Attachment VI	-	Output and Outcome Measures
Attachment VII	-	Public Hearing and Public Comment Information

## 1.0 Introduction

The Drinking Water State Revolving Fund (DWSRF) was created in 1996 as a result of New York State's enactment of Chapter 413 of the Laws of 1996 (Clean Water/Clean Air Bond Act, "Bond Act") and passage of the 1996 Amendments to the Safe Drinking Water Act (Public Law 104-182) by the U.S. Congress. The DWSRF provides a financial incentive for municipally and privately owned public water systems to undertake needed drinking water infrastructure improvements (e.g., treatment plants, distribution mains, storage facilities). This program provides market rate and below market rate financing for the construction of certain eligible public water system projects. As financings are repaid, money is made available for new financings - a true revolving fund. For communities with demonstrated financial hardship, interest rates can be reduced to zero percent. In this federal fiscal year, the State expects to receive additional federal grants to capitalize the DWSRF. Monies from the Bond Act will be used to provide federally mandated state matching funds of at least 20%. The program is administered jointly by the New York State Department of Health (DOH) and the New York State Environmental Facilities Corporation (EFC).

This Intended Use Plan (IUP) includes:

1. an anticipated financing schedule which covers the period from October 1, 2011 to September 30, 2012;
2. a description of the goals of the DWSRF program;
3. specifics on how New York State proposes to use available DWSRF funds during federal fiscal year (FFY) 2012;
4. criteria for selecting projects to receive financial assistance;
5. criteria for determining which communities qualify as disadvantaged communities;
6. an estimate of anticipated funds available for subsidized financial assistance;
7. a procedure to amend this IUP;
8. a description of capacity assessment;
9. a description of the project selection process;
10. criteria for determining equivalency projects;
11. a Project Readiness List which includes eligible projects expected to be ready for short-term or long-term financing during this IUP period;
12. a Category A List which includes eligible projects of systems serving less than 10,000 people;
13. a Multi-Year List of projects eligible to receive DWSRF financing;
14. a Category C (hardship) List of projects which have received written confirmation that they qualify for financial hardship;
15. the project scoring and ranking system;

16. a description of the fees associated with DWSRF financing; and

17. a copy of the DWSRF pre-application form and application checklist.

This IUP is based on the use of FFY 2012 federal Capitalization Grant monies and unobligated funds carried forward from the previous IUP. The anticipated financing schedule for this IUP period is found in Attachment II.

Under the anticipated financing schedule, leveraged financing funded from bond issues will be determined. Direct long-term and short-term financings will be originated throughout the year.

## 2.0 Program Initiatives and Changes

**Ongoing Initiative:** The DOH and the EFC encourage communities that apply for financing in this and future IUP periods to prepare and submit an asset management plan to accompany the engineering report and/or plans and specifications for their project. An asset management plan would support communities by encouraging the building of sustainable infrastructure. The DOH reserves the right to require an asset management plan for any project that has shown deficiencies with respect to Managerial, Technical, and Financial capacity.

**Ongoing Initiative:** New York State encourages the efficient use of energy in all drinking water projects. In addition, the US EPA requires that for FFY 2012 a minimum of 20% of the federal capitalization grant be used for “green” projects. Therefore, the DOH and the EFC are requiring that all engineering reports and/or plans and specifications submitted to the DOH identify project components that incorporate green infrastructure, energy efficiency, water efficiency, and/or other environmentally innovative activity.

**Program Change: State Smart Growth Public Infrastructure Policy Act-** On August 30, 2010 the New York State Environmental Conservation Law was amended to add the State Smart Growth Public Infrastructure Policy Act. This law requires that starting September 27<sup>th</sup>, 2010, any new or expanded public infrastructure project receiving financing from a state infrastructure agency must be consistent with the relevant smart growth public infrastructure criteria as they are defined in the law to the extent practicable. DOH will now require, as a part of the engineers report and/or through other DWSRF application materials that may be developed, an analysis of each project with respect to its compliance with the criteria of the smart growth law. Projects that received short term financing or other phased financing prior to the enactment of the law are exempt.

The Smart Growth Public Infrastructure Policy Act can be viewed at:

<http://public.leginfo.state.ny.us/MENUGETF.cgi?COMMONQUERY=LAWS+&TARGET=VIEW>

Once there, click on ENV and then click on Article 6

**Program Change: Interconnections-** Under provisions of the 1996 Amendments to the Federal Safe Drinking Water Act, DOH is required to ensure that all systems receiving DWSRF assistance have adequate managerial, technical, and financial capabilities to provide safe drinking water. The failure to meet this requirement could result in a significant reduction of the DWSRF federal capitalization grant. Therefore, systems that lack adequate managerial, technical, and financial capacity may be determined as ineligible by DOH to receive DWSRF assistance unless the project to be financed corrects the managerial, technical, and financial deficiencies.

DOH will continue to promote the regionalization and interconnections for public water systems in an effort to enhance managerial, technical, and financial capacity for those systems. Therefore, when the possibility to interconnect to another public water system exists for project

seeking assistance, and if that interconnection will address the scope of the project with respect to its priority health ranking, the interconnection must be a carefully considered alternative as a part of the State Environmental Quality Review Act process and also be discussed in detail in the engineering report. If the system applying for DWSRF assistance decides not to pursue a possible interconnection alternative when it exists and would address the scope of the project with respect to its priority health ranking, then detailed justification satisfactory to DOH must be provided demonstrating that the interconnection is a technically, financially, or managerially disadvantageous option. See Section 8 of this IUP for additional information regarding capacity requirements.

**Program Change: Short-Term Market Rate Financing** - In Section 4.6, the conditions under which Short-Term Market Rate Financing (SMRF) is available is more fully described.

**Program Change: Phased Points-** DOH will no longer typically assign phased points for any pre-application received if the prior related portion of the project closed on long term financing more than five years earlier and the improvements already funded are operational. However, DOH reserves the right to assign phased points for projects that require additional financing, regardless of time frames, to address the more serious original public health priorities for which the project received score.

**Program Change: Minority and Women Business Enterprise/Equal Employment Opportunity (MWBE/EEO)** - DOH will be working with EFC in making significant revisions to the MWBE/EEO program to reflect statutory changes and to streamline current procedures. EFC will be strengthening the Disadvantaged Business Enterprise (DBE) requirements in the revised MWBE/EEO program to offer a seamless solution for our clients to meet both the state MWBE and Federal DBE requirements. The proposed MWBE/EEO Program changes are expected to be implemented commencing in FFY 2012. Some of the more significant Program changes include:

- Professionals services, such as engineering, legal, and financial advisory services, are now subject to MWBE participation requirements;
- There are new recordkeeping and reporting requirements;
- Information concerning the makeup of the project workforce will be required to be submitted quarterly; and
- All contracts and agreements that are paid for with DWSRF funds will be required to contain certain contractual provisions.

**Program Change: Davis-Bacon Compliance-**As part of the FFY 2011 budget appropriation for the DWSRF, Congress mandated that federal labor laws regarding prevailing wages, hours of work, and rates of pay shall apply to construction carried out in whole or in part with assistance from the DWSRF. These requirements are collectively known as the Davis-Bacon laws. **These requirements are in addition to the requirements of NYS prevailing wage laws.**

EPA guidance requires that any DWSRF financings comply with the Davis-Bacon laws and incorporate these provisions into any project work that has been or will be contracted. Work done by a municipal applicant's employees, generally known as "force account" or "work force", is not generally subject to Davis-Bacon requirements. For more information on Davis-Bacon laws, please visit EFC's website.

The President's budget request for FFY 2012 includes compliance with Davis-Bacon requirements as part of the DWSRF appropriation. Compliance with Davis-Bacon requirements for FFY 2012 will not be known until the final budget for FFY 2012 has been enacted.

### **3.0 Short- and Long-Term Goals**

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorize a DWSRF to assist public water systems with financing the costs of infrastructure needed to achieve or maintain compliance with SDWA requirements and to protect public health. The DWSRF program will help ensure that New York State's drinking water supplies remain safe and affordable, and that drinking water systems that receive funding will be properly operated and maintained.

#### **3.1 Short-Term Goals**

1. Continue to implement the DWSRF program for the State of New York.
2. Receive project pre-applications, score and rank projects based on human health risk and compliance with the SDWA.
3. Make available short-term financing to help accelerate project development.
4. Make available long-term financing for projects in priority order, taking into account project affordability.
5. Make available financing and/or financial assistance payments (grants) to help small public water systems and disadvantaged communities finance needed projects.
6. Make available emergency financing to allow for emergency repairs when no other funding source is available to the eligible public water system.

#### **3.2 Long-Term Goals**

1. Help public water supplies achieve and maintain compliance with federal and state drinking water standards and enforceable requirements of the SDWA and the New York State Sanitary Code.
2. Protect and enhance New York's public drinking water supplies using the financial incentives provided by the DWSRF and the programs that the DWSRF supports.
3. Administer the DWSRF in a fiscally responsible manner that will ensure its revolving nature in perpetuity.
4. Assist public water supplies to improve drinking water quality, quantity and dependability by providing reduced interest rate long-term financing and/or Additional Financing Subsidies (Grants).

### **4.0 Financial Status**

#### **4.1 Total DWSRF Monies**

Capitalization for the New York DWSRF program during this IUP funding period will be provided from the FFY 2012 federal Capitalization Grant and unobligated funds carried forward from the previous IUP (October 1, 2010 - September 30, 2011). New York State has not yet received a FFY 2012 DWSRF Capitalization Grant and the Final IUP, due to be released October 1, 2011, may reflect a different amount depending on negotiations and finalization of the federal budget. The minimum state match requirement is 20% of each federal award. The minimum state

match requirement is made from Bond Act funds that were provided in excess of the 20% minimum amount required under the federal SDWA and that have been credited (banked) against future state match. The 100% state match requirement for the state program management set-aside will be met with in-kind services. The proposed sources and uses of the DWSRF for this IUP are presented in Table 1. Total available DWSRF program resources to finance drinking water projects are \$295,453,263 for this IUP period.

<b>Table 1</b>	
<b>Proposed Sources and Uses</b>	
<b>And Estimated Amount of DWSRF Funds for FFY 2012</b>	
<b>Sources</b>	<b>Amount</b>
FFY 2012 Capitalization Grant	\$52,564,937 <sup>1</sup>
Carry-over monies from FFY 2011	\$58,909,528
Repayments and Interest Earnings	\$69,600,000
<b>Total Sources</b>	<b>\$181,074,465</b>
<b>Uses</b>	<b>Amount</b>
Administrative Set-Aside	\$2,102,597
Technical Assistance Set-Aside	\$1,051,299
State Program Management Set-Aside	\$5,256,494
<b>Total Set-Asides</b>	<b>\$8,410,390<sup>2</sup></b>
Direct Financing	\$70,000,000
Grants Expected to Close	\$12,000,000
Grant Funds Reserved	\$9,000,000
Grant Funds Available	\$15,769,481
Reserve Allocation for Leveraged Financing	\$65,894,594 <sup>3</sup>
<b>Total Uses</b>	<b>\$181,074,465</b>
<sup>1</sup> This amount is based on an estimated national DWSRF allocation of \$829 million for federal fiscal year 2012; however, this amount has not yet been appropriated.	
<sup>2</sup> Refer to Section 6.0 for a detailed description of each set-aside.	
<sup>3</sup> Leveraged three times, these funds will provide financing of \$197,683,782 worth of eligible projects. Combined with Direct Financing, Grants Expected to Close, and Grants the total subsidized financing capacity for this IUP period is approximately <b>\$295,453,263</b> .	

#### 4.2 Fees

Up to 4% of the total amount of federal Capitalization Grants (as provided by Section 1452(g)(2) of the SDWA) can be set-aside to support the cost of administering the DWSRF program. Costs of DWSRF program administration not covered by the 4% administrative set-aside must be paid from fees charged to DWSRF recipients. A program administration fee of 1.1% of the project costs plus an annual fee of 0.11% of the outstanding principal balance of the financing will be assessed to support the administration of the DWSRF program. The 1.1% program administration fee may be included as part of the financing. For non-hardship projects that receive short-term financing, an administrative fee equal to 0.6% will be charged and may be included as part of the short-term financing. A description of the fees is presented in Attachment III. Fees collected by the DWSRF are held in an account outside of the DWSRF. For the state fiscal year (SFY) 2011 (4/1/10 to 3/31/11), the DWSRF has recognized and expects to collect \$362,607 in program administration fees and \$1,404,042 in annual fees. It is anticipated that in SFY 2012 a similar amount of fees will be recognized and collected.

#### 4.3 Transfer of Funds

The SDWA Amendments of 1996 offered states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). An amount equal to up to 33 percent of the DWSRF Capitalization Grant could be transferred from the DWSRF to the CWSRF program, or an

equivalent amount from the CWSRF to the DWSRF program. While the authority expired on September 30, 2001, Congress extended this provision within EPA's annual budgets. Transfers from the CWSRF to the DWSRF were made for FFY 1997 through 2001, totaling \$82,443,933. Pending Congressional approval of an extension within EPA's proposed budget, transfers between the CWSRF and the DWSRF programs during current and future IUP periods may be made. Any funds transferred during this IUP period will be returned using program funds within this IUP period. Therefore, there will be no effect on the funding line of either the DWSRF program or the CWSRF program.

