Narrative Text:

The IA review found no issue of the PPS budget portion of the 6/1 Implementation Plan. The contingency line above has been left blank due to MAPP tool limitations (not allowing negative numbers). The Contingency Fund is a rolling a fund to address variations in revenue throughout the five years.

The line should read:

Page 8 of 460 Run Date : 03/31/2017

Milestone #9 Inclusion of CBOs in PPS Implementation.	In Progress	Explain your plans for contracting with CBOs and their continuing role as your PPS develops over time; detail how many CBOs you will be contracting with and by when; explain how they will be included in project delivery and in the development of your PPS network.	04/01/2015	03/31/2020	04/01/2015	03/31/2020	03/31/2020	DY5 Q4	NO
Task The NYP PPS has a proven track record of effectively leading collaborative teams of NYP, community providers and CBOs in the design and development of innovative care models. The Regional Health Collaborative is one example of a recent success story. The NYP PPS will build on that experience to optimize the governance of the NYP PPS and inform the management of governance risk. Major risks to implementation of the Governance Structure and Processes, and associated mitigation strategies include: Competition for community provider and CBO time: The NYP PPS geography has several different PPS and many community providers and CBOs are members of multiple PPS. As such, demands on these providers and CBO' time are high. We will mitigate this risk by: 1) rotational membership of 10-month Committee terms which decreases the length of service burden; 2) charging Committee members with representation for all like provider and CBO types which will ensure each segment's interests are always represented; and 3) building a broad membership for our Committees, which will allow others to carry more weight when some need to	In Progress	The NYP PPS has a proven track record of effectively leading collaborative teams of NYP, community providers and CBOs in the design and development of innovative care models. IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The NYP PPS has a proven track record of effectively leading collaborative teams of NYP, community providers and CBOs in the design and development of innovative care models. The Regional Health Collaborative is one example of a recent success story. The NYP PPS will build on that experience to optimize the governance of the NYP PPS and inform the management of governance risk.

Major risks to implementation of the Governance Structure and Processes, and associated mitigation strategies include:

Competition for community provider and CBO time: The NYP PPS geography has several different PPS and many community providers and CBOs are members of multiple PPS. As such, demands on these providers and CBO' time are high. We will mitigate this risk by: 1) rotational membership of 10-month Committee terms which decreases the length of service burden; 2) charging Committee members with representation for all like provider and CBO types which will ensure each segment's interests are always represented; and 3) building a broad membership for our Committees, which will allow others to carry more weight when some need to step away.

Sustaining community provider and CBO engagement over DSRIP term: Both competing demands for time within and across PPSs, and the need for community providers and CBOs to maintain their non-DSRIP businesses over the term of DSRIP will be risks. If not mitigated, these risks could result in a lack of engagement across the PPS, which could jeopardize the connectivity and inter-dependence required to produce the broad utilization changes to which DSRIP aspires. The primary mitigation strategy is to ensure that Committees produce meaningful work and engage community providers and CBOs in substantive decision-making at the Committee level. Similarly, engaging in fair and transparent funds flow will be important to securing community provider and CBO loyalty to and engagement with the PPS over time.

IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Good governance is at the heart of a successful PPS. Therefore, interdependence with other workstreams is high. Good PPS governance will require several critical factors to be successful:

Strong IT systems and processes: IT systems and processes capable of collecting and analyzing key performance metrics are essential to support credible and accurate decision-making.

Page 44 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Effective communication among participating community providers and CBO: Active and open decision-making with strong participation from PPS members will support the engagement of community providers, CBOs, and the community at large.

Effective workforce management across the PPS: Training, education and funding must be designed to effectively support the changes needed across the delivery system.

Transparent and credible funds flow management: The effective commitment of DSRIP funds is required to stimulate participation and reward collaboration while buffering the negative impacts of DSRIP program progress on some provider organizations.

Engagement of practitioners across the continuum: Practitioner engagement is critical to achieving the levels of coordination and collaboration required to deliver the right services to the right patients at the right time and at the right locations.

IPQR Module 2.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Lead and Fiduciary	NewYork-Presbyterian (David Alge, VP Integrated Delivery System Strategy, DSRIP Executive)	Policies and procedures; PMO leadership and resourcing; IT infrastructure leadership and resourcing; budgeting and funds flow; PPS legal, regulatory and compliance support; PPS Committee co-Leadership, Project Leadership; quality leadership and assurance
Major FQHC Collaborators	Charles B. Wang Community Health Center (Betty Cheng), Community Healthcare Network (Ken Meyers), Harlem United/Upper AIDS Ministry (Jacqui Kilmer), St. Mary's Center, Inc.	Committee membership; Protocol design for care transitions, ED triage and primary/behavioral integration, palliative care
Major Post-Acute Collaborators	MJHS (Jay Gormley), ArchCare (Eva Eng), Hebrew Home (David Pomeranz), VNSNY (Angela Martin)	Committee membership; Protocol design for care transitions, Ambulatory ICU
Major Children's Healthcare Providers	Leaders from Blythedale Children's Hospital, St. Mary's Hospital for Children, Northside Center for Child Development and others	Committee membership; Protocol design for care transitions, Ambulatory ICU
Major Behavioral Health and Substance Abuse Providers	Leaders from Argus Community (Daniel Lowy), The Bridge, ASCNYC (Sharen Duke), St. Christopher's Inn, and others	Committee membership; Protocol design for primary/behavioral integration, crisis stabilization, HIV COE
Community Health Worker CBOs	ASCNYC (Sharen Duke), Community League of the Heights, Northern Manhattan Improvement Corp (Mario Drummonds), DWDC and others	Committee membership; CHW workforce development; support for CHW technology design
Community Organizations	Various Community Boards, homeless services providers, and others	PAC membership; community feedback

Page 46 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IVALUATION Module 2.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders	1	
All PPS Members	Committee members including, but not limited to primary care, behavioral health and substance abuse providers and CBOs	Representing other like organizations on Committees; providing input and feedback on policies, protocols, performance management, IT strategies and tactics, quality programs; Holding other members accountable
PAC (internal)	PAC membership	Represent PPS members interests and understand community needs
1199 TEF	Workforce expertise	Workforce (re)training, (re)deployment, reduction and hiring best practices and associated resources
External Stakeholders		
PAC (external)	PAC membership	Represent community interests and understand PPS members' needs
Workforce Collaborators (1199, NYSNA)	Workforce advocacy	Support and advise re: workforce engagement plan, training plans, recruitment, workforce feedback
NYC DOHMH	Committee member	Provide integration with other PPS and input on governmental resources and priorities

Run Date: 03/31/2017

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 2.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

A robust IT infrastructure is essential for the various governance committees to support effective and efficient decision-making and DSRIP goal achievement for the NYP PPS. The collection and analysis of data from participating community providers and CBOs will form the basis for an evidence-based process for evaluating effectiveness of PPS interventions across the ten projects as well as the contribution of the various community providers and CBOs in achieving DSRIP goals. Good data and information produced by this IT infrastructure will help build and maintain credibility within the PPS, with the PAC and with the broader community. The IT infrastructure will work collaboratively with the PPS PMO to create effective channels to share information on progress toward milestones, utilization and quality outcomes, and opportunities for community engagement through private and public information-sharing tools.

Key to the NYP PPS IT shared infrastructure will be:

1) successfully building on the current work deploying Allscripts Care Director (ACD) to selected community providers and CBOs involved in the existing NYP Health Home (e.g., ASCNYC). NYP has both an implementation blueprint and a recent and rich understanding of critical success factors and barriers to timely deployment which will heavily inform our approach to deploying ACD more widely across the PPS, and 2) leveraging our leadership role in the RHIO, Healthix, to assure priorities, design considerations, SHIN-NY related decisions, etc. advance the interests of DSRIP and do so in a timely way consistent with the stated DSRIP objectives. NYP plays important leadership roles on various Healthix committees and the Healthix Board.

☑ IPQR Module 2.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

"The NYP PPS has a high likelihood of success in governance due to two important factors. The first is the relatively small size of the PPS membership; our thoughtful and strategic selection of Network Members who together cover the full spectrum of clinical and social determinants of health needs allows us to govern efficiently and effectively. Second, our experience working with many of the Network Members on existing population initiatives allows us to build on trusted relationships (e.g., Charles B. Wang Community Health Center and NYP Lower Manhattan Hospital on serving the Chinese population; Weill Cornell Medical Center and Community Healthcare Network serving underserved populations in Western Queens; Columbia University Medical Center and the myriad CBOs, community providers and pharmacies like ASCNYC, Washington CORNER Project and AIDS Healthcare Foundation serving PLWA/HIV).

