

Project Management Tools?

Dear Fellow Colleagues,
We are in the process of selecting a project management tool to manage our projects. I understand there are different tools available out there. I would like to know if any of you are ahead of us and have already begun using a tool. The tool I know available are MS Project and Performance Logic. Are you using any of these or tools different from these? I would like to hear your thoughts in this regard.
Thank you.
Swathi Gurjala.