#### **4.4 Eligible Systems and Types of Projects to be Funded**

Drinking water systems that are eligible for project funding are community water systems, both public and privately owned, and non-profit, non-community water systems (when funding is provided, a "recipient").

"Drinking water infrastructure project" or "water supply project" means the planning, design, construction, improvement, or acquisition of facilities, equipment, sites, or buildings for the supply, control, treatment, distribution, and transport of drinking water and the testing and monitoring to ensure the integrity and quality of such water intended to improve drinking water facilities including achievement of compliance with the federal SDWA or other applicable federal law and state drinking water quality goals and standards.

Projects eligible for DWSRF financing include investments to upgrade or replace infrastructure, address exceedances of federal or state health standards, prevent future violations of such standards, and provide the public with safe drinking water. Examples of such projects include but are not limited to:

- rehabilitation or development of new drinking water sources to replace contaminated supplies;
- installation or upgrading of facilities if the project will improve the quality of drinking water to comply with primary or secondary standards or treatment/performance criteria;
- installation or upgrading of storage facilities, including finished water reservoirs, to prevent microbiological contamination or to provide adequate delivery pressures;
- installation or replacement of transmission and distribution mains to prevent contamination caused by leaks or breaks;
- funding and/or construction to promote the consolidation of water supply services, particularly in circumstances where individual homes or water systems generally have an inadequate quantity of water, the water supply is contaminated, or the system is unable to maintain adequate compliance for financial or managerial reasons;
- the purchase of a portion of another system's capacity, if the purchase is part of a consolidation plan to bring the system(s) into compliance;
- capital investments made to improve the security of drinking water systems; and
- any of the above listed project types which are publicly owned and which were previously financed subsequent to July 1, 1993, may be eligible for refinancing. Planning, design and other pre-construction costs incurred prior to July 1, 1993, may be allowed if related to an otherwise eligible project.

Projects submitted by systems that lack technical, managerial or financial capacity or that are significant non-compliers are not eligible for funding unless the proposed project will ensure capacity or compliance. Also, projects whose primary purpose is fire protection or growth/development, dams and reservoirs, or acquisition of land not integral to an eligible project are not eligible.

The EPA issued a notice in the Federal Register (63FR 59299, November 3, 1998) which allows States to provide DWSRF assistance to projects that solve public health problems for residents currently served by contaminated sources. This policy allows for the creation of a community water system (publicly or privately owned) to address an existing public health problem caused by unsafe drinking water provided by individual wells or surface water sources. This policy also extends to a situation where a new regional public water system is created by consolidating several existing public water systems that have technical, financial or managerial difficulties. Under this policy, a proposed project may only receive DWSRF assistance if the following conditions are met:

1. upon completion of the project, the entity responsible for the DWSRF financing meets the definition of a Federal community public water system;
2. the project is on the Project Readiness List and addresses an actual public health problem with serious risks;
3. the project is limited in scope to the specific geographic area affected by contamination;
4. the project is only sized to accommodate a reasonable amount of growth expected over the life of the facility (growth cannot be a substantial portion of the project);
5. the applicant demonstrates that sufficient public notice to potentially affected parties was provided and alternative solutions to addressing the problem were considered; and
6. the project is a cost-effective solution to solving the public health problem.

#### **4.5 Financial Planning Process**

Projects submitted for financing will be screened for eligibility, scored, ranked and listed. Projects can be submitted to the DOH for listing at any time. All eligible projects for which pre-application forms are submitted on or before September 3, 2011 will be included in the final IUP. Eligible projects for which pre-application forms are submitted after September 3, 2011 will be included in the next IUP (October 1, 2011 – September 30, 2012). Projects for which an engineering report or plans and specifications are submitted to the DOH or which complete construction by September 3, 2011 will be listed on the Project Readiness List. Scheduled closings for leveraged financing during this IUP period will be determined. Direct long-term and short-term financings will be originated throughout the year.

#### **4.6 Types of Assistance and Terms**

The DWSRF program will offer the following types of financial assistance:

1. Short-Term Financing Program (STFP) – Short-term financing will be offered interest free and at market rate for terms of up to three (3) years. Before any short-term financing is provided, an applicant must, among other conditions, receive approval of an engineering report for the project, complete the State Environmental Review Process (SERP), obtain

approval from the Office of the State Comptroller for any necessary district formation, and adopt a bond resolution for the project.

- Short-Term Interest Free Financing (STIFF) - The STIFF program provides short-term financing to recipients that are developing projects eligible for long-term DWSRF financing. STIFF is available for projects that are eligible to be funded from the current Project Readiness List and have not completed construction. The amount available is limited to one-third of the estimated total project costs as set forth on the Project Readiness List. Recipients that qualify for hardship assistance are not subject to the one-third project cost limitation. STIFF is not available to pre-finance any *awarded grants*.
- Short-Term Market Rate Financing (SMRF) – For projects with scores too low to be eligible for long-term DWSRF financing or projects eligible for STIFF but with financing needs in excess of the one-third project cost limitation referenced above, short-term financing may be made available at EFC's short-term cost of funds (market rate). SMRF may be used to pre-finance third party grants. EFC and DOH encourage applicants to inquire about SMRF availability as we believe this financial assistance is generally less expensive and more convenient than traditional bond anticipation note financing.

Funds for SMRF are derived internally, from EFC's short-term financing sources or externally, through the issuance by EFC of long-term bonds or short-term notes (commercial paper). EFC expects that its commercial paper program will obtain high short-term credit ratings and pass through low borrowing costs. EFC tracks the availability of its internal short-term financing sources by projecting its cash flow month to month over the course of the FFY. For FFY 2012, EFC and DOH project \$75 million to be available for DWSRF SMRF from these internal sources. Upon reaching this threshold amount of SMRF transactions, DOH and EFC will, if prudent, revise the threshold or EFC will pursue external funding sources as described above. In the event EFC determines to pursue external funding sources, applicants may experience delays in SMRF funding until proceeds of external funding are received by EFC. DOH and EFC intend to make SMRF available to as many applicants as possible. However, DOH and EFC have determined that additional considerations may need to be given to the process of SMRF allocation. Therefore, depending on the number of applications received and the total dollar amounts associated with them, the following priorities which are in order of public health benefit may be applied, if necessary, to DWSRF SMRF availability:

1. Projects on the Readiness List with scores above the subsidy funding line requiring short-term financing in excess of the amount available under the Short Term Interest Free Financing (STIFF) Program. This can include financings beyond the STIFF for readiness list projects and pre-financing of third-party grants.
2. Projects on the Readiness List that require “interim” financing prior to the next scheduled pooled financing. These financings typically occur for projects with STIFF that matured prior to the leveraged financing pool or projects that require additional funds prior to the leveraged financing pool.
3. Projects on the Readiness List below the Subsidy Line and not reachable for subsidy via bypass between the Subsidy Line down through 45 points. DOH and EFC, may elect not process applications for SMRF for projects with priority health ranking scores of 40 points or lower.

2. Leveraged Financing - Leveraged Financings are DWSRF financings funded from bond proceeds. Certain bond series issued to fund DWSRF financing will be secured by federal and state match dollars deposited to and held in program financing indentures. Leveraged Financings will be at market rate or receive an interest subsidy either from earnings received from a dedicated reserve allocation equal to one-third of the financing amount or from other program assets. Certain hardship communities may receive an interest subsidy of more than one-third of the financing amount. Other program assets or investment earnings from the reserve allocation will provide a 33 1/3% interest subsidy, based on the market rate of the related EFC bonds, to certain recipients, thereby resulting in a subsidized interest rate on the financing. In instances where the project qualifies for a hardship financing, the interest subsidy may reduce the net interest rate to zero percent. The performance of investments held in the financing indenture or the general accounts of the program will not impact the net interest rate on leveraged recipient financings.
3. Regular Reduced Rate Direct Financing - Regular Reduced Rate Direct Financing will be made available to recipients not eligible for Leveraged Financing. Direct Financing recipients are determined by EFC and may include non-investment grade borrowers or small financing requests.
4. Hardship Financing – Direct or Hardship Financing will be made available to qualified recipients at rates below the regular reduced interest rate. Certain hardship eligible recipients may receive leveraged financing. If qualified, Hardship Financing may also be issued for 30 years. A description of the DWSRF Disadvantaged Community Program is provided in Section 7.0.
5. Additional Financial Assistance (Grants) - Grants may be made available to eligible recipients if a Direct or Hardship interest free financing does not provide sufficient funding to lower the Projected Service Charge to the Target Service Charge (TSC). A description of the DWSRF Disadvantaged Community Program is provided in Section 7.0.
6. Emergency Financing - The emergency financing program allows for the immediate financing of emergency situations as defined in Attachment I of this IUP, at eligible public water systems. This funding is only available to water supply systems for emergency repairs when no other funding source is available to the system. The determination of when an emergency exists would be made by the DOH. Imminent threats to public health would include situations that result in the unavailability of a source of potable water for an extended period of time. Projects that are designed to address such emergency situations will receive the highest priority ranking and will be added to the Project Readiness List. These projects would receive the first priority for any funds that are by-passed in accordance with by-pass procedures authorized in Section 10.2 of this IUP.
7. SRF Bond Market Rate Program - The SRF Bond Market Rate Program provides eligible financing recipients with project scores below the subsidy funding line on the Project Readiness List access to the public market at preferred market rates. Projects funded with market rate obligations will be retained, in subsequent years, on the Project Readiness List of the IUP until such time that they may qualify for subsidy assistance in future years. For projects with scores that later rise above the subsidy funding line (including through by-pass), subsidy assistance will become available at the then target rate for the remaining term of the recipient financing. For projects that qualify for subsidy assistance, a bond guarantee may be available to extend repayment terms beyond the previous DWSRF limit of 20 years from project completion. For recipients opting for longer repayment terms, subsidy assistance will be limited to that which would have been available had the financing been structured with such 20 year repayment terms. Subsidy assistance will be made available, at the target level, on the total financed amount of the project. Consistent with

project useful life, bond with maturities that exceed 20 years from the project completion date will be supported solely by SRF guarantee and will carry no subsidy.

8. SRF Bond Guarantee Program - The SRF will provide a bond guarantee for bonds issued by eligible recipients. The Bond Guarantee Program is available to support eligible projects for which DWSRF subsidized financing is not available. Bonds issued by recipients and guaranteed by the DWSRF may be issued for terms of up to thirty years.

#### **4.7 Program Financial Terms**

1. Short-Term Financing - Communities will borrow through the STFP by issuing municipal Bond Anticipation Notes (“BANs”) to the EFC. The EFC will provide funding in the amount of the BANs on an interest-free or EFC market rate basis. Upon maturity, the BANs may be retired with long term DWSRF financing, the issuance of long term debt obligations by the community, or other funding. Applicants other than municipalities will borrow through the STFP by issuing a promissory note to EFC secured by a letter of credit if not PSC regulated. Only DWSRF market rate short-term funds will be available to pre-finance any awarded grants.
2. Leveraged Financing - The financing terms, including the payment of principal and interest, are based on the terms of the EFC’s bonds, proceeds of which fund the Leveraged Financing. Principal amortization will be required to commence the earlier of a) within one year of the project completion or b) no later than two years after closing the financing (consistent with New York State Local Finance Law). Principal amortization cannot exceed 20 years from the project completion date or the Period of Probable Usefulness, whichever is sooner. The interest subsidy is provided either from other program assets or interest earnings on the investment of the reserve allocation. Reserve investments will be limited to U.S. Treasury securities, U.S. Government guaranteed securities, securities of Government Service Enterprises (GSE) such as the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, GSE guaranteed securities, investment agreements collateralized by U.S. Treasury securities, U.S. Government guaranteed securities, GSE securities, and GSE guaranteed securities and entered into with banks, broker dealers or insurance companies rated in one of the two highest rating categories by each nationally recognized rating service that rates their obligations, and state obligations, state guaranteed securities or other qualified obligations rated in one of the two highest rating categories by each nationally recognized rating service that rates the bonds. The Effective Market Rate for leveraged financing made from New York’s DWSRF in 2011 C financing is 4.09%. The Effective Interest Cost (EIC) for recipient financings based on this transaction is approximately 2.73% (1/3 subsidy).
3. Regular Reduced Rate Direct Financing – Terms governing principal amortization are the same as those applicable to Leveraged Financing. Interest payable on the financing will be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds issued to provide financing to eligible recipients.
4. Hardship Financing - For eligible projects the terms governing principal amortization shall be as long as 30 years from the project completion date or the Period of Probable Usefulness, whichever is sooner. Any interest payable on Hardship Financing will be set at less than two-thirds of the interest rate, as determined by the most recent DWSRF financing; rates may be as low as zero. The actual rate will be determined based on the affordability criteria (refer to Section 7.0).