The success of NYP PPS governance will be measured by: 1) adherence to these timeline commitments; 2) the application of Committee policies to

Page 48 of 460 **Run Date**: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

resolve issues and meet unanticipated challenges; 3) the development, negotiation and execution of agreements to formalize PPS contractual relationships; 4) robust attendance at the Standing Committees and the Executive Committee; and 5) the management of performance for the PPS as a whole and for individual community providers and CBOs within the PPS.

Milestone Name	Narrative Text					
Finalize PPS finance structure, including reporting structure	There were no changes to the NYP PPS finance structure during DY2, Q3.					
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	There were no changes to the NYP PPS financial sustainability strategy during DY2, Q3.					
Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Attached please find a copy of the annual certification confirmation received from OMIG.					
	Moving milestone back to DY2Q4 submission (3/31/17). PPS requires additional time to capture appropriate assessment results.					
Develop a Value Based Payments Needs Assessment ("VNA")	MAPP ISSUE: The MAPP tool would not allow the PPS to move this milestone back to 3/31/17 since it is hard coded to be due by DY2Q3. The updated December 2016 guidance allows the PPS to submit this by DY2Q4. The IA will need to make the adjustment to the PPS"s milestone.					
Develop an implementation plan geared towards addressing						
the needs identified within your VNA						
Develop partner engagement schedule for partners for VBP						
education and training						
≥50% of total MCO-PPS payments (in terms of total dollars)						
captured in at least Level 1 VBPs, and ≥ 8%* (blended for 15%

DSRIP Implementation Plan Project

Page 60 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Funding: The NYP PPS DSRIP budgeted conservatively based on expectations set by the State regarding both PMPM and preliminary attribution. The actual reduction in funding of 21% resulted in a budget contraction of similar magnitude. At the same time, there has been no relief from any DSRIP reporting or performance requirements. Given that the fixed costs of DSRIP management and technology have not changed, we are concerned about the impact on sustainable implementation of the ten projects and the impact lower funding on our community providers/CBOs. Mitigation strategies include encouraging the State to reduce reporting and performance requirements and conservative planning/expectation-setting across the PPS.

Acceptance by Network Members of Sustainability Plan/compliance with reporting Requirements: Some Network Members may be reluctant to share their financial challenges with other Members. Also, some Members may be not be able to adhere to reporting requirements which may stress organizations which are already financially stressed. Mitigation strategies currently include simplifying reporting requirements within the constraints of the DSRIP requirements, collaborating with other PPSs to encourage the State to develop and maintain a shared warehouse of financial metrics for PPS participants, or collaborating with local PPSs with shared network members to share financial sustainability information. Resources to maintain the financial sustainability monitoring: There is a risk that financial sustainability reporting becomes onerous. This is a risk for the Network Members (see above) and for the PPS Finance Committee and PMO as aggregate reporting requirements across DSRIP are prolific. Mitigation strategies include allowing Network Members to self-report and attest to meeting the requirements and the State, regional PPSs, or the NYP PPS developing an IT capability for automatic metric submission and attestation by the Network Members.

Acceptance of funds flow model by PPS members: Having the buy-in of the PPS membership is key if the PPS is going to meet DSRIP project requirements and earn the performance payments. In some instances those project requirements may negatively affect PPS members' business

requirements and earn the performance payments. In some instances those project requirements may negatively affect PPS members' business model. Therefore, the PPS will regularly communicate with full transparency to all members regarding the funds distribution plan and its related processes.

Adherence by Network Members to compliance reporting: Network Members may have compliance plans that may not be fully aligned with DSRIP

requirements. Modifying compliance plans may require involvement of Boards and organizations may be reluctant to modify long-standing programs. Mitigation strategy includes allowing Network Members to self-report and attest to meeting the requirements.

Building basic understanding of VBP across the PPS membership: Many Network Members lack experience with non-fee-for-service models of reimbursement. The preferred mitigation strategy is the State provides broad-based education for providers at increasing levels of sophistication (and possibly certification to demonstrate proficiency). A less desirable model relies on the PPS Finance Committee (or designee) providing this education.

Analyzing population health data to inform VBP Adoption Plan in a cost-effective way: Little local experience exists in VBP and this presents a risk as achievement of the 80-90% goal is fundamentally transformative and presents a significant threat to participants. In addition, risk exists that preparing for VBP may be cost-prohibitive vis. the needed consultants, IT infrastructure, data analysis and contracting expertise. Mitigation strategies include: collaborating with the State for shared resources, including scrubbed/searchable population data, and collaborating with other PPS in discussions with MCOs to increase scalability.

Page 61 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Major risks to implementation of the Financial Sustainability workstream and achievement of outcome measure targets, and associated mitigation strategies include:

DSRIP Funding: The NYP PPS DSRIP calculated its project budgets based on communications from the State regarding both the PMPM and the preliminary attribution for the NYP PPS. We conducted sensitivity analyses, including the effects of a lower PMPM, lower-than-expected Domain 1 achievement values and lower-than-expected Domain 2 and 3 quality and clinical outcomes measures. The actual reduction in funding of 21% due to the change in attribution methodology and, possibly, a change in PMPM has resulted in a budget contraction of a similar magnitude. At the same time, there has been no communication regarding relief from any DSRIP reporting or performance requirements. Given that the fixed costs of DSRIP management and technology infrastructure have not changed, we remain concerned about the negative impact on our ability to sustainably implement the ten projects chosen and developed by the PPS during the application phase and the impact lower funding could have on our community providers and CBOs. Mitigation strategies include encouraging the State to address reporting and performance requirements in light of this significant funding decrease and conservative planning and expectation-setting across the PPS.

Acceptance by Network Members of the Financial Sustainability Plan and compliance with PPS reporting Requirements: It is anticipated that some Network Members may be reluctant to share their financial challenges with other network members, including potential competitors in other lines of business. In addition, some Network Members may be overwhelmed by (or not have robust enough financial reporting to adhere to) reporting requirements which may add stress and workload in particular to organizations which are already financially stressed. Mitigation strategies currently include simplifying reporting requirements to the extent possible within the constraints of the DSRIP requirements, and collaborating with other PPSs to encourage the State to develop and maintain a shared warehouse of financial sustainability metrics for PPS network members from around the State and, in the absence of that, collaborate with local PPSs with shared network members to share financial sustainability information and mitigation approaches.

Resources to maintain the financial sustainability monitoring: There is a risk should the requirements for financial sustainability reporting become onerous and the metrics either too numerous or not well-defined. This is a risk for the Network Members (as discussed above) and for the PPS Finance Committee and PMO as reporting requirements taken in aggregate across DSRIP are prolific. Mitigation strategies include allowing Network Members to self-report and attest to meeting the requirements (in lieu of PPS Finance Committee/PMO collecting and analyzing). A second mitigation strategy could be the State, regional PPSs, or the NYP PPS developing an IT capability for automatic metric submission and attestation by the Network Members.

Acceptance of funds flow model by PPS members: Having the buy-in and support of the PPS membership is key if the PPS is going to meet DSRIP's overall goals and project requirements and earn the acceptable levels of DSRIP payment. In some instances those project goals and requirements may negatively affect PPS members' standard business model. In order to obtain, and maintain, this essential buy-in the PPS will regularly communicate with full transparency to all members regarding the funds distribution plan and its related processes.

