

NEW YORK STATE  
DEPARTMENT OF HEALTH  
DIVISION OF FAMILY HEALTH  
BUREAU OF EARLY INTERVENTION

# NYS EARLY INTERVENTION PROGRAM

## REPORT TO THE LEGISLATURE

*JANUARY 1, 2005 – DECEMBER 31, 2005*

**New York State Department of Health  
Early Intervention Program**

**Annual Report to the Legislature  
January 1, 2005 – December 31, 2005**

Under Section 2557 of the Public Health Law (PHL), the Department of Health is required to prepare and submit an annual report to the Governor and Legislature, covering the period January 1<sup>st</sup> to December 31<sup>st</sup>, with respect to certain aspects of the Early Intervention Program. Specifically, the Department is required to report data, by municipality, on the Early Intervention Program (EIP) for the purposes of improving the efficiency, cost effectiveness, and quality of the EIP. This report was prepared to comply with reporting requirements in the PHL to report to the Governor and the Legislature on data related to the EIP and covers the period January 1, 2005 – December 31, 2005.

These reporting requirements were first enacted with the SFY 2003-04 Legislative Budget. By statute, the first report, which was submitted to the Governor and Legislature in March, 2004, was for a six-month period only (July 1, 2003-December 31, 2003). The second report covered calendar year 2004. This report covers calendar year 2005.

**Data Collection Methods**

Since the inception of the EIP, the Department has supplied municipalities with a software application, known as the Kids Integrated Data System (KIDS), to use in the collection of data, local management of EIP activities, payment of bills submitted by providers, and processing of claims to commercial insurers, Medicaid, and the Department. The Department maintains the KIDS application and periodically issues revised versions of the application to municipalities as necessary to meet new program requirements and/or improve data collection capabilities.

All fifty-eight municipalities use KIDS for data collection and to assist in management of program activities, and all municipalities with the exception of New York City use the billing and claiming components of KIDS. New York City contracts with First Health to manage its provider payment and claiming processes. In addition, the following counties used fiscal agents during the current reporting period to manage their claiming procedures (these fiscal agents use KIDS for claims processing): Dutchess, Erie, Genesee, Monroe, Niagara, Orleans, and Wayne.

KIDS is a distributed data system. Data are collected locally using the KIDS application and submitted to the Department on a quarterly basis. The Department maintains and regularly updates its state-level database on the EIP, using the quarterly data submitted by municipalities. This state-level database is

used by the Department to comply with federal and State reporting requirements, including this report. The database is also used by the Department for program management purposes.

In addition to the KIDS application, the Department maintains a Fiscal System application, which is used to process all claims submitted by municipalities for State reimbursement. In accordance with State law, municipalities must submit claims for payment within two years of the date of service.

The majority of data elements necessary to comply with the legislative requirements for this report existed in either the KIDS application or the Medicaid Management Information System (MMIS). Subsequent to enactment of these new reporting requirements with the SFY 2003-04 legislative budget, a significant development effort was required to modify the KIDS application to allow municipalities to record, on a claim by claim basis, the reasons for the denial of claims by commercial insurers. The data elements related to insurance are still relatively new and efforts to improve the quality of the data are continuing.

### **Data Table Descriptions and Data Limitations**

Section 2557 of PHL requires the Department to report on data collected from January 1, 2005 through December 31, 2005. Child and provider data included in this report are based on data submitted to the Department by municipalities in February, 2006 and are complete through December 31, 2005. Medicaid data were supplied by the Office of Medicaid Management, using the Medicaid Management Information System.

All data presented in this report, with the exception of Medicaid data and data submitted by fiscal agents under contract with municipalities, are based on the KIDS application. Fiscal System data for this reporting period are incomplete because of the two-year claiming period for municipalities.

Data are reported by county, New York City, Rest of State excluding New York City, and State, as required under Section 2557(4) of PHL.

The following describes the data included in each of the tables, along with limitations of the data that should be considered when interpreting the data.

**Table 1** presents data on the number of children enrolled in the EIP by age for the period January 1, 2005 through December 31, 2005. To assign children to an age category for the period, the following criteria were used: children with an IFSP continuing in the program were assigned to an age category based on their age on January 1; and, children entering the program were assigned to an age category based on the date of the initial IFSP.