5. Additional Financial Assistance (Grants) - Grants will be provided to qualified recipients to lower the Projected Service Charge to the Target Service Charge. If determined to be eligible, projects will be ranked according to project priority ranking system score. Projects with the highest scores will receive confirmation letters for hardship assistance until the available funding is fully committed (see Section 7.0). To be considered for hardship assistance, eligible projects must have had a total numerical score greater than (or equal to) that of the project with the lowest score (excluding bonus points) eligible to be funded from the Project Readiness List for the October 1, 2011 to September 30, 2012 funding period.
6. Emergency Financing - Emergency financing would be issued as regular reduced rate direct financing. Interest payable on the financing would be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds for eligible recipient projects. However, before an emergency financing can be issued the recipient must demonstrate credit worthiness and fiscal viability in accordance with EFC criteria. Privately owned water systems regulated by the Public Service Commission would be permitted to apply for funding only if the Public Service Commission has issued an order allowing the water system to surcharge its customers to repay the financing.
7. SRF Bond Market Rate Program - Bonds issued by eligible recipients and guaranteed by the EFC will be purchased by the EFC from proceeds of DWSRF bonds publicly issued by the EFC to investors. All avenues of recourse currently available to the EFC will apply with respect to recipient bonds guaranteed by the EFC, including its statutory right to intercept any state aid annually appropriated by the state to the recipient.
8. SRF Bond Guarantee Program - The SRF will provide a bond guarantee for bonds issued by eligible recipients. The Bond Guarantee Program is available to support eligible projects for which DWSRF subsidized financing is not available. Bonds issued by recipients and guaranteed by the DWSRF may be issued for terms of up to thirty years.

#### **4.8 Fund Management and Long-Term Effects of Funding Decisions - Leveraging**

A tremendous need exists for financial assistance for eligible drinking water projects in New York State. The EPA's *Drinking Water Infrastructure Needs Survey and Assessment – Fourth Report to Congress* dated February 2009 estimated that more than \$27.1 billion will be needed in New York State over the next twenty years to ensure continued delivery of safe public drinking water. Pre-applications received by the DOH indicate an aggregate need of approximately \$6.4 billion over the next several years. Anticipated project financing needs for this IUP, ending September 30, 2012, is about \$3.8 billion. Based on a comparison of available resources and anticipated financing needs, New York State plans to leverage the available DWSRF capital by a factor of three to one. Therefore, with \$65,894,594 of capital available for Leveraged Financing, the total Leveraged Financing capacity for the period of this IUP is \$197,683,782. When combined with Direct Financing, Grants, and Grants expected to close, the total DWSRF program assistance available during this IUP period is approximately \$295,463,263.

All DWSRF financings are made in a fiscally responsible manner that will ensure the revolving nature of the program in perpetuity. In addition, the fiscal aspects of the program are regularly evaluated to ensure optimum use of DWSRF resources. Further, the long-term effect of leveraging the DWSRF three to one will be to extend the reach of financial assistance benefits to more New York State water systems than could be served if leveraging were set at a lower level.

## **5.0 Amending the IUP**

This IUP may be amended to reflect changes in specific areas (e.g., increased project costs). Draft amendment notices will be published in the Environmental Notice Bulletin (ENB). At the end of the comment period, responses to all significant comments will be made available and the final amendment notice will be published in the ENB.

## **6.0 Set-Aside Activities**

Section 1452 of the SDWA authorizes states to use a portion of the federal Capitalization Grant (set-asides) to support various drinking water programs. Section 1452 allows as much as 31% of a state's federal Capitalization Grant to be used for administrative activities, technical assistance activities, state program management activities, and special activities. New York State proposes to use 16% (\$8,470,059) of the \$52,564,937 FFY 2012 Capitalization Grant for set-aside purposes. Table 2 specifies set-aside allocations and is presented at the end of this section. The State intends to maximize the use of Capitalization Grant monies for water supply projects. Therefore, only those funds considered essential for DWSRF and water supply program support have been allocated to set-aside activities. Also, any unused set-aside monies can be transferred to the project fund after receiving an approved amendment to the Capitalization Grant. The intended use of funds and expected accomplishments for each set-aside are described below.

Descriptions of how the FFY 2012 set-aside monies will be budgeted will be included in the federal Capitalization Grant Application Set-Aside Work Plans. The State plans to bank some set-aside funds for use in future IUP funding periods.

### **6.1 Administrative**

The SDWA authorizes states to use up to 4% of the total annual federal Capitalization Grant (as provided in Section 130 of the SDWA Amendments of 1996) to support the cost of administering the DWSRF program. The State plans to use 4% of the total annual federal Capitalization Grant for administrative activities.

Administrative tasks include, but are not limited to: developing and finalizing the Capitalization Grant application package to secure federal funds; implementing the Operating Agreement (OA) between the DOH and the EPA; performing technical project reviews and ranking project proposals in priority order; preparing an IUP which identifies available funding resources and expenditures and establishes current year and multi-year project priority lists; implementing a State Environmental Review Process; reviewing and approving engineering reports, construction plans and specifications; conducting project inspections; evaluating and determining specific project affordability (hardship); conducting public participation efforts; conducting database management activities; establishing DWSRF accounts; directing the investment of DWSRF funds; preparing project financing agreements (including cost summaries and project financing schedules); preparing necessary financial documents; issuing Corporation Bonds and originating financing; establishing annual reserve allocations; establishing disbursement schedules; processing disbursement requests and conducting associated document reviews; collecting and managing repayments; establishing and collecting DWSRF fees; insuring program and fiscal audits are conducted; and preparing technical and financial reports to meet federal and state mandates.

### **6.2 Technical Assistance**

Section 1452(g)(2)(D) of the SDWA authorizes states to use up to 2% of the total annual federal Capitalization Grant to provide technical assistance to small water systems (those with populations of 10,000 or fewer). This technical assistance may include assistance to potential DWSRF applicants complying with federal and state drinking water regulations. The State plans to use 2% of the total annual federal Capitalization Grant to continue to fund the enhancement of the State's existing Small Water Systems and Comprehensive Performance Evaluation Programs and provide for direct technical assistance to small water systems.

### **6.2.1 Small Water Systems**

The DOH has an existing technical assistance program for small water systems. This program has helped numerous communities improve their drinking water systems while saving money using self-help techniques. The DOH's Small Systems Program provides guidance to communities in considering project alternatives, calculating alternative project costs, preparing budgets for selected projects and reviewing existing operation and maintenance practices. Additionally, the program assists communities to develop criteria for consultant selection, determine project priorities, and select the most sensible project, use inexpensive labor and materials, improve purchasing practices, use volunteers, avoid duplication of services and conduct technical assessments to determine the overall needs of the community. These assessments will be useful to the small water systems in helping them improve their overall capacity. This program provides statewide coverage and the DOH will:

- participate in meetings with the public and individual systems to explain the Small Systems Program and its advantages to local communities;
- encourage small water systems to consider collaborative or regional approaches to water supply services, such as consolidating, forming partnerships, and initiating contract operation and maintenance agreements;
- oversee the contract to provide on-site "circuit rider" training and other direct technical assistance to mobile home parks and other small community and nontransient noncommunity public water systems not currently served by such a program;
- implement a number of small system projects, focusing primarily on communities applying for DWSRF financing; and
- oversee the regional capacity for providing direct assistance to DWSRF communities and to provide for training and support of local health unit staff.

### **6.2.2 Comprehensive Performance Evaluation Program**

The Comprehensive Performance Evaluation (CPE) Program has resulted in detailed assessments of 142 water filtration plants since November 1994. Although most of these plants are able to meet the current Filtration Performance Criteria and Maximum Contaminant Levels (MCLs), the structural, operational and administrative deficiencies noted in the evaluations will make it difficult for many of these systems to comply with future regulations without considerable capital improvements. There are approximately 270 filtration plants in New York State.

The primary CPE program goal is to review and evaluate the capabilities of existing treatment facilities to determine if they are meeting current standards and performance goals. A secondary, but equally important goal is to develop a program, based upon the evaluation, for the optimization of each facility to assure compliance with current and future standards and regulations.

The CPE program initiative includes:

- conducting 2 – 3 CPEs per year, complete with a detailed evaluation report with prioritized recommendations and follow-up meetings with the community to discuss the report, as needed;
- continuing to develop and issue comments and recommendations for initial remedial actions to the community within 14 days after completion of field work, followed by the submission of the completed evaluation within an average of 90 days after the completion of field work;
- improving training of field staff responsible for follow-up by including them at CPEs, making equipment available where needed and holding at least one workshop per year on troubleshooting and plant evaluation techniques; and
- conducting 3 – 5 mini performance evaluations per year, with follow-up letter reports, at communities who had a full CPE and are implementing recommendations or experiencing new difficulties, or to support communities who are having a specific critical problem.

### **6.3 State Program Management**

The SDWA authorizes states to take up to 10% of the total annual federal Capitalization Grant to support state program management activities. The State plans to use 10% of the total annual federal Capitalization Grant to administer the Public Water System Supervision (PWSS) program. States are required to match these set-asides on a one-for-one basis above and beyond the 20% match required of all capitalization funds. This amount will be matched with in-kind services associated with the State's existing PWSS and Drinking Water Enhancement Programs.

#### **6.3.1 Administer the PWSS Program**

The PWSS program enables the DOH to continue administration and oversight of the drinking water program, ensuring consistency in the implementation of and compliance with the requirements of the New York State Sanitary Code on a statewide basis. Additionally, the PWSS program assures that public water systems are operated in a manner that ensures adequate protection of their source water(s) and delivery of potable, aesthetically pleasing drinking water.

To achieve these objectives during FFY 2012, the DOH will:

- assure compliance with Part 5 of the State Sanitary Code;
- coordinate with Wadsworth Center for Laboratories and Research (WCL&R) to assure that State Laboratory capabilities are maintained;
- provide technical assistance to public water systems in achieving compliance;
- assure public health protection at public water systems using surface water sources;
- assure public health protection by developing, adopting and implementing mandatory federal drinking water regulations into the State Sanitary Code, including development and submittal of primacy packages;
- ensure that local health department water supply programs properly implement the program;

- assure that water supply facilities are built in accordance with proper design criteria by providing conceptual review and design approval of new construction and major modifications to water supply systems;
- continue to assess whether community groundwater systems may be under the influence of surface water;
- continue to implement the State's Capacity Development Program including submitting the Annual Capacity Development Report to the U.S. EPA by December 31<sup>st</sup> of each year;
- continue to implement the Source Water Assessment and Protection Programs and Well Head Protection Program;
- continue to perform security inspections of public water systems;
- assure potable water is provided during water supply emergencies;
- assure staff are properly trained;
- assure that water systems are operated by competent operators;
- continue participation in Child Health Initiative by assisting EPA with collection and analysis of lead samples from school drinking water outlets in cities around the state;
- continue to track NYC avoidance compliance; and
- ensure that all EPA reporting requirements under the grant are met and that EPA proposals for regulations and policies are promptly commented upon as requested.

#### **6.4 Special Activities**

Section 1452(k) of the SDWA authorizes states to take up to 15% of the annual federal Capitalization Grant for land acquisition, capacity development projects, wellhead protection, and source water petitions. No more than 10% of the federal Capitalization Grant can be allotted to any one of these special activities.

New York State is not proposing to take or use any of the allotted set-aside funds from the FFY 2012 DWSRF Capitalization Grant for the following programs.

##### **1. Land Acquisition**

Funds in the DWSRF can be used to purchase land integral to the construction of facilities, but not for other purposes such as watershed protection. A separate set-aside of 10%, however, may be used to establish a separate low-interest fund for land acquisition, particularly for watershed protection. New York State is not proposing to create such a fund at this time. There are a number of existing programs that can be used to purchase sensitive watershed lands. These include the State's 1986 Environmental Bond Act, the 1996 Clean Water/Clean Air Bond Act, the New York City Watershed Agreement, the Clean Water State Revolving Fund, as well as local, regional and private sources. The State will review the need to create additional capacity for land acquisition as part of its source water assessments and delineation efforts.

##### **2. Capacity Development Projects**

The State has proposed to use a portion of the allotted Program Management set-aside to implement the statewide capacity development strategy. The DOH with input from the EFC, the New York State Public Service Commission, the Office of State Comptroller, and other state agencies will use the capacity development strategy to address non-viable public water supplies in the State.

### 3. Wellhead Protection

The DEC developed New York's Wellhead Protection Program (WHPP), which was approved by the U.S. Environmental Protection Agency in 1990. The goal of the WHPP is to protect the ground water sources and wellhead areas that supply public drinking water systems from contamination. New York's approach to wellhead protection recognizes and includes the existing federal, state and county programs that protect groundwater, and compliments these programs through a combination of activities and efforts using existing public and private agencies and organizations at all levels. In New York, the WHPP has focused on assisting municipal community water systems with an interest in developing protection plans for their ground water supplies.

In October 1998, administration of New York's WHPP was transferred from the DEC to the DOH. The basis for the transfer of this program responsibility was due to the creation of the Source Water Assessment Program (SWAP) under the 1996 SDWA Amendments and the need to ensure efficiency and compatibility in the administration of these key water supply management programs. The WHPP and the SWAP share several similar program elements (e.g., delineation and contaminant inventory) for identifying areas of source water vulnerability to contamination, and both programs provide a foundation for focusing source water protection efforts at the local level.

