Quarterly Report - Implementation Plan for New York City Health and Hospitals Corporation

Year and Quarter: DY2, Q2

Quarterly Report Status:  Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	 Completed
Section 02	Governance	 Completed
Section 03	Financial Stability	 Completed
Section 04	Cultural Competency & Health Literacy	 Completed
Section 05	IT Systems and Processes	 Completed
Section 06	Performance Reporting	 Completed
Section 07	Practitioner Engagement	 Completed
Section 08	Population Health Management	 Completed
Section 09	Clinical Integration	 Completed
Section 10	General Project Reporting	 Completed
Section 11	Workforce	 Completed

Status By Project

Project ID	Project Title	Status
2.a.i	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	 Completed
2.a.iii	Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services	 Completed
2.b.iii	ED care triage for at-risk populations	 Completed
2.b.iv	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	 Completed
2.d.i	Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care	 Completed
3.a.i	Integration of primary care and behavioral health services	 Completed
3.b.i	Evidence-based strategies for disease management in high risk/affected populations (adult only)	 Completed
3.d.ii	Expansion of asthma home-based self-management program	 Completed
3.g.i	Integration of palliative care into the PCMH Model	 Completed
4.a.iii	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	 Completed
4.c.ii	Increase early access to, and retention in, HIV care	 Completed

Narrative Text :

When compared with the approach articulated in the OneCity Health DSRIP application, budget estimates set out here reflect relative higher percentages for Project Implementation Costs and Costs for Services Not Covered, and lower relative percentages for the Revenue Loss and Bonus Pool categories. This variance stems from a variety of factors:

1. These estimates reflect costs net of Inter-governmental Transfers (IGT).
2. The budget estimates set out here are based on the most recent projections of resources required to fulfill the state mandated project requirements and performance targets and successfully achieve the objectives outlined in OneCity Health's DSRIP application. These estimates

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

were built upon individual workflows within the DSRIP projects, focusing on Project Implementation Costs and Costs for Uncovered Services. The estimates are preliminary and will continue to evolve as the PPS works with its partners to better understand program and implementation requirements.

3. These estimates take into account OneCity Health's maximum total valuation figures communicated by the DOH on May 7th, which reflected a lower amount than anticipated given the proportion of New York State Medicaid patients served by OneCity Health.

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Expenditures reported this quarter reflect DSRIP Year 2 partner payments, which included funds flow for completion of the Master Partner Data Survey (a prerequisite for developing the Comprehensive Schedule B), participation in Project 11 (2.d.i), and for achieving early metrics in the Comprehensive Schedule B. Of total funds paid to partners, 70% was to non-hospital organizations.

The total amount allocated for partner payments as approved via the OneCity Health PPS governance in DY2 is \$55 million. Due to a natural ramp up period in project implementation and related lag in invoicing and payments, the larger portion of funds is expected to be distributed in the second half of DY2.

Administration expenses include strategic planning for, roll out and support of Phase 1 contracts to partners. During DY2 Q2, OneCity Health issued contracts (Schedules B) covering the period through March 2017 to approximately 185 PPS partners, provided technical assistance to partners to delivering on contractual obligations, developed a contract management infrastructure (web-based partner portal) to facilitate validation of contract deliverables, invoicing and payment processing, and established a dedicated support desk to foster more efficient and effective partner communication.

Project Implementation expenses include supporting initiatives under project 2.a.i such as technical support to community primary care practices for PCMH Level 3 certification; Domain 4 Mental Health and Substance Abuse (4.a.iii) project expenses, for which a lead implementer was funded via a PPS collaborative; Domain 1 Workforce Strategy expenses to conduct a baseline assessment and develop a future state for the PPS's workforce; Domain 3 Asthma (3.d.ii) project expenses in support of key project activities; and the implementation of a care coordination platform for partners.

Narrative Text :

The forecast funds flow set out here is consistent with the approach to the distribution of DSRIP funds articulated in the OneCity Health DSRIP application. However it should be noted that the "Hospitals" and "Clinics" categories include primary care physicians, non-PCP practitioners, behavioral health providers, etc., who are employed by HHC or SUNY. In addition, the "Health Home/Care Management" category is assumed to incorporate several provider classes engaged in the provision of care management services.

✔ IPQR Module 1.5 - Prescribed Milestones

Instructions :

Please provide updates to baseline target dates and work breakdown tasks with target dates for required milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Complete funds flow budget and distribution plan and communicate with network	Completed	Funds Flow Budget and Distribution Plan, signed off by your Finance Committee, including details of your approach to funds flow on a whole-PPS and project-by-project basis; evidence of involvement of provider network in developing funds flow methodology.	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	YES

✅ IPQR Module 2.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize governance structure and sub-committee structure	Completed	This milestone must be completed by 9/30/2015. Governance and committee structure, signed off by PPS Board.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	YES
Task Step 1: Appoint members of the PPS Executive Committee.	Completed	Step 1: Appoint members of the PPS Executive Committee.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Step 2: Convene PPS Executive Committee and initiate committee work.	Completed	Step 2: Convene PPS Executive Committee and initiate committee work.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Step 3: Develop and finalize charters for PPS Executive Committee, Nominating Committee, Care Models Subcommittee, Stakeholder & Patient Engagement Subcommittee, Business Operations & Information Technology Subcommittee, and Hub Steering Committees (collectively, the "Governance Charters"). The Governance Charters will describe the responsibilities of each committee, the process for appointing members to each committee, and the consensus-based decision making process of each committee.	Completed	Step 3: Develop and finalize charters for PPS Executive Committee, Nominating Committee, Care Models Subcommittee, Stakeholder & Patient Engagement Subcommittee, Business Operations & Information Technology Subcommittee, and Hub Steering Committees (collectively, the "Governance Charters"). ✓ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: Development and negotiation of the Base Agreement among the partners will likely present challenges, given variability in partner type, size, interests, capabilities and limitations.

Mitigation: We intend to mitigate this risk through the review process we have established. The planned review of the Base Agreement with partners' legal counsel will be transparent and will aim to reach mutually agreeable terms among all partners.

Risk: In addition, time constraints and other day-to-day obligations of governance committee members will pose a risk to the level of meaningful and productive engagement required to ensure a strong and effective governance structure.

Mitigation: This risk will be mitigated by support from the PPS Central Services Organization (CSO) in preparing meeting materials, establishing clear expectations among committee members around advanced meeting preparation, attendance, and active committee involvement. OneCity Health recognizes that committee members have significant obligations to their organizations outside of the PPS and will aim to be respectful of their time commitments.

Risk: As a City-wide PPS, we share partners with several other PPSs. For partners affiliated with multiple PPSs, ensuring that Governance and reporting processes do not present undue burden on these partners will pose a challenge.

Mitigation: We will address this risk by actively coordinating with other PPSs and aligning reporting processes and requests where possible.

✓ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The ability to develop the project schedules that are part of the partnership agreements with CBOs will depend on the development of Clinical Operational Plans which will detail partner obligations for each DSRIP project. Creation of the budgets for each partner's involvement in a particular project is dependent upon outputs of the Finance workstream, which will include projected PPS revenue, project budgets, and funds flow projections. In addition, the establishment of robust Performance Reporting/Management systems and capabilities will be critical to effectively monitoring partner performance against agreed-upon targets; these will in turn depend on the successful implementation of Reporting and Analytics IT infrastructure.

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Governance Leadership	OneCity Health PPS Executive Committee: Ross Wilson, MD, Chair	Review and approve Governance Charters, Clinical Guidelines, Base Agreement and Project Schedules and budgets. Develop contracting priority order.
Lead Applicant/Entity	HHC	Review and approve Governance Charters.
Legal review	Lead Partner (HHC) Legal: Salvatore Russo, Esq, Senior Vice President and General Counsel, HHC	Review Governance Charters and Base Agreement.
Compliance	HHC Chief Compliance Officer: Wayne McNulty	Review PPS compliance plan.
PPS Clinical Governance Leadership	Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Review and recommend clinical guidelines and provide quality oversight.
PPS Clinical Leadership	PPS Chief Clinical Officer: Anna Flattau, MD	Provide quality oversight.
Support infrastructure	PPS Central Services Organization- OneCity Health Services: Christina Jenkins, MD, CEO; Anna Flattau, MD, Chief Clinical Officer; Hub Executive Directors: Nicole Jordan-Martin (Brooklyn), Richard Bernstock (Bronx), Ishmael Carter (Queens), Manattan Hub Executive Director TBD; Hub Program Managers: Caroline Cross (Manhattan); Rachael Steimnitz (Brooklyn); Erfan Karim (Queens); Lindsay Donald (Bronx)	Support development of clinical guidelines, reporting process, partner oversight process, and policies and procedures.

 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✔ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Providers	PPS Partners	Committee membership, including the Project Advisory Committee
Community Based Organizations (CBOs)	PPS Partners	Committee membership, including the Project Advisory Committee
Labor Unions	PPS Partners	Committee membership, including the Project Advisory Committee
Government agencies	PPS Partners	Committee membership, including the Project Advisory Committee
External Stakeholders		
Other PPSs	Cross-PPS Coordination Partners	Coordination on City-wide Reporting standards
NYS Dept of Health	Government agency stakeholder	Coordination on City-wide Reporting standards
NYC Department of Education	Government agency stakeholder	Coordination on Community and Stakeholder Engagement Strategy
City University of New York (CUNY)	Educational institution stakeholder	Coordination on Community and Stakeholder Engagement Strategy
State University of New York (SUNY)	Educational institution stakeholder	Coordination on Community and Stakeholder Engagement Strategy

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

Timely, accurate, and comprehensive quality and performance reporting will be critical to inform effective and transparent governance processes and decision-making. Shared IT infrastructure enabled by cross-PPS connectivity is required to produce the underlying data for a PPS-wide performance management and reporting process. Given the City-wide scope of the OneCity Health PPS, this connectivity is dependent on enabling successful connectivity between our partners with multiple RHIOs across all boroughs, and among the RHIOs themselves.

Developing the electronic governance portal will enable all PPS partners to access relevant governance materials which will improve engagement in PPS activities.

✔ IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We define success as the achievement of robust, effective, and transparent PPS governance at both a City-wide and Hub level. Fulfillment of the milestones described above will reflect our progress in building the infrastructure required to support this multi-tiered governance. Success will be measured by (1) the occurrence of meetings of the Executive Committee and Subcommittees at a frequency in accordance with the applicable charter, (2) implementation of PPS policies and procedures, (3) execution of the Base Agreement and project schedules by HHC and partners (including CBOs), and (4) performance by OneCity Health and partners (including CBOs) of obligations against the Base Agreement.

IPQR Module 2.9 - IA Monitoring

✓ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

- Risk: Insufficient provider engagement
Mitigation: The PPS must meaningfully engage with PPS partners and communicate a set of PPS partner/provider funding schedules at the outset of DSRIP implementation to ensure that partners and their providers understand the process and project milestones tied to receiving payment from the PPS. In addition, as the PPS begins to engage partners around the Master Services Agreement and clinical operational planning, it will need to be transparent on the budgeting and payment processes, and educate partners on the ties to funds flow and, ultimately, funding schedules.

- Risk: Availability of DSRIP waiver funds and uncertainty around the ability of the PPS to achieve and draw down incentive payments both present risks. The PPS must successfully achieve and report on State-established milestones and metrics to draw down incentive payments and subsequently distribute funds to its partners.
Mitigation: The PPS has and will continue to engage in a thoughtful planning process to ensure it is able to achieve DSRIP milestones and metrics in a timely manner and to the best of its ability and will design the budgeting process with flexibility to allow for scenarios in which the PPS may miss certain targets.

- Risk: Timing of DSRIP waiver funds: Once the PPS has demonstrated successful achievement of reporting and/or performance metrics, incentive payments will not be made for 90-120 days, leaving a potential gap in funding available to support DSRIP projects.
Mitigation: The PPS must actively track payments received and expenditures incurred to minimize the periods of low cash holdings. In addition, judicious usage of the PPS Contingency Fund will help to alleviate periods of potential low cash holdings.

- Risk: Alignment of PPS partners with Medicaid value-based payment models: Although the PPS currently has the majority of its Medicaid Managed Care lives in global risk contracts that reward performance consistent with DSRIP, the continued transition to value-based payment across the PPS will require the engagement with PPS partners and Medicaid managed care organizations (MCOs) to align contracting with value-based payment.
Mitigation: As the PPS lead, HHC expects to leverage its considerable experience in managing value-based payment models and extend value-based payment arrangements to other PPS partners.

✓ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

- Performance reporting: Identify point-of-contact in each partner organization for finance-related matters (e.g., reporting and policies/procedures); base partner reporting requirements on DSRIP reporting milestones/metrics.
- IT: The PPS IT systems must support population health management to enable partners to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.
- Practitioner Engagement: The PPS must effectively engage and educate physicians and other providers in the evidence-based protocols and requirements that will drive performance and contracting.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 3.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Governance Leadership	PPS Executive Committee: Ross Wilson, MD, Chair	Review and approve recommendations from Business Operations and IT Subcommittee
PPS Governance Entity	Business Operations and IT Subcommittee: Chair TBD; staffed by Juan Maluf, OneCity Health Services Senior Director for IT Strategies and Implementation, and OneCity Health Services Finance Director	Review and recommend network financial health current state assessment and value-based payment plan
Compliance Oversight	HHC Office of Corporate Compliance and Chief Compliance Officer: Wayne McNulty	Establish and maintain an effective compliance program as required by, and in accordance with, New York Social Services Law 363-d and its implementing regulations found at 18 NYCRR Part 521
Expense Oversight	PPS Comptroller: Julian John, HHC Corporate Comptroller	Review and manage PPS expenditures
Compliance Lead	Chief Compliance Officer: Wayne McNulty	Provide executive compliance oversight and management of DSRIP-related compliance plan and activities
Audit function	Internal Auditor	Review PPS budget and funds flow
Finance Lead	PPS Finance Director: permanent Director being recruited; interim support from HHC Corporate Finance	Prepare PPS budgets and forecasts
HHC Corporate Finance	Marlene Zurack, HHC Corporate Chief Financial Officer; Laura Free, AVP Managed Care Finance; Krista Olson, AVP Corporate Budget Director; Linda Dehart, AVP Corporate Reimbursement	Support PPS Finance operations, financials sustainability planning, and value-based contracting strategy

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 3.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
PPS Partners	Performing providers	Responsible for performance on program metrics, participation in clinical project implementation, accountability for use of funds
HHC and other Partner Finance Organizations	Finance support	Collaborate with PPS to participate in network financial health assessment and alignment of PPS network with value-based purchasing models
External Stakeholders		
MetroPlus, HealthFirst	Partner in development of value-based payment arrangements	Collaborate with PPS and providers to develop value-based payment arrangements
Other Managed Care Organizations	Partner in development of value-based payment arrangements	Collaborate with PPS and providers to develop value-based payment arrangements

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

A shared IT infrastructure across the PPS will prove instrumental in allowing the PPS to maintain a real-time assessment of performance across partners, which will be critical to success as PPS partners transition to value-based payment. The PPS is establishing a centralized performance management analytics and reporting environment to store normalized claim, clinical and other patient-level data in HHC's Business Intelligence/Enterprise Data Warehouse based on the IBM Provider Data Model. We expect that the dashboards produced using this system will help drive improved outcomes and allow the PPS to monitor performance against key metrics by benchmarking our providers against standardized NQF quality measures to address gaps in care for chronic diseases.

✔ IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The financial sustainability workstream will be considered successful based on the demonstrated ability to:

- Identify and monitor the PPS partner organizations that are or will become financially fragile during the course of the DSRIP period
- Seamlessly implement and adhere to financial controls and the PPS compliance plan
- Establish and execute the PPS' plans to transition to the targeted volume of Medicaid value-based payment revenues.

