

Million Hearts Resources

For all of those folks doing the CVD (3.b.i.) project - this may be helpful. Attached is a crosswalk between the Million Hearts Hypertension Change Package - DSRIP Project Requirements. I've also attached a survey (intended audience = providers) on which patient tools are most useful.

CVD   Million Hearts   Patient education   survey   Population Health

Caitlin,  
this is great. I saw the HTN change control package on the Million hearts webpage but your crosswalk is a great tool to link directly to DSRIP 3bi milestone requirements. Thank you! Million Hearts also requires Cholesterol management for which the guidelines have changed ( American Heart Association Guidelines <http://newsroom.heart.org/news/acc-aha-publish-new-guideline-for-management-o...> ) and it is no longer measured by Health Plans per HEDIS 2015 Technical Specifications . Since managing Cholesterol is baked into the Million Hearts Campaign goals, do you have a plan to work on Cholesterol Management for the DSRIP Milestones 6 and 18 ? Thanks!  
Priti

Hi Priti,  
We have formed workgroups made up of representatives from our partner organizations to support project planning. One of the topics for the CV workgroup is selecting evidence-based guidelines for HTN and cholesterol for adoption. We are actually going to be talking about this topic in our next meeting, which is next week.

Thanks for sharing this crosswalk, good to understand what your deliverables are with respect to CVD and how Million Hearts aligns.
