

## Tips for Safe Storage

### ALWAYS

- Comply with building and fire codes.
- Store pool chemicals away from children and animals.
- Store pool chemicals as recommended by manufacturer and in original, labeled containers.
- Store pool chemicals in cool location away from heat, direct light, doors, and windows.
- Protect stored chemicals from mixing together or with other substances. Store each pool chemical separately.
- Store only identical chemicals above or below each other. This will prevent chemical mixing in case of a leak.
- Keep storage area clean and neat.
- Dispose of deteriorating, unwanted or unlabeled pool chemicals safely. Contact your local hazardous waste disposal facility for more information.

### NEVER

- Store containers of any pool chemical directly on the floor.
- Store or consume food and beverages near chemicals.
- Store pool chemicals near incompatible or flammable materials.
