

**TO:** Local District Commissioners, Medicaid Directors

**FROM:** Betty Rice, Director  
Division of Consumer and Local District Relations

**SUBJECT:** Rodriguez v. Novello

**EFFECTIVE DATE:** Immediately

**CONTACT PERSON:** Priscilla Ferry or Gail Phelan @ (518) 474-5271

The purpose of this GIS is to clarify and elaborate on the assessment of Personal Care Services pursuant to the Court's ruling in Rodriguez v. Novello and in accordance with existing Department regulations and policies.

Social services districts, including those using locally developed task based assessment (TBA) instruments, must complete a comprehensive assessment of the patient's health care needs in order to determine the patient's appropriateness for services and the amount, frequency and duration of a service authorization. Department regulations (18 N.Y.C.R.R. § 505.14) require both a social and nursing assessment in the Personal Care Services patient assessment process.

The assessment process should evaluate and document when and to what degree the patient requires assistance with personal care services tasks and whether needed assistance with tasks can be scheduled or may occur at unpredictable times during the day or night. The assessment process should also evaluate the availability of informal supports who may be willing and available to provide assistance with needed tasks and whether the patient's day or nighttime needs can totally or partially be met through the use of efficiencies and specialized medical equipment including, but not limited to, commode, urinal, walker, wheelchair, etc.

When the district, in accordance with 505.14 (a)(4), has determined the patient is appropriate for the Personal Care Services Program, a care plan must be developed that meets the patient's scheduled and unscheduled day and nighttime personal care needs. In determining the appropriate amount of hours to authorize, the district must review the physician's order and the nursing and social assessments to assure that the authorization and scheduling of hours in combination with any informal support contributions, efficiencies and specialized medical equipment, is sufficient to meet the patient's personal care needs.

Social services districts should authorize assistance with recognized, medically necessary personal care services tasks. As previously advised, social services districts are **NOT** required to allot time for safety monitoring as a separate task as part of the total personal care services hours authorized (see GIS 99 MA/013, GIS 99 MA/036). However, districts are reminded that a clear and legitimate distinction exists between "safety monitoring" as a non-required independent stand alone function while no Level II personal care services task is being provided, and the appropriate monitoring of the patient while providing assistance with the performance of a Level II personal care services task, such as transferring, toileting, or walking, to assure the task is being safely completed.

Completion of accurate and comprehensive assessments are essential to safe and adequate care plan development and appropriate service authorization. Adherence to Department assessments requirements will help assure patient quality of care and district compliance with the administration of the Personal Care Services Program.