IPQR Module 3.9 - IA Monitoring

Instructions :

✓ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: We have identified a number of risks to implementation. First, the degree of cultural, ethnic and language diversity across our service area will challenge our PPS to meet the needs of all attributed patients. For example, the population of foreign born residents with low literacy rates ranges from 24.6% to 48% [being validated]. This will make prioritization of resources and training approaches more complex and resource intensive.
Mitigation: To mitigate this risk, we intend to work with partners with demonstrated expertise in meeting the needs of their respective communities. This work will include leveraging existing best practices to identify and meet the education and training needs across the PPS.

Risk: The second risk we have identified is the time needed to provide cultural competency and health literacy training to clinicians and staff. In addition to training on these topics, we expect to have a broad range of DSRIP-related training and educational needs, including needs around clinical guidelines and processes, operational workflows, PPS standards, data collection and monitoring, etc.
Mitigation: To address this risk, we intend to design and deploy a training strategy that identifies all the clinical and non-clinical training needs and includes a rational approach to delivering that training. As a result of the need to harmonize PPS-wide training efforts, cultural competency and health literacy training may be on a slightly less aggressive timeframe than it would otherwise be.

Risk: Finally, the City-wide scope of the OneCity Health PPS introduces a high degree of complexity and diversity in executing on an effective Cultural Competency/Health Literacy strategy, as patient and community needs/engagement will vary across boroughs and geographies.
Mitigation: OneCity Health's Hub-based structure will allow for this risk to be mitigated through Hub-based planning that takes into account the local network of established community-based organizations and local knowledge/expertise around patient engagement barriers and solutions.

✓ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

As described in Risks & Mitigation Strategies, the achievement of OneCity Health's cultural competency and health literacy strategies is dependent on developing the overall approach to PPS training and education and an overarching Practitioner Engagement strategy. In addition, because the strategy relies on a keen understanding of existing areas of expertise and available tools among partners, we must first complete a partner assessment process, which seeks to identify partner capabilities and capacity across a broad range of areas, including cultural competency. Finally, the ability of providers to meet the language needs of their patients will be dependent on the capability to know a patient's preferred language. As a result, OneCity Health will need systems to track and share this information with partners in the PPS.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 4.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Supporting the PPS governance Committees and Partners	OneCity Health Services: Christina Jenkins, MD, CEO	Working with PPS governance committees and partners to ensure the PPS meets DSRIP milestones.
Governance	Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Review and recommend clinical processes for project implementation, including cultural competency/health literacy standards.
Governance	Patient & Stakeholder Engagement Subcommittee	Review and recommend strategy to engage patients and stakeholders, including cultural competency/health literacy standards.
Governance	OneCity Health Executive Committee: Ross Wilson, MD, Chair	Review recommendations from subcommittees.
PPS Cultural Competency Lead	Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Accountable for the development of cultural competency/health literacy standards

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Project Advisory Committees	Total PPS and Hub-based PACs	Provide input and feedback into PPS cultural competency/health literacy initiatives
Providers	PPS Partners	Provide input and feedback into PPS cultural competency/health literacy initiatives
Community Based Organizations (CBOs)	PPS Partners	Provide input and feedback into PPS cultural competency/health literacy initiatives
Labor Unions	PPS Partners	Provide input and feedback into PPS cultural competency/health literacy training plans
External Stakeholders		
Other PPSs	Cross-PPS Coordination Partners	Coordination on City-wide CC/HL approaches
NYS Dept of Health	Government agency stakeholder	Coordination on City-wide CC/HL approaches

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

As described in Major Dependencies on Other Workstreams, there are a number of areas where IT capabilities will enable OneCity Health to address cultural competency and health literacy issues. First, providers will need to meet the language needs of their patients. This may include access to interpreter services, providing educational materials that have been translated into another language, or connecting patients to a support group that meets a patient's cultural and ethnic preferences. To respond to these requirements, OneCity Health will need to identify and track the language preferences of its attributed patients and ensure this information is accessible to PPS clinicians and staff at the point of care. OneCity Health will also need to determine threshold languages for translation needs and make translated materials available across the PPS. Finally, OneCity Health will need to track and make available PPS resources (e.g., in-language support groups) so that patients can be easily connected to community supports that improve self-management and self-efficacy efforts.

In addition, the tools and approaches adopted by the PPS to engage patients in self-management and to promote self-efficacy will need to be tailored to the culturally-specific strategies unique to each community. Flexible IT platforms to house and deploy these tools will be critical to ensuring that patient engagement strategies are responsive to these local needs.

Finally, technology support will be required for tracking of training program delivery and effectiveness.

✔ IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We define successful design and deployment of a PPS Cultural Competency/Health Literacy strategy as the effective incorporation of the unique cultural and health literacy needs and barriers of our patient populations into the process by which our clinical guidelines, operational processes, and training programs are developed and implemented. Fulfillment of the milestones for this workstream will reflect our progress in building the infrastructure required to support this strategy. Success will be measured by the degree to which key health disparity and patient engagement activation are improved across the PPS.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	There are no updates at this time.
Develop an IT Change Management Strategy.	<p>12/13/16 Update - The Meeting Schedule Template contained the 10/26 meeting that was referenced in the IA's informal remediation comment. We included this 10/26 meeting even though it did not fall within DY2 Q2 because per minimum standards of supporting documentation, that was the meeting where we discussed the IT Change Management Strategy. Our Business Operations and IT Committee met during DY2 Q2, but IT change management was not a topic of discussion nor was training conducted. No additional change management training has since been conducted.</p> <p>+++++</p> <p>The goal of the OneCity Health IT Change Management Strategy is to establish a standardized workflow for soliciting, evaluating, authorizing and implementing IT system and application changes that affect the PPS as a whole. Key components of the IT Change Management Strategy include: (1) creating an initiation plan and a back-out plan, (2) assessing the impact and potential risks, and (3) evaluating and addressing training and communication needs.</p> <p>The Strategy was developed by PPS and NYC Health & Hospitals IT leadership and discussed with the Business Operations and IT Committee on October 26, 2016 and will be shared with stakeholders and users through the PPS newsletter and website, as well as targeted emails and phone calls as needed. There will also be a webinar to discuss the IT Change Management Strategy.</p>

✓ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: We anticipate reluctance on the part of some partners to agree to certain elements of IT governance and requirements, since it will require them to use IT systems and processes unfamiliar to them, some of which may duplicate systems and processes already in place within their own organizations.

Mitigation: We will educate partners on the need and justification for all requirements, processes and IT change management governance and incorporate provisions for complying with them into contractual agreements to eliminate ambiguity and clarify that compliance is contractually obligated.

Risk: Partners may be challenged—financially or otherwise— to comply with data sharing obligations, especially those who had not previously participated in data exchange or whose IT infrastructures may not meet certified EHR MU requirements.

Mitigation: Again, we will educate all partners on the importance of data sharing and incorporate data sharing agreements into their contracts.

Risk: Patient engagement in QEs, as measured by consent, is critical to achieving patient engagement speed and scale for 2.a.i and many other projects, since consent is required for data sharing and data sharing is integral to meeting the requirements of most projects.

Mitigation: We will work with the Bronx RHIO, Healthix and Interboro QEs to understand gaps in patient engagement, as measured by consent, and to implement targeted strategies for obtaining consent from more attributed patients.

✓ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The IT workstream is dependent on strategies and requirements developed in the Performance Reporting, Clinical Integration and Population Health Management workstreams primarily, and to a lesser extent in all other organizational workstreams to the extent they identify IT expectations (e.g., for a learning management system in the Workforce workstream). In addition, the IT workstream will be highly interdependent with general project implementation for Domain 2 & 3 project-specific strategies and their Domain 1 requirements. Elements of IT governance may be dependent on the Governance workstream since the Business Operations & Information Technology Subcommittee and other elements of IT governance will be integrated into overall OneCity Health governance. Finally, to the extent that meeting connectivity and EHR certification requirements requires financial investment, the PPS is dependent on capital funding requested through the Capital Restructuring Financing Program.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 5.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
IT Management and Support	HHC Enterprise IT Services (EITS)	Complete Integrated OneCity Health IT strategy. Manage QE relationships, and HHC/QE integration/interfaces. Manage overall IT implementation Strategy (central and partner connectivity).
Partner IT Liaisons	TBD – 1 per partner	Connectivity adoption, implementation, integration and support at own organization (for participation in OneCity Health). Data exchange support.
Support Infrastructure	OneCity Health Central Services Organization	Partner network relationship management and program management for implementation/ integration support. Project management and coordination.
PPS Governance Leadership	OneCity Health Executive Committee	Approval of certain IT governance decisions.
PPS Governance Entity	OneCity Health Care Models Subcommittee	Advice related to integrated DSRIP IT strategy.
PPS Governance Entity	OneCity Health Business Operations & Information Technology Subcommittee	Approval of certain IT governance decisions and oversight of certain IT processes and expenditures.
PPS Governance Entity	OneCity Health Stakeholder & Patient Engagement Subcommittee	Advice related to patient engagement in certain IT systems and processes.
PPS Governance Entity	OneCity Health Hub Steering Committees	Advice related to local implementation requirements of integrated DSRIP IT strategy.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipient of care services delivered with support of effective IT	Interaction sufficient to participate and take limited accountability for health and care-related activities.
OneCity Health CSO Business and IT Staff	Accountable for project management, integration and effective use of IT in PPS services	Oversight and integration of IT into OneCity Health operations Project management.
OneCity Health Governance Committee Members	Governance for effective integration and use of IT, centrally and across partners	Oversight and integration of IT into OneCity Health operations.
HHC Management/Leadership	Fiduciary oversight for effective integration and use of IT in OneCity Health operations	Oversight and integration of IT into OneCity Health and HHC operations.
HHC Enterprise IT Services (EITS) Leadership and Staff	Primary leadership and operational support	Coordinate, support and maintain coordinated OneCity Health (and HHC) IT solutions.
Partner Organization Providers and Staff	Project management, integration, connectivity and effective use of OneCity Health IT solutions	Adopt, implement, use and support integrated OneCity Health IT solutions, depending on role.
External Stakeholders		
QE Management/Leadership and Staff	Accountable for integration of key QE-supplied IT functionality for OneCity Health support	Oversight and integration of QEs into OneCity Health operations.
Community Advocates/Leaders/Elected Officials	Awareness of how IT is being used to effectively support OneCity Health and patients in the community at-large	Consume stakeholder communication and participation in stakeholder events.
Community Members/Public At-Large	Awareness of how IT is being used to effectively support OneCity Health and patients in the community	Consume stakeholder communication and participation in stakeholder events.
Non-Partner Providers	Awareness of how IT is being used to effectively support patients in the community and how they can participate in IT and connectivity-related solutions related to OneCity Health	QE participation as warranted to effectively treat patients.
Medicaid Managed Care Organizations (MCOs)	Awareness of how IT is/can be used to serve covered members	Contribute data and participate in QE and other IT solutions as warranted to effectively serve members.
DOHMH	Awareness of how IT is being used by OneCity Health	Offer solutions, participate in OneCity Health IT solutions in order to serve residents.
NYSDOH	Provide guidance and tools, including MAPP/SIM, to support OneCity Health use of IT	Guidance and tools to support OneCity Health IT use, including for efficient performance management and DOH reporting.
Labor Unions	Awareness of how IT is being used by OneCity Health	Member labor support for and training on OneCity Health IT solutions, as warranted.

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Successful design and deployment of an IT systems and processes approach will be measured by the Central Services organization along the following dimensions:

- Governance participation – Multi-stakeholder representation and participation in Business Operations & Information Technology Subcommittee meetings;
- Strategy/Solution Development – Timely completion of current state assessment, IT connectivity roadmap, data sharing plan, etc. according to the milestone dates outlined for this workstream;
- QE Adoption and Integration – Percentages of providers using OneCity Health-affiliated QEs and patients consenting to disclosure, tracked using the partner network management database; and
- Meaningful Use tracking – Percentages of required providers meeting MU standards, tracked using the partner network management database.

Milestone Name	Narrative Text
Establish reporting structure for PPS-wide performance reporting and communication.	<p>12/13/16 Update - Please see the attached OneCity Health Executive Committee meeting minutes, agenda, and slide deck as documentation of board approval for the Performance Reporting Structure (Performance Reporting Milestone 1).</p> <p>+++++</p> <p>The Performance and Reporting and Communications Strategy framework was approved by the OneCity Health Executive Committee on October 25, 2016. Supporting documentation for this completed milestone include: 1) OneCity Health Performance Reporting Structure document; 2) October 25, 2016 Executive Committee meeting minutes; and 3) October 25, 2016 Executive Committee slide deck. A decision was made to have the framework approved directly by the Executive Committee to begin development and further iterations on the strategy in the Care Models Committee rather than seek initial recommendation by the Business Operations & IT Committee; therefore, step 7 of milestone 1 has been deleted. Significant updates from the Care Models Committee to the framework will be included in ongoing quarterly reports.</p>
Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	<p>The due date for completion of the baseline current analysis specific to existing quality/performance training programs across the PPS, including those conducted by the MCOs, has been adjusted to DY2 Q3 to align with plans for conducting a broader analysis of all training resources within the PPS.</p>

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: The first risk we have identified is the variability in health IT capabilities and levels of experience in data-driven population health and quality improvement activities. Variation exists around collecting and using clinical and care management data, reporting, and population health management tools to shape care delivery.
Mitigation: We have two mitigation strategies to address this risk. First, we will seek to better understand partner reporting capabilities through our partner readiness assessment process. Second, we will work with partners to provide training on PPS care management tools, interpreting reports, and using these data to improve clinical outcomes.

Risk: We also anticipate a risk associated with effectively defining and communicating performance standards and expectations across the PPS. Because the PPS will evolve as a "learning organization," it will be challenging to set expectations in Demonstration Year 1 as the PPS will mature and standards will change.
Mitigation: To mitigate this risk, we will focus on a robust communications process with partners and adjusting our approach and standards as needed to ensure DSRIP performance and the delivery of high-quality, patient-centered care.

✓ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

This workstream is dependent on workstreams related to workforce and practitioner engagement. Both workstreams include training and education activities, and our PPS seeks to harmonize all DSRIP-related training in order to reduce the burden on providers and staff and ensure a coordinated approach.

The care management and performance reporting workstreams are interdependent in important ways. The care management model that OneCity Health defines will directly affect the types of reports and content of those reports that care managers will use to manage day-to-day tasks and patient interactions. Because of this, care managers will be involved early in the process of defining the technical specifications of reports and will work closely with staff charged with application development.

This workstream is also dependent upon a number of IT components, as described under IT expectations for this workstream. First, identification and implementation of a learning management system, as described throughout this implementation plan, will facilitate education and training related to performance. Second, data sharing will be key to monitoring performance.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Clinical Leadership	PPS Chief Clinical Officer: Anna Flattau, MD	Spearhead performance measurement selection process; provide quality oversight and input into strategies to address low-performing providers.
PPS Governance Leadership	OneCity Health PPS Executive Committee: Ross Wilson, MD, Chair	Review and approve performance reporting and communications strategy. General DSRIP oversight.
PPS Governance Leadership	Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Review and recommend draft performance reporting and communications strategy.
PPS Governance Leadership	Business Operations & Information Technology Subcommittee: Chair TBD; staffed by Juan Maluf, OneCity Health Services Senior Director for IT Strategies and Implementation, and OneCity Health Services Finance Director	Review and recommend draft performance reporting and communications strategy.
Support Infrastructure	PPS Central Services Organization, OneCity Health Services : Christina Jenkins, MD, CEO; Anna Flattau, MD, Chief Clinical Officer; Hub Executive Directors: Nicole Jordan-Martin (Brooklyn), Richard Bernstock (Bronx), Ishmael Carter (Queens), Manhattan Hub Executive Director TBD; Hub Program Managers: Caroline Cross (Manhattan); Rachael Steimnitz (Brooklyn); Erfan Karim (Queens); Lindsay Donald (Bronx)	Support development of a training programs, participant-level data needs, and training outcomes.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Providers	PPS Partners	Ensure PPS can collect performance data as needed
Community based organizations	PPS Partners	Ensure PPS can collect performance data as needed; support for implementing performance reporting training program as needed
External Stakeholders		
Other PPSs	Cross-PPS Coordination Partners	Coordination on City-wide Performance Reporting approaches
NYS Dept of Health	Government agency stakeholder	Coordination on City-wide Performance Reporting approaches
Consumers	PPS patients and families	Coordination to ensure performance metrics are patient and family centric

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

First, identification and implementation of a learning management system, as described throughout this implementation plan, will facilitate education and training related to performance. Second, data sharing will be key to monitoring performance on both clinical and financial metrics and producing dashboards on both. The PPS is establishing a centralized performance management analytics and reporting environment to store normalized claim, clinical and other patient-level data in HHC's Business Intelligence/Enterprise Data Warehouse based on the IBM Provider Data Model. We expect that the dashboards produced using this system will help drive improved quality and performance reporting.

