Resident Choices and Person Centered Care

Policy: To provide person centered care to each individual Registrant. Individual written plan of care will be based on collection from the interdisciplinary team and Registrant and/or Registrants representative. Plan of care will be reviewed every 6 months or PRN, and updated as needed.

Procedure:

1. The RN will collect all necessary data alongside the interdisciplinary team (Social Work, Recreation, Dietary and Medical Director) for the determination of Registrants abilities and preferences.
2. IDT team will develop a Person Centered Care Plan based on the desires of the Registrant and/or Registrants representative.
3. Care Plan will include individual goals, preferences, likes and dislikes and desired outcomes.
4. If Registrant's requests or goals are unable to be met, the IDT team alongside the Registrant and/or Registrant designated representative will schedule a care plan meeting for review of current goals, possible if needed interventions and plan of new desired goals.
