New York State Legislature Clinical Staffing Committee Bill

Due Date: January 1, 2022

Purpose
The bill represents an alternative to the mandatory nurse staffing ratio bill. The clinical staffing committee will work collaboratively with nurses and other members of the care team to design and implement a hospital staffing plan. The Clinical Staffing Committee allows for frontline team members to have a role and voice in the staffing process.

Committee Responsibilities

- Development and oversight of implementation of an annual clinical staffing plan
- Semiannual review of the staffing plan against patient needs and known evidence-based staffing information, including the nursing sensitive quality indicators collected by the general hospital
- Review, assessment and response to complaints regarding potential violations of the adopted staffing plan, staffing variations or other concerns regarding the implementation of the staffing plan and within the purview of the committee
- Staffing plan to be submitted by July 1st 2022 and annually thereafter. Implementation will occur no later than January 1st 2023 and annually thereafter
- Clinical staffing plan to be posted in a publicly conspicuous area on each patient care unit

The Clinical Staffing Committee was formulated and began meeting in January of 2022. Please see the Committee Charter document that includes the committee responsibilities, member eligibility, scope of representation from the various types of clinical units, frontline team member names and titles, and leader membership. Individuals on this Committee were nominated and selected by their peer staff to represent the various units through an already-established Shared Governance Committee of United Memorial Medical Center. The Clinical Staffing Committee Meetings are monthly with active participation on pertinent clinical staffing discussions resulting in creation and approval of a Clinical Staffing Plan annually. Minutes are sent out to each committee representative and are made available to be shared with any interested clinical staff.

The United Memorial Medical Center Bank Street Campus Nursing Staffing Plan has been developed by utilizing staffing grids as a guide for the various units that reflect the expected/ideal clinical staff to patient ratios. The grids reflect direct patient care givers: nursing staff (RN/LPNs), Patient Care Technicians (PCTs) and unit/department secretaries. The newly established Clinical Staffing Committee members reviewed, revised and approved through consensus the staffing grids for their perspective units. Please see Attachment 2 for the latest staffing grids by units. Staffing information including the unit staffing plan and actual daily staffing shall be posted within a conspicuous public area on each patient care unit.

United Memorial Medical Center’s Nursing Supervisors have easy access to each 4 week nursing schedule by unit and has access to current patient census for all units. The Nursing Supervisor receives all sick calls in order to enhance appropriate triaging of any full- time, part- time, or per diem staff members to the unit of need. Floating staff from one unit, to a similar unit, will occur when necessary to meet unit/department, and patient needs.

On the off shifts and weekends, an RN Nursing Supervisor oversees the staffing coordination so that 24/7 staffing needs at United Memorial Medical Center can be addressed. The unit charge RN’s are expected to communicate closely with the Nursing Supervisor by addressing changes/increases in patient acuity level that may necessitate additional staffing needs. Hospital census, that include new admissions, patient transfers and expected discharges, are numbers assessed each shift in order to anticipate any changes to staffing needs for the upcoming shifts.

In situations in which the expected nurse to patient ratio for safe staffing cannot be met by the number of staff previously scheduled, many options are then utilized include:

- Asking staff to work an additional 4 hours or 8 hours to an existing shift
- Switch scheduled shift/day off to another shift/day to meet the present need
- Adjust the charge nurse to take a full patient assignment in addition to the charge nurse responsibilities
- Assess the skill mix and experience (including specialty certification) of team members in house and resource share as appropriate to meet the needs of acuity in individual unit/departments
- Offer additional pay incentives to staff nurses in times of high RN vacancy rates
- Utilize RN management to take a patient assignment
- Offer office or specialty area nurses to assist on medical-surgical units as a “helping hands” nurse that is paired with a scheduled unit staff nurse
• Agency RN utilization with contracts for areas with a vacancy
• Available Weekend Program
• Available Premier Per Diem Program

Grids are developed as a guide for shift to shift unit based staffing. Decisions to adjust up or down will be made based on patient factors and skill mix of hospital staff.
