

Primary Care and Population Health

Sarah C. Shih, MPH

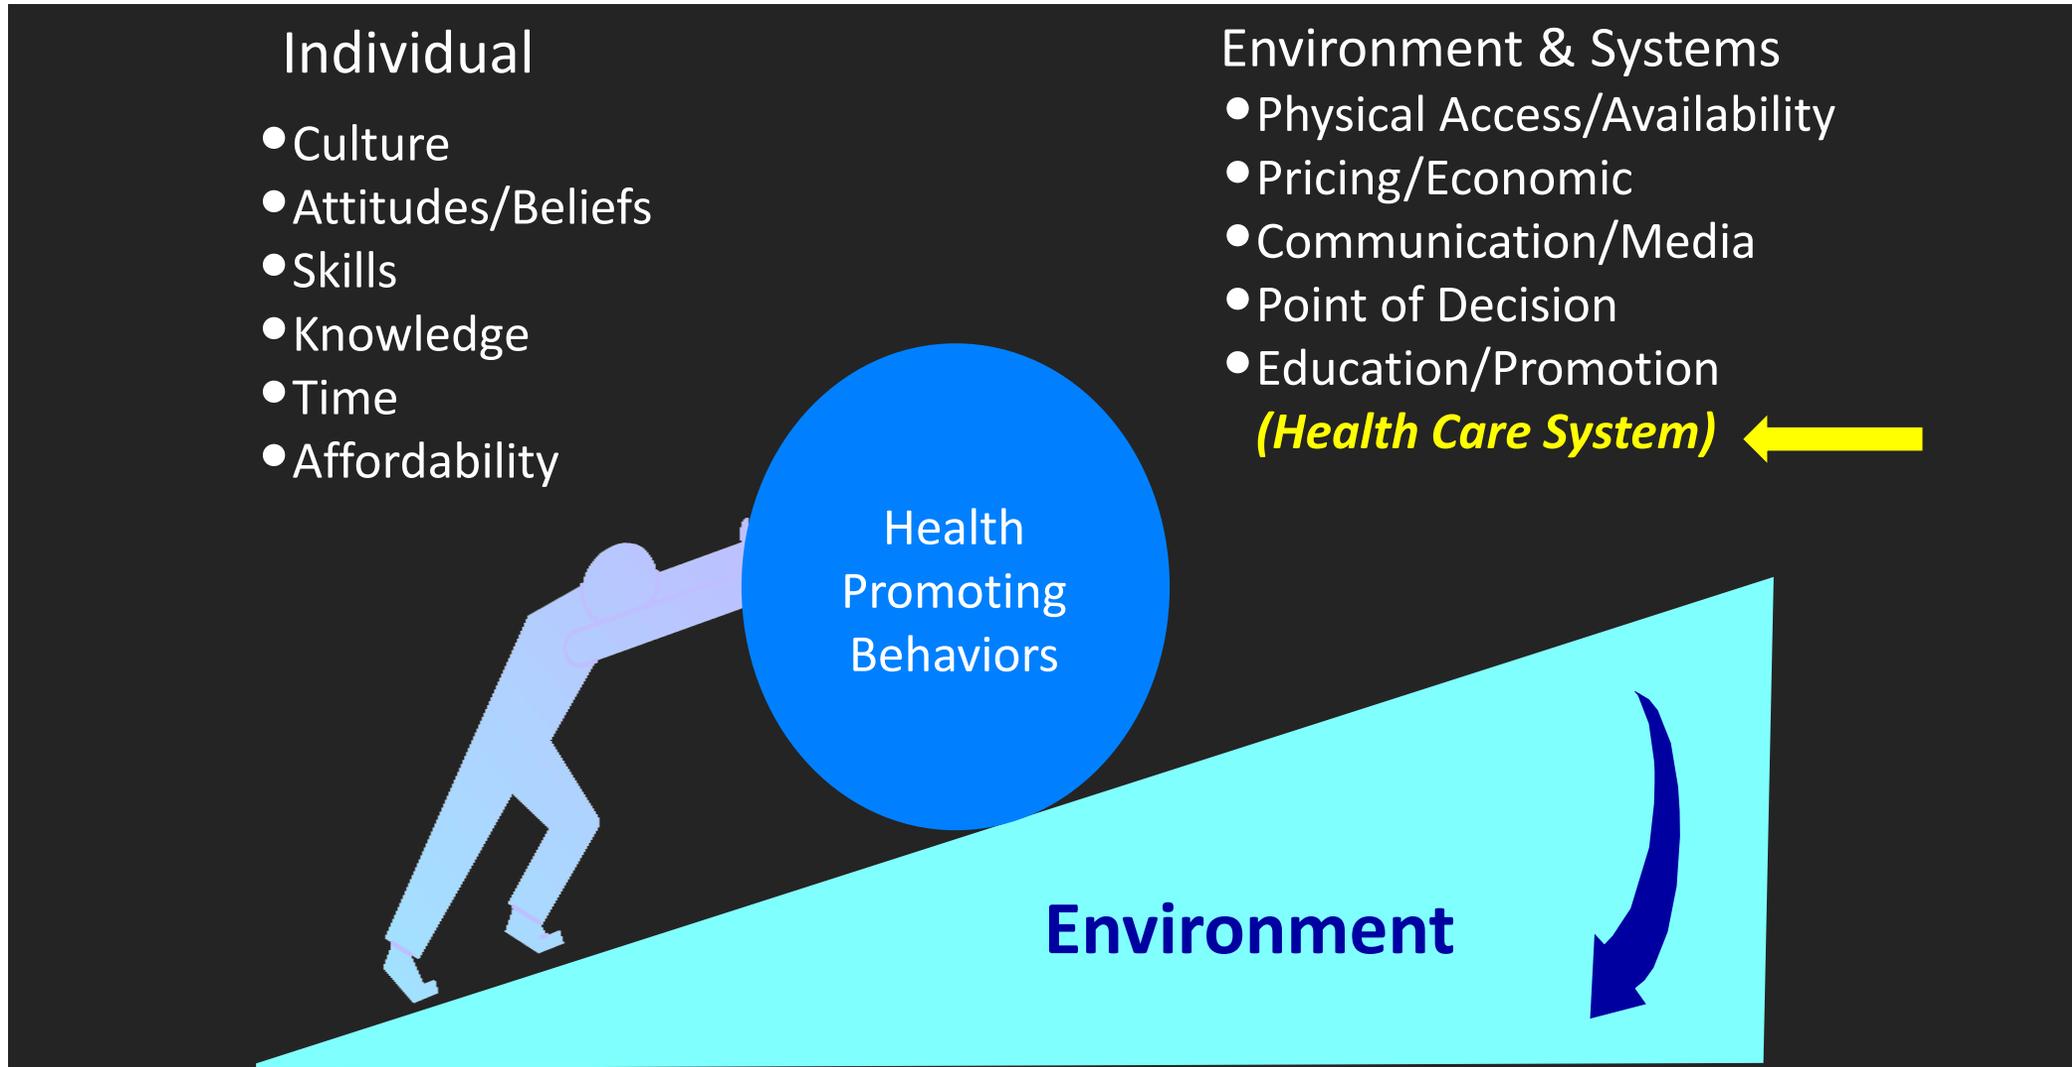

Assistant Commissioner, Primary Care Information Project

Heart Disease, Stroke, Cancer = 50% of all NYC Premature Deaths

Source: Zimmerman R, Li W, Lee E, Lasner-Fratner L, Van Wye G, Kelley D, Kennedy J, Maduro G, SUN Y. Summary of Vital Statistics 2013: Mortality, New York, NY: New York City Department of Health and Mental Hygiene, Office of Vital Statistics, 2015. (Appendix A, Table M9)

Changing Population Health

Actionable Information in NYC Primary Care Information Project (PCIP)

