

NYS DOH - Procedure Codes Subject to APG Ancillary Policy

Free-Standing DTC and Amb Surg Ancillary Policy (Effective July 1, 2011): To receive payment for the ancillary procedure codes listed below based on normal APG payment logic, modifier U6 must be coded at the procedure line level. Column [H] shows how the procedure will pay at the line level when modifier U6 is coded on the procedure line level. If modifier U6 is NOT coded along with a procedure listed below, then procedures that group to non-packaged ancillary APGs will pay zero and procedures that group to packaged ancillary APGs will receive a payment reduction at the procedure line level as listed below in column [I]. Each packaging ancillary will reduce the claim weight by procedure's APG weight, which essentially unpackages the ancillary by removing the portion of the claim's weight associated with the packaged line. APGs NOT on this list will be reimbursed based on the normal APG payment logic whether or not modifier U6 is on the procedure line level. Please see the Modifier U6 policy for more information.

Hospital Based Ancillary Policy (Effective July 1, 2009): At this time, since hospitals are not subject to the U6 modifier columns [H] and [I] do not apply to hospital claims. When hospitals bill the procedure codes below the procedure codes will pay according to basic APG logic, whether or not modifier U6 is coded on the claim. However, hospitals are required to include on APG clinic claims all ancillary services as defined by this list, whether or not the service was performed by the billing hospital. For more information on the hospital ancillary billing policy see section 4.4 of the APG Provider Manual.
