

The Partner Services Program provides an immediate link between health care providers, persons diagnosed with HIV, *Chlamydia*, gonorrhea or syphilis, and their sexual and/or needle-sharing partners. The Partner Services Program can facilitate partner notification and early testing while maintaining confidentiality of all individuals involved. Partner Services staff work with patients to develop a plan to notify their partners. Based on the patient's needs, staff can notify potentially exposed partners anonymously, as well as help patients who want to tell their partners on their own.

### Local Health Department and NYSDOH Regional Contacts for *Partner Services for STD/HIV*