The DOH submitted a Biennial Wellhead Protection Report to the EPA on November 15, 1999 for the October 1997 through September 1999 reporting period. This biennial report was prepared in accordance with the reporting requirements and criteria outlined in the EPA guidance provided to states and is consistent with previous New York State submittals on progress reporting for the WHPP. The DOH submitted a Biennial Wellhead Protection Report, using the 2001 Source Water Assessment and Protection Reporting Matrix, to the EPA on November 9, 2001 for the October 1999 through September 2001 reporting period. Future wellhead protection reporting will be prepared in accordance and be consistent with revised EPA reporting requirements that are under development.

### 4. Source Water Petitions

As part of the SWAP, the State will assess a variety of options for improving source water protection throughout the State. The source water petition program outlined in the SDWA is one such option. It remains premature to develop a financing program to fund source water petition partnerships at this time.

<b>TABLE 2 DISTRIBUTION OF FFY 2012 SET-ASIDE FUNDS</b>				
<b>Drinking Water State Revolving Fund</b>				
<b>Set-Aside</b>	<b>SDWA</b>	<b>FFY 2012 Maximum Allocation<sup>1</sup></b>	<b>NYS</b>	<b>FFY 2012</b>
<b>Administration</b> EFC (0.689740%) DOH (3.310260%)	<b>4%</b>	<b>\$2,102,597</b>	<b>4%</b>	<b>\$2,102,597</b> (\$362,561) (\$1,740,036)
<b>Technical Assistance</b> DOH	<b>2%</b>	<b>\$1,051,299</b>	<b>2%</b>	<b>\$1,051,299</b> (\$1,051,299)
<b>State Program Management</b> Administer PWSS Program DOH	<b>10%</b>	<b>\$5,256,494</b>	<b>10%</b>	<b>\$5,256,494</b> (\$5,256,494)
<b>Special Activity Set-Asides<sup>2</sup></b>	<b>15%</b>	<b>\$7,884,741</b>	<b>0%</b>

SW Petition Programs	(10%)	<b>(\$5,256,494)</b>		
<b>Total Set-Asides<sup>3</sup></b>	<b>31%</b>	<b>\$16,295,131</b>	<b>16%</b>	<b>\$8,410,390</b>

<sup>1</sup> Based on receiving Federal Capitalization Grant of \$52,564,937.  
<sup>2</sup> No more than 10% for any individual component and a total of 15% under Special Activity Set-Asides.  
<sup>3</sup> The USEPA Safe Drinking Water Act allows for States to use up to 31% of the federal grant for set- asides, NYS intends on using a total of 16%.

## 7.0 Disadvantaged Community Program and Hardship

### 7.1 Introduction

Chapter 413 of the Laws of 1996 (Clean Water/Clean Air Bond Act) provided \$355,000,000 to finance drinking water infrastructure projects in New York State. Of these monies, \$90,000,000 was allocated to provide direct financial hardship assistance payments for projects in disadvantaged communities. As of December 1998, the \$90 million available for State Assistance Payments (Grants) from the Bond Act was fully committed. Prior to FFY 2010, the DOH and the EFC exercised the federal SDWA Hardship Provision that allowed states to utilize up to 30% of their annual DWSRF Federal Capitalization Grant to provide Additional Financing Subsidies (Grants) beyond the interest free financing rate to eligible disadvantaged communities. In FFY 2010, it became a requirement to provide 30 percent of the Capitalization Grant in Additional Financing Subsidies and that requirement is carried forward through FFY 2012. Table 3 reflects the cumulative amount of federal grant funds that were provided from the cumulative federal Capitalization Grants received to date. \$15,769,481 will be available to provide Grants to eligible disadvantaged communities from the FFY 2012 Capitalization Grant.

<b>Table 3 Available Hardship Grant Funds</b>		
<b>Federal Fiscal Years</b>	<b>Capitalization Grant Amounts</b>	<b>Grants Provided</b>
1998 - 2011	\$650,629,600 <sup>1</sup>	\$186,392,367
2012(Cap Grant pending)	\$52,564,937	\$15,769,481 <sup>2</sup>

<sup>1</sup> Cumulative totals for FFYs 1998 – 2011 (not including ARRA).  
<sup>2</sup> Required to be provided for FFY 2012

Hardship applications, submitted by December 1, 2011, will be evaluated using the criteria outlined herein and if determined to be eligible will be ranked according to project priority ranking system score. Drinking water projects will be reviewed to determine eligibility for

funding and scored based on the established project priority ranking system (see Attachment I). Communities whose drinking water projects are listed on the Project Readiness List or the Multi-Year List with a total numerical IUP score greater than (or equal to) that of the project with the lowest score (excluding bonus points) eligible to be funded will be evaluated for financial hardship. Projects with the highest scores (excluding bonus points) will receive confirmation letters for hardship assistance until the available hardship allotment plus any unexpended, previously committed hardship funds are fully committed.

Hardship applications may be submitted after December 1, 2011 for evaluation of a financing only (no grant) hardship assistance package during the current IUP period (October 1, 2011 - September 30, 2012). Applicants that seek additional financial assistance (grants) as part of their hardship assistance package and submit their hardship application after December 1, 2011 will have to re-apply during the annual call for projects for the next IUP period (October 1, 2011 – September 30, 2012) to be re-evaluated.

## **7.2 Financial Availability**

As defined by § 1452(d)(3) of the SDWA, a disadvantaged community is one in which the public water system service area meets established affordability criteria. Under the Disadvantaged Community Program financial hardship assistance may include:

1. **Reduced Interest Rate Financing** - The rate on a financing can be reduced to as low as interest free and/or the financing terms increased to as much as thirty years to bring the Projected Service Charge (PSC) down to the Target Service Charge (TSC) level (see Calculating Hardship); and
2. **Grants Beyond an Interest Free Financing** - If an interest free financing does not provide sufficient funding to reach the TSC, Grants (up to \$2 million or 75% of the eligible project cost, whichever is less) may be used to make up the difference. An applicant may not be awarded more than \$2 million in grants in a particular funding period. Grants will not be made available to systems with a Median Household Income (MHI) greater than the statewide MHI of \$43,393.

## **7.3 Eligibility for Financial Hardship Assistance**

The following eligibility requirements apply to hardship applicants:

- The project must be listed on the Project Readiness List or the Multi-Year List with a total numerical IUP score greater than (or equal to) that of the project with the lowest score (excluding bonus points) eligible to be funded from the current Project Readiness List.
- Hardship assistance is available only for drinking water projects for which the notice to proceed for construction was issued on or after April 1, 1997. Debt issued between July 1, 1993 and March 31, 1997 is eligible only for refinancing through regular subsidized interest rate financing from the DWSRF program.
- Only projects that have a total project cost less than \$14,000,000 are eligible for hardship assistance. Projects may not be segmented in order to qualify for hardship financial assistance.
- An applicant may not be awarded more than \$2 million in grants in a particular funding period.

- Grants will not be made available to system service areas with a MHI greater than the statewide MHI of \$43,393. However, projects in such areas with a MHI up to 150% of the current statewide MHI, or \$65,090 will be eligible for reduced interest rate financing (to as low as 0%) and/or extended up to thirty years to bring the PSC down to the TSC. Systems with a service area MHI greater than \$65,090 will not be eligible for hardship financing.
- Only community water systems, systems that provide drinking water to residential populations, such as municipal water systems and privately owned water supply companies that are regulated by the Public Service Commission, are eligible for hardship assistance.

#### 7.4 Calculating Hardship

A hardship determination is made based on the information provided in a completed financial hardship application and a comparison of PSC and TSC for a typical household. The formula that establishes the TSC is based on the applicant's MHI, as indicated in the example and graph that follow. The PSC is the projected annual service charge of the project per Equivalent Dwelling Unit (EDU) including existing debt service, projected debt service, and project operation and maintenance (O&M) costs.

The EDU concept relates all water system usage proportionately to that equivalent to a typical single family residence. EDUs will be calculated for commercial, industrial and institutional users based upon the water usage from flow data, number of employees, fixture units, or other factors that equate usage to that of an equivalent number of residential users. The percentage of total water use dedicated to institutional/industrial uses is taken into account in calculating the amount of hardship a particular community will qualify for in grant assistance (see below).

The comparison of PSC to TSC is used to determine which public water systems are eligible for financial assistance beyond the regular subsidized interest rate financing available through the DWSRF. The additional benefits will assist economically disadvantaged water systems in the construction of eligible drinking water projects.

The TSC is based on the service area's MHI. In calculating the MHI for this IUP period, the 2000 U.S. Census data will be used. Under certain circumstances, an income survey for the service area may also be considered (contact EFC for income survey guidance). The TSC calculation and example follow:

$$TSC=(MHI/10,000)^2 \times 36 - (MHI/10,000) \times 52 + 155$$

EXAMPLE:

MEDIAN HOUSEHOLD INCOME (\$)	TARGET SERVICE CHARGE (\$)
15,000	158
20,000	195
25,000	250
30,000	323
35,000	414
40,000	523
45,000	650
50,000	795
55,000	958
60,000	1,139
65,000	1,338

The following factors may be considered including, without limitation, the relative number and nature of residential, seasonal, commercial, industrial and institutional users when making the determination regarding hardship assistance.

Once the initial hardship determination is made, a percentage of the calculated grant amount (if any) equivalent to the percentage of industrial and institutional water use (if that use exceeds 25% of the total water consumption of the applicant service area) will be limited to an interest free financing. Institutional refers to a facility with dormitory or similar accommodations for overnight use.

The grant portion of hardship packages will not be provided if the difference between the projected service charge, based on hardship assistance, and the projected service charge for the project if financed through a financing only hardship package is calculated to be less than 5%.

## **7.5 Hardship Application Process**

To be considered for financial hardship assistance, an applicant must request a Financial Hardship Application from the DOH or the EFC and provide the following information when completing the application:

- existing population of the project service area;
- number of EDUs to be served, including commercial, institutional and industrial users, and the basis on which they were calculated;
- existing annual debt for the system;
- existing annual O&M costs;
- estimated annual O&M costs based upon completion of the project;
- annual financial reports, audited if available, for the last three years;
- an analysis of project alternatives for cost effectiveness;
- other revenue of the system (including charges to outside users),
- estimated project costs; and
- any other funding sources for the project, including detail on whether such funding is a grant or a loan, and if a loan, its interest rate, term, and annual debt payment.

The hardship application is different than the DWSRF application. It is recommended that applicants, meeting the aforementioned eligibility criteria obtain and submit a hardship application directly to the DOH. Hardship applications submitted after December 1, 2011 will be evaluated for a financial hardship assistance package (no grant) during the current IUP period. Applicants that seek grants as part of their financial hardship package will have to re-apply during the next IUP funding period to be re-evaluated.

## 7.6 Confirmation of Hardship Availability

Upon review of all hardship applications received in a funding round, projects eligible for hardship assistance will be ranked in priority order based on their project priority ranking scores. Projects with the highest project priority scores will receive confirmation letters for hardship assistance until the available hardship monies and any unexpended previously committed hardship funds are fully committed. Projects which qualify for financial hardship assistance may be provided with written confirmation from EFC of such qualification and placed on the next IUP Hardship List unless already funded during the current IUP funding period. Written confirmation for financial hardship will remain valid for the term identified in the confirmation letter. The amount and type of hardship assistance offered may change or be withdrawn if:

- the applicant fails to demonstrate satisfactory progress towards project implementation;
- the information on which the determination was first made changes prior to financial closing; or
- the applicant fails to demonstrate that it can repay the financing portion of the assistance package.

If a project has not closed on funding by the expiration date identified in the confirmation letter, it will be removed from the Hardship List and will have to reapply for hardship assistance, unless re-qualified for the Hardship List.

Projects which are deemed eligible for hardship assistance and would otherwise be eligible for a Grant, but are either not reachable due to the limited grant monies available or consist of multiple projects submitted by a single applicant for which the sum of the grant component exceeds \$2 million, will have to compete each year for the available hardship monies. However, these projects may be offered a zero interest rate financing upon determination of hardship eligibility. Projects that accept this financing will still be eligible to compete for Grant money in future years up to the time of long-term financing.

Projects that receive a financial hardship confirmation letter, that *have not closed* on their long-term funding package, and whose project costs increase will be able to apply for a reduced interest rate financing, as low as zero percent, to cover the cost increases as long as direct financing dollars are available in the current IUP funding period. As an alternative for projects not yet closed, the project applicant may submit the entire revised project for reconsideration in a subsequent annual call for projects.