✔ IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We will measure the success of this workstream across three broad dimensions. First, we must develop the two deliverables (performance reporting and communications strategy, performance training program) within the implementation plan timeframe. Second, we must submit PPS-wide metrics, as outlined in Attachment J and the Domain I metrics. Third, we must develop and implement a strategy for the rapid cycle evaluation of our PPS, thus enabling us to identify areas of strength and to target areas for improvement.

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: The first major risk to the implementation is the broad geographic reach of OneCity Health providers and partners, as well as high variance in IT infrastructure and capability, which will make our engagement efforts challenging.
Mitigation: To mitigate this risk, we intend to identify clinical champions as needed and leverage our Hub-based governance structure.

Risk: The second risk we have identified is the amount of training that must be developed and deployed across OneCity Health. It will be challenging for providers and staff to adjust schedules and reduce patient/client loads in order to engage in training.
Mitigation: To mitigate this risk, we intend to develop a training/education plan that is sensitive to the busy schedules of our providers and staff. Although we don't anticipate being able to reduce the time burden associated with training, providing a rational, staged process for education that is responsive to busy schedules is one strategy to reduce the burden.

✔ IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The training and education plan is related to activities around Workforce transformation in that all PPS training and education activities – including those targeted toward clinicians and staff – should be harmonized into a single cohesive approach.

This workstream is also highly dependent on the successful completion of planning related to clinical guidelines and process and operational workflows. This work must be largely complete before training on clinical standards and care pathways can be designed and deployed.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Support Infrastructure	OneCity Health Services: Christina Jenkins, MD, CEO; Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Accountable for development of draft practitioner engagement and training plans.
PPS Governance Entity	OneCity Health Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Review draft practitioner engagement and training plans.
PPS Governance Entity	OneCity Health Stakeholder & Patient Engagement Subcommittee	Review draft practitioner engagement and training plans.
Workforce Training Vendor	TBD	Work with Central Services Organization to develop and deploy materials and training.
Clinical Champions	Initial Champions include 50+ cross-partner Clinical Leadership Team members convened to support clinical planning; Additional champions to be identified throughout DY1-DY2 implementation process	Local practitioners identified as champions during the clinical planning process.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
1199 SEIU	PPS Partners	Participation on PAC and input into education and training
CIR/SEIU	PPS Partners	Participation on PAC and input into education and training
DC37	PPS Partners	Participation on PAC and input into education and training
Doctors Council	PPS Partners	Participation on PAC and input into education and training
New York State Nurses Association (NYSNA)	PPS Partners	Participation on PAC and input into education and training
United University Professions (UUP)	PPS Partners	Participation on PAC and input into education and training
Civil Service Employees Association (CSEA)	PPS Partners	Participation on PAC and input into education and training
Public Employees Federation (PEF)	PPS Partners	Participation on PAC and input into education and training
Graduate Student Employee Union	PPS Partners	Participation on PAC and input into education and training
External Stakeholders		
Other PPSs	Cross-PPS Coordination Partners	Coordination on City-wide Practitioner Engagement Approaches
NYS Dept of Health	Government agency stakeholder	Coordination on City-wide Practitioner Engagement Approaches

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

OneCity Health will implement and utilize a commercial customer relationship management (CRM) system (Salesforce.com), to manage our partner network, including physicians. The CRM will support physician communication and engagement, track phone, mail, email and other interactions, and manage engagement campaigns to reach groups of physicians.

OneCity Health will engage physicians in care management, population health management and other key aspects of DSRIP-related care coordination by building awareness of the capabilities of the planned centralized care coordination management solution (CCMS). Through demos, other events and other communications, OneCity Health will explain CCMS benefits and capabilities, focusing on how the system will help provide better service and outcomes to their patients and make their practices more efficient, allowing them to deliver higher quality patient care through functions such as:

- Providing multi-lingual, multi-cultural care navigation and support;
- Tracking and assisting patients with practice selection, active engagement in DSRIP programs, utilization tracking and pediatric-adult transition;
- Assisting patients with locating and accessing community resources, including for palliative care;
- Supporting transitions and warm handoffs at discharge, with follow-up tracking;
- Educating patients and families about wellness and care, and supporting patients in self-management and shared decision making related to their health needs; and
- Surveying patients and families regarding care experience.

In addition, physician training in evidence-based medicine, care coordination, population health management and other topics pertinent to DSRIP and OneCity Health standardization will be scheduled, delivered and tracked using a learning management system (LMS) administered by the OneCity Health Central Services Organization.

✔ IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We will measure success of this workstream through the completion of two deliverables: the draft practitioner engagement plan and the completion of a draft education/training plan. Because of the size and scope of the OneCity Health PPS, reporting against progress associated with the deployment of these plans will likely require both Hub-level and PPS-level reporting and management processes.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop population health management roadmap.	<p>The purpose of the OneCity Health Population Health Management Roadmap is to outline the PPS-wide approach to identifying and supporting populations experiencing disparities through the use of a risk-based needs assessment, IT infrastructure and reports, and Patient Centered Medical Home (PCMH) 2014 Level 3 certification. The roadmap is based on initial findings from the community assets and needs assessment (CNA) and further developed with input from various stakeholders including NYC Health + Hospital Enterprise IT Services (EITS) and the Office of Population Health. The roadmap will be used to lay the foundation for the PPS-wide bed reduction plan.</p> <p>Milestone 1 was completed, but step 6 is being deleted at this time. The OneCity Health Population Health Management Roadmap will be presented at a later date to the Executive Committee, upon completion of the PPS-wide bed reduction plan in order to provide Committee members with a more comprehensive future state vision.</p> <p>Please see the attached OneCity Health Population Health Management Roadmap for more details.</p>
Finalize PPS-wide bed reduction plan.	<p>The end date of step 1 of milestone 2 is being pushed back to DY2 Q3 to align with organizational changes to NYC Health + Hospitals service lines and allow for discussion among appropriate stakeholders involved in bed-reduction planning.</p>

✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Risk: Given the size and complexity of our network, it may be difficult to quickly gain a thorough understanding of the various population health capabilities of our partners.
Mitigation: We have begun implementing a comprehensive "Partner Readiness Assessment" in order to rapidly gain an effective understanding of our network and its various population health-related assets.

Risk: Given the size and complexity of our network, and the large number of PCMH-eligible practices, bringing all practices up to the required standards by the end of DY3 presents a challenging task. There are some PCMH eligible partners (primary care providers) who do not currently have an EHR. Being able to meaningfully use an electronic health record is important part of meeting PCMH. Depending on the timing of an EHR procurement, implementation, and training, these providers may be unable to achieve PCMH Level 3 2014 Standards by the end of DY3. The same will hold true for those eligible providers who may be beginning Meaningful Use Stage 1 Year 1 in 2016. They will likely not be far enough along (in Stage 2) in order to meet the PCMH reporting requirements by the end of DY3.
Mitigation: We plan to implement a robust "Path to PCMH" program in order to assist our eligible partners in meeting the relevant PCMH requirements by DY3 as much as possible and will be in close communication with the State on progress and emerging risks to timing as DY3 approaches.

Risk: A robust population health management capability relies on the seamless flow of information, health information exchange (HIE), across different partners and sites of care. Effectively implementing these capabilities will be slow and tedious and will require difficult decisions to be made around which platforms will be used, how the platforms will "talk" to each other, standards for tracking care management interactions, etc. An important part of our HIE strategy relies on successfully integrating our clinical provider partners to the RHIOs/SHIN-NY by the end of DY3. If the RHIOs/SHIN-NY cannot adequately meet our needs in this timeframe, or at all, then we may need to alter our strategy well into the DSRIP timeline.
Mitigation: As part of our Partner Readiness Assessment, we plan to evaluate current partners IT capabilities and from that assessment, formulate a strategy related to the implementation of a care management platform, partner connectivity and information exchange, and the development of standards for care management activities. Unfortunately, relying on the RHIOs/SHIN-NY as a central strategy for HIE places a large part of this process out of the control of OneCity Health. In an effort to mitigate the potential risks associated with the RHIOs/SHIN-NY, we are exploring the option of building our own private HIE.

✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

Population health management strategy will be dependent on adequately assessing and training the proper workforce to deliver care in a population health model. Population health management strategy will be dependent on ensuring that care coordination and care management services are available in a culturally competent and language- and culture-specific manner.

Population health management strategy will be dependent on ensuring the PPS has adequate care coordination and management infrastructure and health information exchange to ensure near-real time and actionable information flow and information tracking across various providers within the PPS.

Population health management strategy will be dependent on ensuring the PPS has adequate reporting, measurement, and analytics capabilities to both meet state requirements and continuously improve PPS performance.

Population health management strategy will be dependent on robust practitioner engagement, especially around the redesign of various care models to a patient- and family-centered, population health-driven model of care.

Population health management strategy will be dependent on seamless information sharing across providers and ensuring consistent use of evidence-based medicine practices.

✓ IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Strategic Planning and Operations Support	OneCity Health Services: Christina Jenkins, MD, CEO	Develop a population health management roadmap and bed reduction plan. Provide support for PCMH-eligible partners in achieving certification.
Care Coordination and Care Management Platform	Platform vendor: GSI; PPS IT Leadership team: Juan Maluf, OneCity Health Services Senior Director for IT Strategies and Implementation; Diana Amrom, OneCity Health Services IT Project Manager; Gerardo Escalera, HHC EITS DSRIP Project Management Lead	Care coordination and management vendor platform.
IT Strategy and Support	Sal Guido, Interim HHC Corporate CIO and Juan Maluf, OneCity Health Services Senior Director for IT Strategies and Implementation	Determine IT infrastructure needed to support population health management vision and how various IT systems should relate to each other in the "end state."
PPS Governance Leadership	OneCity Health Executive Committee: Ross Wilson, MD, Chair	Final approval of plans.
PPS Clinical Governance Leadership	OneCity Health Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Recommendation of plans.
HIE Qualified Entities	Bronx RHIO, Healthix, Interboro	Partner connectivity.
PCMH Support Vendor	Vendor TBD; PCMH technical assistance strategy lead: Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Provide support for PCMH-eligible partners in achieving certification.

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Health Homes and other Care Management Organizations	VNSNY, CHN, CBC, HHC, and others	Provide care coordination & management services
Hospital partners	HHC Facilities, SUNY	Participate in care coordination & management services
Community Based Organizations	Various	Participation in patient outreach and engagement activities
External Stakeholders		
Managed Care Organizations	MetroPlus, HealthFirst and others	Provide care coordination & management services; collaborate to expand value-based payment contracting arrangements

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

Current population health management IT capabilities in the PPS are largely at the partner or facility level. Health Homes and their care management agencies, along with other care management-focused OneCity Health partners, are using small scale care management solutions. Other partners are using homegrown analytics to track patients across settings and within condition cohorts that could be considered to be ad hoc patient registries.

A primary objective of our PPS is to develop a standard approach to population health management across all PPS partners based on a new IT infrastructure. Features will leverage tools already in place or being implemented at HHC that may not be currently utilized for population health management. Our plan for leveraging and developing a new and integrated IT infrastructure for population health management includes the following:

- Establish a centralized performance management analytics and reporting environment to store patient-level data in HHC's Business Intelligence/Enterprise Data Warehouse. HHC will optimize its performance management business intelligence analytics platform for DSRIP and population health stakeholder readiness. New capabilities will use the existing platform to create an automated registry functionality, clinical and claims based data aggregation, NYS required MDF reporting functionality for OneCity Health, and eventually dashboards with detailed information and performance analytics to support clinical programs.
- Implement a Clinical Record Locator Service (CLRS). Creating a master data management (MDM) environment and a CLRS for patient and provider matching and PPS-wide identification is a high priority. OneCity Health partners must be able to provide accurate, safe, secure, and timely exchange of patient information to providers across a multitude of facilities and systems. The foundational element of this integrated system is the ability to accurately identify and link patient records across the PPS. The CLRS will be critical for care coordination, transitions of care, and operational monitoring and reporting.
- Use the DOHMH Medicaid Analytics Provider Portal (MAPP) for additional analysis and reporting.
- Implement a common commercial care coordination and management solution (CCMS) for use across HHC and other PPS partners, which will serve as a central location for all PPS providers to enable successful population health management. We expect the platform will provide our PPS with the ability to (at a minimum): (1) risk stratify members, (2) track outreach and patient engagement, (3) create care teams and mechanisms for communication within the team, (4) document appropriate patient centered assessments, (5) create care plans, (6) track outcomes for continual improvement, and (7) receive real time event notification alerts (ADTs).
- Contract with and build interfaces to the three regional health information exchanges/Qualified Entities in OneCity Health's coverage area – Bronx RHIO, Healthix, Interboro –to achieve required data sharing among PPS partners and between electronic medical records and the CCMS, and potentially with other PPSs. This will require assessing the current state of PPS partner's IT capabilities and assessing the level of complexity

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

and effort to connect. The PPS will develop and implement a phased plan for connecting partners to one of the NYC QEs beginning with high volume partners who are not already connected.

- Help partners implement certified EHRs, adopt and integrate with RHIO services and, if eligible, use the combined IT infrastructure to achieve PCMH 2014 recognition, all to perform population health management effectively and efficiently.
- Implement robust and secure IT network and communications infrastructure to support these solutions and a patient contact center that supports population health management.

IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Success of this workstream will be measured by the following milestones, to be tracked with support from the Central Services Organization (CSO):

- Number of partners who actively use care coordination and management platform or other relevant tools;
- Number of eligible practices that have achieved NCQA PCMH recognition;
- Approval of population health management roadmap by Executive Committee; and
- Approval of bed reduction plan by Executive Committee.