**Tables 2 and 3** present data for children authorized to receive single services and multiple services, respectively, by type of service and the percent of children

receiving the type of service. For the purpose of these analyses, service coordination services, evaluations, transportation, assistive technology devices, and respite services were excluded.

For **Table 2**, a child was counted as receiving a single service if s/he was *authorized to receive only one type of general early intervention service (e.g., physical therapy only, or speech therapy only, or occupational therapy only, etc) during the entire time period, regardless of the length of time during the reporting period for which the service was authorized*. For example, if a child received an initial IFSP in October, and was authorized to receive speech language therapy and no other service (excluding service coordination, evaluations, transportation, assistive technology devices, and respite services) for the months of November and December, the child was counted as receiving a single service.

For **Table 3**, a child was counted as authorized to receive multiple services if s/he was authorized to receive two or more services (excluding service coordination, evaluations, transportation, assistive technology devices, and respite services) at any time during the entire time period, regardless of whether service authorizations for each type of service were overlapping (e.g., for the same time week, month, etc) or consecutive (e.g., consecutive weeks, months, etc in the period January 1, 2004 – December 31, 2004). Children were counted *under each service type* authorized at any time during this twelve-month period (e.g. there are duplicate child counts across service types).

Section 2557(4) of PHL also requires the Department to collect and report on the average number of visits per week delivered to children receiving a single service and those receiving multiple services. These data for the reporting period, January 1, 2005 – December 31, 2005, are not currently available, since state-level claiming data for this time period are incomplete. These data will be reported when available.

**Table 4** presents the number of State approved agencies<sup>1</sup> and independent (individual) service providers that were *under direct contract* with one or more municipalities and therefore available to provide services to children during this time period, by service specialty, expressed in full-time equivalents (FTEs). Agency and individual providers that are only approved by the Department and are not reported as under contract, either by a municipality or, for individuals, by an approved agency, are not included in these FTEs. These data are derived from applications submitted by providers *at the time State-approval is sought*, and do not include FTEs for individuals employed or subcontracted with the agency *after their initial application to the Department*. For individual data, FTE data are for individuals who are under direct contract with a municipality and the

---

<sup>1</sup> Under EIP regulations, an agency means incorporated entities, sole proprietorships, partnerships, and state operated facilities operating under the approval of any state early intervention agency. "Individual" providers means qualified individuals with appropriate licensure, certification, or registration identified as qualified personnel for purposes of the EIP.

data reflect percentage of time available to deliver EIP services at the time of application. Therefore, these data *are likely to under-represent* the current FTEs available to deliver early intervention services, particularly for agency providers. The Department anticipates these data will improve with the initiation of the reapproval process authorized by amendments to Section 2550 of PHL authorized by the SFY 2003-04 budget.

**Tables 5 and 6** present the number and percent of children authorized to receive a single service and children authorized to receive multiple services, by the type of State-approved, contracted provider authorized to deliver the service(s) to the child. **Table 5** displays the data by agency providers and individual providers, and **Table 6** presents the data by agency only, individual only, and individual and agency, since children authorized to receive multiple services could be authorized to receive these services from both agencies and individuals under direct contract with municipalities.

**Table 7** displays the total number of State-approved providers under contract with municipalities to deliver evaluation services, and the number and percent of evaluators who provided services to children whom they evaluated.

**Table 8** displays the number and percent of children whose families were authorized to receive family training, counseling, parent support groups, and respite.

**Table 9** displays the number and percent of children who were reported to have some form of third party coverage during the reporting period. Children with an unknown status have no commercial insurance coverage or Medicaid coverage reported during the time period.

**Table 10** displays the number and percent of claims submitted to commercial insurers and the claims denied by insurers **that were reconciled** during the reporting period. Data submitted by municipalities using the KIDS application include claims submitted to insurers prior to January 1, 2005 that were subsequently denied, paid, or partially paid by insurers and reconciled on or after January 1, 2005 through December 31, 2005. Data reported by fiscal agents under contract with municipalities to perform claiming functions include only those claims that were both submitted and reconciled during the period.