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS PMO	David Alge, VP Integrated Delivery System and Isaac Kastenbaum, DSRIP PMO Director	Responsible for development and management of the PMO Finance function, including functional roles (AR, AP, treasury, etc.), subject matter experts, financial analysts, reporting resources, consultants (as needed) and supporting IT. The PMO will provide guidance and oversight related to the Financial Stability Plan.
PPS Finance Committee Co-Chairs	Brian Kurz, NYP ACN Finance; Network Member (Rotating)	Responsible for the leadership and management of the PPS Finance Committee in its role in overseeing PPS Network Member financial sustainability, including adoption of thresholds, standards and framework.
PPS Lead - Compliance	Debora Marsden, Compliance Officer	Will oversee the development and implementation of the compliance plan of the PPS Lead and related compliance requirements of the PPS as they are defined. Scope would include the PPS Lead compliance plan related to DSRIP. The PPS Lead - Compliance will advise the Executive Committee.
PPS Lead - Audit	Debora Marsden, Compliance Officer	Engages and oversees internal and/or external auditors reporting to the Compliance/Audit Committee who will perform the audit of the PPS related to DSRIP services according to the audit plan recommended by the PPS Compliance/Audit Committee and approved by the PPS Finance Committee and Committees
NYP Budget	Richard Einwechter, Accounting	Oversees NYP accounts payable, treasury/banking and general ledger functions which NYP will be providing to the PPS
NYP Grants Accounting	Sameh Elhadidi, Accounting	Responsible for the day-to-day operations of the DSRIP Accounts Payable function related to the DSRIP funds distribution
Audit	TBD	External auditors will perform the audit of the PPS Lead including those services, functions and funds flows related to DSRIP
VBP Work group (VBPWG)	TBD	Coordinate overall development of VBP baseline assessment and plan for achieving UOSSM or IPC payments; engages third parties as needed to complete

Page 63 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
David Alge, SVP, Community and Population Health	DSRIP Executive Lead	Oversight of the DSRIP initiative for the PPS
Isaac Kastenbaum, Director Strategy	DSRIP PMO Director	Day-to-day operations of the PMO and the PPS infrastructure including Governance
Debora Marsden, Compliance Officer	"PPS Lead - Compliance PPS Lead - Audit "	Oversight of Compliance and Audit functions, staffing and deliverables
Gil Kuperman, MD, PhD, Director Interoperability Informatics	PPS IT Infrastructure Lead	Information Technology related requirements for the finance function; access to data for the finance function reporting requirements
Various (rotating)	PPS Executive Committee	Oversight of PPS Finance and Audit Committee recommendations; review of VBP Adoption Plan
Various (rotating)	PPS Finance Committee	Oversight of financial sustainability plan development, implementation and enforcement; review of VBP Adoption Plan
Various (rotating)	PPS Compliance/Audit Committee	Oversight of compliance plan development, implementation and enforcement
External Stakeholders		
Various (rotating)	PAC	Communication of community needs and interests related to network financial sustainability and compliance
MMCOs and other payers, including special needs plans	VBPWG	Productive engagement with the PPS VBPWG
NYS DOH	Defines related DSRIP requirements	Timely, exhaustive requirements; robust support for fulfilling; and easy access to enabling data, technology and other tools

Page 64 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The development of shared IT infrastructure across the PPS will support the PPS Finance Committee and the PMO in the financial sustainability work by providing the Network Members with capability for sharing and submitting reports and data pertaining to organizational performance in a secure, manipulable and compliant manner.

Shared IT infrastructure and functionality is critical to supporting the work of the VBPWG, including the development of the VBP Baseline Assessment and the VBP Adoption Plan, including:

Population Health Analytic Infrastructure: Systems, data sets, tools and technology

Allscripts Care Director: care coordination software that supports management of patient populations across the Network Membership RHIO/SHIN-NY: interoperability and connectivity needed to share information to optimize timely and effective management of patient care.

IPQR Module 3.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The performance of the NYP PPS with respect to Financial Sustainability will be measured by the PPS PMO, as established by the Executive Committee. Success will be measured by: 1) adherence to these timeline and milestone commitments; 2) the deployment of the Financial Sustainability Plan including a manageable and measurable set of financial and operational metrics for routine reporting; 3) the effectiveness in either supporting financially fragile organizations in their return to health OR transitioning responsibilities for patient care and other services to stronger organizations; 4) the adherence to compliance commitments at a comparable rate to other PPSs; and 5) robust attendance and participation by the VBPWG; and 6) comparison of PPS performance to the NYS VBP Roadmap goal of 90% VBP.

IPQR Module 3.9 - IA Monitoring

Section 04 – Cultural Competency & Health Literacy

IPQR Module 4.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	Completed	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: Identify priority groups experiencing health disparities (based on your CNA and other analyses); Identify key factors to improve access to quality primary, behavioral health, and preventive health care Define plans for two-way communication with the population and community groups through specific community forums Identify assessments and tools to assist patients with selfmanagement of conditions (considering cultural, linguistic and literacy factors); and Identify community-based interventions to reduce health disparities and improve outcomes.	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task VP, Community Health develops expanded cultural competency/health literacy strategy ("CCHL") based on the core NYP "Culture of One" framework. Inputs will include: Clinical Operations Committee and internal and external colleagues with an expertise in cultural competency/health literacy and delivering cultural competency/health literacy training to healthcare providers.	On Hold	VP, Community Health develops expanded cultural competency/health literacy strategy ("CCHL") based on the core NYP "Culture of One" framework. Inputs will include: meetings and discussions with key CBOs, Network Members and community stakeholders; and a review of the health disparities and community needs in each NYP PPS service area (Southwest Bronx, Upper Manhattan, Upper East Side, Harlem, Western Queens and Lower Manhattan) via the CNA.	04/01/2015	03/31/2020	04/01/2015	03/31/2020	03/31/2020	DY5 Q4

IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Much the NYP PPS service area is comprised of linguistically isolated ethnic and racial minorities. The NYP PPS has adopted a patient-centered approach to cultural competency, known as the "Culture of One," which is aligned with the National Quality Forum's (NQF) framework, was arose from seminal research published by NYP's VP-Community Health, Dr. Emilio Carrillo, in 1999 and is used internationally. As part of the Culture of One, the the burden of clear communication and understanding is placed on the provider, not the patient, otherwise, we risk the same fragmented care that DSRIP seeks to remedy.. We have identified several associated implementation risks:

Training. We must ensure that all providers on a patient's care team across the continuum are consistently and effectively trained in cultural competency and health literacy. To mitigate this risk, the NYP PPS will train frontline staff and physicians to provide care that respects patients' "Culture of One" by treating patients as individuals whose culture is unique and a result of multiple social, cultural and environmental factors and avoiding racial or ethnic stereotyping. Additionally, providers and staff in certain projects will receive supplemental training on sensitivities related to specific target populations. For example, those involved in Project 3.g.i will receive training on how to deal sensitively with patients and families facing advanced illnesses. Those involved in Projects 3.e.i and 4.c.i will receive training that will include education on HIV as a disease, gender identity, substance abuse issues and disability issues. We will also establish an expert panel to review the health literacy level of DSRIP project educational materials.

The NYP PPS also intends to co-invest with the State through the CRFP and with ASCNYC in a Peer Training Institute which provide training for CHWs, Patient Navigators, Health Educators and Interpreters. These "peer providers" are trained local community members who provide diagnosis-specific education in a linguistically and culturally appropriate manner to patients and families. At the Peer Training Institute, trainees will learn to avoid the pitfalls of "false fluency" and of using family interpreters or bilingual providers as ad hoc interpreters. They are critical to mitigating the barriers presented by the cultural diversity of our attributed beneficiaries.

New Patient Population. Though NYP has extensive experience with Upper Manhattan communities, it has less experience with the Asian population that lives in Lower Manhattan, home to its newest hospital, NYP/LM. This service area is 25% Asian with a majority of Chinese origin (75% of the Asian population; 18% of the total service area). Almost a third of the population is foreign-born, 60% of which originate from Asian countries. Twenty percent of the population speaks an Asian language, of which 65% speak English less than "very well." To address the challenge of working with this new population, the NYP PPS will collaborate with long-standing, experienced leaders in the community such as Charles B. Wang Community Health Center as well as the NYC Department of Health and Mental Hygiene for training, translated materials and so on.

In addition, the NYP PPS will establish and provide guidance to existing and new cultural competency committees at several large Network Members to ensure that the Culture of One program is tailored to the needs of PPS members.

Data Collection. In order to analyze data and measure progress/success, we must capture the appropriate patient-level data at each encounter.

These include but are not limited to ethnicity, race and preferred language. To mitigate the risk of not having adequate data, training for registrars and other front-desk staff will include education on how to ask these sensitive questions and how to code them appropriately.

IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Page 72 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

"As Cultural Competency and Health Literacy are integral to the roll-out of all DSRIP projects, several interdependencies are noted below.