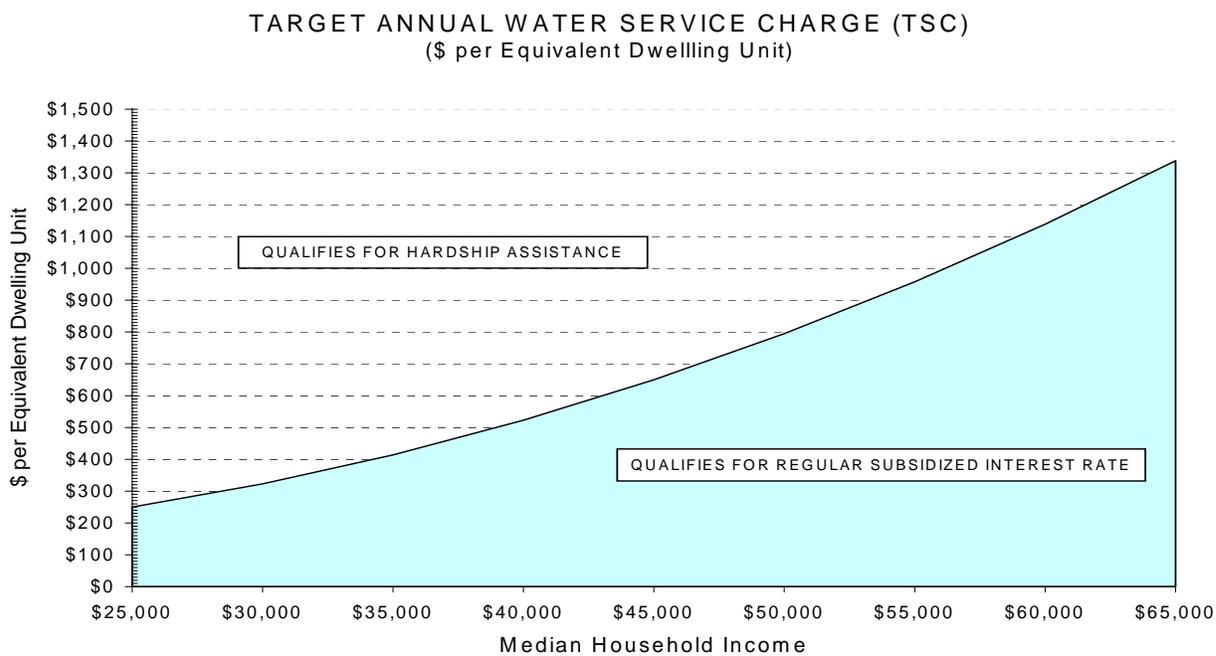

Projects that receive a financial hardship confirmation letter, that *have closed* on their long-term funding package, and whose project costs increased can apply during the next IUP funding period for a reduced interest rate financing, as low as zero percent, to cover the cost increases. In this case, the applicant must file a new pre-application to list the project in the next IUP. The project will be awarded additional points for project phasing.

## 7.7 Co-funding

Confirmation that a project qualifies for hardship assistance will help facilitate funding coordination with other State and Federal agencies that finance drinking water projects. The New York State Water and Sewer Infrastructure Co-funding Initiative brings together representatives from the DOH, EFC, DEC, Department of State, Office of Community Renewal, United States Department of Agriculture Rural Development, Office of the State Comptroller, and New York State Energy Research and Development Authority to ensure optimum funding

potential and assistance for New York’s communities. For more information about co-funding, visit the co-funding web site at <http://www.nycofunding.org>.

Co-funding is anticipated and encouraged by the provision of additional points to a project’s score in the priority system. A project must receive co-funding assistance of either \$25,000 or 5% of the project costs, whichever is less, to qualify for project co-funding points. Coordination of joint funding of projects will be done on a project by project basis.

## 8.0 Capacity Assessment

To provide safe and reliable drinking water, the federal and state governments are investing substantial financial resources in the drinking water infrastructure of New York State. To assure the DWSRF is invested wisely, each DWSRF applicant must demonstrate that its water system has adequate technical, financial and managerial capacity.

### 8.1 Technical Capacity

To assure adequate technical capacity, the applicant must demonstrate adequacy of source water, adequacy of infrastructure and technical knowledge. The DOH will review central office and local office records to assure that the system is being properly operated and maintained. The water system must not have outstanding drinking water compliance problems unless the project is aimed at correcting those problems. The engineering report and plans and specifications for the proposed project will be evaluated to insure that the system has a reliable source for its drinking water and that it is adequately protected; that the project will maintain system compliance; and that the education, experience, and technical skills and capabilities of the system operator are appropriate for that system.

### 8.2 Financial Capacity

To assure adequate financial capacity, the applicant must have sufficient rates, charges and revenues to cover necessary costs, demonstrate credit worthiness and fiscal condition in accordance with EFC criteria. The EFC will review the applicant’s financial capacity during the

full application process to determine financial viability before the awarding of financial assistance. The EFC's review will include, but not be limited to, the project budget, municipal bond resolution(s), annual financial reports to the Office of the State Comptroller, and other financial information to assure adequate financial capacity of the applicant.

### **8.3 Managerial Capacity**

To assure adequate managerial capacity, the water system must have clear ownership identity and be appropriately staffed by personnel with expertise to administer overall water system policies and operations. The DOH will review the applicant's managerial capacity to assure that management is involved in the day to day supervision of the water system, is aware and responsive to all required regulations, is available to respond to emergencies, is capable of identifying and addressing all necessary capital improvements, is responsive to their customers and is capable of keeping accurate records and assures financial viability. The water system must have a qualified water operator in accordance with the State's existing Operator Certification Program.

### **8.4 Systems with Inadequate Capacity**

For all systems that seek funding under the DWSRF, the DOH will review any history of violations, outstanding compliance problems, reported source contamination or inadequacies, treatment failures, needs survey data, operations and maintenance issues, and operator and owner coverage to determine whether a system lacks adequate capacity. A system that requires improvements to obtain adequate capacity can apply to the DWSRF provided the improvements will ensure compliance and render the water system viable. Using the procedures outlined in Sections 8.1, 8.2, and 8.3 to evaluate the system's technical, financial, and managerial capacity, the DOH will assess whether DWSRF assistance will help to ensure compliance. In addition, the DOH will consult with the local health department, which provides the daily oversight and regulation of the water system, to make this assessment.

### **8.5 Long-Term Capacity**

Water systems must maintain adequate capacity. The DOH and EFC will assess whether each water system has a long-term plan to undertake feasible and appropriate changes in operations necessary to develop adequate capacity. The DOH will review Water Resource Management Strategies, Comprehensive Studies, the Needs Survey and other available engineering reports, as well as consult with the local health departments, in making these assessments. The DOH and EFC will encourage restructuring efforts when two or more systems can benefit and other options, such as contract management or partnerships with other communities in their area, in an effort to improve the overall capacity. The priority ranking criteria provides additional points to encourage this objective. In addition, restructuring efforts and other cooperative arrangements among systems will be encouraged as part of the implementation of the statewide capacity development strategy.

### **8.6 Annual Reporting Requirements**

The State will submit to the EPA and include in the IUP, documentation that summarizes the results of the capacity assessments conducted on those systems seeking funding under the DWSRF in the preceding year. The summary will include statistics on the numbers, types, and sizes of systems assessed to determine technical, managerial, and financial capacity, including the assessment outcomes; whether DWSRF assistance will ensure compliance for those systems with inadequate capacity; and whether restructuring efforts will result in both

developing adequate capacity and achieving long-term capacity for systems. Table 4 summarizes the required capacity assessment information.

<b>Table 4</b>						
<b>Capacity Development Review Summary (10/1/10 – 9/30/11)</b>						
Statewide Capacity Reviews	Totals	System Type:		System Size (population served)		
		CWS	NTNC	<1000	1,000-3,300	>3300
Passed	29	29	0	7	11	11
Failed	0	0	0	0	0	0
(Failed) Requiring Restructuring	0	0	0	0	0	0
Systems in SNC Requesting DWSRF Assistance	Funded	1	1	0	1	0
	Being Processed	8	8	0	3	4

## 9.0 State Environmental Review Process/Determination of Equivalency Projects

The State Environmental Review Process (SERP) applies to all projects receiving financial assistance from the DWSRF. The SERP incorporates environmental review requirements of the National Environmental Policy Act (NEPA) and its implementing regulations (40 CFR, Part 6 and 40 CFR, Part 1500), the State Environmental Quality Review (SEQR) Act, Article 8 of the Environmental Conservation Law (ECL) and its implementing regulations under 6 NYCRR, Part 617, as well as the DOH regulations under 10 NYCRR, Part 97. The DWSRF applicant must complete the SERP before receiving DWSRF financing.

All projects that are financed from the DWSRF are classified by the DOH under the SERP as either Tier I or Tier II projects. Tier I projects, also referred to as equivalency projects, refer to those projects that are financed by the DWSRF whose cumulative total is an amount equal to the federal Capitalization Grant to the State. Tier II projects, (non-equivalency projects), refer to all other projects that receive DWSRF financial assistance.

Tier I projects must undergo an environmental review consistent with the NEPA. For the DWSRF program, Tier I projects will include:

- projects for which an environmental review consistent with NEPA has already been completed; and
- projects that meet the definition of a NEPA categorical exclusion.

If necessary, additional Tier I projects will include:

- projects for which applicants have voluntarily undertaken to complete a NEPA equivalent environmental review;
- projects that have a particular environmental significance, due to the nature and scope of the projects; and

- projects for which the environmental review can be considered functionally equivalent to a NEPA environmental review, with some minor additional elements.

Tier II projects are subject to the environmental review requirements of SEQR with additional requirements imposed by the SERP for the DWSRF program. Applicants will be notified by the DOH whether their project(s) proposed for financing through the DWSRF program fall under the category Tier I (equivalency) or Tier II.

## **10.0 Project Priority Lists**

### **10.1 Project Selection Process**

Both federal and state laws require that New York develop a Project Priority Ranking System. The priority ranking system establishes a list of eligible projects to be funded in a manner consistent with the SDWA such that the most serious risks to public health are given the highest priority. The DOH has given the highest priority to acute public health risks, particularly those related to microbiological organisms. The next priority was given to situations that pose chronic and longer term risks to consumers, such as organic chemical contamination. The scoring criteria also consider issues that are related to infrastructure upgrading or replacement. The project ranking system also considers, as mandated by the SDWA, special allocations and restrictions on the use of DWSRF monies for disadvantaged and small systems. A detailed description of the Project Priority Ranking System and Scoring Criteria are included as Attachment I to this IUP.

### **10.2 Description and Use of Project Lists**

Projects must be included in the IUP to receive DWSRF financing. This IUP includes the following prioritized lists of eligible projects being considered for financing from the DWSRF:

- The Project Readiness List for this IUP includes all projects for which an engineering report or plans and specifications are submitted to the DOH or for which construction is completed by September 3, 2011. A project is deemed "ready" when all technical submittals have been received by the DOH. Projects that have submitted pre-application forms, but have neither submitted an engineering report, plans and specifications nor completed construction have been included on the Multi-Year List.

The Project Readiness List includes a subsidized funding line. Projects listed above this subsidy funding line comprise the Funding List, which includes all those projects expected to qualify for long-term financing within the current IUP financing period. Provisions are made in the Project Priority Ranking System to by-pass projects that may not progress as expected (see Attachment I). The DOH will proceed with an accelerated by-pass of those non-hardship projects that have been on the Project Readiness List, above the subsidy funding line for two or more consecutive IUP periods and fail to submit a complete application by December 1, 2011. Notification letters will be sent to applicants with such projects informing them that their complete applications will have to be submitted by December 1, 2011, or they will receive a by-pass letter.

Funds released by project by-passing will first be used for the Emergency Financing Program to finance imminent threats to public health. Funds released by project by-passing will then be used to finance cost increases incurred by projects on the IUP above the subsidy funding line. Any remaining funds available will be used to finance projects below the subsidy funding line in order of priority ranking.

The project cost presented on the Project Readiness List reflects the applicant's estimated project cost.

It should be noted that for some larger projects there may not be sufficient funds available in a single IUP financing period for their complete financing. As necessary, New York State will segment and/or phase finance (cash flow basis) larger projects over several IUP financing periods to maintain a statewide program of maximum effectiveness.

- The Category A List consists of projects for small systems serving less than 10,000 people from the Project Readiness List. This list includes a funding line and a line designating the SDWA minimum funding requirement (15% of the DWSRF) for small public water systems.
- The Category B List consists of projects for water systems serving greater than or equal to 10,000 people from the Project Readiness List. This list has not been included in the IUP.
- The Multi-Year List includes all eligible projects for which pre-application forms have been submitted and reviewed, including those projects on the preceding Multi-Year List. The DOH accepts pre-applications on a continuous basis. All eligible projects for which pre-application forms are submitted on or before September 3, 2010 will be included on the Multi-Year List in the final IUP.
- The Category C (Hardship) List includes all eligible projects that have received written confirmation that they qualify for financial hardship assistance.

Copies of the Project Readiness List, the Category A List, the Multi-Year List, and the Category C (Hardship) List follow at the end of this section.

## PROJECT READINESS LIST

The Project Readiness List for this IUP begins with projects that have received a written confirmation letter that they qualify for financial hardship and are determined to be ready. These projects are identified by 'H' in the column labeled "score." Phased or segmented projects are assigned 2000 points in addition to their total project ranking system score. Projects with interest free short-term financing are assigned 1000 points in addition to their total project ranking system score and are identified by 'NOTE: Short-Term Loan Closed' in the column labeled "project cost." The code box located under each project number identifies the source of financial assistance for the project, if known, and also whether the project contains green infrastructure components.