**Table 11** displays the number and percent of claims submitted by municipalities and denied by commercial insurers by reason for denial by the insurer. The following are definitions used to report reasons for denial of claims by insurers:

- *EIS Blanket Rejection* - Denial of payment by an insurer based on the service being an EIP service or service provided under a governmental program.
- *Not a covered service/equipment/device* – Denial of payment by an insurer for a service known to be in the child benefit package, for one of the following

reasons: not a covered service, equipment, or device; or, denied based on location of service (e.g. home or community setting).

- *No primary care physician referral* - Denial of payment by an insurer for failure to obtain a referral from the primary care provider prior to the provision of services (including evaluation services).
- *Not medically necessary* – Denial of payment by an insurer when preauthorization was sought and denied by the insurer or when the insurer has determined, independent of any preauthorization requirement, that the service was not medically necessary.
- *Use of out-of-network provider* – Denial of payment by an insurer based on the use of a non-participating provider to deliver the service.
- *Preauthorization required and not obtained* – Denial of payment because preauthorization for the service was required but had not be sought and obtained by the municipality (intended to exclude denial of claims when preauthorization was sought and the insurer does not provide such authorization for the service). ***It is important to state that several municipalities indicated to the Department that this field was also used to report denials when preauthorization was sought, and the insurer denied the preauthorization.***
- *Visit limit reached for service/benefits exhausted* – Denial of payment when policy limits have been reached (either visit limits or amount of reimbursement)(includes claims not submitted by municipalities to insurers upon notification that benefits have been exhausted).
- *Child is not covered at the time of service* – Denial of payment by the insurer for services delivered to a child at a time when the child was not covered by the insurer (e.g., policy terminated or not renewed or services provided prior to the effective date).
- *Unresolved technical errors in claim* – Denial of payment by an insurer due to technical errors on the claim, such as incorrect policy number, incorrect procedure code, incorrect or missing diagnosis, incorrect date of service, or duplicate dates of service.
- *Exceeds insurer's filing-time limit for claims* – Denial of payment by an insurer when the claim exceeds the timeframe from date of service required by the insurer.
- *No response/EOB or remittance advice from insurer* – No response from an insurer in reply to repeated contacts with the insurer by the municipality.
- *Other Denial* – Denial of payment by an insurer for any other reason.

**Tables 12 and 13** display the number of claims submitted to Medicaid by the number and amount of claims paid, pending, and denied during the reporting period (Table 12); and, reasons for denial of claims by Medicaid (Table 13). These data were supplied by the Office of Medicaid Management.

## **Department Guidance and Oversight of the EIP**

The Department used these and other data analyses to enhance and improve ongoing state-level management and oversight of the EIP through the actions described below.

1. Department implementation of program management activities to enhance statewide oversight and guidance in implementation of the Early Intervention Program. A number of initiatives are ongoing to enhance and improve State-level oversight of the EIP. These include:
  - A statewide monitoring system to review municipal administration of the EIP and agency and individual providers engaged in the service delivery system. Through its contractor, IPRO, the Department has completed its first full cycle of monitoring, completing review of all 58 municipalities and the agency and individual providers they contract with to deliver early intervention services. A total of 1906 comprehensive on-site programmatic and fiscal reviews were conducted during this first cycle, including reviews of 1266 individual providers and 582 agency providers of early intervention services and the 58 municipalities. Corrective action plans (CAPS) were required of and have been submitted by all providers and municipalities for whom deficiencies were identified. Since May 2005, IPRO has begun the Department's second monitoring cycle, reviewing 300 individual providers, and 123 agency providers to date.
  - Implementation of an auditing program for the EIP, including:
    - development and dissemination of an audit protocol for use in auditing of providers and municipalities by the Department;
    - development of data-driven criteria to prioritize provider audits; and,
    - provision of support to municipalities engaged in local audits of providers, including verification of local audits when requested by municipalities. Department auditors have provided support to 3 municipalities with respect to local audits and monitoring efforts, and completed 10 audits of providers.
  - Continuation of State-level matches on the EIP and Medicaid eligibility files to submit retroactive claims for reimbursement by the federal CMS.

To date, more than \$64 million in Federal Medicaid reimbursements have been achieved through submission of quarterly retroactive claims.