Section 09 – Clinical Integration

✅ IPQR Module 9.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform a clinical integration 'needs assessment'.	Completed	Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee, including: -- Mapping the providers in the network and their requirements for clinical integration (including clinical providers, care management and other providers impacting on social determinants of health) -- Identifying key data points for shared access and the key interfaces that will have an impact on clinical integration -- Identify other potential mechanisms to be used for driving clinical integration	10/01/2015	06/30/2016	10/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO
Task Step 1: Building on data collected as part of Partner Readiness Assessment process, collect any additional data from partners required to determine needs and capabilities with regard to: data sharing and interfaces, IT system interoperability, care coordination/ management, care transitions including ED and inpatient discharge, and care team communication.	Completed	Step 1: Building on data collected as part of Partner Readiness Assessment process, collect any additional data from partners required to determine needs and capabilities with regard to: data sharing and interfaces, IT system interoperability, care coordination/ management, care transitions including ED and inpatient discharge, and care team communication.	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Step 2: Based on data collected and identified best practices across the PPS network, create a clinical integration needs assessment, including mapping providers in the network, requirements, key data points for shared access, key interfaces, and other potential mechanisms to drive clinical integration.	Completed	Step 2: Based on data collected and identified best practices across the PPS network, create a clinical integration needs assessment, including mapping providers in the network, requirements, key data points for shared access, key interfaces, and other potential mechanisms to drive clinical integration.	01/01/2016	06/30/2016	01/01/2016	06/30/2016	06/30/2016	DY2 Q1

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform a clinical integration 'needs assessment'.	There are no updates at this time.
Develop a Clinical Integration strategy.	<p>The language for milestone 2 has been updated for steps 1, 3 and 4 to reflect the developmental process of the clinical integration strategy.</p> <p>Identification of key data elements within OneCity Health's network requires an understanding of clinical and operational needs for program implementation and performance monitoring. The expertise in the Care Models Committee is most applicable to meaningful review and commentary on this body of work. Therefore, the governance committee has been changed from the Business Operations and IT Committee to the Care Models Committee in step 1.</p> <p>Guidelines for care transitions are based on best practices as elicited from literature review of care management programs and expert input. Expert input for this task was elicited as part of care model development (with input from the Care Models Committee), and further specified through dedicated workgroups on Care Transitions, Psychiatric Care Transitions, and ED Care Management with representation from multiple partner types on each of these workgroups. In addition, the care model was reviewed in a PPS-wide webinar and comments elicited at that time. Since these forums are the most appropriate venues for meaningful input into care transitions guidelines, step 3 has been updated accordingly.</p>

New York City Health and Hospitals Corporation (PPS ID:52)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Care transitions guidelines differ by setting (e.g., medical inpatient, medical emergency setting, psychiatric settings), and need to be developed according to the specific needs of patients seen in each of these settings. The basic parameters included in these guidelines would not be expected to differ between hubs. Therefore, the refinement of Care Transitions guidelines, as detailed in Step 4, has been changed from a hub-based planning process to a setting-based planning process.

✓ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: The greatest risk will be to attempt to address the full scope of the PPS's clinical integration needs without the benefit of a targeted approach with regard to clinical integration.
Mitigation: We intend to mitigate this risk by basing integration goals on prior experience with regard to high-impact integration levers, specific project and organizational requirements identified in other workstreams, and on DSRIP Domain I process measures, clinical measures, and the Special Terms and Conditions. This will enable our PPS to effectively measure progress against goals and timeframes.

Risk: Partners may be challenged, financially or otherwise, to comply with clinical integration approaches, especially those who had not previously participated in data exchange or whose IT infrastructures may not meet certified MU requirements.
Mitigation: We will educate all partners on the importance of clinical integration and incorporate clinical integration requirements into their contracts. In addition, we will take a targeted, phased approach to Clinical Integration that takes into account differing levels of partner readiness.

✓ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The strategies developed in the Clinical Integration workstream are closely related to requirements and strategies that will be identified in the Workforce Strategy, IT Systems and Processes, Performance Reporting, Physician Engagement and Population Health Management workstreams. In addition, the Clinical Integration workstream will be highly interdependent with General Project Implementation, particularly for Domain 2 and 3 project-specific strategies and their Domain 1 requirements. Many of the goals and requirements of project 2.a.i are closely related to clinical integration. Finally, practitioner engagement will be a core component and prerequisite for establishing a clinically integrated network.

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Clinical Leadership	Anna Flattau, MD, One City Health Services Chief Clinical Officer	Oversight of clinical integration needs assessment and strategy development
Support Infrastructure	OneCity Health Services : Christina Jenkins, MD, CEO; Hub Executive Directors: Nicole Jordan-Martin (Brooklyn), Richard Bernstock (Bronx), Ishmael Carter (Queens), Manattan Hub Executive Director TBD; Hub Program Managers: Caroline Cross (Manhattan); Rachael Steimnitz (Brooklyn); Erfan Karim (Queens); Lindsay Donald (Bronx)	Network management and program management for implementation/integration support; Project management and coordination.
PPS Governance Leadership	OneCity Health Executive Committee: Ross Wilson, MD, Chair	Review and approve relevant clinical integration strategies and decisions.
PPS Governance Entity	OneCity Health Care Models Subcommittee: Joseph Masci, MD, Chair; staffed by Anna Flattau, MD, OneCity Health Services Chief Clinical Officer	Review clinical integration decisions and provide oversight of certain clinical integration efforts.
PPS Governance Entity	OneCity Health Business Operations & Information Technology Subcommittee: Chair TBD; staffed by Juan Maluf, OneCity Health Services Senior Director for IT Strategies and Implementation, and OneCity Health Services Finance Director	Provide input related to clinical integration in certain IT systems and processes.
PPS Governance Entity	OneCity Health Stakeholder & Patient Engagement Subcommittee	Provide advice related to integrated DSRIP clinical integration strategy.
PPS Governance Entity	OneCity Health Hub Steering Committees; staffed by Hub Executive Directors: Nicole Jordan-Martin (Brooklyn), Richard Bernstock (Bronx), Ishmael Carter (Queens), Manattan Hub Executive Director TBD	Provide input related to local implementation requirements of clinical integration strategy.
Support Infrastructure	HHC Enterprise IT Services (EITS): Gerardo Escalera, HHC EITS DSRIP Project Management Lead	Integrated OneCity Health IT strategy; QE relationships; Integration/interfaces; Overall IT implementation strategy (central and partner connectivity)
Support Infrastructure	PPS Finance Director (Permanent Director TBD)	Review clinical integration expenditures.
Providers	PPS Partners	Input into clinical integration elements and process via hub-based planning process and the Project Advisory Committee
Community Based Organizations (CBOs)	PPS Partners	Input into clinical integration elements and process via hub-based planning process and the Project Advisory Committee

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipient of care services delivered with support of effective IT	Interaction sufficient to participate and take limited accountability for health and care-related activities
OneCity Health CSO Business and IT Staff	Accountable for project management of clinical integration initiatives PPS-wide	Oversight and integration of clinical integration into OneCity Health operations; Project management
HHC Management/Leadership	Fiduciary oversight for effective and compliant clinical integration	Oversight of clinical integration into OneCity Health operations
HHC Enterprise IT Services (EITS) Leadership and Staff	Leadership and operational support for IT-related clinical integration supports and data sharing	Coordinate, support and maintain coordinated OneCity Health (and HHC) IT solutions
Partner Organization Providers and Staff	Project management and effective adoption of OneCity Health clinical integration protocols and solutions	Adopt, implement, use and support clinical integration protocols and solutions, depending on role
Labor Unions	Awareness of how clinical integration is being used by OneCity Health	Member labor support for and training on OneCity Health clinical integration protocols, solutions and workforce supports, as warranted
External Stakeholders		
QE Management/ Leadership and Staff	Accountable for integration of key QE-supplied IT functionality for OneCity Health support	Oversight and integration of QE services into OneCity Health operations
Medicaid Managed Care Organizations (MCOs)	Awareness of how clinical integration is/can be used to serve covered members	Contribute data and participate in QE and other clinical integration solutions as warranted to effectively serve members
DOHMH	Awareness of and support for OneCity Health clinical integration	Offer solutions and guidance for compliant clinical integration in order to serve residents
NYSDOH	Provide guidance and tools for compliant clinical integration	Guidance and tools to support OneCity Health in implementing compliant clinical integration solutions
Other PPSs	Awareness of how clinical integration is being used to effectively support patients in the community and how multiple PPSs may be able support each other's clinical integration efforts	Participation in joint clinical integration planning and solution development as warranted

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Nearly all components of OneCity Health's shared IT infrastructure will provide support for and will be critical to clinical integration. A centralized performance management and analytics environment will provide common data and outcomes measurement to bind together partners and help them track common integration results in a standardized way. A clinical record locator system and HHC-administered master data management system will provide a single integrated view of each patient and a unified, standard and navigable view of participating partners. A common care coordination management solution will add to the integrated view of the patient and provide a common tool for the care teams to interact and manage patients.

✔ IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Clinical Integration success will be measured according to:

- Progress against integration-related Domain 1 milestones; and
- Tracking interaction among partners in the PPS.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

Section 10 – General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

OneCity Health's approach to project implementation is to transform the PPS in a coordinated, measured and integrated fashion. We intend to support an implementation process that: leverages existing infrastructure; promotes partner/provider engagement and identifies areas to reduce burden; establishes clear expectations for performance; and results in high-quality patient-centered care. Key components of this approach include:

- As OneCity Health covers a large geographic area, with a broad range of partners and a diverse attributed population, we established a governance structure that would support the development of central standards that also reflect local planning. Our PPS organized its service area into four borough-based "hubs" to support a coordinated, locally-driven approach to planning. Each hub is led by a Steering Committee responsible for providing local leadership of DSRIP-related activities and reporting back to PPS-wide committees on local issues and best practices. In addition, each hub has a project advisory committee (PAC) to ensure the engagement of partners and stakeholders.
- Our clinical governance structure is designed to establish and support a process to develop clinical guidelines that provide sufficient standardization across the PPS while allowing for local flexibility. The development of clinical guidelines is aimed at identifying "must-have" elements to support our PPS in meeting DSRIP requirements and transformation goals. These PPS-wide guidelines are augmented to accommodate local variations in resources and capabilities and local operational workflows. This planning will occur primarily in DY 1; however, we anticipate revising and updating guidelines as needed. Guidelines and processes will be reviewed and recommended by the Care Models Subcommittee. This work will be supported by robust analytics and performance monitoring activities.
- To be successful in DSRIP, education, training, engagement and communication among providers and staff will be crucial. Given the breadth and depth of these needs, we must establish a coordinated plan to identify training and education needs across the PPS, establish requirements for the development and delivery of the training, and determine areas for partner participation. Training around cultural competency must be incorporated to ensure that we are responsive to the diverse needs of our attributed population.
- A robust, IT-enabled population health approach will rely on a range of capabilities, including the capability to share data across providers and access patient-level information organized in a secure, provider-friendly electronic format. As part of this work, we conducted a preliminary partner readiness assessment to understand partner capabilities across a broad range of PPS needs. Initial data from the partner readiness assessment will inform a longer-term plan to address gaps in our network and the deployment of a comprehensive population health management strategy.
- We are establishing a workforce strategy that will address recruitment, retention and redeployment needs. The strategy will be designed around goals of meeting the primary and preventive care needs of our attributed population and addressing existing gaps in care as a result of provider shortages. We anticipate the need for expanded care management and care coordination capacity as well. A central tenet of our strategy will be to

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

ensure that our workforce includes culturally and linguistically responsive providers and staff.

- We are developing an approach to financial sustainability that will enable the PPS to expand its existing and extensive value-based contracting, support the PPS infrastructure needs, leverage high standards for accountability and transparency and leverage existing infrastructure and best practices.

✓ IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

Our overall implementation approach will rely on an adequate and effective workforce that has the training and education they need. Population health management strategy will be dependent on adequately assessing and training the proper workforce to deliver care in a population health model.

Outreach, engagement and care delivery must be provided in a way that meets the diverse language and cultural needs of our population.

Ensuring the PPS has the IT tools it needs to support care delivery, performance reporting, patient management and tracking, and care delivery is critical to almost every goal within the PPS. In addition, as part of a data-driven approach to performance improvement, our PPS must have adequate reporting, measurement, and analytics capabilities.

Finally, robust practitioner engagement, especially around the redesign of various care models, is critical to providing high-quality, patient centered care in a population health driven model.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Support Infrastructure	OneCity Health Central Services Organization	Project management and coordination; Data analytics and performance monitoring
PPS Governance Leadership	OneCity Health Executive Committee	Oversight of DSRIP implementation and performance
PPS Governance Entity	OneCity Health Care Models Subcommittee	Guidance related to clinical quality and care model design
PPS Governance Entity	OneCity Health Business Operations & Information Technology Subcommittee	Guidance related to business functions and information technology
PPS Governance Entity	OneCity Health Stakeholder & Patient Engagement Subcommittee	Guidance related to outreach, education and communications strategies for stakeholders and patients
PPS Governance Entity	OneCity Health Hub Steering Committees	Input related to local implementation requirements of clinical integration strategy
Support Infrastructure	HHC Enterprise IT Services (EITS)	Overall IT implementation strategy (central and partner connectivity); Integrated OneCity Health IT strategy; QE relationships; Integration/interfaces

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipient of care services delivered with support of effective IT	Interaction sufficient to participate and take limited accountability for health and care-related activities
HHC Management/Leadership	Fiduciary oversight for effective and compliant clinical integration	Oversight of clinical integration into OneCity Health operations
OneCity Health Partners	Project management and effective project implementation	Guidance on and responsibility for project implementation, provider and staff engagement, and performance
Medicaid Managed Care Organizations (MCOs)	Support for identification, outreach and management of patients	Contribute data and participate in QE and other clinical integration solutions as warranted to effectively serve members
HHC Enterprise IT Services (EITS) Leadership and Staff	Leadership and operational support for IT-related clinical integration supports and data sharing	Coordinate, support and maintain coordinated OneCity Health (and HHC) IT solutions
External Stakeholders		
QE Management/ Leadership and Staff	Accountable for integration of key QE-supplied IT functionality for OneCity Health support	Oversight and integration of QE services into OneCity Health operations
RHIOs/SHIN-NY	Accountable for making HIE functionality available and onboarding partners	Functionality required as a result of DSRIP
DOHMH	Collaboration to support shared goals	Provide expertise and a forum for collaboration as needed
Labor Unions	Support for education and training	Support for and training on OneCity Health operational workflows

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✅ IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

To support implementation and ongoing management of DSRIP projects and to act as an effective integrated delivery system, OneCity Health will require and implement a robust IT infrastructure.

- Care Coordination & Management: HHC is in the process of contracting for a care coordination management solution (CCMS) for population stratification, patient engagement, patient assessment, care planning, clinical and social service navigation, care transition management, patient registries and care management workflow, capacity and task management. HHC will implement this platform for its Health Home and OneCity Health expects to use the platform for DSRIP internally and among its PPS partners.
- Clinical Record Locator Service (CRLS): Each patient within the PPS will need a unique patient ID number that is available to providers at all points of care. OneCity Health will create a clinical record locator service for patient and provider matching and PPS-wide identification and an overarching master data management (MDM) environment. We intend to also use IBM Infosphere and Initiate tools (also known as the MDM Suite).
- Health Information Exchange: Layered on top of the unique patient ID will be a robust healthcare information exchange (HIE) that operates across PPS entities and providers that will enable the exchange of information so patient data is accurate, and patients receive the right care without unnecessary duplication of services. OneCity Health's strategy to increase the availability and utilization of health information exchanges (HIEs) will be accomplished via connectivity to various Qualified Entities (QEs) across New York City. OneCity Health will develop and implement a phased plan for connecting PPS partners to one of the NYC QEs (Bronx, Healthix, Interboro) beginning with high volume partners that are not already connected.
- Performance Management and Analytics: In order to know whether clinical programs are working and to help reduce unnecessary admissions and ED visits on an individual and population level, OneCity Health will normalize and store claims, clinical and other patient-level data in HHC's Business Intelligence/Enterprise Data Warehouse based on the IBM Provider Data Model, creating a centralized performance management, analytics and reporting capability for the PPS. OneCity Health will also use the DOHMH Medicaid Analytics Provider Portal (MAPP) for additional population health management analysis and reporting.
- Unified Communications: OneCity Health will create a foundation for data sharing among hundreds of thousands of patients and care providers in a single controlled environment through upgrades to existing technology. To provide a consistent, unified user and patient communication system, infrastructure upgrades will be made to instant messaging, presence information, telephony, video conferencing, patient portal access, desktop sharing, data sharing and call control/management systems, and unified messaging integration (integrated voicemail, e-mail, SMS and fax).
- Telehealth and telemedicine: OneCity Health will have the ability to centralize the availability and management of patient care using IT and

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

communications-supported telehealth methods.

- Assessment, Monitoring and Support Programs and resources: Based on a current state assessment of PPS partner capabilities against OneCity Health and DOH requirements, the OneCity Health Central Services Organization will establish program management services for monitoring or assisting PPS partners as required with acquiring EHRs certified for Meaningful Use attestation, achieving NCQA 2014 PCMH recognition and participating and integrating with QEs for health information exchange.

