

## Collaborative Protocols Changelog | Version 23.1

### Collaborative Protocols Changelog

- Cover Page
  - Version updated to 23.1
  - **Effective 02.15.2023**
- Index
  - Updated to current contents
- Pediatric Definition and Discussion
  - Added the following as motioned in 9/22/22 SEMSCO Meeting:
    - *We have one new protocol, Behavioral: Agitated Patient – Adolescent, that provides guidance for an individual in the transitional stage of physical and psychological development between puberty and adulthood. The was developed since neither the adult or pediatric protocol may provide sufficient direction in the care of these socially and medically complex patients, and our hope is that this protocol can assist. Please note the section on De-escalation techniques included in the Resources section.*
- Behavioral Emergencies: Excited Delirium – Adult
  - Protocol removed as motioned in 9/22/22 SEMSCO Meeting