## NYS Drinking Water State Revolving Fund Draft Readiness List October 1, 2011 to September 30, 2012

Project #	County	System Name/ Borrower	Description	Pop.	Project Cost	Score	Cumulative Total
17473	Jefferson	LAFAVE ROAD WATER DISTRICT / Le Ray (T)	Consolidation of existing public water systems with GUDI wells, coliform and lead violations., New Distribution System, New System Consolidation	600	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17321	Jefferson	WESTCOTTS WATER DISTRICT / Hounsfield (T)	Westcotts WD to serve along NYS Route 3. Consolidation of PWS systems addressing SWTR & E-Coli violations. , Upgrade Storage, New Distribution System, New System Consolidation	300	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17456	Hamilton	INDIAN LAKE WD / Indian Lake (T)	New Surface Water Treatment Rule Compliance Facility, Upgrade Water Treatment Plant, New Ground Water Source, Upgrade Distribution System	900	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17611	Franklin	SARANAC LAKE V / Saranac Lake (V)	New SCADA equipment., New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System	5,800	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17388	Essex	PORT KENT WD / Chesterfield (T)	New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Storage	202	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
15881	Essex	WADHAMS WD / Westport (T)	New Surface Water Treatment Rule Compliance Facility, New Inter-Connection, New System Consolidation	140	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17561	Chautauqua	FORESTVILLE VILLAGE / Forestville (V)	New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Distribution System	804	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17461	Orange	PHEASANT HILL / Pheasant Hill Water Corp	Rehabilitation of water system to address e-coli contamination, Upgrade Water Treatment Plant, New Ground Water Source, New Storage	154	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
15072	Orange	BEAVER DAM LAKE WATER CORP. / Beaver Dam Lake Corp.	New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Storage, Upgrade Distribution System	487	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17647	Saratoga	STILLWATER VILLAGE / Stillwater (V)	Alternative Water Source for Surface Water Treatment Rule compliance., New Transmission, New Inter-Connection	1,572	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
15343	Otsego	UNADILLA VILLAGE / Unadilla (V)	Install new well, pumphouse, controls, chlorination system to replace GWUDI springs. New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Pump Station, Upgrade Distribution System	1,350	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
15204	Oswego	HANNIBAL (T) / Hannibal (T)	Extend system to serve area with private contaminated wells, consolidate public water supply. , Extend Distribution System, New System Consolidation	1,200	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17543	Saratoga	MOREAU WD 7/CONNECTION TO SCWA / Moreau (T)	Consolidate 3 small CWSs, consolidate WD 1, connect Town with SCWA, New Storage, Extend Distribution System, New Inter-Connection, Extend System Consolidation, New Water District	1,100	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17576	Chautauqua	CHERRY CREEK VILLAGE / Cherry Creek (V)	New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System	650	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
16744	Delaware	FLEISCHMANN'S VILLAGE / Fleischmanns (V)	Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Storage, Upgrade Distribution System	690	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
16278	Hamilton	LONG LAKE (T) / Long Lake (T)	New Ground Water Source, New Storage, Upgrade Distribution System	750	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
16261	Oswego	TOAD HARBOR/CONSTANTIA WD / Constantia (T)	New Surface Water Treatment Rule Compliance Facility, New Storage, New Pump Station, New Distribution System, New Inter-Connection, New System Consolidation	2,765	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17538	Oswego	WATER DISTRICT #2 / Richland (T)	New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Transmission, New Storage, New Distribution System	1,662	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17306	Jefferson	WATER DISTRICT #2 / Henderson (T)	New Surface Water Treatment Rule Compliance Facility, New Distribution System, New System Consolidation	352	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan							
17382	Allegany	HOUGHTON WATER DISTRICT / Caneadea (T)	Upgrade Water Treatment Plant, New Ground Water Source, New Transmission, Upgrade Distribution System	2,000	\$0	H	\$0
NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan

INTENDED USE PLAN  
FOR THE  
NEW YORK STATE DRINKING WATER STATE  
REVOLVING FUND

ATTACHMENT I  
PROJECT PRIORITY RANKING SYSTEM

# **Project Priority Ranking System for the Drinking Water State Revolving Fund (DWSRF)**

## **(I) Priority Ranking System and Intended Use Plan**

### **A. Priority Ranking System**

The purpose of the priority ranking system is to establish a list of eligible projects to be funded in a manner that the most serious risks to public health are given the highest priority. The New York State Department of Health (NYSDOH) proposes that the highest priority be given to acute public health risks, particularly those related to microbiological organisms. The next priority has been given to situations that pose chronic and longer-term risks to consumers, such as organic chemical contamination. The scoring criteria also considers issues that are related to infrastructure upgrading or replacement. Consistent with these priorities, the numerical scores in the Drinking Water State Revolving Fund (DWSRF) priority ranking system are based on the following criteria:

#### Technical Factors

- A. MCL/Treatment Technique Violations
- B. Other Sanitary Code Violations
- C. System Reliability/Dependability Issues

#### Non-Technical Factors

- D. Governmental Needs
- E. Financial Needs

The total numerical score for a project or a project segment will be the sum of the scores for criteria A, B, C, D and E.

### **B. Intended Use Plan**

The State will prepare a document called the Intended Use Plan (IUP) that describes how the State intends to use available DWSRF resources for the year to meet the objectives of the Safe Drinking Water Act (SDWA) and to further the goal of protecting public health. The IUP will include specific detail on how the State will use all funds available. The IUP will also include a list of projects expected to qualify for financing within the fiscal period addressed by the IUP. A project must be listed in an IUP to be eligible for financing.

## **(II) Project Ranking**

### **A. Special Allocations and Restrictions**

The federal Safe Drinking Water Act Amendments of 1996 (SDWA) require that, on an annual basis, water systems serving fewer than 10,000 persons must receive a minimum of 15% of the DWSRF. This minimum allocation for systems serving less than 10,000 persons will occur to the extent that there are a sufficient number of eligible projects to fund.

The SDWA also states that up to 30% of the annual DWSRF federal capitalization grant can be used to give loan subsidies to disadvantaged communities.

The State of New York will impose an annual cap or ceiling of 50% of DWSRF resources that can be received by any single applicant. In addition, the State may limit DWSRF financing to the demonstrated annual cash flow needs of any single applicant.

The New York State Clean Water/Clean Air Bond Act of 1996 requires the development of a Memorandum of Understanding among the Governor and Legislative Leaders regarding selection of projects to be funded from the Drinking Water provisions of the Bond Act. Projects identified in the Memorandum of Understanding will be incorporated into an annual funding list for Bond Act financing in conjunction with projects selected according to the Priority Ranking System.

### **B. Project Ranking Categories**

Projects will be placed in categories to allow priority ranking within a specific grouping of projects. Federal legislation requires that, on an annual basis, a minimum of 15% of the DWSRF be received by water systems serving fewer than 10,000 people. Also, water systems that qualify for financial hardship have special conditions that require a separate category for these projects. Therefore, three priority ranking categories will be created:

1. Category A. Water systems serving > 10,000 people.
2. Category B. Water systems serving < 10,000 people.
3. Category C. Water systems that have received written confirmation of qualification for financial hardship assistance.

### **C. Description and Use of the Project Lists**

Several lists of projects will be created to organize and manage projects with different levels of priority and readiness. These listings will display the status of all projects in the system and indicate the final list of projects that qualify for funding in the current IUP.

#### **1. Multi-Year List:**

This list will contain all eligible projects for which pre-application forms have been submitted and reviewed. This list will contain projects from Categories A and B. New projects can be added to this list on a continuous basis. Projects must be on the Multi-Year List to be eligible for short-term loans when short-term loans are made available.

Short-term loans for projects listed on the Multi-Year List will be limited to projects that have a total numerical score greater than (or equal to) the project with the lowest score (excluding bonus points awarded under Section II.E.2.) eligible to be funded from the current Project Readiness List. Applications for short-term loans, when available, will be approved on a first come/first served basis, up to the total amount reserved in the IUP for that purpose.

NOTE: Short-term loans may not be offered in the initial years of the DWSRF program.

## 2. Hardship List:

This list will contain all projects with written confirmation that they qualify for financial hardship assistance (Category C). This written confirmation will be limited to projects that have a total numerical score greater than (or equal to) the project with the lowest score (excluding bonus points awarded under Section II.E.2.) eligible to be funded from the current Project Readiness List. These projects will be selected from the Multi-Year List. Written qualification for financial hardship assistance will remain valid for two consecutive annual federal funding cycles. If a project has not been selected for funding during this period, it will be removed from the Hardship List (and re-listed on the Multi-Year List) unless requalified for the Hardship List.

## 3. Project Readiness List:

This list will contain Category C projects and the projects from the Multi-Year List which are anticipated to be ready for long-term financing during the effective period of the IUP. Applicants for these projects are expected to apply for the funds projected to be available during the fiscal period addressed by the IUP. Projects from Categories A and B will be listed in descending order of total numerical score (resulting from the Priority Ranking System Scoring Criteria).

## 4. Funding List:

This list will include all projects from the Project Readiness List expected to qualify for long-term loans within a particular IUP. Projects will be listed according to the three project categories. All Category C that are on the Project Readiness List will qualify for funding. Projects in Category A will then be selected from the Project Readiness List in priority order to meet the 15% minimum requirement for water systems serving less than 10,000 people. All remaining projects on the Project Readiness List will be selected in priority order until the remaining annual DWSRF funding amount is encumbered. The project selection is subject to Restrictions and Project By-pass Criteria in Sections II.A and D of this document.

#### D. Project By-pass

Projects on the Project Readiness List can be by-passed, upon written notice, if any of the following occurs:

1. Project is withdrawn by the applicant.
2. Project does not meet the dates and/or conditions in the project schedule or the Project Financing and Loan Agreement.
3. The applicant has reached the 50% annual DWSRF resources cap for fundable projects on the Project Readiness List. All other projects for the applicant that would exceed the 50% cap will be by-passed.

#### E. Special Priorities

##### 1. Emergencies:

An emergency is a catastrophic situation that results in an imminent threat to public health. The determination of when an emergency exists will be made by the NYS DOH. Imminent threats to public health include situations that result in the unavailability of a source of potable drinking water for an extended period of time. Projects designed to address emergencies will receive the highest priority ranking.

##### 2. Projects with Prior Funding Agreements:

Projects with executed Project Financing and Loan Agreements for long-term and short-term DWSRF loans will be given significant additional bonus points when they are placed on the Project Readiness List. This will help to ensure the availability of DWSRF financing needed for completion of on-going projects.

Phased or segmented projects for which additional funds have been conditionally committed in an executed Project Financing and Loan Agreement (PFLA) for long-term DWSRF financing will be listed, in descending priority score order. These projects will be assigned 2000 points in addition to their total project ranking system score.

Projects for which funds have been committed in an executed PFLA for short-term DWSRF financing will be listed, in descending priority score order. These projects will be assigned 1000 points in addition to their total project ranking system score. Other projects will then be listed in descending priority score order.

#### F. Tie Breaking

In the event of a tie score for projects, the higher total score under Technical Factors (Criteria A, B and C) will be used as a tie breaker. If this still results in a tie score, the size of the population served by the system will be used as a tie breaker. The larger population will be given preference.

## G. Eligible Project Limitation

Eligible projects are activities that address critical water system problems. The NYS DOH may require separation of unrelated project components into separate projects if it is necessary to focus on critical water system problems. These separate projects will be scored independently. Projects must be adequately supported by technical documentation, data, reports, etc.

### (III) Priority Ranking System Scoring Criteria

The numerical scores in the DWSRF priority ranking system are based on technical and non-technical criteria. The technical criteria are A.) MCL/treatment technique violations; B.) Other sanitary code violations; and C.) system reliability and dependability issues. The non-technical criteria are D.) governmental needs and E.) financial needs. The total numerical score for the project or project segment being scored shall be the sum of the scores for criteria A, B, C, D and E. Projects must be adequately supported by technical documentation, data, reports, etc.

#### Technical Factors

A. MCL/Treatment Technique Violations. Points awarded are based on treatment of MCL exceedances and/or replacement with an alternate source of supply, and for interconnection with, or purchase from adjacent water system(s) in lieu of treatment (more than one item may apply):

	<u>Score</u>
1. Microbiological	
a) Surface Water Treatment Rule	
i. Filtration	100
ii. Filtration Performance Criteria (NTU compliance)	50
iii. CT Disinfection	30
b) <i>E. coli</i>	80
c) Total Coliform	40
2. Organics	
Organic chemicals (POC/UOC) and disinfection by-products	40
3. Lead and Copper/Corrosion (mandated)	30
4. Radiological	25
5. Inorganic/Physical	
a) Nitrates	50
b) Other health-related	25
c) Aesthetic	10

B. Non-treatment Sanitary Code Violations (more than one item may apply):

The project need must be adequately supported by technical documentation, data, reports, etc.

1. Inadequate Source Capacity (public health hazard)	50
2. Inadequate Distribution Pressure (public health hazard)	25
3. Uncovered Finished Water Storage (public health hazard)	25

C. System Reliability/Dependability Issues (more than one item may apply):	<u>Score</u>
The project need must be adequately supported by technical documentation, data, reports, etc.	
1. Complete replacement or major rehabilitation of existing treatment facility for primary contaminants that has exceeded design life and/or does not meet the design standards in the current edition of <u>Recommended Standards For Water Works</u> . In lieu of treatment, replacement with an alternate source of supply, and/or interconnection with, or purchase from, adjacent water system.	20
2. Upgrade, replace and/or install major vulnerable system components to meet the design standards in the current edition <u>Recommended Standards For Water Works</u> . Any of the following apply.	10
a) A principal component integral to an existing filtration process such as sedimentation, flocculation, filtration, chemical feed, or backwashing (can only receive points for Criteria C.2a. or C.1.)	
b) Pump stations	
c) Existing wells	
d) Existing disinfection system for a groundwater/surface water supply	
e) Transmission main	
f) Finished water or distribution storage	
g) Other water treatment systems for secondary contaminants only (or replacement of source instead of treatment)	
3. Aged mains and appurtenances	5
4. Redundancy of critical components (pumps, valves, chemical feed-systems, etc.)	5
5. Asbestos main replacement	5
6. Control/automation for operational efficiency (computerization, control valves, metering, laboratory upgrading)	5
7. Inadequate source capacity which is not a public health hazard (can only receive points for Criteria B1 or C7)	5

Non-Technical Factors:

Score

D. Governmental Needs (more than one may apply)

Additional points will be assigned to a project on the basis of state or local government needs, policies, and/or requirements.