- In order to maximize the contribution of private third party insurance and remove as many barriers as possible, the Department has initiated a “pilot project” on EI insurance claiming. The goal is to standardize basic claiming practices for early intervention services by counties and insurers in the Capital District region. Joining the Department in this effort are representatives from six local municipalities, the New York State Association of Counties, the New York State Association of County Health Officials, the Health Plan Association, CDPHP, Empire Plan, HealthNow, MVP, and the NYS Insurance Department. As promising practices are identified by this group, the Department will share and encourage the use of these practices with municipalities in other regions of the State. Areas under discussion include implementation of the EI subrogation requirement, the application of insurance medical necessity requirements to EI claims, identifying and processing EI claims by insurers, and State provider approval and health plan credentialing.
- In response to a competitive Request for Proposals, the Department has selected a contractor to develop a new state-of-the-art data management system for the EIP, the New York State Early Intervention System (NYEIS). NYEIS will be developed in collaboration with the NYS Office for Technology . This enterprise system will centralize all EI data into a single data system managed and administered at the State level. The anticipated start date of the development phase is May 2006, with system implementation scheduled to begin in Spring 2008.
- The Department continues to maintain the existing distributed data system, KIDS, which captures information about children participating in the EI program on the local level, and which assists municipalities to claim reimbursement for EI services from insurance, Medicaid and the State. These efforts include:
  - release of updated versions of KIDS to institute technical improvements and correct identified problems;
  - providing individual technical assistance and support to municipalities regarding their day-to-day operation of KIDS;
  - researching KIDS operational and policy-related problems identified by the municipalities, collaborating with the Office of Medicaid Management or other programs, as necessary, to resolve the issues, and providing guidance regarding appropriate claiming practices back to the municipalities.

- The Department and State Education Department continue to provide ongoing training and technical assistance to municipalities, EIP providers, school district personnel, and parents to provide direction necessary to ensure children potentially in need of Preschool Special Education receive an evaluation from their school districts by age three; and to ensure the smooth and timely transition of all children from the EIP to other services and supports as needed.
  - The Department continues to provide ongoing training and technical assistance to municipalities, EIP providers, and parents to improve evaluation procedures used to determine eligibility for children referred to the EIP.
  - Training contracts have been established to deliver ongoing statewide training for providers, municipalities, and parents on a variety of topics related to the EIP, and to develop new curricula for the EIP.
  - The Department continues to hold annual meetings with Early Intervention Officials/Managers which provides an opportunity to disseminate information to and dialogue with municipal officials responsible for local implementation of the EI Program. It also affords the municipalities with the opportunity for municipalities to network and problem-solve with each other.
  - The Department continues to hold bimonthly conference calls with Early Intervention Officials/Managers as a method to provide municipal-related training, technical assistance, program updates and guidance. The calls also identify topics that require additional guidance from the Department. Five such calls were held in 2005.
2. General Supervision Enhancement Grant to Establish an EIP Outcomes System for New York State: The Department applied for, and was one of 16 states to receive a grant from the U.S. Department of Education, Office of Special Education Programs (OSEP), to identify child and family outcomes expected to be achieved by participation in the EIP and design and implement a system to measure and report on child and family outcomes. The EIP Outcomes initiative, which is currently under way, is a three-phase project:
- In Phase I, concept mapping methodology was used to work with municipalities, EIP providers, and parents to reach consensus on child and family outcomes that should be achieved by children and families through participation in early intervention services.
  - During Phase II, a field study will be conducted to identify and test data collection methods.
  - In Phase III, the success of this project will be evaluated and a report will be prepared with specific recommendations on implementation of a statewide EIP outcomes system.

3. Collection of additional federally-required data: As of February 2007, the U.S. Department of Education, Office of Special Education Programs is requiring the Department to report prescribed child and family outcome data. The Department is in the process of establishing a Memorandum of Understanding with an institute of higher education to facilitate the collection of these data beginning in the Spring 2006.

