

The PPS IT Information Session - January 21, 2015

We're underway with the IT Information Session today. Lots of great DSRIP related IT information and speakers to come over the next three hours, and we'll be posting some highlights here. A great kick-off by Greg Allen: "We want to be a national and international leader in improving the patient experience... let's get this right, and let's be proud of this."

Collaboration ITStrategy

Great mission statement presented by Greg Allen "In order to effectively change the delivery of care, we have to have access to actionable information."

Over 90% of the DSRIP metrics are calculated by the State, and PPSs will have access to robust data and analytics throughout DSRIP.
The key point: how will the system prepare for this information? How will we handle it and act upon it in a meaningful way? These are key questions for PPSs over the upcoming months.

Guiding Principles from the Health Homes initiative:
1. Collaborate across multidisciplinary teams
2. Import data from multiple systems to display holistic. 360 degree views
3. Leverage industry assessment models
4. Mandate care plans to help achieve desired outcomes

Great insights from our CIO panel! We look forward to hearing from others through the MIX and future sessions.

CIO Panel:

- Jitendra (Jeet) Barmecha, CIO at St.Barnabas Health System
- Kumar Chatani, CIO at Mt. Sinai Hospital
- Charles (Chuck) Fennel, CIO at St. Joseph's Hospital Health Center

For those that missed it you can skip to 2 hour mark in the recording once it is posted.

Great message from Kumar Chatani, CIO at Mt. Sinai Hospital: "Collaborate, collaborate, collaborate. The more we work together, the faster we'll get there. None of us can do this alone."
