Comprehensive HIV Health Care For Adolescents And Young Adults

HIV primary care, medical case management, treatment education and adherence, mental health and supportive services to meet the complex needs of adolescents and young adults (aged 13-24) living with HIV. Limited medical care services available for high risk HIV negative/status unknown young adults including HIV testing and STI.

North Shore University Hospital

865 Northern Blvd
Great Neck, NY 11021
(516)622-5070

Comprehensive HIV Health Care For Adults

HIV primary care, medical case management, health behavioral change interventions and partner counseling by multidisciplinary service teams.

Nassau Health Care Corporation

380 Nassau Rd
Roosevelt, NY 11575
(516)571-8600

Disease Intervention Services

Support of the Field Investigative staff in high-morbidity counties in NYS (outside of NYC). Prevention and control of sexually transmitted diseases (STDs) is facilitated through field interviews and partner notification. This supports field investigators to provide STD disease intervention services, including patient interviewing, counseling and education, partner referrals/service, and conduct notification of exposed sex partners (partner notification).

**Nassau County
Department of Health**

106 Charles Lindbergh Blvd
Uniondale, NY 11553
(516)227-9439

Expanded Syringe Access Program (ESAP)

Supports the provision of new, sterile syringes without a prescription to active injection drug users, steroid and hormone users and others who inject substances to prevent transmission or acquisition of blood borne diseases. Provision of syringes includes an informational insert on various safer injection practices, disposal and referrals to needed services. ESAP eligible providers are NYSDOH licensed pharmacies, health care providers (Physician, Physician Assistant, Nurse Practitioner) and Article 28 facilities.

Long Island Minority AIDS Coalition, Inc.

Bedell and Main St
Hempstead, NY 11550
(631)225-5501

Harm Reduction

Individual- and group-level interventions (single-session and/or multiple-session) that address harms related to substance use—particularly the risk of HIV/STD/Hepatitis C transmission from unsafe drug-using and/or unsafe sexual behaviors. Interventions combine client-centered risk reduction education and counseling to help drug users recognize the consequences of substance use and set achievable goals toward positive behavior change. Referrals and navigation to substance use treatment and other supportive services are provided as needed.

Long Island Minority AIDS Coalition, Inc.

Bedell and Main St
Hempstead, NY 11550
(631)225-5501

Health Home HIV Care Management

Health Homes provide comprehensive care management to high need Medicaid recipients with chronic illnesses, including persons living with HIV. HIV Care Management agencies provide access to, coordination, and integration of physical, behavioral, and community support services to PLWHA in order to improve each individual's health and health care.

Options for Community Living

HIV/STD/HCV Prevention Education/Risk Reduction Services

Health education and risk reduction education and/or counseling services are provided to individuals and/or groups and range from targeted outreach to prevention counseling to group interventions to broad community level interventions (CLI). Individual-level interventions (ILI) provide individualized health communication, health education, and risk reduction counseling to assist clients in creating plans for individual behavior change and making ongoing appraisals of their own behavior. These interventions may consist of one or multiple sessions. Group-level interventions (GLI) may include peer education and support to promote and reinforce safer behaviors. Prevention interventions delivered to groups may be single or multiple sessions, and often provide interpersonal skills training to negotiate and sustain appropriate behavior change. CLIs seek to reduce risk behaviors by changing attitudes, norms, and practices of community members, and may include a combination of intervention types (e.g., outreach, health communication, public information) or units of delivery (e.g., individual, group, community)

Medical Care - Designated AIDS Centers

Designated AIDS Centers (DACs) are State-certified, hospital-based programs that serve as the center of a continuum of hospital and community-based case management for people with HIV and AIDS. DACs with pediatric and obstetrical departments also provide specialized HIV care to infants, children and pregnant women. HIV-specific care standards developed for and used by DACs are intended to ensure uniformly high quality care.

Treatment Adherence - Medication Support

These programs are funded to integrate treatment adherence services into the continuum of HIV primary care. Each program implements strategies to promote adherence to HAART through a client-centered approach. Members of the health care team work in concert with consumers to develop, implement, and evaluate tools and skills-building activities to increase and sustain adherence to therapy. One of the fundamental objectives of the Treatment Adherence Initiative is to foster a comprehensive approach to assessing and assisting consumers at risk for non-adherence, and promote consumer and provider collaboration to develop consumer-specific strategies that lead to sustained treatment adherence.

Medical Care - Designated AIDS Centers

Designated AIDS Centers (DACs) are State-certified, hospital-based programs that serve as the center of a continuum of hospital and community-based case management for people with HIV and AIDS. DACs with pediatric and obstetrical departments also provide specialized HIV care to infants, children and pregnant women. HIV-specific care standards developed for and used by DACs are intended to ensure uniformly high quality care.

University Hospital and Medical Center at Stony Brook
205 Belle Mead Road
East Setauket, NY 11733
(631)444-1667

Medical Transportation

Provision of transportation services (directly or indirectly) for HIV+ persons to ensure that transportation is not a barrier to receipt of medical and support services associated with improving HIV clinical status. Services may include direct transport by car or van, provision of bus/subway tokens or cards, taxicab or ambulette transport, and/or purchase of train/bus tickets and gas cards.