Workforce Strategy. The overlap between these two workstreams is related to 1) hiring and 2) training. First, the PPS will hire close to 40 culturally competent peer providers (Community Health Workers and Patient Navigators). This group of new employees is an important link between beneficiaries and medical/social services. Second, cultural competency and health literacy training is a key aspect of the PPS's workforce development strategy. To ensure standardized training across all staff, the Community Health Department and Workforce Sub-committee will work together to design and implement a training schedule, to be approved by the Clinical/Operations Committee. In addition, NYP and ASCNYC are partnering to develop a Peer Training Institute which will be a PPS center for Community Health Worker, Patient Navigator, Health Educator and Interpreter training serving all NYP PPS projects and Network Members.

Financial Sustainability. Similar to the Workforce Strategy workstream, we must be able to finance cultural competency and health literacy training. To that end, the Finance Committee has embedded within it a member of the Workforce Sub-committee, who will be able to speak to cultural competency and health literacy training. The Finance Committee will also invite the Community Health department to report on this training.

Governance. The NYP PPS will rely on several key Network Members, such as Charles B. Wang Community Health Center, to assist in its cultural competency and health literacy training. To keep these Network Members engaged, we will make sure they are among the first to serve on the Executive Committee and Clinical/Operations Committee.

Practitioner Engagement. The practitioner communication and engagement plan will include information and training on cultural competency and health literacy. Physicians (including house staff) will need separate training from care team staff (RNs, etc.)."

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 4.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Community Health	Emilio Carrillo, MD, VP Community Health, NYP	Developing and executing cultural competency and health literacy strategy and training
CCHL Strategy Work Group	Emilio Carrillo, MD, VP Community Health, NYP and Various Others (NYP and Network Members)	Develop CCHL Strategy
Community Health	Victor Carrillo, Community Health	Executing strategy globally
Organization-Based Cultural Competency Committees	Multiple PPS Network Members	Executing strategy locally

Page 74 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 4.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Andrea Procaccino	Chief Learning Officer (Head of Training and Development), NYP	Consulting on workforce training needs
SHAWN MCCOLLISTER	Workforce Sub-committee Lead	Work with Community Health on training roll-out
Charles B. Wang Community Center	Experienced PPS Network Member	Assistance with cultural competency and health literacy training for Lower Manhattan population
1199 Training & Employment Funds (TEF)	Workforce training	Training assistance for frontline workers
Employees / Practitioners	Providers	Engage in training
All PPS Network Members	IT Contacts	Liaison
Eliana Leve, LCSW, MA, CASAC	Deputy Executive Director for Programs, AIDS Service Center NYC	Development of Community Health Worker Peer Training Institute in Upper Manhattan.
External Stakeholders		
NYC DOHMH	Training and technical assistance	Technical assistance for projects at the NYP/LM campus
NYU NYC Treats Tobacco	Training and technical assistance	Technical assistance for Project 4.b.i - Tobacco Cessation
1199 SEIU; NYSNA	Labor/Union Representation	Expertise and input re cultural competency training

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

Page 75 of 460

Run Date: 03/31/2017

IPQR Module 4.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

"Shared IT infrastructure development will support the implementation of our cultural competency / health literacy strategy in three ways: 1) Workflow support for care coordinators via Allscripts Care Director; 2) Documentation support for Community Health Workers; and 3) Enhancements to the patient portal.

Workflow support for care coordinators. The PPS will extend Allscripts Care Director (ACD), an application that supports the work flows of care coordinators to multiple Network Members across the care continuum. The application enables care coordinators to care for registries of patients; manage tasks related to those patients; and document assessments, care plans, problems, goals, interventions and future tasks. In this way, care team members across the continuum can be made aware of patients' cultural preferences.

Documentation support for Community Health Workers (CHWs). Culturally competent CHWs will serve as a link between patients and medical/social services. The CHWs will see patients in their homes and document their findings, e.g., psychosocial issues that may be hurdles to the delivery of optimal care and recommendations for referrals to community-based organizations. Because CHWs are mobile, the PPS will provide them with a wireless-enabled tablet-based application for documentation. The application will allow both free-text and structured documentation approaches. The PPS will leverage lessons learned as part of a NYS eHealth Collaborative Digital Health Accelerator project in which NYP piloted electronic documentation for CHWs.

Enhancements to the patient portal. The PPS will develop a patient portal for patients. We will create specialized, relevant, multi-lingual content to improve health literacy such as asthma-related materials for parents of asthmatic children and information about managing multiple chronic diseases for adults. The content will be clinically oriented but also provide information about Network Members and social services available."

IPQR Module 4.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Because the cultural competency / health literacy strategy is at the core of every project, we will measure its success by analyzing: 1) existing disparity-sensitive clinical outcomes measures, as defined by the National Quality Forum (NQF); 2) Ambulatory Care Sensitive Conditions (PQIs and PDIs); 3) measures associated with cultural competency; and 4) utilization (i.e., emergency department visits, hospitalizations and 30-day readmissions) and patient satisfaction. We will also track the number of providers (staff, physicians and peer providers) trained as measure of our

Page 76 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

progress.

Disparity-Sensitive Clinical Outcomes. Each project has its own clinical outcomes measures of success. We will select existing measures that qualify as "disparity-sensitive" as defined by the NQF, i.e., "those that serve to detect... differences in quality among populations or social groupings (race/ethnicity, language, etc.)." These measures include care with a high degree of discretion, such as the decision to prescribe medication to control a patient's pain (e.g., Project 3.g.i); communication-sensitive services, such as smoking cessation counseling (e.g., Project 4.b.i); social determinant-dependent, or patient self-management, measures, such as medication adherence to diabetes or CHF management (e.g., Projects 2.b.i, 2.b.iv); and outcome and communication-sensitive process measures, such as the provision of certain vaccines, where some groups may have specific concerns about some interventions or medications over others (e.g., Project 2.b.i).(1)"

"Ambulatory Care Sensitive Conditions. PQIs measure potentially avoidable hospitalizations for ambulatory care sensitive conditions and reflect issues of access to high-quality ambulatory care, which may be the result of disparities in care. Examples are short-term complications from diabetes and uncontrolled diabetes admission rate, both of which will likely be tracked by Project 2.b.i.

Cultural Competency Measures. We will track some of the NQF-endorsed measures associated with culture, language and health literacy. For example, patient readmission measures are included in this bucket due to the importance of patient-provider communication in transitions of care (e.g., Project 2.b.iv). Other examples are adherence to chronic care medication (e.g., Projects 2.b.i, 3.e.i) and the conducting of a depression assessment (e.g., Projects 2.b.i, 3.a.i, 3.a.i, 3.a.i, 3.a.i, 3.a.i).

Utilization and Patient Satisfaction. We will measure changes in utilization (admissions, readmissions and ED visits) and patient satisfaction (via Press Ganey) in aggregate and by categories such as race, ethnicity and preferred language, much as we did with the NYP Regional Health Collaborative (RHC). In October 2010, NYP, in association with the Columbia University Medical Center, launched an integrated network of patient-centered medical homes that were linked to other providers and community-based resources and formed a "medical village" in Northern Manhattan. Three years later, a study of 5,852 patients who had some combination of diabetes, asthma and congestive heart failure (CHF) found that emergency department visits, hospitalizations and 30-day readmissions had been reduced by 29.7%, 28.5% and 36.7%, respectively, compared to the year before implementation of the network. Patient satisfaction scores improved across all measures.(2)

IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The biggest risk to implementing the IT governance structure and network-wide infrastructure is that funding from the CRFP is not approved. The NYP PPS IT infrastructure is a prerequisite to achieving the goals of DSRIP. If we receive less funding than expected, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Another risk is the need to develop new inter-institutional workflows. These challenges will be mitigated through leadership commitment from NYP and the Network Members as well as dedicated project management resources.

Third, there is a need to develop robust governance processes. The mitigation approach will be to use the IT/Data Governance Committee to make decisions as needed, with approval from the Executive Committee.

Finally, there is the risk that our assumptions, though conservative, have still underestimated the budget for key parts of the infrastructure. To mitigate this risk, we plan to use operational funds earmarked for projects if needed.

