The New York State Department of Health (NYSDOH) collects, compiles, and analyzes information on influenza activity year-round in New York State (NYS) and produces this weekly report during the influenza season (October through the following May).  

During the week ending January 13, 2024

- Influenza activity was categorized as geographically widespread. This is the eighth consecutive week of widespread activity reported this season.
- Laboratories tested 66,734 specimens for influenza, of which 24,942 (37%) were positive, a 5% increase in positive cases compared with the previous week.
- The number of patients hospitalized with laboratory-confirmed influenza was 1,456, a 15% decrease in hospitalized cases compared with the previous week.
- Of the 3,323 specimens submitted to WHO/NREVSS laboratories, 289 (9%) were positive. 279 were positive for influenza A and 10 for influenza B.
- The percent of patient visits for influenza-like illness (ILI) from ILINet providers was 2.51%, below the regional baseline of 4.20%.
- There were 19 outbreaks reported in hospitals and 21 outbreaks reported in nursing homes. Season to date, a total of 403 outbreaks have been reported from hospitals and nursing homes in NYS.
- There were two influenza-associated pediatric deaths reported this week. There have been five influenza-associated pediatric deaths reported this season.

Laboratory-confirmed Influenza Reports and Influenza Hospitalizations (including NYC)

Clinical laboratories report weekly the number of lab-confirmed test results. Hospitals report weekly the number of hospitalized patients with laboratory-confirmed influenza. County, regional, age group, and multi-season comparison graphs are available on the NYS Flu Tracker dashboard at https://nyshc.health.ny.gov/web/nyapd/new-york-state-flu-tracker.

2 No Activity: No laboratory-confirmed cases of influenza reported to the NYSDOH. Sporadic: Small numbers of lab-confirmed cases of influenza reported.
Local: Increased or sustained numbers of lab-confirmed cases of influenza reported in a single region of New York State; sporadic in rest of state. Regional: Increased or sustained numbers of lab-confirmed cases of influenza reported in at least two regions but in fewer than 31 of 62 counties. Widespread: Increased or sustained numbers of lab-confirmed cases of influenza reported is greater than 31 of the 62 counties. Increased or sustained is defined as 8 or more cases of laboratory-confirmed influenza per 100,000 population.

3 ILI = influenza-like illness, defined as temperature 100° F with cough and/or sore throat in the absence of a known cause other than influenza.
Regional Incidence for Lab-confirmed Cases and Hospitalizations
Regional incidence rates are calculated for both lab-confirmed cases and hospitalizations.

Geographic Activity and Incidence Rate
Laboratories that perform testing on NYS residents report all positive influenza test results to NYSDOH. County and regional incidence rates are calculated statewide to determine geographic activity.

- 62 counties reported influenza cases this week.
- Incidence ranged from 22.62-236.14 cases/100,000 population.

National Respiratory & Enteric Virus Surveillance System (NREVSS)
NREVSS surveillance consists of a subset of clinical and public health laboratories in NYS that voluntarily report weekly aggregate data to the CDC for multiple pathogens including influenza, COVID-19, and RSV.

World Health Organization (WHO) and National Respiratory & Enteric Virus Surveillance System (NREVSS)
The WHO and NREVSS surveillance system consists of a subset of clinical and public health collaborating laboratories that report aggregate data for influenza-positive specimens by type/subtype to CDC.

Outpatient Influenza-like Illness Surveillance Network (ILINet)
The ILINet Program consists of healthcare providers in NYS (excluding NYC) that voluntarily report aggregate data for the total number of visits and the total number of visits of ILI in an outpatient setting.

Healthcare-associated Influenza Activity (including NYC)
NYS Hospitals and nursing homes statewide report outbreaks of influenza to NYSDOH. For additional information about the influenza mask regulation and the status of the Commissioner’s declaration, please visit www.health.ny.gov/FluMaskReg.