✅ IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

As the lead applicant, HHC has engaged in many quality improvement projects across facilities within the system. Similarly, many other partners within the PPS have implemented their own initiatives related to improving outcomes and performance. DSRIP will serve as a unifying force for these varied and disparate activities. OneCity Health's Central Services Organization (CSO) will serve as the infrastructure to support quality performance reporting, through the development and implementation of performance reporting formats and tools. Performance reports will integrate Domain 1 process metrics, Domain 2 and 3 quality and outcome metrics, and other internal PPS clinical and performance metrics relevant to the successful implementation of DSRIP projects and continued progress toward meeting DSRIP goals.

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✓ IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

In formulating our PPS, we were guided by several core principles. First, our PPS should be organized around the needs of the patient, the family, and the community, with an emphasis on high-quality, patient-centered care that also addresses the social determinants of health. Thus, we engaged a large number of community-based organizations (CBOs) and partners to join our PPS. Second, our PPS's ability to deliver patient-centered care depends on a well-trained workforce focused on providing seamless care across the continuum. Third, our PPS will operate transparently with a strong bias towards inclusivity. Thus, our governance structure ensures that community-based partners hold a majority of the seats on our Executive Committee, and also provides ample opportunity for local involvement and guidance. Activities that we have undertaken in this regard include:

- Taking an inclusive approach to designing its Project Advisory Committee (PAC). It is structured to both represent and include all partners within the PPS. As described previously, our governance structure also includes hub-based PACs to ensure that input into planning at both the central and local levels represents partner views and expertise. Guiding principles include committing to: a shared vision of healthier communities, meaningful collaboration, and supporting the transformation journey.
- Designing and implementing a partner readiness assessment tool. This assessment addresses a broad range of information about partner resources, capacity and readiness to implement DSRIP projects. As a result of these data, our PPS will have a much more nuanced understanding of our existing assets and resources and where we may need to develop or deploy additional supports and services.

OneCity Health anticipates contracting with CBOs to support DSRIP implementation, including to broaden the availability of social services and supports, provide education and training to patients, families, providers and staff, and to support patient identification, activation and enrollment as part of the 11th Project. Once the partner readiness assessment process is complete, we will have a better understanding of our existing assets and resources as well as gaps that must be filled. Based on this data, and through the establishment of requirements for successful implementation of each project, we will utilize the contracting process outlined in the Governance section.

One risk we have identified is that the process to identify needs, establish contracting requirements, effectuate contracts, and then provide training and education, may have a longer time horizon than is optimal for DSRIP needs. To mitigate this risk we have prioritized our work to understand current partner capabilities and gaps that may need to be filled.

Section 11 – Workforce

IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions :

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

Funding Type	Year/Quarter										Total Spending(\$)
	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)	DY2(Q1/Q2)(\$)	DY2(Q3/Q4)(\$)	DY3(Q1/Q2)(\$)	DY3(Q3/Q4)(\$)	DY4(Q1/Q2)(\$)	DY4(Q3/Q4)(\$)	DY5(Q1/Q2)(\$)	DY5(Q3/Q4)(\$)

✓ IPQR Module 11.2 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Please note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Completed	Finalized PPS target workforce state, signed off by PPS workforce governance body.	10/01/2015	09/30/2016	10/01/2015	09/30/2016	09/30/2016	DY2 Q2	NO

	<p>on our part. The meeting slides and agenda has also been attached for the IA's reference - all Workforce Milestones were placed within the "approval" section of the meeting materials.</p> <p>+++++</p> <p>The purpose of the Target Workforce State report is to describe the anticipated system transformation and the estimated DSRIP and non-DSRIP related impacts on future OneCity Health workforce needs. OneCity Health engaged BDO Consulting ("BDO") as its workforce vendor, in collaboration with IHS, Inc., to define the target workforce state through analysis of workforce impacts resulting from factors independent of DSRIP (demographic shifts and effects of health insurance coverage under ACA) and implementation of the DSRIP program.</p> <p>More specifically, modeling the future workforce was accomplished using a combination of existing workforce modeling tools, original data analysis, findings from the published literature, information on the population served and current health care use patterns within New York State and the OneCity Health service area, and expert opinion from PPS project leads and the modeling team. The analysis required modeling the likely impact of each DSRIP project individually and jointly (as many DSRIP projects overlap in terms of participating patients and health utilization goals). The modeling tools and analyses were adapted to reflect the characteristics of the target population and the nature of each DSRIP project.</p> <p>Development of the OneCity Health Target Workforce State report was conducted in collaboration with the PPS's Executive Committee ("Workforce Governance Body"), Workforce Committee, and Workforce Consortium, and includes input from multiple stakeholders within the PPS's partner network as well as external data sources. External data sources included local, state and national surveys, medical claims databases, published literature and IHS's Health Care Demand Microsimulation Model (HDMM).</p> <p>OneCity Health determined that the Workforce Committee is the most appropriate committee to review and recommend the target state workforce state given the workforce and training expertise of Committee members, many of whom represent labor partners. As a result, OneCity Health deleted step 6 of milestone 6, which required the PPS to vet the target state workforce scenarios through the Stakeholder & Patient Engagement Committee and Business Operations & Information Technology Committee. OneCity Health will continue to work with its labor partners and Workforce Committee members to educate, review, and collect input on workforce deliverables.</p> <p>The Target State Workforce report was reviewed by the Workforce Committee on July 11, 2016 and re-reviewed and recommended by the Workforce Committee on October 20, 2016. The report was approved by the Executive Committee on October 25, 2016.</p> <p>Please see the attached Target State Workforce report for more details.</p> <p>Notes: (1) BDO Consulting is a vendor for multiple PPSs (cross-vendor PPS). (2) The Workforce Consortium references Consortium members (Bronx Partners for Health Communities PPS, Community Care of Brooklyn PPS and NYU Lutheran PPS). The Consortium was developed to bring more uniform workforce evaluation across the four New York City boroughs and to support collaboration across networks in data gathering, analysis, and strategy development. (3) The Workforce Committee references the OneCity Health PPS governance committee with membership from partner organizations and NYC Health +</p>

	<p>materials.</p> <p>+++++</p> <p>The purpose of the Gap Analysis is to identify gaps in workforce resources and forecast future workforce impacts resulting from system transformations and DSRIP project implementation. The Gap Analysis will be used to assist OneCity Health in achieving its target workforce state and managing DSRIP workforce impacts by 2020.</p> <p>OneCity Health engaged BDO Consulting ("BDO") as its workforce vendor to assist in the development of the OneCity Health Gap Analysis. The Gap Analysis was developed in collaboration with key stakeholders as well as the other participating Workforce Consortium members. OneCity Health collaborated through several in person working sessions and conference calls with participation from project leadership and clinical staff. The Gap Analysis was also created in collaboration with the PPS's Executive Committee ("Workforce Governance Body"), Workforce Committee, and Workforce Consortium, and includes input from providers within the PPS's partner network.</p> <p>OneCity Health determined that the Workforce Committee is the most appropriate committee to review and recommend the Current State Assessment Report and Gap Analysis given the workforce and training expertise of Committee members, many of whom represent labor partners. As a result, OneCity Health deleted step 5 of milestone 3, which required the PPS to vet the Current State Assessment Report and Gap Analysis through the PPS Stakeholder & Patient Engagement Subcommittee and Business Operations & Information Technology Subcommittee. OneCity Health will continue to work with our labor partners and Workforce Committee members to educate, review, and collect input on workforce deliverables.</p> <p>The Gap Analysis was reviewed and approved by the Workforce Committee on October 20, 2016. The Analysis was approved by the Executive Committee on October 25, 2016.</p> <p>Please see the attached Gap Analysis for more details.</p> <p>Notes: (1) BDO Consulting is a vendor for multiple PPSs (cross-vendor PPS). (2) The Workforce Consortium references Consortium members (Bronx Partners for Health Communities PPS, Community Care of Brooklyn PPS and NYU Lutheran PPS). The Consortium was developed to bring more uniform workforce evaluation across the four New York City boroughs and to support collaboration across networks in data gathering, analysis, and strategy development. (3) The Workforce Committee references the OneCity Health PPS governance committee with membership from partner organizations and NYC Health + Hospitals, including union representatives.</p>
Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	There are no updates at this time.
Develop training strategy.	OneCity Health determined that training assessments should be conducted PPS-wide to provide for a more complete picture of citywide training needs and allow for further categorization by hub or other geographical region.

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✅ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk: Given the size and complexity of our network, it may be difficult to quickly gain a thorough understanding of the workforce of our PPS.
Mitigation: We have implemented a comprehensive "Partner Readiness Assessment" in order to quickly gain an understanding of our network and its various workforce capabilities. In addition, we are collaborating with a cross-PPS consortium to contract with a vendor to conduct a cross-PPS workforce analysis that will take into account the overlapping nature of our partner networks.

Risk: Given the rapidly evolving healthcare landscape in New York City, and the challenge of coordinating not only with our hundreds of partners but also with other PPSs with overlapping service areas, the 'Future State' of our workforce will be an evolving target. Indeed, our ability to successfully execute the DSRIP projects will be dependent on coordination and alignment with other PPSs with respect to standardized roles and responsibilities, hiring, and training. This will also require coordination with large partners in multiple PPSs.
Mitigation: We are coordinating with several other PPSs as a consortium to collaborate on a cross-PPS workforce analysis through a common vendor. We also plan to continue to coordinate regularly with other PPSs and large partners in multiple PPSs, to the extent possible, on our collective workforce transformation efforts.

Risk: Given that the entirety of New York State is undertaking this effort concomitantly, demand may exceed supply for certain roles, such as primary care practitioners, care managers, care navigators, etc.
Mitigation: As part of our workforce transformation efforts, we will seek to retrain or redeploy existing PPS employees to the extent possible for care management and navigator positions, and will seek to partner with community-based primary care practices to limit any shortages within our service area.

✅ IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Workforce transformation will be dependent on robust practitioner engagement, especially around the redesign of various care models to a patient- and family-centered, population health-driven model of care that will implicate the hiring, re-deployment, and re-training of much of our workforce.

Workforce transformation will also be highly dependent on the clinical and operational plans emerging from project implementation planning, which will identify future state functionalities related to care management and coordination that will drive target-state workforce planning.

Workforce transformation will be dependent on the population health management workstream, especially as it relates to PCMH certification of all

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

eligible practices and the related requisite care team retraining and care coordination/management capabilities that will be required.

The funds flow to support workforce transformation will be dependent on the financial analysis and governance provided by the Business Operations & Information Technology Subcommittee.

Finally, workforce transformation will be dependent on adoption of new care management and other related technology systems to support robust population health management capabilities.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Workforce Analysis Vendor	TBD (cross-PPS RFP in process)	Cross-PPS analysis of workforce current state and support in development of target state
Support Infrastructure	PPS Central Services Organization- OneCity Health Services: Christina Jenkins, MD, CEO; Anna Flattau, MD, Chief Clinical Officer; Hub Executive Directors: Nicole Jordan-Martin (Brooklyn), Richard Bernstock (Bronx), Ishmael Carter (Queens), Manhattan Hub Executive Director TBD; Hub Program Managers: Caroline Cross (Manhattan); Rachael Steimnitz (Brooklyn); Erfan Karim (Queens); Lindsay Donald (Bronx)	Working with Workforce Analysis Vendor, develop target workforce state, current state assessment report & gap analysis, workforce transition roadmap, final training strategy, and compensation and benefit analysis report
PPS Governance Leadership	OneCity Health PPS Executive Committee: Ross Wilson, MD, Chair	Approve target workforce state, current state assessment report & gap analysis, workforce transition roadmap, final training strategy, and compensation and benefit analysis report
PPS Governance Entity	OneCity Health Stakeholder & Patient Engagement Subcommittee	Review and recommend target workforce state, current state assessment report & gap analysis, workforce transition roadmap, final training strategy, and compensation and benefit analysis report
PPS Governance Entity	OneCity Health Business Operations & Information Technology Subcommittee	Review and recommend target workforce state, current state assessment report & gap analysis, workforce transition roadmap, final training strategy, and compensation and benefit analysis report
Workforce Training Vendor	1199 and others	Work with Central Services Organization to develop final training strategy and deliver training, as appropriate

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

✔ IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Human Resources stakeholders	PPS Partner HR organizations	Input into workforce transformation planning.
SUNY Downstate	PPS Partners	Participation on PAC and input into workforce transformation planning.
1199 SEIU	PPS Partners	Participation on PAC and input into workforce transformation planning.
CIR/SEIU	PPS Partners	Participation on PAC and input into workforce transformation planning.
DC37	PPS Partners	Participation on PAC and input into workforce transformation planning.
Doctors Council	PPS Partners	Participation on PAC and input into workforce transformation planning.
New York State Nurses Association (NYSNA)	PPS Partners	Participation on PAC and input into workforce transformation planning.
United University Professions (UUP)	PPS Partners	Participation on PAC and input into workforce transformation planning.
Civil Service Employees Association (CSEA)	PPS Partners	Participation on PAC and input into workforce transformation planning.
Public Employees Federation (PEF)	PPS Partners	Participation on PAC and input into workforce transformation planning.
Graduate Student Employee Union	PPS Partners	Participation on PAC and input into workforce transformation planning.
DOHMH	Government agency stakeholder	Coordination on City-wide Workforce Strategy.
External Stakeholders		
Other PPSs	Cross-PPS Coordination Partners	Coordination on City-wide Workforce Strategy.
NYS Dept of Health	Government agency stakeholder	Coordination on City-wide Workforce Strategy.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

✅ IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

Learning Management Software: The PPS will require learning management software in order to track training across the PPS.

Partner Management Database and other Workforce Tracking Systems: The PPS will require a robust database to track and manage workforce (and other) related data associated with the PPS partner network. This database will be initially populated through an extensive partner readiness assessment with periodic updates.

✅ IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We define success as the development of a comprehensive, PPS-wide workforce strategy that ensures that the PPS workforce of the future has the capacity and skill sets that it needs. Fulfillment of the milestones for this workstream will reflect our progress in collaboratively developing and implementing a robust workforce transformation strategy. The key stakeholders responsible for each core component of the workforce transformation strategy will also ensure that methods are established for data collection and analysis, as well as periodic data reporting.

Success will ultimately be measured by:

- Completion of target workforce state identification
- Completion of current state workforce assessment
- Completion of gap analysis
- Completion of workforce roadmap
- Completion of training strategy
- Number of people retrained
- Number of people redeployed
- Number of people newly hired
- Amount spent on retraining
- Amount spent on redeployment
- Amount spent on new hires

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

For DY1, OneCity Health's allowable workforce strategy spend reflected foundational training and education for the fiduciary partner and the subsidiary charged with supporting all OneCity Health partners in achieving DSRIP transformation goals. NYC Health + Hospitals staff received skill development in electronic medical records (Epic), a necessity for population health management and DSRIP training delivered by Central Services

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Organization (CSO) staff. This essential training is anticipated to continue for several years and will be reported in OneCity Health's workforce strategy spend. In addition, this report includes spending on new hires fully dedicated to supporting DSRIP at OneCity Health and at the facilities of the fiduciary partner. The data on training and staffing spend from other partners is not currently available to OneCity Health, but is expected to be included in future reporting periods.

✓ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

There are a range of risks to the success of this project. First, many patients will face challenges becoming engaged in their own health care and in prevention activities. To mitigate this risk we intend to work with our partners to identify, engage, and track patients—with special focus on low- and non-utilizers and the uninsured, who represent an opportunity to reduce preventable hospitalizations and ED admissions. Working with CBO partners, we also intend to expand PPS cultural competency and health literacy programs.