One of the key risks is the capacity of the RHIO to connect new members. Healthix has to support about eight PPSs citywide, and the number of new interfaces they will need to create is estimated at over 1,000. They have given us a tentative timetable that it will take until the end of 2016 to connect all NYP PPS Members. We will mitigate this risk by (i) prioritizing the connections so that the partners that are most important to achieving our goals will be connected first; and (ii) having a multi-layered data exchange strategy that includes—beside the RHIO—key members using Allscripts Care Director, the use of direct messaging and the secure exchange of auxiliary files when necessary.

Another challenge will be consent. Obtaining consent can be operationally difficult to implement, yet RHIO consent is a core measure of success for the PPS. Mitigation approaches include (i) leadership commitment from the partners to participate in HIE-related obligations; (ii) educating partner organizations about the processes necessary to obtain consent; (iii) examining the consent options; and (iv) staffing, in the form of a "CBO integration manager," to help partners organizations work through consent-related challenges.

Third, there is the challenge of interoperability amongst various vendors and with different Network Members. To mitigate this risk, the PPS intends to assure that all relevant PPS partners are connect to Healthix so that the Network Members can access the basic, necessary data to care for patients. NYP currently connects to the State Health Information Network for New York (SHIN-NY) via Healthix. Currently, only a minority of NYP PPS Network Members are Healthix participants.

Another risk mitigation strategy to address interoperability and the ability to share data is the implementation across the PPS of Allscripts Care Director (ACD), a care coordination platform supported by NYP. PPS members will use ACD to document patient assessments and care plans and to see documents entered by others who are caring for the patient. ACD currently is being used by several CBOs as part of NYP's Medicaid Health Home program and will be extended under DSRIP.

The goals of the PPS will be achieved through the implementation of technology-enabled work flows that include increased access to the patient's data by members of the patient's care team. The increased access will be achieved through (i) the use of Allscripts Care Director by Network Members and (ii) the use of Healthix.

To mitigate ACD's risks, ACD's privacy and security framework includes BAAs, which establish privacy obligations under HIPAA; formal processes for creation/termination of accounts; training in privacy and security; and password management. Healthix members sign a Participant Agreement, which obligates them to adhere to Healthix's Privacy and Security Policies.

Page 87 of 460 Run Date: 03/31/2017

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The IT Systems and Processes workstream will depend on:

Cultural Competency. As RHIO consent is an important part of the success of DSRIP, cultural competency and health literacy will be essential to the success of this workstream. The PPS must ensure that consent is accessible to a diverse audience. As discussed in other parts of the implementation plan, we will ensure accessibility by providing cultural competence and health literacy training to all frontline staff and peer providers who will be working with our attributed population. In addition, we intend to redesign patient registration areas in NYP's clinics to include a small education cubicle for private conversations with patients regarding health-related issues and obtaining RHIO informed consent as well as a patient education cubicle or kiosk.

Practitioner Engagement. IT is but a tool; in order for the workstream to be successful, practitioners must be engaged in learning new software or using existing software in new ways, as the case may be. Most DSRIP projects depend on the successful implementation of new software systems, including EHRs, the care coordination platform Allscripts Care Director (ACD) and access to the Healthix RHIO. New and existing workers at all levels will need technical training and engagement support to ensure that impacted staff are ready, willing and able to succeed with the new system. To address this challenge, the NYP PPS will retain the 1199SEIU League Training and Employment Funds (TEF) as the lead workforce development provider. Using TEF's expertise in this area, the PPS will provide training to incumbent workers who need additional skills to do existing jobs and develop training for new staff. Training will also be delivered by external resources from the community or by the NYP internal training department (Talent Development). For some projects, we plan to engage with the NYC Department of Mental Health and Hygiene to assist in technical training (see Project 4.b.i). Software vendors such as Allscripts and Healthix will also conduct their own user training.

Governance. The size of the NYP PPS--though small relative to others in the Greater NYC area--makes staying on the same page with regard to IT decisions important. The goals of the PPS will have to dictate the final local decisions, but the Data/IT Governance Committee and Clinical/Operations Committee will both provide operational and clinical decision-making to guide the Network.

Clinical Integration. As strategies and workflows are developed for network integration, the supporting IT infrastructure will be developed simultaneously so that these two aspects fit together to form a coherent process. Workflows and information technology support will be developed simultaneously to support: 1) the identification of the patients that can benefit from involvement with Network Members; 2) the methods that are used to inform Network Members about the need for engagement with the patient; 3) the data that needs to be available to Network Members; 4) the protocols that will be used to care for the patient; and 5) the methods for data flows from Network Members to other clinicians. Education, training and other operational processes related to the information systems (e.g., authorization) will be taken into account as clinical integration processes are implemented.

Performance Reporting. Information systems will be involved as performance measurement specifications are developed. We expect that some specifications will be related to DSRIP project goals, per se; other specifications will be related to quality measures and yet others will be related to more general performance improvement goals. Information Services will be involved with the project teams as these specifications are developed.

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 5.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities		
Corporate IT Director for Analytics, NYP	Niloo Sobhani	Co-Chair of IT/Data Governance Committee		
PPS Network Member	Rotating	Co-Chair of IT/Data Governance Committee		
Director of Interoperability Informatics, NYP	Gil Kuperman, MD, PhD	Implementation of IT infrastructure components; coordination of training		
Chief Information Security Officer, NYP	Jennings Aske	Implementation of data security plan		
ACN/Financial Operations	Brian Kurz	Architect of clinical operations (registration) redesign to implement RHIO consent process		
Clinical Expertise	TBD	Clinician(s) familiar with the PPS population who can provide guidance on implementation of the RHIO consent process and other changes		
PPS Network Member Expertise	Network Members TBD- to include primary care, behavioral health and substance abuse (e.g., Charles B. Wang CHC, Harlem United, Community Healthcare Network, ASCNYC, Argus, The Bridge, NYSPI)	Operations counterparts at Network Member sites who can provide guidance on shaping the RHIO consent process and other change, particularly as relates to securing consent from lower SES, substance abusing and mentally ill patients		
State and Local Government Expertise	e.g., DOH, DOHMH	Share best practices among participating PPS and advocate for streamlined documentation and processes to support goal of universal RHIO consent		

Page 89 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 5.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Daniel Barchi	Chief Information Officer, NYP	Overseeing all IT implementation
Davina Prabhu	VP, NYP ACN	Overseeing changes to registration at ACN to implement RHIO consent process
Cheryl Parham	Lead Counsel, NYP	Ensuring that contracts for software across the PPS are legal
PPS Network Members		Good faith efforts to incorporate necessary IT and encourage practitioners to use it
Clinical/Operations Committee	Several	Guidance on clinical and operational aspects of IT implementation
External Stakeholders		
RHIOs (Healthix, BRIC)	Infrastructure, Training	Delivery of on-time project; user training
Medicaid beneficiaries	Recipients	Providing RHIO consent
Software Application Vendors (Allscripts, etc.)	Infrastructure, Training	Delivery of on-time project; user training
1199 SEIU Training & Employment Fund	Training	Training of front-line workers in new systems and processes

Page 90 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 5.7 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

We will measure the success of this organization workstream in several ways, including:

- Successful roll-out of all seven components of the IT infrastructure project:
- (1) Development of an automated work flow platform to support care coordinators. Metrics will include installation of Allscripts Care Director in targeted sites and usage statistics.
- (2) Enhancements to the electronic health records (EHR) applications. Metrics will include tracking changes necessary for becoming a Level 3 PCMH as well as project-specific needs.
- (3) Procurement and implementation of an automated application for mobile Community Health Workers. Metrics will include usage and usability statistics based on conversations with CHWs.
- (4) Development of health information exchange (Healthix RHIO) so that members of the care team can interact optimally. Metrics will include number of connections and pace of roll-out.
- (5) Data interfacing capabilities to move data among applications. Metrics will include number and type of data interfaces as well as utilization statistics.
- (6) Enhancements to the NYP patient portal. Metrics will include the selection of the final patient portal and how often it is used by PPS beneficiaries.
- (7) Development of an analytics platform to support the PPS. Metrics will include number and quality of reports developed to oversee the performance of the PPS.
- RHIO consent attempts and the consents themselves.
- Patient safety improvements, including reduced patient safety errors and adverse drug events.

