

# Motor Vehicle Traffic Injuries Montgomery County Roadways 2007

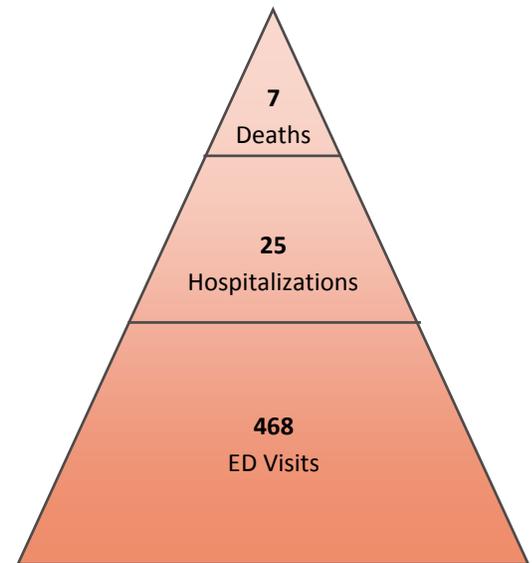

The Concern

**Motor Vehicle Traffic Injuries are a serious public health problem in Montgomery County, NY.** They are the leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to Montgomery County. In 2007, the crashes on Montgomery County's roadways resulted in almost \$2 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

## Magnitude of the Crash Problem

- Every **two months**, because of a traffic-related crash on a Montgomery County road, an average of:
  - 1 person died
  - 4 people were hospitalized
  - 78 people were treated in an ED
- In 2007, crashes on Montgomery County roadways resulted in:
  - \$1.2 million in hospitalization charges
  - \$578.1 thousand in ED charges

Motor Vehicle Traffic Crashes, 2007  
Number of Deaths and Hospital Visits

**Traumatic Brain Injuries (TBIs)** can result from traffic related crashes and may result in the loss of full independent function, requiring long-term care and increased life-long expenses.

Crashes on NYS Roadways in 2007:

- ⇒ Unrestrained vehicle occupants were **three times more likely to sustain a TBI than vehicle occupants that buckled-up!**
- ⇒ Alcohol and speed related crashes were associated with the highest risk of a TBI.

## Risky Driving Behaviors Help to Identify the Crash Patterns and Associated Risks

### In NYS, vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:

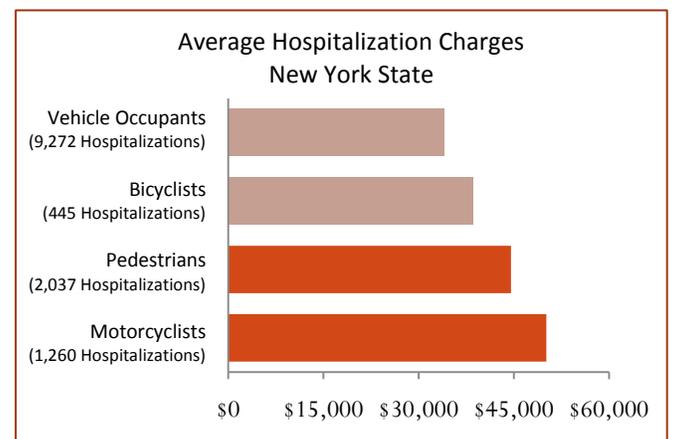

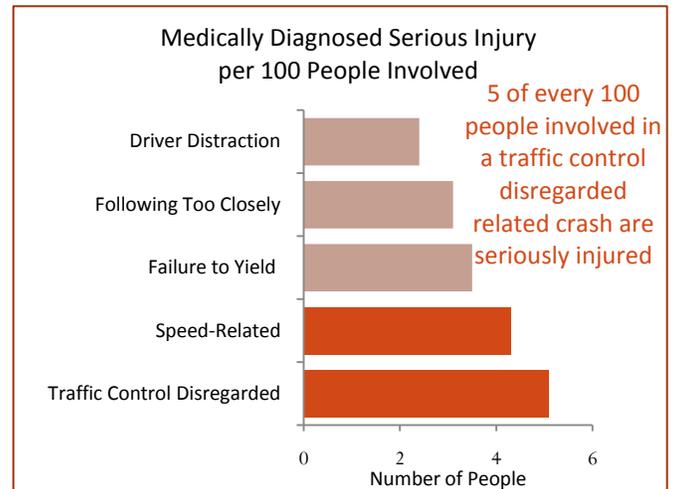

- ⇒ Four times more likely to require hospitalization.
  - Resulted in average hospital charges over \$8,000 higher than those buckled up
- ⇒ Three times more likely to be diagnosed with a TBI.
- ⇒ Three times more likely to be diagnosed with a serious injury.

### People involved in traffic control disregarded and speed related crashes:

- ⇒ Were more likely to have medically diagnosed serious injuries
  - Resulting in some of the highest hospital treatment charges among those injured in a motor vehicle crash

### In 2007, crashes on Montgomery County roadways resulted in **\$2 million** in hospital and ED charges for treatment of injuries.

- ⇒ Average hospital charge = \$49,442
- ⇒ Average ED charge = \$1,234
- ⇒ Highest average charges in NYS were for:
  - Motorcyclists
  - Pedestrians
- ⇒ Highest total Hospital and ED charges in Montgomery County were for:
  - Speeding
  - Failure to Yield Right of Way
  - Passing/ Lane Violations

Reducing risky behaviors on the road can save lives and prevent injuries – making Montgomery County a safer place to drive!
