Secure File Transfer 2.0
Quick Reference Guide

Secure File Transfer 2.0 (SFT) is a utility that provides solutions for the handling of sensitive information, including financial files, medical records, legal documents, personal data, etc. SFT securely collects, stores, manages, and distributes information between the NYS Health Commerce System (HCS) users. The utility will securely and easily transfer files and folders of up to 2GB in size between two or more users. It uses email addresses from the HCS Communications Directory to send and receive packages. Files remain on the HCS for 14 days. This utility is similar to your email system. It has an Inbox, Drafts, Sent, Templates and Trash mailboxes.

Additional information...

How do I search using the Check Recipient?
1. Enter the recipients last name, email address or user ID in the To field. If you are sending to more than one recipient, separate the information with a comma (,)
   between each user. Also, you can carbon copy (cc) and blind carbon copy (bcc) recipients
   by clicking on Show CC/Bcc link below the To field.
2. Click Check Recipient
3. From the results, check the box next to the user you want to receive the package, click OK (you may have to scroll down)
   NOTE: If you entered more than one recipient, each result will happen one at a time, just repeat Step 3 above for each user. For example, if you are sending a package to three people and you enter Smith, Patel, Jones. The system will look for the people in the order they were entered. It will search for Smith first then you select from the results, then system will search for Patel next then you select from the results; and then for Jones last then you select from the results. It will populate the To field with each of their information (name and organization).