IPQR Module 5.8 - IA Monitoring

IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

"Data Availability. DOH is the source of much of the performance reporting data; that data is on a significant delay. The PPS will rely heavily on the MAPP tool as the most complete and relatively current data repository which either provides actuals or proxies for data used for performance measurement purposes so the PPS understands progress and challenges. MAPP has the potential to become a roadblock if there are delays in release or concerns about data integrity.; already it is proving to be a cumbersome and slow-responding web-based tool without the upload/transfer functionality this PPS would expect of the central tool supporting a state-wide program of this magnitude. To mitigate this, the PPS will analyze existing or propose easily implementable measurements based on internal data with which real-time (or near) performance can be ascertained. However, the PPS has not contemplated replicating the data repository or analytic capability which is to be provided by the MAPP as that is both incompatible with available DSRIP funding and the DOH has been clear throughout the process about its accountability for this function.

Resistance to Change. One risk is practitioners who are resistant to changing practice in response to performance reporting. To mitigate this challenge, the PPS PMO will design practitioner surveys and analyze responses to gauge levels of engagement or resistance. The PPS Clinical/Operations Committee will represent practitioner interests, solicit input through surveys and recommend practitioner group structure to PPS Executive Committee as well as monitor practitioner engagement plan. In addition, we will establish Practitioner Groups, whose leads will represent practitioners to the Clinical/Operations Committee as needed to advance the engagement agenda. Our hope is that if practitioners feel they have a voice in the process, they will be more responsive to performance reporting and management.

IT Systems. Because of the complexity of the DSRIP initiative, there is a risk that the IT capabilities will not be able to provide practitioners and managers with the data they need to make decisions. To mitigate this risk, IT personnel will be involved as performance measurement specifications are developed.

Time Lag in Capabilities. We recognize that we will need to monitor performance starting April 1, 2015; clearly our reports will not be deployed at that point, which is a risk to the performance management system and culture. To address this challenge, we will prioritize reporting needs and roll them out incrementally. In the interim, we will rely on the State's data via the MAPP portal (e.g., performance on the claims-based, non-Hospital CAHPS DSRIP metrics as well as the DSRIP population health metrics) to benchmark ourselves against other PPSs and compare Network Members' progress internally. In addition, we will identify other available performance measures which may serve as effective proxies and leading indicators for some of the more important metrics, until the official measure is available."

IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Page 96 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

"IT Systems and Processes. Clearly, IT infrastructure forms the backbone of reporting capabilities. Though inputs to the reports will come from clinicians, Project Leads, key Network Members and other stakeholders, the analytic output is dependent on the PPS' IT function putting it all together in a useful manner.

Governance. Without effective leadership and a clearly defined organizational structure, with clear responsibilities and lines of accountability, our ability to create a common culture and to embed performance reporting structures and processes will be severely hampered. The NYP PPS Clinical/Operations Committee will be responsible for reporting on PPS performance, both at an individual project level and at a network level. This Committee will be led by one NYP representative and one community provider or CBO representative, with membership including representation from all Network Members. This group will report directly to the Executive Committee and receive analytical support from the IT/Data Governance Committee and the PMO. The Finance Committee will also monitor financial performance (revenue and expenses) of the PPS. Both committees will report on the "State of the PPS" at bi-monthly committee meetings and at Executive Committee meetings.

Workforce Strategy. The size of the NYP PPS—from Network Member, staff and provider perspectives—will pose the classic management challenge of integration, e.g., gaining buy-in to the established governance and performance management structure and processes. The Workforce Sub-committee will provide overall direction, guidance and decisions related to the workforce transformation agenda, including developing a change management strategy that addresses performance management. In addition, providers will need training on using performance reporting systems and/or understanding how to read and interpret reports.

Likewise, Practitioner Engagement and Clinical Integration will both be critical to creating a common performance culture throughout the PPS network, and to embedding the new performance reporting practices within existing clinical practice.

Page 97 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 6.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PMO	Isaac Kastenbaum, Director, DSRIP PMO	Initial performance reporting strategy
Project Leads	Elaine Fleck MD, Adriana Matiz MD, Peter Steel MD, Jordan Foster PD, Patricia Peretz, Peter Gordon MD, Sam Merrick MD, Veronica Lestelle, Craig Blinderman MD, Barbara Linder, Dianna Dragatsi MD, David Albert DDS and Julie Mirkin RN	Initial performance reporting strategy; clinical and financial outcomes for projects
Workforce Sub-committee	Eric Carr, Lead	Strategy to include performance reporting training into DSRIP-wide training, as appropriate
IT Lead	Gil Kuperman, MD, PhD, Director, Interoperability Informatics	Lead for creation of analytic tools
Network Members	variousto include community physician practices, FQHCs/Article 28, Article 31, Article 32 and, as appropriate, non-licensed Network Members that may impact, or be impacted by, PPS performance	Provide input and feedback into performance reporting and communications strategy

Page 98 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 6.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		•
1199 TEF	Training Vendor	Assist with scheduling and rolling out training
Clinical/Operations Committee	PPS Committee	Oversee roll-out of performance reporting
IT/Data Governance Committee	PPS Committee	Oversee roll-out of analytic tools for performance reporting
PPS Lead Employees/Practitioners	Providers	Engage in training and required reporting
PPS Network Members	Primary care, behavioral health, substance abuse, care management and other provider and support functions, as appropriate	Engage in training and required reporting
PPS Network Members	IT and HR Contacts	Liaison for performance reporting implementation and training
External Stakeholders		
1199/NYSNA	Labor Unions	Advising on workforce issues related to training
DOH	DSRIP measurement partner and customer	Providing guidance, best practices and tools to enhance value of performance reporting
Medicaid Patients/Representatives	Healthcare customer	Input into performance monitoring and continuous performance improvement processes
Non-PPS IPAs/Physicians	Shared patients	Provide input and feedback into performance reporting as impacts the non-PPS network member

Page 99 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 6.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

"The NYP PPS will use a variety of analytics tools (Microsoft Amalga, Tableau, SAS, etc.) to develop reports that monitor process and outcome measures with data from EHRs, Allscripts Care Director (care management platform), the Healthix RHIO and implementation reports. The analytics platform will provide population health management capabilities for the PPS. The platform will identify eligible patients, receive identifying information from NYS and combine it with NYP medical records and PPS-wide care coordination platform data. Analysts will create data marts that—with graphical front-end tools—will provide management reports, quality reports, reports for regulatory reporting purposes, lists of patients meeting specific criteria that need care coordination services and predictive models that identify likely high utilizers of care. The analytics platforms will leverage NYP's existing database hardware and analytics software, but additional application software, database servers and hard disk storage will be needed to support the PPS.

Analytics reports, including baseline, current and target performance metrics, will be available on the PPS's intranet website. Performance data will be reviewed at weekly PMO meetings and bimonthly Clinical/Operations Committees; to achieve necessary targets, each group will develop a plan-do-study-act (PDSA) cycle for metrics that are not achieving their goals. Any major tweaks to project activities will be reviewed by the Executive Committee and the NYS DOH, when appropriate. The IT/Data Governance Committee will be responsible for interfacing with the Project Leads as well as the Clinical/Operations Committee to ensure that dashboards, reports and metrics are accurate and user-friendly, i.e., easy to read/understand and helpful in making decisions."

IPQR Module 6.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

From NYP's population health experience, we understand that effective rapid-cycle evaluation (RCE) is critical to the success of the NYP PPS's DSRIP projects. Effective RCE requires: 1) clear definitions and benchmarks for performance measurements; 2) developing the appropriate data governance standards; 3) scheduling regular meetings to review performance data; and 4) focusing on both process and outcomes data. We will measure the success of this workstream by examining the usefulness of reports, both to the PPS Committees and to practitioners, i.e., how much they are used to make decisions for the next reporting period. We will also look at how well providers and Network Members understand their performance.

IPQR Module 6.9 - IA Monitoring

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Competition for practitioner time: The NYP PPS geography has several different PPSs and many practitioners are members of multiple PPSs. As such, demands on these providers are high. We will mitigate this risk by: 1) seeking input from practitioners as to topics of interest, methods of communication and availability, so the training/education plan is sensitive to their needs; 2) collaborating (where feasible and practical) with other PPSs in general training and education topics; and 3) offering virtual participation for most training/education events.