Second, the scale and scope of PPS partner support required to meet a number of requirements (e.g., 2014 Level 3 PCMH recognition, connectivity to the RHIO/SHIN-NY) is a risk to meeting the DSRIP DY3 implementation deadline. While many clinics in our PPS eligible to meet NCQA PCMH recognition have already achieved such recognition, it is according to the 2011 standards. In addition, we expect that a number of smaller providers have yet to embark on the PCMH transformation journey. Also, while many within the PPS are using a meaningful use certified EHR, some are not and only some facilities are currently able to share data. We intend to mitigate our health IT and PCMH risks with two main strategies: (1) collaborating closely with IT and PCMH experts within our PPS to determine what support services need to be developed and deployed; (2) prioritizing practices most in need of support, either because they are a priority partner or they are most at risk of not achieving recognition.

Next, the large and diverse service area and population attributed to our PPS could present a risk in terms of meeting a broad range of varying needs across our service area. To mitigate this risk, we have established a governance structure organized into four borough-based hubs, each with a Project Advisory Committee (PAC) and Steering Committee to ensure PPS consistency while enabling responsiveness to local issues and opportunities. With Hub and City-wide members, this structure will enable us to balance local needs with broader population health goals.

We are also concerned about the limited guidance which defines which project requirements apply to different classes of providers. While we made provider speed and scale commitments in our application, this was done without complete information about how the state defined all providers (i.e., all providers to whom project requirements were relevant or all providers). As a result, we believe there is a risk associated with meeting these commitments. To mitigate this risk, we intend to continue to work with the State to identify a solution.

Additionally, our PPS is the predominant public provider in New York City, providing the majority of care to most of the city's Medicaid and uninsured residents. This population is likely to be challenging to engage and is disproportionately affected by social determinants of health. To mitigate this risk, we will undertake a number of strategies, many of which will address similar risks identified as part of other projects. For example, we intend to work with partners that have expertise addressing psycho-social risk factors as part of our ED Care Triage (2.b.iii) and 30-Day Care Transitions (2.b.iv) projects. As part of the "11th Project" (2.d.i), we intend to work closely with CBOs to conduct outreach to hard-to-engage populations.

Finally, we anticipate a risk in engaging the diverse and large number of providers in our PPS. To mitigate this risk we intend to undertake several

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

strategies: identify clinical champions as needed to build support across the PPS provider network; phase-in certain projects in order to improve the implementation approach and learn best practices related to implementation; and develop and deploy, as needed, assistance to low-performing providers struggling with implementing IDS population health requirements.

✅ IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	DY4 Q4	Project	N/A	In Progress	01/01/2016	03/31/2019	01/01/2016	03/31/2019	03/31/2019	DY4 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.		Project		Completed	01/01/2016	03/31/2016	01/01/2016	03/31/2016	03/31/2016	DY1 Q4
Task Step 1: Develop Partner Readiness Assessment Tool (PRAT), which includes partner-reported information of certain IT, operational, and staffing capacity and capabilities. Use PRAT to gather information on PPS network capacity and capabilities. Educate partners on PRAT and roll out PRAT.		Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Step 2: Analyze current state baseline PRAT data to ensure robust PPS network capacity across all geographies and all components of the care continuum, including medical, behavioral, post-acute (home care, hospice, SNF), long-term care, and community-based service providers.		Project		Completed	07/01/2015	12/30/2015	07/01/2015	12/30/2015	12/31/2015	DY1 Q3
Task Step 3: Incorporate baseline data into partner management database to track all identified partners in the IDS.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Step 4: Draft Master Services Agreement and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure (collectively, the "Base Agreement").		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Step 5: Solicit comments from partners.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task		Project		Completed	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3

Milestone Name	Narrative Text
All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	
Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	
Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	
Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.</p>	<p>The delayed announcement and distribution of the Capital Restructuring Financing Program (CRFP) award has deferred the timeline for OneCity Health's Population Health IT strategy. In response, the end date of step 5 of milestone 5 is being changed to DY2 Q3. The delivery of the award has enabled the PPS to proceed with developing a plan and timeline for partners to obtain a certified EHR system.</p> <p>OneCity Health completed the initial phases of evaluating IT readiness of PPS partners by contracting with a specialized vendor, Digital Edge, to conduct site level evaluations for partners, including safety net providers. The PPS continues to engage with the downstate Qualified Entities (QEs) to communicate priorities. OneCity Health is evaluating EHR vendor options for partners pursuing an EHR transition and ensuring existing EHR vendors utilized by PPS partners are connected to QEs. In conjunction, the PPS contracted with vendors to provide technical assistance to support partners in addressing both the IT and clinical needs of partners working to achieve Patient Centered Medical Home (PCMH) Level 3 certification.</p>
<p>Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.</p>	
<p>Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.</p>	
<p>Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.</p>	
<p>Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.</p>	
<p>Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.</p>	
<p>Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.</p>

Project 2.a.iii – Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services

✓ IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

We anticipate that a significant risk facing the PPS is the fragmented set of care management programs available to populations attributed to the PPS. The programs have different and often overlapping populations, program structures, staffing models, and services. To mitigate this risk, our PPS is in the midst of developing an integrated care management strategy which will engage representatives from OneCity Health partnership, including HHC, primary care practices, Health Homes, and MCOs. The goal will be to understand how various care management programs work in concert with one another and to determine optimal approaches to coordination. This includes the development of standard policies, procedures, care pathways and clinical protocols related to care transitions, referral management, team-based care, and data sharing and reporting.

Another risk related to care management is the challenge associated with recruiting and training sufficient care management staff of various types and levels. To mitigate this risk, our PPS intends to work with partners to identify a pipeline of care management staff. We also intend to contract with organizations with expertise in workforce training (1199 SEIU Training and Employment Funds, SUNY Downstate Medical Center, and others) to ensure that care management staff are adequately trained.

We have also identified risks related to identification of and outreach to the target population. Based on the PPS's experience with Medicaid Health Homes and the lead applicant's experience with its Medicare Shared Savings Program activities, we anticipate that some members of the attributed population will be difficult to locate and may also be challenging to engage. To mitigate this risk, we anticipate leveraging the wealth of local knowledge and on-the-ground expertise represented by the diverse group of community-based partners within the OneCity Health PPS. We believe community-based organizations may be best-positioned to locate and outreach to some populations given this knowledge and experience.

Finally, the scale and scope of PPS partner support required to achieve 2014 Level 3 PCMH recognition is a risk to meeting the DSRIP DY3 implementation deadline. While many clinics within our PPS that are eligible to meet NCQA PCMH recognition have already achieved such recognition, it is according to the 2011 standards. In addition, we know from early partner survey data that a number of smaller providers have yet to embark on the PCMH transformation journey. We intend to mitigate this risk with two main strategies: first, we are collaborating closely with IT and PCMH experts within our PPS to determine what support services need to be developed and deployed. Second, we will prioritize practices most in need of support, either because the partner is integral to successful implementation (e.g., services impact a relatively high number of patients) or they are most at risk of not achieving recognition.

✓ IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

OneCity Health was unable to meet the actively engaged commitment for patient engagement speed and scale for project 2.a.iii in DY2 Q2. With continuous input from existing partners, OneCity Health developed and distributed a distinct Schedule B contract for Health Home At-Risk outlining project specific responsibilities and payment terms. As of October 17, 2016, two of three potential partners have signed the Schedule B. Contract execution will expedite 2.a.iii implementation efforts, as NYC Health + Hospitals Health Home has already identified appropriate outreach specialists for the project. All potential Health Home partners have begun engaging their Care Management Agencies (CMAs) and determining their available capacity and resources needed.

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

To help prepare Health Homes and CMAs with the launch of project 2.a.iii, OneCity Health held a kick-off webinar for all interested CMAs and primary care partners, that provided an overview of project expectations and requirements, resources, and a plan for implementation and scale-up. OneCity Health further surveyed primary care partners to determine existing working relationships between practices and Health Homes and/or CMAs so that these relationships can be built upon and expanded to include project 2.a.iii, as relevant.

Lastly, OneCity Health hosted a New York City-wide Health Home At-Risk Coalition meeting with PPSs participating in project 2.a.iii, as well as partner Health Homes, CMAs, and the New York City Department of Health and Mental Hygiene, to continue efforts to share best practices, discuss challenges, learn from the experiences of community partners, and standardize efforts where possible.

Milestone Name	Narrative Text
Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	
Ensure all eligible primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	
Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	The delayed announcement and distribution of the Capital Restructuring Financing Program (CRFP) award has deferred the timeline for OneCity Health's Population Health IT strategy. In response, the end date of step 4 of milestone 4 is being changed to DY2 Q3. The delivery of the award has enabled the PPS to proceed with developing a plan and timeline for partners to obtain a certified EHR system. OneCity Health completed the initial phases of evaluating IT readiness of PPS partners by contracting with a specialized vendor, Digital Edge, to conduct site level evaluations of for partners, including safety net providers. The PPS continues to engage with the downstate Qualified Entities (QEs) to communicate priorities. OneCity Health is evaluating EHR vendor options for partners pursuing an EHR transition and ensuring existing EHR vendors utilized by PPS partners are connected to QEs. In conjunction, the PPS contracted with vendors to provide technical assistance to support partners in addressing both the IT and clinical needs of partners working to achieve Patient Centered Medical Home (PCMH) Level 3 certification.
Perform population health management by actively using EHRs and other

IT platforms, including use of targeted patient registries, for all participating safety net providers.	
Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	
Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	
Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	
Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.

Project 2.b.iii – ED care triage for at-risk populations

✓ IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

One risk to successful implementation of the ED Care Triage project is overwhelming the 6 HHC hospitals that are already implementing the Center for Medicare and Medicaid Innovation (CMMI) Preventing Avoidable ED/Inpatient Use project. In addition, there is a risk of presenting guidance to these facilities that may come into conflict with or contradict CMS-approved protocols developed for the CMMI project. To address these risks, we will use a staged implementation, focusing first on hospitals that are not implementing the CMMI grant. In these hospitals we will implement the same ED Care Management components as those CMMI-funded hospitals. Once CMMI funding has ended, we will identify potential enhancements for those hospitals, such as supplementary care management and ambulatory support tools developed under DSRIP.

We have identified several risks related to primary care linkages and access. One challenge may be limited capacity at primary care clinics that hinder timely appointments. This challenge will be mitigated by one or more of the following strategies: increased staffing, increased hours provided at facilities, and coordination of primary care capacity across the PPS. To increase network capacity, we will work with appropriate partners, including federally qualified health centers (FQHCs) and community providers, to coordinate a system of extended hours and improved open access capabilities. Another risk is in meeting the project requirement around making PCP appointments for patients in the ED. First, we anticipate challenges in identifying the true or usable primary care capacity of partners, particular during evenings and weekends. Second, we are concerned that patients may not show up for appointments, which both reduces capacity and also means the patient may not get the care they need. Finally, the process of making appointments may take significant staff time. To address these risks, we intend to develop an approach to determining capacity both within HHC facilities as well as among other partners. This approach will identify technology and workflow requirements. To address concerns about no shows, we will leverage care managers to follow-up with patients about the need for and value of primary care visits. Care managers, community health workers and other staff can also identify barriers to keeping appointments (e.g., transportation), and identify resources to help patients overcome those barriers. Finally, we will take a data-driven approach to determining the optimal workflow for ED appointment making and determine where improvements may be needed.

Another risk we anticipate is in meeting the needs of particularly complex patients, such as those who are homeless. To mitigate this risk, we intend to work closely with partners with expertise in addressing psycho-social risk factors to better inform the care team of options for these patients and to address operational and/or staffing issues that impede their access to follow-up care.

Finally, the health IT capabilities required to be successful in this project present a risk. Many aspects of our ED Care Triage proposed interventions rely on enhanced IT systems to support: (1) population health management capabilities; (2) functional capabilities to support operations and measure performance; (3) care coordination and management capabilities; (4) improved connectivity within the PPS and with partners, including assistance with meeting Stage 2 Meaningful Use attestation; and, (5) health information exchange (HIE) with RHIO/SHIN-NY and private HIE. To mitigate this risk we intend to: focus on augmenting existing IT capabilities; prioritize partners that are key to being successful within this project; and, identifying the technology and implementation support services that are critical to success.

✔ IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

During DY2 Q2, OneCity Health engaged 16,867 patients in project 2.b.iii.

All patients engaged were successfully redirected to a primary care provider (PCP) as demonstrated by a scheduled appointment after a medical screening examination in the emergency department (ED), or were successfully redirected to a PCP while en route to the ED. Please see the attached roster with a list of each individual's first/last name and Medicaid CIN.

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

✓ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Our proposed approach to the 30-Day Readmissions project is to implement and standardize Project RED (re-engineered discharge) at all 12 hospitals within the PPS. While 11 of 12 hospitals have implemented some components of Project RED, implementation has not been consistent across the hospitals. Project RED consists of 12 interventions and we believe that implementing all 12 components in 12 hospitals presents a risk to success because of the volume of work. To mitigate this risk, we will pursue a staged implementation. Our patient speed and scale estimates reflect this approach.

One of the Project RED components is to make follow-up medical appointments based on the patient's primary and specialty care needs. As with the ED Care Triage project (3.b.iii), we anticipate challenges in identifying the true and usable capacity of partners, particular during evenings and weekends. Second, we are concerned that patients may not show up for appointments. Patients failing to keep appointments both reduces capacity and also means the patient may not get the care they need. Finally, the process of making appointments may take significant staff time. To address these risks, we intend to develop an approach to determining capacity both within HHC facilities as well as among other partners. This approach will identify technology and workflow requirements. To address concerns about no shows, we will leverage care managers to follow-up with patients about the need for and value of primary care visits. Care managers, community health workers and other staff can also identify barriers to keeping appointments (e.g., transportation), and identify resources to help patients overcome those barriers. Finally, we will take a data-driven approach to determining the optimal workflow for appointment making during discharge planning and determine where improvements may be needed.

Another risk we anticipate is in meeting the needs of particularly complex patients, such as those who are homeless. To mitigate this risk, we intend to work closely with partners with expertise in addressing psycho-social risk factors to better inform the care team of options for these patients and to address operational and/or staffing issues that impede their access to follow-up care.

Finally, the health IT capabilities required to be successful in this project present a risk. Many aspects of the 30-Day Readmissions proposed interventions rely on enhanced IT systems to support: (1) population health management capabilities; (2) functional capabilities to support operations and measure performance; (3) care coordination and management capabilities; (4) improved connectivity within the PPS and with partners, including assistance with meeting Stage 2 Meaningful Use attestation; and, (5) health information exchange (HIE) with RHIO/SHIN-NY and private HIE. To mitigate this risk we intend to: focus on augmenting existing functionality; prioritize partners that are key to being successful within this project; and, identifying the technology and implementation support services that are critical to success.□

✔ IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	
Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	<p>OneCity Health is removing Steps 1 and 2 at this time, as they are not yet relevant to the current stage of program implementation.</p> <p>Currently, OneCity Health is piloting the Care Transitions intervention with six care management agencies (home care agencies and community based partners), and working closely with Health Homes around protocols for collaboration for shared patients. These protocols include joint care plan development, defining functional roles and division of responsibility for team members of patients in both programs, as well as protocols for timely referral of patients in the Care Transitions program to the Health Home as needed.</p> <p>OneCity Health has also discussed existing transitional care programs and other value-based payment programs with Managed Care partners. However, at this early stage of implementation, there is no current work related to developing or expanding a payment model for transitions of care with Managed Care organizations or Health Homes. Once the PPS is further along into implementation and has identified best practices from pilot sites, work with Managed Care companies to consider value-based payment models for transition of care services can be considered.</p>
Ensure required social services participate in the project.	
Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	
Ensure that a 30-day transition of care period is established.	
Use EHRs and other technical platforms to track all patients engaged in the project.

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

✓ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

We have identified a number of risks associated with this project. First, we must find, identify and connect with the uninsured population, including the undocumented and those without formal connection to the healthcare system. Identifying and connecting with this population will prove challenging. To mitigate this risk, we will contract and/or partner with organizations that have culturally-responsive approaches and engage trusted community leaders. We will also coordinate with CBOs that have existing relationships to the community and outreach expertise.

