All Measures Worbook

Good morning!
This is a .xlsx version of the updated measures listed in the April 2, 2015 version of *Delivery System Report Incentive Payment (DSRIP): Measure Specification and Reporting Manual.*
I used a process similar to the one I described for the Domain 1 measures. This one, however, took a little more hand-editing to clean up the annotations and move them to their own columns. Reformatting this way makes those annotations available as grouping critera.
When I build these things, I try as much as possible to follow the principles of "Tidy Data" that Hadley Wickham describes in great detail in a paper by the same name.
Designed for a range of audiences, this file includes some additonal information that I thought might be useful.
Do you have a different version? What features can we add to this to make it more useful?

Jamie, this is very helpful. Thank you for sharing! My team is in the process of creating a similar document in Access. I will share that when ready.

By Swathi Gurjala, 9 months ago 1

That's great news, Swathi! We are working on something similar, which was started in Access. The plan, however, is to move all of the separate Access databases that were created as "band-aid" solutions to a more permanent platform that performs better, like postgreSQL.

HI, I want to thank Jamie and Swathi for sharing their measure's spreadsheets. I was about to begin work on such a workbook and greatly appreciate this help. I would like to suggest that this group consider the issue raised by Priti Banqia on May 21 concerning the process for chart abstraction for December measure reporting. I suggest that to effectively manage the chase logic for locating charts, to provide nurses with appropriate and efficient tools for data abstraction, and to facilitate an audited data collection process a single certified HEDIS vendor should be contracted state wide to modify chase and HEDIS chart abstraction tools to the particular requirements of the DSRIP measures. This could most efficiently be done by NUS DOH directly (similar to the arrangement with the vendor for the PAM instrument.) Should the state fail to do this I strongly suggest that PPS's consider collaborating to do so, but time is of the essence. There is already a very short window to accomplish this. We might begin by asking for a meeting with Anne Schettine, who I understand is going to oversee the P4P measure reporting for NYS DOH. Anne has overseen QARR reporting for many years.

Very nice work Jamie. Thanks for sharing. I see the reporting schedule for measures that applies to the annual submission of the completed Member Detail file. I cannot however find a reporting schedule for the items in the Domain 1 DSRIP Project Requirements Milestones and Metrics. Is there a similar schedule for providing updates to the network provider list? Will PPSs be required to submit supporting documentation like contractual agreements and screen shots of secure messaging use, EHR vendor documentation, etc? Or are those items just to be collected/stored and presentable in the case of an audit?
