

RHIO Connectivity and Substance Abuse Providers

So, as I understand it, RHIO connectivity is a fundamental part of the integration process. However, I still have not heard a decision about how DSRIP will work around 42 CFR Part 2 confidentiality regulations to allow us to connect our EMR to the RHIO. Is there are plan for this? In the event that we could do that, Catholic Charities has gotten a quote from our provider (NetSmart) on the cost of that connectivity. How would we leverage DSRIP dollars to offset that cost?
