\*Note: In acknowledgement of the need for checks against fraud and abuse, but to ensure a client's access to services, service utilization in excess of the annual claim limits and "soft" unit limits will be based on medical necessity and subject to post-payment review. Documentation of the medical necessity for extended durations must be kept on file in the client's record.

\*\*What is non-travel off-site?

Services provided off-site are paid a significantly higher rate due to the amount of practitioner time spent in travel status; therefore, Medicaid will only reimburse one off-site travel claim per day, per location. This means that if a practitioner is providing a service to more than one individual at the same location, or if multiple services requiring separate claims are being provided to one individual at an off-site location, only one off-site claim may be submitted for any services provided at that off-site location. Any subsequent claims for services provided at the same location will require that the practitioner submit a claim using the appropriate "on-site/non-travel off-site" rate code.
