

Cloud-based solutions for handling state's claims data

All - We are trying to pursue cloud-based solutions for handling the state's claims data prior to the opt-out, and have heard that other PPS have received approval on certain solutions. Would anyone know the exact solutions?

Best regards,
Fernando Torres from the Alliance for Better Healthcare

We are following a similar approach and are going to utilize Microsoft's Azure services. We are following FLPPS' lead on this, as they have already been through the process including the submission of the security assessment affidavit specific to this vendor.

Joe - thanks so much. Would you mind sharing with me the contact person at Microsoft Azure?