- |   |    |
|---|----|
| 1. Development of a water system or extending existing system to service contaminated or insufficient yielding private wells at existing residential housing (new systems are not eligible for points under Criteria A, B or C) | 40 |
| 2. Consolidation of water systems (can include improving technical, managerial and financial capacity development)  | 25 |
| 3. System dependent on a Sole Source Aquifer for its source. (These points can only be obtained <u>if</u> system scores points from Criterion A, B, C.1. or C.2.g.)   | 25 |
| 4. A project that has received written commitment of funding from another governmental source (e.g., co-funded with Clean Water SRF, Rural Development, HUD, etc.)<br>These points do not apply to refinancing of projects.     | 10 |
| 5. Consistent with Water Resources Management Strategy  | 5  |
| 6. Proposes operational changes that improve and insure adequate technical, managerial and financial capacity of the system in order to insure compliance (guidelines to be developed)  | 5  |

E. Financial Need

The Median Household Income (MHI) of the community in which the water service area is located is used as a numerator and the Statewide MHI is used as the denominator in the following equation to determine the financial need factor.

$$\frac{\text{Community MHI} \times 100}{\text{Statewide MHI}^*} = \text{Factor}$$

Factor	≤70	>70 - ≤77.5	>77.5 - ≤85	>85 - ≤92.5	>92.5 - ≤100	>100
Points	25	20	15	10	5	0

\*2000 Statewide MHI is \$43,393.

The MHI of the community in which the water service area is located and the Statewide MHI will be determined from income data in the most recent United States census. If there is reason to believe that the census data are not an accurate representation of the MHI within the area to be served, the reasons will be documented and the applicant will furnish, or the Department may obtain, additional information regarding the MHI. Information will consist of reliable data from local, regional, state or federal sources or from an income survey conducted by a reliable impartial source.

## Appendix A. Glossary of Terms

CT - The product of the free residual disinfectant concentration (C) in milligrams per liter determined before or at the first customer, and corresponding disinfectant contact time (T) in minutes, expressed by the formula  $(C) \times (T) = CT$ . (10 New York Code of Rules and Regulations (NYCRR) Part 5, Subpart 5-1, Public Water Systems.)

DWSRF - Drinking Water State Revolving Fund. A fund for financing, planning, design and construction of drinking water projects.

*E. coli* - *Escherichia coli*. A microscopic organism of fecal origin.

HUD - United States Department of Housing and Urban Development.

MCL - Maximum Contaminant Level. The maximum permissible level of a contaminant in water which is delivered to any user of a public water system as specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

MHI - Median Household Income.

NTU - Nephelometric Turbidity Unit. The system under which measured turbidity is reported.

PFLA - Project Financing and Loan Agreement. An agreement between the NYS Environmental Facilities Corporation and a loan recipient in order to provide financial assistance from the DWSRF for an eligible project.

POC - Principal Organic Contaminant. Any organic chemical compound belonging to specific chemical classes as described in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

Primary Contaminants - Any contaminant for which a maximum contaminant level has been established for protection of public health.

Secondary Contaminants - Any contaminant for which a maximum contaminant level has been established for reasons other than protection of public health (i.e., aesthetic purposes such as taste, odor and staining of fixtures).

Surface Water Treatment Rule - A regulation that requires that all surface water be treated in accordance with 10 NYCRR Part 5, Subpart 5-1, Section 5-1.30, Public Water Systems.

UOC - Unspecified Organic Contaminant. Any organic chemical compound not otherwise specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

## ATTACHMENT II

ANTICIPATED INTENDED USE PLAN  
SCHEDULE FOR THE  
October 1, 2011 - SEPTEMBER 30, 2012  
FUNDING PERIOD

## **Anticipated Intended Use Plan Schedule for the October 1, 2011 to September 30, 2012 Funding Period**

October 1, 2011	Start of the financing period
December 1, 2011	Cut-off date for receipt of complete Hardship Applications by applicants seeking grants
December 1, 2011	Cut-off date for receipt of complete applications for non-hardship projects that have been on the Project Readiness List, above the subsidized Funding Line for two or more consecutive IUP periods
March 1, 2012	Cut-off date for receipt of complete applications for subsidized financings from this IUP
May 13, 2012	Cut-off date for receipt of complete applications for unsubsidized financings from this IUP
To be determined	Leveraged financing
September 30, 2012	End of financing period.
To be determined	Principal Payment Dates for Leveraged Financing Projects. (Note: Principal and Interest payments will be required in 2012 on new leveraged financings, and recipients should contact EFC to discuss payment schedules and redemption dates on BANs to be refinanced with the DWSRF.)

ATTACHMENT III

FINANCING FEES  
AND  
FINANCING OPTIONS

# Financing Fees

## Issuance Costs

Fees associated with processing a DWSRF financing are based on the amount financed (i.e., project costs). Issuance costs are calculated as follows:

**Program Administration:** This cost is calculated by multiplying the project costs by 1.1%. This fee is used to support the administration of the DWSRF program. For non-hardship projects that receive short-term financing, an administrative fee equal to 0.6% will be charged.

**Direct Expenses:** The direct expense is calculated by multiplying the project costs by 1.0%. Direct Expenses represent the recipient's proportionate share of EFC's costs to complete the transactions necessary for a bond sale and include bond counsel costs, financial advisor fees, printing costs, rating agency fees and trustee fees.

**State Bond Issuance Charge:** Public authorities that sell bonds, including EFC, must collect the State Bond Issuance Charge. The State Bond Issuance Charge applies only to leveraged financings. The Division of Budget approved an extension to the State Bond Issuance Charge waiver through March 31, 2011. The rate for leveraged financings through March 31, 2011 is determined as follows:

<u>Financed Amount</u>	<u>Rate</u>
\$1,000,000 or less	0.168%
\$1,000,001 - \$5,000,000	0.336%
\$5,000,001 - \$10,000,000	0.504%
\$10,000,001 - \$20,000,000	0.672%
More than \$20,000,000	0.840%

## Maintenance Charge

An annual fee is charged to defray the cost of maintaining financing accounts during the life of the financing. This fee is calculated as 0.11 percent of the outstanding financing balance.

Exceptions to the above fees apply to certain financings. EFC will work with the applicant to determine the appropriate DWSRF financing type. Fees apply to the different types of DWSRF financing as follows:

### Long-Term Leveraged Financing

- Program administration fee
- Direct expenses
- State bond issuance charge
- Maintenance charge

### Long-Term Direct Financing

- Program administration fee
- Direct expenses
- Maintenance charge

Reduced Interest Rate Direct Financing

- All fees waived

Short-Term Interest Free Financing

- Program administration fee for non-hardship projects

Short-Term Market Rate Financing

- All fees waived

SRF Bond Market Rate Program

- Direct expenses
- State bond issuance charge
- Maintenance charge applies only if, and after, subsidy assistance becomes available

SRF Bond Guarantee Program

- Direct expenses

**Disbursement Requests**

Once a financing has closed, the project funds not disbursed at closing will be available on a weekly basis provided an acceptable disbursement request, supported with proper cost documentation, has been submitted to EFC. Disbursement request forms will be included in the PFA that the recipient will execute to obtain financing. The recipient should make certain proper financial coverage is in place in the event that a disbursement is delayed, denied or adjusted.

Disbursement request forms can be submitted via:

1. Mail to: NYS Environmental Facilities Corporation, 625 Broadway, Albany, NY 12207-2997
2. Fax to: (518) 402-7085
3. E-mail to: [DisbursementRequests@nysefc.org](mailto:DisbursementRequests@nysefc.org). Note: This e-mail address should only be used for the initial submission of each request and related documentation for the initial request. Follow-up documentation or information should be sent directly to the assigned EFC analyst.

Further information about the disbursement request process is available in the “Disbursement Request Information Sheet” which is one of the reference and guidance documents in the financing application package.

## Financing Options

The DWSRF provides short-term and long-term funding for eligible projects. In addition to the traditional DWSRF interest subsidy for projects, the EFC has developed a second set of financing options for projects that are either:

- a) not reachable on the current Project Readiness List in the DWSRF IUP, or
- b) need financing for eligible project costs above the subsidized amount available on the Project Readiness List.

Please keep the following in mind:

- All projects should be listed on the IUP Project Readiness List.
- No financings may be for a term in excess of the useful life of the project.
- The by-pass process may impact the availability of financing (see IUP for further information). A project below the subsidized funding line but ready for financing may be financed with the long-term market-rate or short-term market-rate options, which then may be automatically converted to interest-subsidized financing if a project becomes reachable following the by-pass process.

In addition to the Financing Options in the attached matrix, for projects that demonstrate a need for hardship financing (see the IUP), the DWSRF provides for reduced interest rate financings (as low as interest-free) and, for qualified projects, grants, to the extent that funds are available. In addition, the SRF Bond Guarantee Program may be used to provide preferred AAA/Aaa rates for recipients issuing bonds independently to finance SRF projects.

Short-term financing with either the short-term market-rate or the short-term interest-free program is intended to provide a seamless transition for project financing (minimizing or eliminating the need for other funding sources).

## DWSRF Financing Options Matrix

Timing	Long-Term			Short-Term	
Option	1. Bond Market Rate	2. Subsidized-Interest	3. Extended Term	4 Market-Rate	5 Interest-Free
<b>SRF Project Score</b>	Below the subsidized Funding Line	Above the subsidized Funding Line		Below the subsidized Funding Line or for project costs above the amount available interest-free	Above the subsidized Funding Line
<b>Benefit</b>	AAA/Aaa Borrowing Rates	AAA/Aaa Borrowing Rates Plus 1/3 <sup>rd</sup> interest rate subsidy for 20 years from project completion		AAA/Aaa Borrowing Rates,	0% Interest
			principal amortization may be extended from 20 up to 30 years (years 21-30 at unsubsidized Market Rate)		
	Economies of scale in pooled bond issue				
<b>Interest Rate Subsidy Timing</b>	Not Available Initially, becomes available in the year the project score is above a future funding line	Available from Closing	Available from Closing	Based on SRF borrowing costs in the high-grade tax-exempt short-term municipal markets	No Interest Expense
<b>Fees (as a % of SRF-Financed project costs unless otherwise noted)</b>	a. 1.0% Direct Expenses b. Sliding Scale State Bond Issuance Charge			None	0.6% Program Admin Fee
	c. Maintenance charge on outstanding balance (0.25% if interest-subsidy is provided)	c. 0.11% Maintenance charge on outstanding balance d. 1.1% Program Admin			
<b>Availability</b>	Ongoing, may be financed pursuant to a pool schedule.			Available for up to 3 years or readiness for long-term financing, whichever is sooner, for a recommended minimum term of six months.	
	Repayment term up to 30 years from project completion	Repayment term up to 20 years from project completion	Repayment term up to 30 years from project completion		
<b>Project Status</b>	Final costs known; Project approvals in place. Plans and Specifications, major contracts awarded, permits in place.			Approved Engineering Report, environmental review completed and other approvals as necessary for short-term financing. Once final costs are known, the project will be considered for long-term financing.	

**ATTACHMENT IV**

**DRINKING WATER STATE REVOLVING FUND  
PRE-APPLICATION FORM**

**Drinking Water State Revolving Fund (DWSRF) Pre-Application Form**  
**Preliminary Project Schedule And Cost Estimate**  
*For Intended Use Plan (IUP) Listing Purposes*

 New York State Department of Health  
 Bureau of Water Supply Protection  
 547 River Street, Flanigan Square, Room 400  
 Troy, New York 12180  
 Phone: (518) 402-7650  
 Fax: (518) 402-7659

**INSTRUCTIONS**  
**PRE-APPLICATION FORM, DWSRF PROJECT SCHEDULE AND COST ESTIMATE**

This form is used to gather preliminary schedule and cost information about your project. It will help us to determine project eligibility and a target date for providing your DWSRF loan. New York State Department of Health (DOH) staff may call you to verify this information and to develop a more detailed schedule for completion of all activities needed for a complete loan application. You should confer with your engineer and financial advisor regarding the schedule and cost estimate. If you have questions regarding the pre-application form, please call DOH at 1-800-458-1158 (within NYS State) or (518) 402-7650 for assistance.

**PROJECT INFORMATION**

This section of the form should include the **Name of the Water System**, **Name of the Municipality** serviced by the water system, and the **County** and **Legislative Districts** in which the project is located. A **Project Description** and the **Location** of the project should also be included (*e.g.*, Construct new water treatment plant at 69 Mill Road in Village of Waterburgh). The applicant should provide information regarding the **Population Served by the Water System** and the **Population Served by the Project**.