Mission

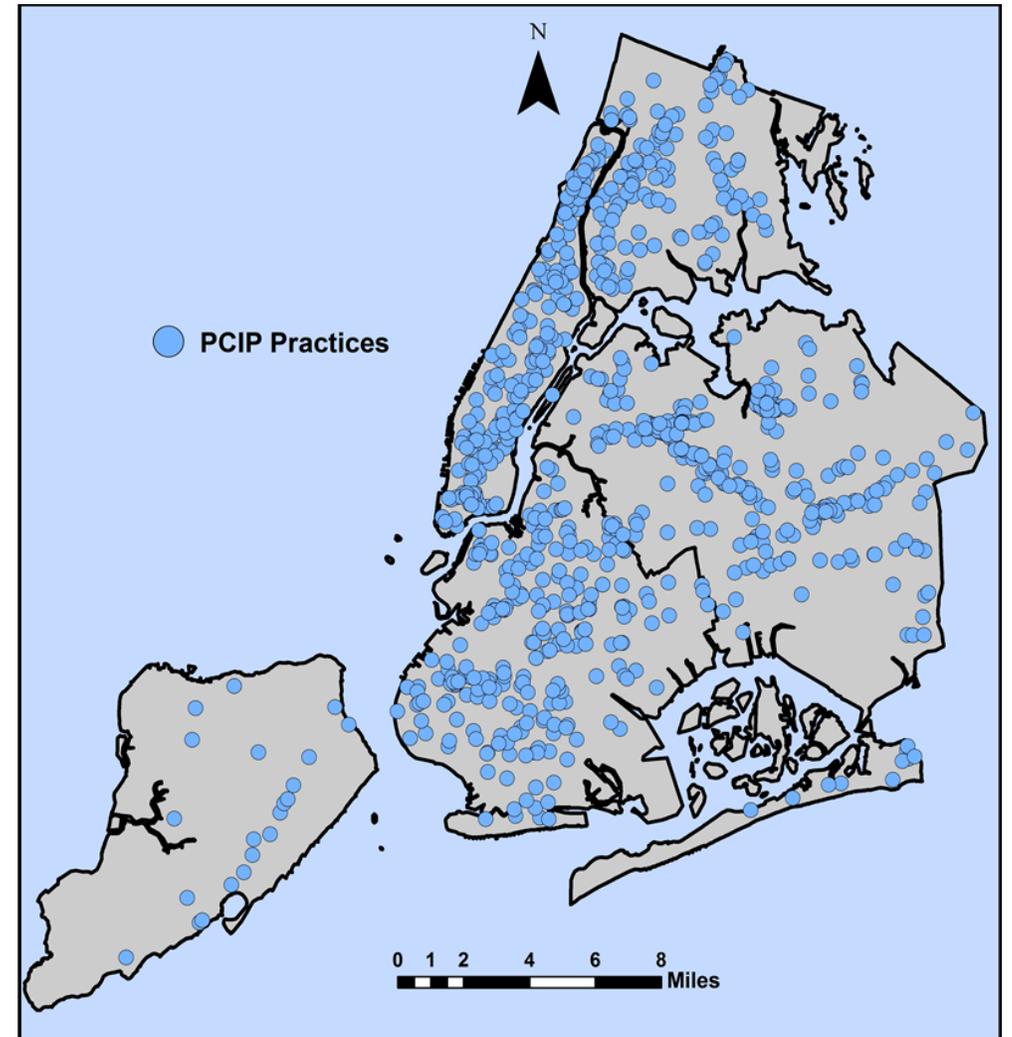

- Promote and support primary care

Goals

- Promote Adoption of the Chronic Care Model
- Use Payment Reform to Advance Population health
- Monitor the NYC Healthcare System