Our ability to be successful in overcoming cultural barriers for new immigrants -- some of whom have not had contact with a formal healthcare system -- also presents a risk. We intend to mitigate this risk by partnering with CBOs that have established relationships within these communities, and further developing our own relationships with these populations. The use of community health workers and peer educators will also support outreach and engagement efforts.

Finally, uncertainty related to workflows and dataflows presents a risk. Seamless data flow will require the deployment of mobile technology to field staff conducting assessments in the community. Challenges to deployment of these types of technologies will require additional mitigation strategies, including the use of paper tools.

✓ IPQR Module 2.d.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

During DY2 Q2, OneCity Health engaged 28,804 patients in project 2.d.i.

All patients engaged have completed the Patient Activation Measure® survey. Please see the attached roster with a list of each individual's first name, last name, and PAM ID#/Medicaid CIN. Please note, a CIN# is included for low and non-utilizing Medicaid patients.

Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	
Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	
Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	
Survey the targeted population about healthcare needs in the PPS' region.	
Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	
Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). <ul style="list-style-type: none"> This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any

educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	
Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	
Include beneficiaries in development team to promote preventive care.	
Measure PAM(R) components, including: <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 	
Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	
Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	
Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	
Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	
Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	
Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.	The development of a Care Coordination and Management Solution (CCMS) to track all patients engaged in the project is no longer required due to the State-mandated utilization of Flourish® from Insignia Health as a population health management tool. Therefore, steps 8-11 of milestone 17 are deleted, as they are no longer applicable to the project.

Project 3.a.i – Integration of primary care and behavioral health services

✓ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

We anticipate execution risk related to resource- and infrastructure-related capacity, the significant variation in co-location models currently deployed across PPS partners, and the ability to integrate this effort with existing initiatives introduced by the partner organization or other NYS or Federal mandates. With regard to capacity, we have seen from CNA and assessment of partner staffing and physical infrastructure that at baseline we currently have inadequate capacity to meaningfully improve outcomes. We intend to mitigate this risk through several approaches: 1) for appropriate resourcing, we will optimize staffing, engage in cross-training among practice teams, optimize practice hours of operation, and optimize coordination of capacity across the PPS according to feasibility of patient access. We will also work to ensure appropriate use of psychiatrists so that psychiatrists treat the most serious BH disorders and stable patients are transferred to PCPs with psychiatric consultation available as needed. 2) For physical infrastructure, the PPS will await state capital funding award announcements with realization that underfunding will impede ability to complete planned space conversion. 3) To mitigate the capital funding risk, our implementation approach allows sites to use the IMPACT model where co-location is not feasible.

We expect that the practice sites across our PPS employ highly variable models, all under the term "co-location." The execution risk associated with this variability is the perhaps significant effort to redesign current offerings in order to employ a uniform model with well-defined requirements and common definitions of integration and co-location. We will determine the existing availability of integrated care using these definitions. Based on these data, we may adjust our implementation approach.

Another risk to implementation is the integration of this effort with the ongoing efforts to prepare for HARP implementation across a number of PPS sites representing significant patient volume. To mitigate this risk, over the last several months we have coordinated planning through weekly meetings and joint pilot site selection such that transformation efforts are maximally aligned. For maximum performance, we will continue these alignment efforts so that behavioral health frontline teams and management have the simplest possible integrated roadmap for transformation.

✔ IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

✓ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

One of the required interventions of the Cardiovascular Project is to ensure that attributed patients are able to have a drop-in blood pressure check with no copay. We anticipate a risk associated with the administrative and nursing capacity. Larger clinics may have a more complex workflow in which to integrate this service and smaller clinics may lack capacity and staffing. To mitigate this risk we intend to work with ambulatory care practices to determine the specific barriers to implementation and develop strategies to overcome the barriers. Patients also don't come in for blood pressure checks due to transportation costs, time required, missed work time etc. To mitigate this risk, we will use home blood pressure monitors to assess patient's blood pressure with reporting via phone.

We also expect risks associated with effective engagement of chronically ill patients over the long term, particularly with regard to behavior change. To mitigate this risk we intend to deploy peer educators and care managers to support patients, with heavy reliance on the recommended evidence-based Stanford Model.

The CVD project requires clinicians to prescribe once-daily regimens or fixed-dose combination pills when appropriate. The second major risk to the project is the potential for Medicaid managed care plans to not cover either the once-daily regimen or fixed dose combination pills. Lack of coverage for the pills would likely result in a lack of adherence. To mitigate this risk, we intend to work collaboratively with other PPSs and managed care plans to optimize and unify the formulary for proven CV medications.

We have also identified risks related to health IT. Our ability to implement and report on metrics related to the project are dependent on existing registries and interoperability. To mitigate this risk we will identify specific IT requirements of the project – such as using the registry to identify existing patients who meet project inclusion criteria – and determine the best way to incorporate this functionality.

The CVD project also requires that 80% of providers be engaged. We believe engaging the majority of primary care providers (PCPs) within the PPS in this project presents a risk, given that PCPs often have very challenging schedules and making time for new quality improvement or practice transformation efforts can be challenging. To mitigate this risk, we intend to work closely with PCPs to provide education about the importance of the project. We will also identify clinical champions, as needed, to promote engagement. Our PPS may also make available clinical and practice transformation support to practices that are either lower performers or that have demonstrated limited engagement in implementation. Finally, we will use the contracting process as a lever to require PPS partners to meet project requirements.

✔ IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

During DY2 Q2, OneCity Health engaged 6,584 patients in project 3.b.i.

The number of patients engaged during this quarter represents 93% of the projected target. OneCity Health continues to implement the Cardiovascular project (3.b.i) in a phased approach and is specifically working with targeted sites on improving current practices to engage more patients and improve quality outcomes.

All patients engaged have received services from participating providers with documented self-management goals in their medical record. Please

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	
Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	<p>The delayed announcement and distribution of the Capital Restructuring Financing Program (CRFP) award has deferred the timeline for OneCity Health's Population Health IT strategy. In response, the end date of step 4 of milestone 3 is being changed to DY2 Q3. The delivery of the award has enabled the PPS to proceed with developing a plan and timeline for partners to obtain a certified EHR system.</p> <p>OneCity Health completed the initial phases of evaluating IT readiness of PPS partners by contracting with a specialized vendor, Digital Edge, to conduct site level evaluations for partners, including safety net providers. The PPS continues to engage with the downstate Qualified Entities (QEs) to communicate priorities. OneCity Health is evaluating EHR vendor options for partners pursuing an EHR transition and ensuring existing EHR vendors utilized by PPS partners are connected to QEs. In conjunction, the PPS contracted with vendors to provide technical assistance to support partners in addressing both the IT and clinical needs of partners working to achieve Patient Centered Medical Home (PCMH) Level 3 certification.</p>
Use EHRs or other technical platforms to track all patients engaged in this project.	
Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	
Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	
Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	
Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	
Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	
Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	<p>OneCity Health is establishing a Cardiovascular Disease Clinical Leadership Workgroup that will meet quarterly to advise the PPS in the implementation of the Cardiovascular project (3.b.i). Specifically, the Cardiovascular Disease Clinical Workgroup will review and recommend how to target the population identified, how many elevated blood pressures should the patient have documented in the medical record, over what time frame before outreach is conducted, what approaches can efficiently determine who in the target population truly needs outreach, what are the best practices for this initiative and provide guidance in the implementation of validated evidenced based clinical guidelines in the management of hypertension.</p> <p>The PPS is changing the end date to step 4 of milestone 10 to DY3 Q2 to incorporate the Cardiovascular Disease Clinical Workgroup's recommendations in the development and implementation of a training program to support the identification, tracking, and automated scheduling of follow-up visits for targeted patients.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	
Document patient driven self-management goals in the medical record and review with patients at each visit.	
Follow up with referrals to community based programs to document participation and behavioral and health status changes.	
Develop and implement protocols for home blood pressure monitoring with follow up support.	
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	
Facilitate referrals to NYS Smoker's Quitline.	
Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	
Adopt strategies from the Million Hearts Campaign.	
Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	
Engage a majority (at least 80%) of primary care providers in this project.

Project 3.d.ii – Expansion of asthma home-based self-management program

✔ IPQR Module 3.d.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

We have identified several risks to this project. The first is the capacity to provide a comprehensive home-based intervention. As we described in our application, there are a number of existing resources, such as NYC's Healthy Homes program or a.i.r. NYC, to support implementation of this program. Given that a number of other PPSs have selected the asthma-home based project, we are concerned that these resources will not be sufficient to meet the needs of the attributed population. To mitigate this risk, we have identified several strategies. First, we are assessing the capacity of our partners to determine where additional capacity may exist. Second, we are identifying opportunities to support partners to develop capacity. Third, we intend to develop a strategy to recruit and train community health workers. Finally, we are coordinating implementation with other PPSs where feasible to establish community resources to do integrated pest management to reduce environmental triggers.

We also anticipate risks associated with the challenge of patient retention in home-based programs. To mitigate this risk our PPS is considering whether to make available patient incentives related to trigger remediation (e.g., pillow cases) in order to improve retention.

The final risk we have identified relates to health IT. While this intervention is primarily home-based and can leverage the use of non-clinical workers, there is also a need to connect with the emergency department (ED) so that when patients are discharged, a root cause analysis of the ED admission can be performed. Connectivity with primary care will also be important in order to support patients in following their asthma action plan, among other activities. We are concerned that the current degree of connectivity – particularly among some of our community-based partners, -- may not sufficiently support data sharing as needed to be effective. To mitigate this risk we have begun to assess partner health IT capabilities and we have established a set of IT requirements related to all DSRIP projects. Once we have completed a detailed landscape assessment, we will develop an approach to deploying IT and providing implementation and training support to address partner needs in order of priority.

✓ IPQR Module 3.d.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY4,Q4	7,595

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

The PPS did not achieve the DY2 Q2 actively engaged target as it is not feasible to achieve the metric under the revised engagement definition requiring home visits issued by NYS DOH.

Community Health Worker (CHW) visits to patients' homes have initiated at identified NYC Health + Hospitals facilities. Currently, Lincoln Hospital has engaged 31 patients with asthma who have received CHW home visits meeting the NYS DOH's revised engagement definition. There are an additional 11 acute care hospital facilities (include SUNY Downstate) and six community neighborhood clinics that have signed on to commence CHW services. These services include the identification of home and environmental triggers, patient education, the reinforcement of clinical

New York City Health and Hospitals Corporation (PPS ID:52)

recommendations from the Asthma Action Plan, support with self-management, prescribed medication used, medical follow-up, and coordination with social services.

GSIHealth Coordinator (GSI) was selected as the care coordination IT platform for CHW documentation and clinical referral for patients with persistent asthma eligible for enrollment into the Expansion of Asthma Home-Based Self-Management Program. GSI IT trainings will commence November 1 across the PPS. Upon completion of training, CHWs from OneCity Health's contracted community partners will begin engaging eligible patients for home visits.

Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	
Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	
Develop and implement evidence-based asthma management guidelines.	
Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.	
Ensure coordinated care for asthma patients includes social services and support.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	<p>OneCity Health is establishing a separate Asthma Clinical Leadership Workgroup that will meet quarterly and serve in a key advisory role in guiding the PPS as implementation of the Asthma project (3.d.ii) rolls out, including providing guidance in the implementation of validated evidenced-based clinical guidelines in the self-management of eligible patients with persistent asthma. The Workgroup will include a variety of partner organizations that have chosen to participate in the Asthma project.</p> <p>In addition, the Asthma Clinical Workgroup will act as a clinical resource in assisting the PPS in creating a protocolized root cause analysis methodology for eligible patients with persistent asthma who had a primary admission or emergency room visit for asthma, and in creating a workflow to redirect those patients back to ambulatory care for follow-up with self-management support.</p> <p>The PPS has met periodically with the Pediatrics Clinical Council of NYC Health + Hospitals to review project design and implementation planning.</p> <p>OneCity Health is moving the submission date for step 6 of milestone 1 to DY2 Q3 to ensure the Asthma Clinical Workgroup and other stakeholders are maximally engaged.</p>
Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	
Use EHRs or other technical platforms to track all patients engaged in this project.

Project 3.g.i – Integration of palliative care into the PCMH Model

✓ IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Our PPS has extensive palliative care resources. For example, each of the 12 hospitals has palliative care experts who serve a broad range of patient needs. In contrast, our PPS is very limited in terms of the palliative care that is provided in a primary care or patient centered medical home (PCMH) setting. The primary risk we anticipate encountering is the ability of very busy primary care practices to integrate generalist palliative care services and education into their practice. This is due to sometimes short patient visits, workflow changes and data collection (e.g., advanced care directives), managing care transitions, and the need to establish new referral patterns. Our PPS will mitigate this risk by providing standardized training and materials to both providers and other members of the care team, as well as making available an enterprise-wide care management platform. In addition, we will explore the possibility of hiring specially trained physician extenders to support patients' palliative care needs.

Another significant risk involves the requirement that project outcomes be measured using the NY UAS tool. For engaged patients not enrolled in a Managed Long Term Care program, this requirement places a significant burden on the PPS to conduct extensive UAS assessments twice per year for the purpose of collecting outcome measures. In order to administer the UAS, a provider must go through ~40 hours of training, and the assessment itself takes several hours to administer. OneCity Health will attempt to mitigate this risk by working with the State and other impacted PPSs to design an alternative solution for outcome metric collection; we will also leverage providers within our network with existing experience and capacity in administering the UAS.

✔ IPQR Module 3.g.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

During DY2 Q2, OneCity Health engaged 2,385 patients in project 3.g.i.

All patients engaged have received palliative care services at participating Patient Centered Medical Home (PCMH) sites, in accordance with the adopted clinical guidelines. Please see the attached roster with a list of each individual's first/last name and Medicaid CIN.

Milestone Name	Narrative Text
Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	
Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.	
Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	
Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	
Engage with Medicaid Managed Care to address coverage of services.	
Use EHRs or other IT platforms to track all patients engaged in this project.	<p>The PPS determined the scope and role of GSIHealth Coordinator (GSI), a Care Coordination and Management Solution (CCMS), to track patients engaged in the 3.g.i. project. The Palliative Care Outcomes Scale (POS) was built into GSI to assess patients' ability to access palliative care services. In late August 2016, NYS Department of Health notified PPSs that the POS would be replaced by the Integrated Palliative Care Outcomes Scale (IPOS) and that additional guidance would be forthcoming. As a result, OneCity Health paused further development in GSI until guidance and a final version of the IPOS was issued. The PPS will focus its efforts in DY2 Q3 on finalizing the specifications and build of the IPOS into GSI and on developing training materials to begin using the IPOS measurement tool in DY2 Q4, as specified in State guidance.</p> <p>In response, the end date of steps 7-9 of milestone 6 have been changed to DY2 Q3.</p>

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Silos between Substance Abuse and Mental Health Services: One risk that OneCity Health confronts is that programs may not be able to overcome the existing silos between substance abuse and mental health services, and hence will primarily focus on mental health needs, while overlooking substance use needs. The CNA identified pronounced silos in care, despite the co-morbidities of MHSA conditions. Further, various evidence-based trainings focus exclusively on mental health concerns. To mitigate this risk, OneCity Health and its MHSA Collaborative Workgroup PPS partners— Bronx Partners for Healthy Communities, Community Care of Brooklyn, and Bronx Health Access—have agreed to build substance use trainings and materials that address prevention of overdose and unprotected sex and other risky behaviors into core programming. Additionally, the Workgroup includes substance use and mental health experts who will continue to ensure that the project addresses both needs in an integrated manner, and also addresses MHSA needs holistically, together with other health needs.
2. Partnership with the Department of Education: Another risk is that PPS partners will not be able to forge a constructive partnership with the Department of Education (DOE) in order to successfully pursue the school-based interventions. The PPSs have identified strong synergies between this project and DOE programming, such as DOE's investments in mental health infrastructure in approximately 100 community/renewal schools city-wide, but they will need to actively engage DOE to succeed in DSRIP-related transformations. The Workgroup has already been addressing this risk by engaging the Director of School Mental Health Services with the City's Office of School Health and individuals with the New York City Department of Health and Mental Hygiene (DOHMH) as advisory members of the Workgroup. The PPS partners will continue to engage both DOE and DOHMH in developing their approach to programming and staffing.
3. Measurement and Sustainability: Additional risks are that PPSs will lack the robust data set required to measure progress against goals and serve as an evidence base to demonstrate the cost-effectiveness of the activities and, relatedly, that MHSA activities will not be sustainable beyond the demonstration period. The PPSs will address these risks in several ways. First, the intervention aims to develop long-standing, sustainable school-based infrastructure to address MHSA needs. The project design utilizes cost-effective staffing plans and trainings to prepare non-MD school-based staff to serve as effective coaches. Further, the PPSs have committed to working together to build an evidence base to document results and cost-effectiveness. The PPSs have identified certain performance metrics, such as reductions in schools suspensions and 911 calls that they will track during the intervention. They will engage MCOs, SDOH, and DOE in discussions regarding the program's cost-effectiveness and how to finance DSRIP staff and their related school-based activities like "coaching" and referrals under a value based payment system post-DSRIP.
4. Engagement of School Staff: Another possible risk is that school-based staff will be disengaged, based on their own biases or misunderstanding of MHSA-related disease, or fears of being held responsible for individual student outcomes related to MHSA issues. To mitigate this risk, PPSs will build partnerships with teachers and school staff at the ground level. Staff trainings will address issues like bias and stigma and will educate staff about the nature of MHSA conditions. The PPSs will also train school-based staff on when to refer students with potentially more serious problems to available referral channels and help to ensure warm handoffs to appropriate community-based MHSA services.