**Has the project been listed in a previous DWSRF Intended Use Plan (IUP)?** If a pre-application has previously been submitted it is not necessary to complete an additional application form. If project information, contact information, actual or targeted activity dates, or project cost estimates previously submitted have changed, the applicant may wish to submit a revised pre-application form. If so, please include the **DWSRF project tracking number**.

Indicate if **other funding sources** (*i.e.*, Rural Development, Housing and Urban Development, etc.) are available for the project. If other sources of funding are available please attach a separate sheet of paper and include the funding source, funding amount, type of funding (*i.e.*, grant, low interest loan), and date the funding was granted (letter of confirmation).

**CONTACT INFORMATION**

DOH will be using the contact information provided on the pre-application form to identify the borrower, the consulting engineer, and other key project contacts (if applicable). Individuals listed on this portion of the pre-application form may be contacted directly by DOH staff to answer technical questions.

**PROJECT COST ESTIMATE**

The accuracy of project costs will vary depending on the stage of project development. Please use the best available estimate when completing the form. Cost estimates should be provided for **Construction Costs**, **Engineering Fees** (planning fees, design fees, and construction fees), **Other Expenses** (legal expenses, bond counsel costs, force account costs, fiscal expenses, interest during construction, and miscellaneous expenses), **Equipment Costs**, **Land Acquisition Costs**, and **Contingencies**. **Financial assistance anticipated from other Funding Sources** (Rural Utilities, Housing and Urban Development, etc.) should be subtracted from the **Subtotal Project Costs** of the above listed cost estimates. The **Estimated Issuance Cost** (approximately 3% of project costs) should be added to the subtotal to determine **Total Amount to Finance**. If certain cost elements are unknown and cannot be reasonably estimated, please indicate on the form. Estimates for all expenses will eventually be needed so that sufficient monies for the project are included in the IUP.

**PROJECT SCHEDULE**

1. Provide the date (targeted or actual) when an approvable **Engineering Report** and all **Technical Submittals** will be completed. Required Technical Submittals include environmental review documents and findings, final plans and specifications, engineer's certification of technical requirements, certification of title to project sites, Minority & Women's Business Enterprise - Equal Opportunity (M/WBE-EEO) program documents. Additionally, the borrower should contact DOH and other responsible permitting agencies (*e.g.*, New York State Department of Environmental Conservation) for anticipated review and issuance times. Please contact EFC for applicable loan application deadlines and anticipated loan closing dates.
2. Provide the date (targeted or actual) of **Start of Construction** (*i.e.*, date Notice to Proceed was issued). Although the construction schedule may be very tentative when you complete the pre-application, it is important to set target dates as they indicate when DWSRF financing will be needed.
3. Indicate if the project is being submitted for **Refinancing**. If the project is being refinanced, include the actual date of Construction Completion.

## ATTACHMENT V

# DRINKING WATER STATE REVOLVING FUND APPLICATION CHECKLIST

The application checklist includes a list of all application items that may apply to a DWSRF project. The checklist includes boxes to indicate which items have been submitted to DOH and EFC. There are two (2) application checklists: one for publicly owned projects, which follows, and one for privately owned projects. The checklists are also available on the EFC web site at [www.nysefc.org](http://www.nysefc.org) (click on "Programs", then "Drinking Water State Revolving Fund", then "Application Process") or by calling EFC at 1-800-882-9721.

New York State Environmental Facilities Corporation  
625 Broadway Albany, New York 12207-2997  
(800) 882-9721 within New York State  
(518) 402-6971 Fax (518) 402-6972

## **APPLICATION CHECKLIST – PUBLICLY-OWNED SYSTEMS**

### **NEW YORK DRINKING WATER STATE REVOLVING FUND**

This document lists items that relate to applying for financing through the Drinking Water State Revolving Fund (DWSRF). The type of financing and the status of the project to be financed will determine which items will be required to be submitted as part of a DWSRF financing application. **Since all items may not be required to apply for financing, it is important that an Environmental Facilities Corporation (EFC) representative confirm with you which items do apply. If someone has not reviewed this Checklist with you, please contact EFC at (800) 882-9721 or (518) 402-7085. This will save you time and effort.**

**Part I details the minimum requirements to obtain a DWSRF short-term financing commitment. Part II details the requirements that may be necessary to release DWSRF short-term funds or obtain a DWSRF long-term financing commitment. Items in Part II of this Checklist may be submitted to EFC if they are available when submitting Part I items. Please keep a copy of the completed form for your reference.**

An explanation of each of these items is provided in the “**Description of Application Components**”, found in the paper version of the application package and on EFC’s website at [www.nysefc.org](http://www.nysefc.org) (Click on “Programs”, then “Drinking Water State Revolving Fund”, then “Application Process”). DWSRF application Forms and Guidance are also available on EFC’s website.

**Please Note: The following important steps should have been accomplished. If not, please contact EFC before proceeding to work on the financing application.**

- 1. Your project is listed on the Project Readiness List, as published in the current DWSRF Intended Use Plan (IUP). An engineering report or construction plans and specifications for your project should have previously been submitted to the Department of Health (DOH) for your project to be listed on the Readiness List.**
- 2. DOH has approved your engineering report or construction plans and specifications, or the report is under review by DOH.**
- 3. The potential adverse environmental and historic preservation impacts of the project have been assessed in the manner prescribed by the DWSRF.**
- 4. A water district has been established or expanded, or the maximum amount to be expended for such district increased, and Office of the State Comptroller (OSC) approval obtained, as needed (this is only applicable to towns and counties).**

5. A bond resolution has been adopted establishing the legal authority to issue debt for the project.

Applicant Name: \_\_\_\_\_  
 DWSRF Project No.: \_\_\_\_\_  
 Date Prepared: \_\_\_\_\_

## APPLICATION CHECKLIST – PUBLICLY-OWNED SYSTEMS

Please call EFC to review the Checklist at the beginning of the application process.

DOH/EFC Project Team Members _____	
DOH Engineering:	_____
EFC Finance:	_____
EFC Legal:	_____
EFC MWBE:	_____

(Team member names will be provided after your application is submitted.)

### **PART I – Items Necessary Prior to Short-Term Financing Commitment**

Please submit items in Part I in order to close a DWSRF Short-Term financing. Items in Part II can be submitted with Part I items if they are currently available. Check the appropriate boxes below.

No.	Checklist Item	Submitted Earlier	Submitted with this Application
1.	Application Form <sup>1</sup>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Municipal Bond Resolution(s) a) Bond Resolution (Certified Copy) b) Proof of Publication of Permissive Referendum (if applicable) c) Proof of Publication of Estoppel Notice	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
3.	Environmental Review Documents and Findings <sup>2</sup> (see SEQR/SERP guidance in the “Environmental Review Requirements” )  OPRHP / SHPO Project Review Letter <sup>2</sup> (Initial or Final Letter)	<input type="checkbox"/>  <input type="checkbox"/>	<input type="checkbox"/>  <input type="checkbox"/>
4.	Engineering Services Contract a) Executed Contract (for eligibility review) b) MWBE Utilization Plan or Good Faith Effort Documentation for Contract (for MWBE approval)	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
5.	Financial Information (Only for Applicants <u>other than</u> counties, cities, towns and villages) Financial statements (audited if available) for the three (3) most recent fiscal years.	<input type="checkbox"/>	<input type="checkbox"/>

No.	Checklist Item	Submitted Earlier	Submitted with this Application	Not Applicable
6.	Intermunicipal Agreements (draft or final agreements critical to the project)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Co-funding Documentation			
	a) Awarded Grants	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b) Closed Third Party Loans	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c) Co-funding Cost Documentation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Please call EFC to review the Checklist at the beginning of the application process since all items listed below in Part II may not apply to your specific project.**

**PART II – Items That May Be Necessary Prior to Funds Disbursement or for Long-Term Financing**

Some of the items in Part II will be needed by EFC after closing a short-term financing to allow release of DWSRF funds and later to roll your project into DWSRF long-term financing. The type of financing and the project's schedule and status at the time of application will determine which of the following items are required for release of disbursements and as part of a complete application for DWSRF long-term financing.

The disbursement of funds will be contingent upon satisfactory completion of the following items, as deemed applicable by EFC. Timely availability of DWSRF funds will be dependent, in part, upon the accuracy and completeness of these submissions, within a reasonable time frame for EFC to review and comment or request clarification, as necessary. For this reason, applicants are strongly encouraged to develop and submit these materials as soon as practicable, to avoid delayed release of disbursement requests.

**Please call EFC to discuss which of the following items apply. Check the appropriate boxes below.**

No.	Checklist Item	Submitted Earlier	Submitted with this Application
1.	Completed Application Checklist <sup>1</sup>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Supplemental Municipal Bond Resolution (if needed)		
	a) Supplemental Bond Resolution (Certified Copy)	<input type="checkbox"/>	<input type="checkbox"/>
	b) Proof of Publication of Permissive Referendum (if applicable)	<input type="checkbox"/>	<input type="checkbox"/>
	c) Proof of Publication of Estoppel Notice	<input type="checkbox"/>	<input type="checkbox"/>
3.	Financial Information Current Adopted Capital and Operating Budgets	<input type="checkbox"/>	<input type="checkbox"/>
4.	OPRHP / SHPO Final Project Review Letter <sup>2</sup>	<input type="checkbox"/>	<input type="checkbox"/>

No.	Checklist Item	Submitted Earlier	Submitted with this Application	Not Applicable
5.	Capacity Development Form <sup>1</sup> (for small community water systems serving a population of 3,300 or less)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Consolidation Plan, Agreements and Approval	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Construction Plans and Specifications	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8.	Agreements for Professional Services			
	a) Engineering Planning Services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b) Engineering Design Services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**OUTPUT AND OUTCOME MEASURES**

## **Environmental Results Grant Requirements**

As required by EPA Order 5700.7, Environmental Results under EPA Assistance Agreements, New York will provide the following output and outcome measures in its DWSRF Biennial/Annual Reports and IUP:

### **NATIONAL REPORTABLE OUTPUTS/OUTCOMES FOR DWSRF**

1. The annual percentage of assistance agreements to bring entities into compliance.
2. Fund utilization rate [cumulative financing agreement dollars to the cumulative funds available for projects] for the DWSRF.
3. Return on Federal Investment [cumulative dollar amount of assistance disbursements to projects divided by cumulative federal outlays for projects].
4. The cumulative number of project completions.

### **ANTICIPATED OUTPUTS FOR DWSRF**

1. Number of binding commitments (50).
2. Number of financing agreements (50).
3. Number of assistance agreements for system compliance (40).
4. Number, dollar amounts, and/or population served of projects financed (50/\$150M).
5. Our fund utilization rate remaining higher than the national average.
6. Our rate at which projects progressed as measured by disbursements as a percent of assistance provided remaining at or higher than the national average.

### **ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) FOR DWSRF**

1. Number of projects initiating operation resulting in improved compliance (25).
2. Improved compliance for systems receiving DWSRF assistance.

### **ANTICIPATED OUTPUTS FOR SET-ASIDES**

1. Small System Technical Assistance
  - Number of systems receiving training (600).
  - Number of systems receiving on-site technical assistance (100).
2. State Program Management
  - Data management system maintained.
  - State required updates to primacy made.
3. Source Water Protection Program
  - Number of source water strategies in place and implemented (15).
4. Capacity Development Program
  - Implement statewide strategy.

### **ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) FOR SET-ASIDES**

1. Improved compliance for systems receiving Technical Assistance.
2. Attainment of primacy for new rules.
3. Improved data quality.
4. Improvement to capacity development baseline.

## Public Hearing and Public Comment Information

### **Public Meeting and Hearing:**

A joint public meeting and hearing to review the draft FFY 2012 CWSRF IUP and DWSRF IUP will be held on **Wednesday, August 3, 2011**, at 10:00 a.m. in the Stedman Room of the William K. Sanford Town Library in the Town of Colonie, Albany County. The Library is located at 629 Albany Shaker Road, approximately ¼ mile east of Exit 4 off I-87. Pre-registration is not required. Reasonable accommodations will be provided for disabled persons if requested in advance.

### **Webinar:**

**NYS EFC and NYS DOH will host a webinar on Wednesday, August 10, 2011, at 10:00 a.m.** This event will present an overview of the 2012 IUPs for the CWSRF and the DWSRF, as well as an opportunity to answer questions. Log-on instructions for this webinar will be posted on NYS EFC's website at: [www.efc.ny.gov](http://www.efc.ny.gov).

### **Public Comment Instructions:**

The NYS DOH is extending the public comment period on this FFY 2012 draft IUP from August 25, 2011 until September 2, 2011. Comments will be accepted by mail or fax until close of business **September 2, 2011**.

Comments should be addressed to:

Mr. Roger Sokol, PhD.  
Director, Bureau of Water Supply Protection  
NYS Department of Health  
Flanigan Square, 547 River Street, Room 400  
Troy, New York 12180-2216  
FAX: 518-402-7659

Or sent by email to his attention at:

[bpwsp@notes.health.ny.us](mailto:bpwsp@notes.health.ny.us)

(If sent by email please reference "2011 Draft IUP comments" in the subject line)
