

Dear New York State Health Care Professionals,

This is to inform you that we have agreed to partner with the various regional stroke conferences around the state instead of convening our annual conference in 2015. We encourage you to attend. We are grateful for the opportunity these regional conferences provide to disseminate the annual update about stroke care in New York State. The information will include the best practices for tPA administration learned from the Coverdell learning collaborative and the latest Stroke Quality Initiative for 2015 involving pre-notification by EMS. Please note registration will be handled by the organization offering each conference.

Calendar of Conferences

Date/Location	Conference	Registration Information
