Calculations cost of care

When multiple care services are involved, calculating the total cost of care involves adding the costs of the individual integrated care services, as illustrated below.

- **Total costs of chronic bundle** (includes costs of Potentially Avoidable Complications [PACs])
- **Total costs of episodic bundle** (includes costs of Potentially Avoidable Complications [PACs])
- **Other health care costs**
  - Maternity and Prenatal care costs
  - Diabetes care costs
  - Integrated Physical & Behavioral Primary Care costs
  - **PAC costs**
  - **PAC costs**

**Total costs of care for individual beneficiary**