Data Source: KIDS data as of 1/06

(1) Enrolled in EI - Children were counted as enrolled if they had an IFSP at any time during the reporting period, regardless of length of time in the EIP. The "All Enrolled" figure in this table is greater than the sum of "Single Service Children" (Tables 2 & 5) and "Multiple Service Children" (Tables 3 & 6) because some children with IFSPs may only be authorized for services which were excluded in those tables like service coordination or evaluations.

(2) Age - Child's age was defined as the age of the child on the earliest IFSP date in the reporting period or the start of the period, whichever was later.

Data Source: KIDS data as of 1/06

(1) These data exclude evaluations, service coordination, respite, transportation, and AT devices. The sum of "Single Service Children" in this table and "Multiple Service Children" in Table 3 will be less than the "All Enrolled" in Table 1 because some children with IFSPs may only be authorized for excluded services like service coordination or evaluations in this time period.

(2) Fam Cnsl/Sup. - Family Counseling, Family Support Group and Family Training were combined into one category for this report.

**Table 3**  
**Number and Percent of Children Within Municipalities Authorized to Receive Multiple**  
**Early Intervention Services By Type of Service**  
**January 1, 2005-December 31, 2005**

Data Source: KIDS data as of 1/06

(1) These data exclude evaluations, service coordination, respite, transportation, and AT devices. The sum of "Single Service Children" in Table 2 and "Multiple Service Children" in this table will be less than the "All Enrolled" in Table 1 because some children with IFSPs may only be authorized for excluded services like service coordination or evaluations in this time period.

(2) Fam Cnsl/Sup. - Family Counseling, Family Support Group and Family Training services were combined into one category for this report.

**Table 4**  
**Number of New York State-Approved Agency and Individual Providers**  
**Under Contract with Municipalities to Provide Early Intervention Services by Service Specialty (1,2)**  
**Expressed as Full Time Equivalents by Type of Discipline (3)**  
**As of December 31, 2005**

Data Source: NYS Provider Approval database 12/31/05

- (1) Providers with contracts in more than one county are counted more than once.
- (2) Providers with qualified personnel in more than one area of licensure, certification or registration are counted more than once.
- (3) Full time employee equivalents and types of qualified personnel were taken from provider applications for state approval.

Data Source: KIDS data as of 1/06

(1) Single Service Children - A child was counted as a 'single service child' if only one type of service was authorized in the reporting period. These data exclude evaluations, service coordination, respite, transportation, and AT devices. The sum of "Single Service Children" in this table and "Multiple Service Children" in Table 6 will be less than the "All Enrolled" in Table 1 because some children with IFSPs may only be authorized for excluded services like service coordination or evaluations in this time period.

**Table 6**

Data Source: KIDS data as of 1/06

- (1) Evaluators are EI providers approved by NYS DOH and contracted with that county to provide evaluation services. A provider may contract with more than one county.  
(2) Evaluators who provided general services between 1/1/05 and 12/31/05 to a child from any county whom they had evaluated at any time.

Data Source: KIDS data as of 1/06

(1) Enrolled in EI - Children were counted as enrolled if they had an IFSP at any time during the period, regardless of length of time.

(2) Medicaid - Child was counted as having Medicaid if the "Medicaid" field in KIDS was equal to 'Yes'.

(3) Commercial Insurance - The number is based on the presence of an insurance record for the child in KIDS. This includes both insurance companies that are regulated by NYS law and those which are not. It is estimated that 27.9% of the children enrolled in EI are covered by an insurance company governed by NYS law.

*Data Sources:* KIDS data as of 12/2005. Municipal Fiscal Agent Reports submitted 2/2006.

- (1) Data from these counties were submitted via a special report created to capture data from fiscal agents. All other data were collected and submitted by counties using the KIDS application.
- (2) Claims Reconciled - These are claims for which the insurance response has been recorded, either as payment, partial payment or denial. Reconciliation data from the fiscal agents include only claims submitted in the reporting period. Reconciliation data from the KIDS application include claims reconciled during the period, regardless of when they were submitted. The number of claims submitted may be less than the number reconciled since some reconciled claims were submitted prior to January 1.
- (3) Percent Denied/Reconciled - Number of claims denied divided by claims reconciled in reporting period.

**Table 11**  
**Reasons for Commercial Insurers' Denial of Early Intervention Claims**  
**by Number of Denials and Percent of All Denials**
