

New York State Cancer Consortium Action Teams 2018 - 2019

What is an Action Team?

Action Teams are groups of New York State (NYS) Cancer Consortium members who work together to implement priority areas of the NYS Comprehensive Cancer Control Plan.

Consortium Action Teams at a Glance

SKIN CANCER

Mission: Reduce the melanoma death rate in NYS by reducing exposure to ultraviolet (UV) radiation from the sun and indoor tanning through policy change, community-wide interventions and promotion of UV protective behaviors.

HPV COALITION

Mission: Increase the human papilloma virus (HPV) vaccination rate and decrease HPV-related cancers in NYS through public and provider education, policy change and health systems change.

COLORECTAL CANCER

Mission: Increase the NYS colorectal cancer screening rate to 80% by developing and promoting tools and resources that support health care practices adopt evidence-based strategies.

PRIORITY-AREA OF YOUR CHOICE

Interested in an area of cancer prevention and control that is not listed here? Let us know! New action teams can be established!

Join an Action Team Today!

- ✓ Learn about the latest updates in state-wide cancer prevention and control efforts
- ✓ Promote Plan priorities through webinars, trainings, or workshops
- ✓ Collaborate with team members to achieve Plan goals and objectives