Sustaining practitioner engagement over DSRIP term: Competing demands for time within and across PPSs, and the need for practitioners to maintain their non-DSRIP businesses over the term of DSRIP will be a risk. If not mitigated, that risk could result in a lack of engagement across the PPS which could jeopardize the level of awareness, knowledge and expertise required to produce the broad system transformation DSRIP aspires to. The primary mitigation strategy is to ensure that the practitioners are engaged in meaningful, efficient and effective training and education that delivers value to the practitioner and not just the NYP PPS or the DSRIP Program more broadly.

High practitioner turnover undermines common knowledge foundation: New care delivery models and new roles require significant practitioner upstaffing which is expected to lead to intense competition for resources. While the mitigation strategy for the resource competition remains elusive as of now, the mitigation strategy for delivering practitioner training/education in a high turnover environment may benefit first and foremost from a commitment by the State (including DOH, OMH, OPWDD, etc.) to developing and delivering high-value cross-PPS training modules. That means the training/education burden at the PPS level is specific to PPS projects, strategies and populations. Then, the mitigation strategies become: 1) simple, direct, "turnkey" training, especially virtual training and training which can be delivered in a "train-the-trainer" mode; and 2) collaborating (where feasible and practical) with other PPSs in general training and education topics so practitioners have a choice of trainings available and the expense burden is shared.

Technology as a barrier to engagement, collaboration and understanding: Practitioners are both dependent on, and frequently isolated by, technology. That is, technologies that support workflow, decision-making and record-keeping are frequently different within and across practitioner types. That can negatively affect engagement, communication and transformation of clinical practice. To mitigate this risk, a multi-pronged approach must be taken. One is a concerted effort to raise the level of all primary care practitioners through the common requirements and language of PCMH and Meaningful Use. Another is to emphasize connection to the RHIO and SHIN-NY so that practitioners have a better connection to the overall care of the patient populations they serve. Finally, deploying a technology like Allscripts Care Director for care management similarly helps build connections between practitioners and institutions.

Managing resistance to change in clinical pathways and care models: Certain practitioner types, esp. community physicians, will likely be resistant to changing practice. To mitigate this, the PPS may seek to: 1) collaborate with other PPS to create a common language related to delivery system change strategies and tactics; 2) draw on case studies of applicable initiatives that show success which may be available through the MIX platform; 3) enlist change management techniques currently deployed by the PPS Lead's training and education department; and 4) develop evidence-based practices and case-studies to support rationale for change.

Page 108 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Interdependence of the Practitioner Engagement Workstream with other workstreams is high, including:
Financial Sustainability/Budget: This commitment to practitioner engagement requires significant investments on the part of the PPS in an environment where: 1) proceeds from the DSRIP waiver are still unknown, and 2) specific mandates for practitioner engagement were not provided at the time PPS application and budgets were developed. While engaging practitioners was always a PPS plan, practitioner engagement plans will now need to be sized consistent with Waiver proceeds.

Governance and Financial Sustainability: The PPS Clinical Operations Committee is an essential conduit for practitioner interests and will need to consider practitioner needs perhaps more broadly than its actual representation at any given time. Similarly, the PPS Finance Committee will need to consider practitioner incentives.

Workforce Strategy: Promoting practitioner engagement will need to be done hand-in-hand with developing the practitioner workforce. The Workforce Sub-committee can provide an important perspective regarding training and change management across and within practitioner groups.

Strong IT systems and processes: IT systems and processes capable of collecting and analyzing key performance and financial metrics are essential to delivering evidence-based models, case studies and performance reports needed to engage practitioners and transform care delivery.

Page 109 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 7.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS PMO - Network Relations	TBD	"Facilitate the development and implementation of the practitioner engagement strategy including designing surveys and analyzing responses; collaborate with other PPS as appropriate and with the State to encourage state-wide approach to training and education
PPS Clinical Operations Committee Co-Chairs	J. Emilio Carrillo, MD, NYP VP Community Health and Rotating PPS Network Member	Represent practitioner interests, solicit input through surveys and recommend practitioner group structure to PPS Executive Committee; monitor practitioner engagement plan
Practitioner Group Leads - Primary and Speciality	TBD	Represent practitioner groups to the Clinical Operations Committee as needed to advance the engagement agenda for this key constituency of primary and, in some case, specialty physicians, nurse practitioners and other mid-level providers
Practitioner Group Leads -Behavioral Health and Substance Abuse	TBD	Represent practitioner groups to the Clinical Operations Committee as needed to advance the engagement agenda for this key constituency of behavioral health physicians, nurse practitioners and other mid-level providers, social workers, CSACs and, as appropriate, even peer advisors.
Practitioner Group Leads -Care Management and Health Homes	TBD	Represent practitioner groups to the Clinical Operations Committee as needed to advance the engagement agenda for this key constituency of health home care managers (lay and licensed)
Practitioner Group Leads -Post-acute Care	TBD	Represent practitioner groups to the Clinical Operations Committee as needed to advance the engagement agenda for this key constituency of non-acute (institutional or in-home/community-based) nurses, social workers, therapists and care managers
DOHMH	TBD	Provide ongoing feedback to Clinical Operations Committee as to initial survey findings and evolving practitioner engagement needs

Page 110 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 7.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Practitioners in PPS including NYP ACN physicians, 6 community physician practices, 3 FQHCs (Harlem United, Charles B Wang CHC, Community Healthcare Network), and various providers of mental health and substance abuse service.	Target of engagement activities	Participation and feedback Practitioners will be expected to provide feedback via surveys so that training and other engagement programs can be customized for optimal results (including customizing for practitioner sophistication); in addition they will be expected to participate in education and training programs and other forums designed to increase engagement and improvem sustainability
Project Leads	Advising PPS Clinical Operations Committee	Project Leads will be expected to provide both facts and impressions related to engaging practitioners within their specific DSRIP projects. Project Leads will also be expected to champion engagement strategies developed by the PPS Practitioner preparedness/gaps
PPS IT/Data Governance Committee	Provider of infrastructure and enabling technologies	Identify practitioner type-specific needs and engage at practitioner level in addition to DSRIP Project focus
External Stakeholders		
Other PPSs in geography including Mount Sinai, HHC, Maimonides and Bronx Lebanon	Potential Collaborator	Identification and facilitation of cross-PPS collaboration and engagement opportunities which may support both reaching a broader practitioner community and reinforcing engagement, skills, and best practices

Page 111 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 7.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Shared IT infrastructure will be required to collect and synthesize the data necessary for performance reporting that demonstrates practitioner performance, project performance and supports case study development. While a ""shared IT infrastructure"" is not required for easy access to virtual training and content, good IT will enable it.

In addition, we will build on the success of our current Health Home effort which uses shared IT to engage practitioners across a wide spectrum of practice. For example, we have recent experience engaging behavioral health practitioners (NYS Psychiatric Institute, The Bridge), care managers/coordinators (ACMH, Argus), post-acute providers (Hebrew Home, Isabella) in the targeted, high-touch management of this patient population on a common platform of Allscripts Care Director. The RHIO will further enable these and other practitioners to engage and collaborate.

IPQR Module 7.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The success of this workstream will be measured by practitioner performance in meeting goals of DSRIP projects. In addition, success may be measured through practitioner surveys/feedback on engagement plan alignment with surveyed needs.

The effectiveness of this Workstream may also be measured through the measurement of training effectiveness and the recruitment and retention of practitioners in the various groups.

Milestone Name	Narrative Text
Develop population health management roadmap.	Please note there were no changes to the population health management roadmap during DY2, Q3.
Finalize PPS-wide bed reduction plan.	The NYP PPS is committed to and is investing in achieving the target reductions in potentially avoidable Medicaid admissions. However, this reduction in Medicaid admissions is not anticipated to result in a significant reduction in the all-payor demand for NewYork-Presbyterian Hospital which requires the Hospital to maintain its current bed complement and service levels.
	This is explained in further detail in the attached Bed Management Plan. Despite reductions in Medicaid utilization from the implemented population health

📨 IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Major risks to implementation of the Population Health workstream, and associated mitigation strategies include:

Current Care Delivery and Reimbursement Models: There is a disconnect presently between population health management demands and the approach to care delivery at the practice/provider level. Care remains siloed with providers still rewarded largely on the basis of procedures or other discreet clinical interventions rather than the health of the populations they serve. To mitigate this risk, performance bonuses expected to be available as a result of the waiver may be used to create incentives for adherence to population health metrics and techniques. In addition, more locally, we will structurally drive a better population health orientation through the use of interdisciplinary teams with active participation of care managers.

