

RFA# 1304150931

New York State Department of Health and the  
Spinal Cord Injury Research Board (SCIRB)  
Request for Applications

Institutional Support for Spinal Cord Injury Research

AMENDMENT #1

MODIFICATION

The paragraph on Page 2 that describes Bridge Funding as an eligible activity now reads as follows (correction noted in bold text):

2. Bridge Funding - to support the initiation or continuation of any peer-reviewed spinal cord injury research project that received a Priority Score (or fundable score, as appropriate to the funder's scoring method) dated no earlier than ~~July 4, 2012~~ **April 1, 2012**, for which funds are not available to support the research project at this time.

CLARIFICATION

Note that only **one application per institution** will be accepted. It is anticipated that each application may have multiple projects within it. However, the sum of the funding requested for multiple projects cannot exceed the total maximum funding available as designated for each institution in Attachment 1 of the RFA.
