reporting.
- Unless individuals are known to be deceased from the NYS or NYC Vital Records or the National Death Index, they are presumed to be living.
- HIV/AIDS case data reported here include (a) all CDC-confirmed cases (for which race/ethnicity must be included) and (b) all surveilled cases for which race/ethnicity is unknown.

**Data Sources**

- Bureau of HIV/AIDS Epidemiology, NYSDOH (BHAIE)
- Population for 2007 from U.S. Census, Annual County Resident Population Estimates by Age, Sex, Race and Hispanic origin 2008