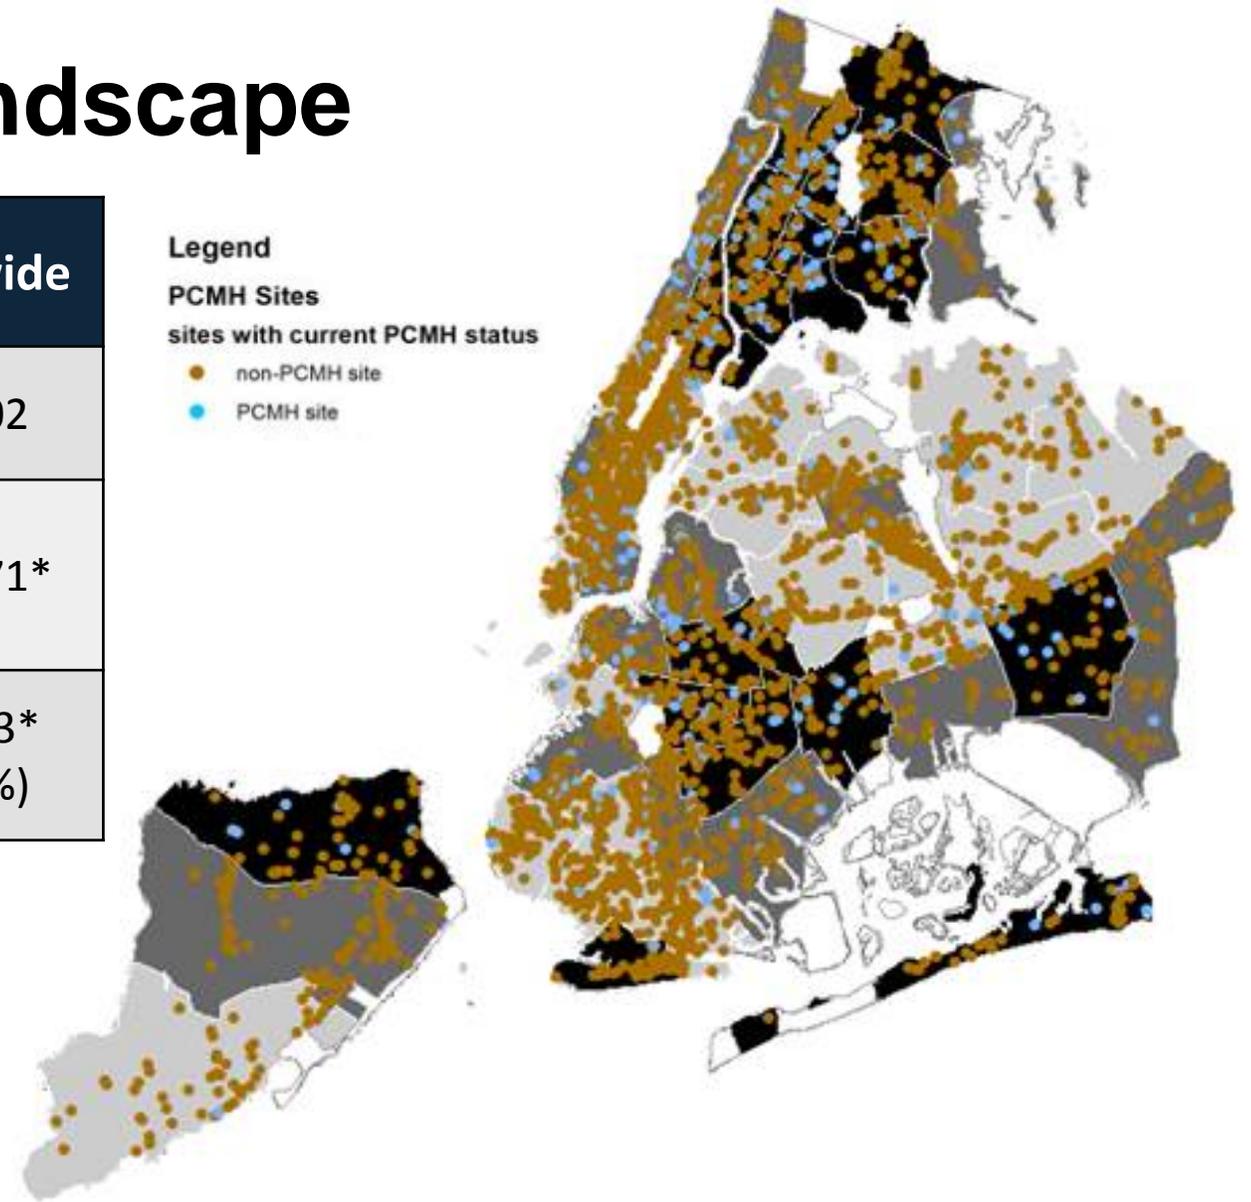

Working with

- Over **16,000** providers joined PCIP and the Regional Extension Center (NYC REACH), including more than:
 - 1095 independent practices
 - 63 community health centers
 - 54 hospitals & outpatient clinics

NYC's Primary Care Landscape

	Zone A	Zone B	Zone C	Citywide
Population (Millions)	2.953	2.214	3.235	8.402
Primary Care Providers	3,932	2,847	4,655	10,171*
PCPs who are PCMH	1,100 (28%)	600 (21%)	609 (13%)	2,333* (23%)

“A Strategy for Expanding and Improving the Impact of the Medical Home Across New York City”

For more information, go to: <https://www.uhfnyc.org/publications/881151>

*The citywide total for PCPs and PCPs who are PCMH is less than the sum of across zones because some PCPs work in multiple sites across zones.

Obesity and Diabetes in NYC
