

# HCV Rapid Kit Storage Temperature Log

Thermometer location: \_\_\_\_\_

Acceptable temperature range: 2°C to 30°C or 36°F to 86°F (taken daily)

Month/Year: \_\_\_\_\_

| Day | Temperature | Initials | Day | Temperature | Initials |
|-----|-------------|----------|-----|-------------|----------|
| 1   |             |          | 17  |             |          |
| 2   |             |          | 18  |             |          |
| 3   |             |          | 19  |             |          |
| 4   |             |          | 20  |             |          |
| 5   |             |          | 21  |             |          |
| 6   |             |          | 22  |             |          |
| 7   |             |          | 23  |             |          |
| 8   |             |          | 24  |             |          |
| 9   |             |          | 25  |             |          |
| 10  |             |          | 26  |             |          |
| 11  |             |          | 27  |             |          |
| 12  |             |          | 28  |             |          |
| 13  |             |          | 29  |             |          |
| 14  |             |          | 30  |             |          |
| 15  |             |          | 31  |             |          |
| 16  |             |          |     |             |          |

**NOTE:** Periodically (e.g., every six months) check thermometer performance and document.

## Corrective Action

| Date | Action Taken | Initials |
|------|--------------|----------|
|      |              |          |
|      |              |          |
|      |              |          |
|      |              |          |
|      |              |          |
|      |              |          |
|      |              |          |