Project 4.c.ii – Increase early access to, and retention in, HIV care

✓ IPQR Module 4.c.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The most significant risk we anticipate is the complexity of HIV and the need to focus simultaneously on the medical and social needs of patients given the history of stigma, discrimination and neglect related to the populations most impacted by the HIV epidemic and complicated by commonly co-occurring risk factors among this population (e.g., poverty, unmet behavioral health needs). To meet DSRIP goals, we must work against negative social determinants to create environments where patients receive the care needed to protect their health. This risk cannot be mitigated by one or two strategies, but must be a core component of all efforts.

Additionally, we will seek to improve service delivery to support a more welcoming and understanding environment. For example, we intend to emphasize working with community partners that can provide targeted support and outreach related to a specific population (e.g., transgender women) or related to a specific need (e.g., homelessness) and to focus on cultural competencies and integrating peers in various aspects of care. We will seek to improve the tools we have to better identify characteristics that predict delayed entry into care and significant challenges to reaching and maintaining viral load suppression. By building a better identification system, removing barriers that deter patients from seeking and accepting assistance, and by expanding our coordination with community partners we will mitigate the challenges posed by the complex network of obstacles that put individuals at high risk for HIV acquisition and preclude efforts to engage them and have them retained in HIV care.

Another risk we have identified is the collaboration between 4.c.ii and other DSRIP projects within the OneCity Health PPS. This includes a minimum of four elements; the first two are the logistical timing of intervention activities and the need to shape HIV-specific efforts within an evolving healthcare delivery system. The last two are the desire to support the success of the whole of DSRIP in an effort to strengthen the HIV response and the need to maximize resources related to workforce and IT to avoid duplication while ensuring that adequate resources are allocated to individual projects. Our strategy to mitigate this risk is to focus on approaches that we know work, including ensuring that HIV efforts function as part of a larger network of services and leveraging the model of HIV patient-centered care and co-location of services. We will build upon our strong network of HHC HIV providers and the "hub system" that has been established by OneCity Health to support communication across our PPS.

The need to extend collaborative efforts beyond our PPS multiplies the coordination risks related to OneCity Health. To meet our shared goals, we must collaborate across all PPSs with overlapping service areas. To mitigate this risk, we intend to continue to convene the 4.c.ii PPS HIV Collaborative we established. To our advantage is a long history of working with community campaigns and consortia that address different aspects of HIV care and prevention, such as the New York State Quality of Care Committee, the National Quality Center, HRSA's NYC Ryan White Part A Planning Council, the CDC HIV Prevention Planning Group, and CBO networks.

Finally, we will leverage the PPS HIV Collaborative throughout the next five years by continuing to meet with providers, colleagues and stakeholders to ensure that we share best practices, make progress toward alignment of common language and approaches whenever possible in order to promote a consistent standard for HIV providers across the city.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
1. Convening a PPS HIV Learning Collaborative	A Memorandum of Agreement has been drafted and is currently awaiting signature from NYC Department of Health and Mental Hygiene (DOHMH.). OneCity Health is actively following up on this process. In response, the end date of step 2 of milestone 1 has been changed to DY2 Q3.
2. Establishing a work plan and timeline for project implementation.	OneCity Health, along with six other PPSs, have worked to establish a DSRIP HIV Coalition, as convened and managed by the New York City Department of Health and Mental Hygiene (DOHMH). OneCity Health is currently exploring a process by which to develop joint work plans, timelines, and milestones across PPSs with the DSRIP HIV Coalition . In response, the end date of step 1 of milestone 2 has been changed to DY2 Q3.
3. Developing agreed upon milestones for project implementation.	OneCity Health, along with six other PPSs, have worked to establish a DSRIP HIV Coalition, as convened and managed by the New York City Department of Health and Mental Hygiene (DOHMH). OneCity Health is currently exploring a process by which to develop joint work plans, timelines, and milestones across PPSs with the DSRIP HIV Coalition . In response, the end date of steps 2 and 3 of milestone 3 has been changed to DY2 Q3.
4. Agree-on project commonalities and shared resources.	
5. Agree-on a data sharing system to address reporting and implementation needs.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'New York City Health and Hospitals Corporation ', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

Section	Module Name / Milestone #	Review Status	
	Milestone #3 Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Pass & Complete	
	Milestone #4 Develop detailed baseline assessment of revenue linked to value based payment, preferred compensation modalities for different provider types and functions, and MCO strategy for the PPS and for facilitating network partner engagement with the MCOs.	Pass & Ongoing	
	Milestone #5 Finalize a plan towards achieving 80% value-based payments across network by year 5 of the waiver at the latest, including efforts to educate PPS network partners on VBP, organizational models to support VBP contracting such as ACOs and IPAs, and to facilitate network partner engagement with MCOs.	Pass & Ongoing	
	Milestone #6 ≥10% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs	Pass & Ongoing	
	Milestone #7 ≥50% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and ≥ 8%* (blended for 15% target for fully capitated plans (MLTC and SNPS) and 5% target for not fully capitated plans) of total MCO payments captured in VBPs has to be in Level 2 VBPs or higher	Pass & Ongoing	
	Milestone #8 ≥80% of total MCO payments (in terms of total dollars) captured in at least Level 1 VBPs, and ≥ 20%* (blended for 35% target for fully capitated plans (MLTC and SNPS) and 15% target for not fully capitated plans) of total MCO payments captured in VBPs has to be in Level 2 VBPs or higher	Pass & Ongoing	
Section 04	Module 4.1 - Prescribed Milestones		
	Milestone #1 Finalize cultural competency / health literacy strategy.	Pass & Complete	
	Milestone #2 Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	Pass & Complete	
Section 05	Module 5.1 - Prescribed Milestones		
	Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	Pass & Complete	
	Milestone #2 Develop an IT Change Management Strategy.	Pass & Complete	
	Milestone #3 Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	Pass & Ongoing	
	Milestone #4 Develop a specific plan for engaging attributed members in Qualifying Entities	Pass & Ongoing	
	Milestone #5 Develop a data security and confidentiality plan.	Pass & Complete	
Section 06	Module 6.1 - Prescribed Milestones		
	Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	Pass & Complete	
	Milestone #2 Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	Pass & Ongoing	
Section 07	Module 7.1 - Prescribed Milestones		
	Milestone #1 Develop Practitioners communication and engagement plan.	Pass & Complete	

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Section	Module Name / Milestone #	Review Status	
	Milestone #2 Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	Pass & Complete	 
Section 08	Module 8.1 - Prescribed Milestones		
	Milestone #1 Develop population health management roadmap.	Pass & Complete	 
	Milestone #2 Finalize PPS-wide bed reduction plan.	Pass & Ongoing	
Section 09	Module 9.1 - Prescribed Milestones		
	Milestone #1 Perform a clinical integration 'needs assessment'.	Pass & Complete	 
	Milestone #2 Develop a Clinical Integration strategy.	Pass & Ongoing	
Section 11	Module 11.1 - Workforce Strategy Spending (Baseline)	Pass & Complete	
	Module 11.2 - Prescribed Milestones		
	Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Fail	  
	Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	Fail	  
	Milestone #3 Perform detailed gap analysis between current state assessment of workforce and projected future state.	Fail	  
	Milestone #4 Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	Pass & Complete	
	Milestone #5 Develop training strategy.	Pass & Ongoing	
	Module 11.10 - Staff Impact	Pass & Ongoing	 
Module 11.11 - Workforce Strategy Spending (Quarterly)	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
2.a.i	Module 2.a.i.2 - Prescribed Milestones		
	Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Pass & Ongoing	
	Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Pass & Ongoing	
	Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Pass & Ongoing	
	Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	Pass & Ongoing	
	Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Ongoing	
	Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	Pass & Ongoing	
	Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.	Pass & Ongoing	
	Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	Pass & Ongoing	
	Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	Pass & Ongoing	
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	Pass & Ongoing		
2.a.iii	Module 2.a.iii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.a.iii.3 - Prescribed Milestones		
	Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	Pass & Ongoing	
	Milestone #2 Ensure all eligible primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Pass & Ongoing	
	Milestone #4 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Ongoing	
	Milestone #5 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Pass & Ongoing	
	Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Pass & Ongoing	
	Milestone #8 Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Pass & Ongoing	
	Milestone #9 Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Pass & Ongoing	
2.b.iii	Module 2.b.iii.2 - Patient Engagement Speed	Pass & Ongoing	 
	Module 2.b.iii.3 - Prescribed Milestones		
	Milestone #1 Establish ED care triage program for at-risk populations	Pass & Ongoing	
2.b.iii	Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	Pass & Ongoing	
2.b.iii	Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Pass & Ongoing	
2.b.iii	Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	Pass & Ongoing	
2.b.iii	Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
2.b.iv	Module 2.b.iv.2 - Patient Engagement Speed	Pass & Ongoing	 
	Module 2.b.iv.3 - Prescribed Milestones		
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Ongoing	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Ongoing	
	Milestone #3 Ensure required social services participate in the project.	Pass & Ongoing	
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Ongoing	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Ongoing	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Ongoing	
	Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
2.d.i	Module 2.d.i.2 - Patient Engagement Speed	Pass & Ongoing	 
	Module 2.d.i.3 - Prescribed Milestones		
	Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Pass & Ongoing	
	Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	Pass & Ongoing	
	Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	Pass & Ongoing	
	Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.	Pass & Ongoing	
	Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	Pass & Ongoing	
	Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	Pass & Ongoing	
Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
	each cohort at the beginning of each performance period.		
	Milestone #8 Include beneficiaries in development team to promote preventive care.	Pass & Ongoing	
	Milestone #9 Measure PAM(R) components, including: <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 	Pass & Ongoing	
	Milestone #10 Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	Pass & Ongoing	
	Milestone #11 Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	Pass & Ongoing	
	Milestone #12 Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	Pass & Ongoing	
	Milestone #13 Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	Pass & Ongoing	
	Milestone #14 Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	Pass & Ongoing	
	Milestone #15 Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	Pass & Ongoing	
	Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	Pass & Ongoing	
	Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.	Pass & Ongoing	
3.a.i	Module 3.a.i.2 - Patient Engagement Speed	Pass & Ongoing	 
	Module 3.a.i.3 - Prescribed Milestones		

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Ongoing	
	Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #5 Co-locate primary care services at behavioral health sites.	Pass & Ongoing	
	Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #7 Conduct preventive care screenings, including physical and behavioral health screenings.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #9 Implement IMPACT Model at Primary Care Sites.	Pass & Ongoing	
	Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	Pass & Ongoing	
	Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	Pass & Ongoing	
	Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.	Pass & Ongoing	
	Milestone #13 Measure outcomes as required in the IMPACT Model.	Pass & Ongoing	
	Milestone #14 Provide "stepped care" as required by the IMPACT Model.	Pass & Ongoing	
	Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
3.b.i	Module 3.b.i.2 - Patient Engagement Speed	Pass & Ongoing	 
	Module 3.b.i.3 - Prescribed Milestones		
	Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Pass & Ongoing	
	Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	Pass & Ongoing	
	Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or ACPM by the end of Demonstration Year 3.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Pass & Ongoing	
	Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	Pass & Ongoing	
	Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Pass & Ongoing	
	Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	Pass & Ongoing	
	Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	Pass & Ongoing	
	Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	Pass & Ongoing	
	Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.	Pass & Ongoing	
	Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.	Pass & Ongoing	
	Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.	Pass & Ongoing	
	Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	Pass & Ongoing	
	Milestone #16 Facilitate referrals to NYS Smoker's Quitline.	Pass & Ongoing	
	Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	Pass & Ongoing	
	Milestone #18 Adopt strategies from the Million Hearts Campaign.	Pass & Ongoing	
	Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Pass & Ongoing	
Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.	Pass & Ongoing		
3.d.ii	Module 3.d.ii.2 - Patient Engagement Speed	Fail	
	Module 3.d.ii.3 - Prescribed Milestones		
	Milestone #1 Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	Pass & Ongoing	
	Milestone #2 Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	Pass & Ongoing	
	Milestone #3 Develop and implement evidence-based asthma management guidelines.	Pass & Ongoing	
	Milestone #4 Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.	Pass & Ongoing

Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

New York City Health and Hospitals Corporation (PPS ID:52)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #5 Ensure coordinated care for asthma patients includes social services and support.	Pass & Ongoing	
	Milestone #6 Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	Pass & Ongoing	
	Milestone #7 Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
3.g.i	Module 3.g.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.g.i.3 - Prescribed Milestones		
	Milestone #1 Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	Pass & Ongoing	
	Milestone #2 Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.	Pass & Ongoing	
	Milestone #3 Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	Pass & Ongoing	
	Milestone #4 Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	Pass & Ongoing	
	Milestone #5 Engage with Medicaid Managed Care to address coverage of services.	Pass & Ongoing	
	Milestone #6 Use EHRs or other IT platforms to track all patients engaged in this project.	Pass & Ongoing

Additional Project Scale Commitments

Instructions:

Please indicate the scale of the categories below that meet all of the project requirements committed to in the Project Plan Application. Documentation must be submitted in Excel format in the quarter when the PPS provider speed commitments for a particular project are due. This documentation should include the target category(e.g. Medical Villages, Emergency Departments with Care Triage, Community-based navigators, etc.), the project ID(e.g. 2.a.iv,2.a.v,3.a.ii, etc.), and the name of the providers/entities/individuals associated with this project, if applicable.

Project Scale Category	Project	Selected	Committed
Emergency Departments with Care Triage	2.b.iii	0	12
PAM(R) Providers	2.d.i	0	750

* Safety Net Providers in Green

Narrative Text :

12/13/16 Update - Coordinated Behavioral Care (CBC) is both a Health Home and an Independent Physician Association (IPA). The CBC Health Home is distinct from the CBC IPA. The CBC IPA did not have an NPI, and therefore was listed in the supplemental PIT within Implementation Plan Project module 1.4.

In DY2 Q2, OneCity Health flowed \$7,560 to the CBC Health Home (Entity ID: E0345855) AND \$36,027 to CBC IPA.

+++++

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

New York City Health and Hospitals Corporation (PPS ID:52)

During DY2 Q2, OneCity Health paid \$580,404.50 to partners. The Provider Import/Export Tool (PIT) has been populated to reflect funds flow at the highest level of a partner entity, which is consistent with its current partner contracting structure.

OneCity Health is currently performing a comprehensive analysis of all identification numbers (NPI, MMIS, and Entity ID) of its network and is reaching out to select partners to obtain updated listings by provider to report funds flow and project participation on a more granular level in subsequent quarters.
