

### **3M EAPG Mainframe Software Known Product Issue Alert Regarding Visit Rate Codes**

---

The mainframe version of the April 2011 EAPG Grouper-Pricer contained a rate code line consolidation problem. The grouping and reimbursement for all visit based APG rate code claims having service dates on or after April 1, 2011 is incorrect if the claim listed multiple dates of service. The visit rate codes impacted by this problem include rate codes 1400, 1401, 1407, 1408, 1413, 1416, 1435, 1438, 1444, 1447, 1501, 1504, 1507, 1510, 1513, 1516, 1519, 1522, 1525, 1528, 1534, 1537, 1561, 1564 and 1567. 3M has identified the problem and submitted an updated Grouper-Pricer with a fix to the rate code line consolidation problem. The updated EAPG Grouper-Pricer will be promoted to production and implemented on May 19, 2011. Service providers may resubmit the incorrectly paying visit based rate code claims on or after May 20, 2011.
