A. Statement of Certification:

I, _____________________________________________________, upon inspection of this water system do hereby certify that to the best of my knowledge, this system, including distribution system, service lines, drinking water supply plumbing, including within homes/building served, contains none of the following:

- lead service lines or lead pipes; plastic pipes with lead plasticizers or plastic service lines with lead plasticizer;
- leaded brass or bronze fittings and/or fixtures that do not meet the lead leaching standards; or lead soldered pipe joints; or copper pipes or copper service lines.

Currently, plumbing fixtures and appurtenances certified as NSF Standard 61, Section 9 meet the above criteria.

B. Application for Waiver:

To apply for a waiver from lead and copper sampling, submit the following:

- Original copy of laboratory results for initial six month lead and copper sample result for each water system distribution system.

I understand that this document shall become a permanent record of this public water system and that I am legally responsible for the validity of the information provided. I certify that all information submitted in support of this application for a waiver is true to the best of my knowledge.
