

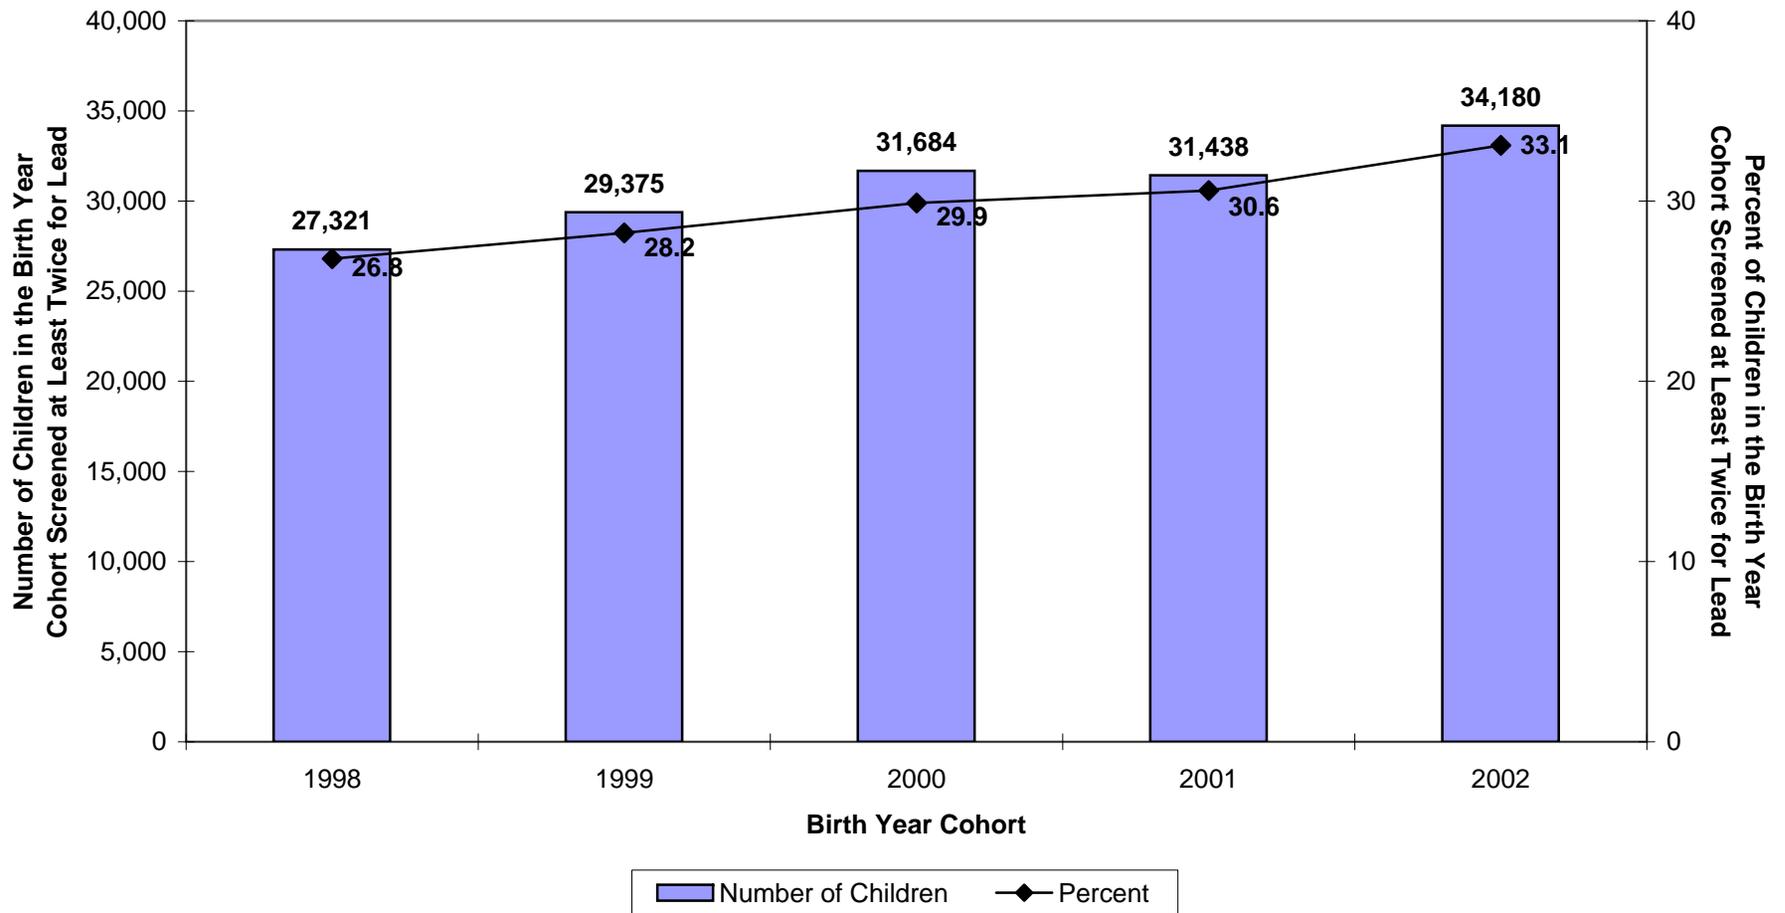

Figure 3: Number and Percent of Children Screened at Least Twice before Age Three Years; 1998 - 2002 Birth Cohorts (1998 to 2005 Blood Lead Test Data),¹ New York State Excluding New York City

¹ Birth cohorts beyond 2002 are not included in this analysis because those children had not yet turned 36 months of age by 2005, and the opportunity for blood lead testing remained available after 2005.
