

# Radon Publications from the New York State Department of Health

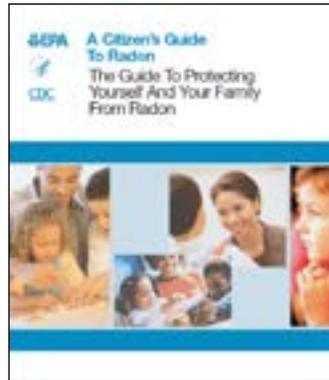

**Build a Green Home - pub #3234.** This brochure describes Radon Resistant New Construction (RRNC) using techniques to seal soil gas entry points, prevent radon gas intrusion, and vent the radon outdoors.

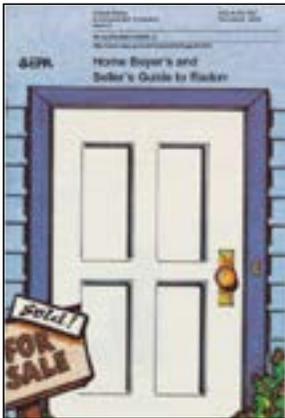

**Protect Your Family from Radon - publication #3168.** This brochure contains a NYS map that shows high risk radon counties. It explains radon levels and what you can do to protect your family.

**Consumer's Guide to Radon Reduction - publication #3152.** This 18-page booklet is for people who tested their home for radon and have elevated radon levels. It can help you select a qualified radon mitigation contractor to reduce the radon levels in your home, determine an appropriate radon reduction method, and maintain your radon reduction system.

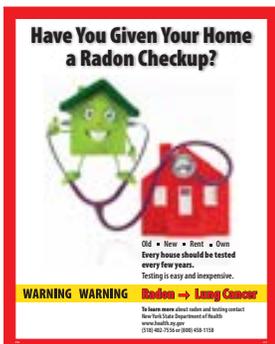

**A Citizen's Guide to Radon - publication #3153.** A 16-page booklet describing how radon gets into your home, how to test for radon, what the results mean, how to lower the radon level, and radon risks.

**Home Buyer's and Seller's Guide to Radon - publication #3179.** A 44-page guide that answers important questions about radon and lung cancer risk. It also answers questions about testing and fixing for anyone buying or selling a home.

**Building Radon Out - publication #3232.** This 81-page, illustrated guide contains information to educate home builders about radon-resistant new construction including: basic questions and detailed answers, specific planning steps before installing a system, detailed installation instructions with illustrations, tips and tricks when installing a system, marketing know-how when dealing with home buyers, and architectural drawings.

**Have You Given Your Home a Radon Checkup pub #2789.** This large and colorful poster drives home the importance of testing your home for radon every few years.