Community Provider Engagement in PCMH certification: DSRIP requires network participants to achieve PCMH and MU standards. Such standards come at a cost to providers, both in terms of real financial cost and the distractions and productivity hits the PCMH process can cause to practices. Two key mitigation strategies will be used: 1) the NYP PPS will provide material support to community providers who are on the journey to PCMH and MU by participating in the financing of the effort; 2) the NYP PPS will leverage its extensive experience bringing community providers to PCMH and MU standards, including deploying best implementation, training and education, documentation and other practices which reduce the adverse business impact on the community practices.

Collecting, analyzing and interpreting population health data: The risk exists that preparing for true population health management may be costprohibitive vis. consultants, IT infrastructure and data/statistical capabilities required. Mitigation strategies include: collaborating with the State for shared resources, including scrubbed and searchable population data for Medicaid attributed beneficiaries, and collaborating with other PPS to increase scalability of this requirement.

Financial Sustainability: The financial sustainability of the transformation to population health management and any one of the related VBP models of reimbursement is, to date in NYS, unproven. The complete universe of risks are not yet understood and there is great diversity in the sophistication of providers statewide. Mitigation strategy includes a deliberate and thoughtful approach to population health management and VBP enabled by conservative investments in associated infrastructure.

IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Interdependence of the Population Health Workstream with other workstreams is high. In fact, Population Health is inextricably linked to

Page 119 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Practitioner Engagement, Clinical Integration, IDS, Performance Reporting, Cultural Competency, Workforce and IT.

Practitioner Engagement and Clinical Integration: The PPS needs a strong and well-executed practitioner engagement strategy. The practitioner engagement training & education described in the Practitioner Engagement section will include education regarding population health management so clinicians can begin to make the shift in approach and practice necessary for success under the DSRIP program. Similarly, effective population health management requires new models of clinical integration, especially integration with those providers and CBOs that impact the social determinants of health.

IT Systems and Processes and Performance Reporting: The foundation of effective population health management is IT. Without a robust population health IT capability, efforts will be short-lived and unmeasurable. Putting the resources in place to build this capability will be critical to Program Success. Similarly, building a capable performance reporting function which makes proper use of Rapid Cycle Evaluation will be important to the smart design and maintenance of population health efforts.

Workforce Transformation and Cultural Competency: Shifting to a population health sensibility requires both new kinds of workers as well as existing workers with new expertise and understanding. Teaming with the Workforce Sub-committee to ensure the programmatic needs of population health are married to the project-level needs of service delivery will be important. Integrating Cultural Competency into the hiring, training, staffing and workflow processes will be critical to making this redesigned workforce most effective.

Page 120 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 8.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS PMO-Population Health Team	Gil Kuperman, Niloo Sobhani and others	Design DSRIP population health IT approach and integrate it with existing population health IT efforts
PPS CNA Team	Emilio Carrillo, Victor Carrillo and others	Provide integration of CNA findings with population health approach
PPS PMO-PCMH Team	Victor Carrillo and others	Develop roadmap to achieving 2014 NCQA Level 3 standards and Meaningful Use across the PPS
PPS PMO	Isaac Kastenbaum	Provide integration across clinical, financial, IT and performance reporting functions and demands
PPS Network Members impacted by care model delivery changes	various	Support population health approach despite significant differences to current operations and strategies
PPS Network Members impacted by capacity changes	various	Forecast changes in capacity needs

Page 121 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 8.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		,
PPS Clinical Operations Committee	Both adviser to and consumer of population health function	Self-educate on this new capability to provide effective leadership to PPS efforts
PPS CBO Network Members	bers Provider of enhanced roles under population health Bring expertise related to social design of population health strate	
External Stakeholders		
NYS DOH	Driver of population health approach for Medicaid population	Facilitate population health collaboration statewide
Various City and State agencies	Consumer of population health data	Provide population health expertise for different populations/diseases
MCOs	VBP stakeholder	Provide insight and expertise into population health management approaches that may be relevant to NYP PPS
Other PPSs	Beneficiaries of and contributors to pop health success	Collaborate to enable cross-PPS integration/visibility

Run Date: 03/31/2017

Page 122 of 460

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 8.7 - IT Expectations

Instructions:

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

The PPS Lead, NYP, has emerging population health IT capabilities and has acquired and implemented population health software on a limited basis. Current population health management capabilities include (i) an enterprise master patient index that consistent patient identification across NYP and its affiliated organizations, (ii) data warehousing platforms with front-end query capabilities that enable registry development, risk stratification and panel management, (iii) applications that support the workflow of care coordinators – i.e., clinical documentation, care plan development task management, etc., and (iv) participation in Healthix that enables inter-institutional data transfer. At this point, we have not yet explored other population health IT capabilities outside of the Lead but will do so under the direction of the IT/Data Governance Committee.

The PPS IT function is developing detailed plans for the building population health IT adequate to serve the needs of the PPS. That effort will be funded by a combination of DSRIP Waiver proceeds (for which there is a detailed IT budget currently) and by the CRFP IT grant (pending approval) which will support the purchase of assets needed to build the necessary population health IT platform.

Finally, we will look to emerging strategies and technologies across NYS to identify best practices for population health IT in the context of the DSRIP program.

IPQR Module 8.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The success of the Population Health Management workstream will be measured by the ability of the PPS to both track and manage individual PPS attributed beneficiaries across the PPS continuum while also assessing those beneficiaries against the outcomes and costs of the entire attributed beneficiary population. Specifically, we will use both DSRIP required outcome measures (which include cost, access and utilization measures) as well as our own specific population health metrics which will be recommended to the PPS IT/Data Governance Committee by the Project Leads in collaboration with the PPS Clinical Operations Committee and which have not yet been developed given the recency of the population health approach to the NYP PPS.

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Major risks to implementation of the Clinical Integration Workstream, and associated mitigation strategies include:

Managing resistance to change in care delivery models: Certain providers will likely be resistant to changing practice in support of a more clinically integrated model. In addition, many providers who are critical links in the integration chain operate largely in silos from the other pieces of the delivery system. To mitigate this, the PPS may seek to: 1) invest in resources to support clinical integration (care and case managers, mid-level providers, data-sharing technologies) and decrease the burden on the provider; 2) draw on case studies of applicable initiatives that show success which may be available through the MIX platform; 3) enlist change management techniques currently deployed by the PPS Lead's training and education department.

High practitioner turnover may be a barrier to consistent, sustainable integration: New care delivery models and new roles require significant practitioner up-staffing which is expected to lead to intense competition for resources. The mitigation strategy for supporting consistent, sustainable integration in a high turnover environment may include simple, direct, ""turnkey" training for new providers on clinical integration resources, processes, policies, protocols/pathways and dashboards; this may be developed by the PPS Lead's training and education departments in collaboration with Network Member training staff, or in collaboration with industry groups like GNYHA, HANYS, 1199TEF or other PPS.

Conflicting or overwhelming demands on providers participating in more than one PPS: Many providers--post acute, community physicians, CBOs and behavioral health providers--have obligations in more than one PPS. Clinical integration strategies may look different from PPS to PPS. Providers may be overwhelmed with slightly different or even conflicting approaches to clinical integration which will make their participation impractical. Mitigation strategies may include: 1) collaboration with other PPSs to standardize approaches, terminology, reporting requirements, etc. where possible by further developing plans to engage with them, especially those two PPSs with a heavy presence in Manhattan; and 2) a relentless commitment to basing these clinical integration strategies in simplicity and common sense, removing bureaucratic and administrative hurdles.

Strong clinical integration requires strong IT systems and processes locally and at the State/regional level, and is a significant investment for the PPS and for participating Network Members:

New IT and communications are needed to support data and information-sharing between providers, levels of care and with CBOs. Designing and building new tools for data sharing when a significant amount of the sharing infrastructure is the responsibility of the RHIO(s) and SHIN-NY is a complex challenge. To mitigate this risk, we will: 1) Continue to use our leadership position in the RHIO to push the RHIO and SHIN-NY to accelerated, high performance; and 2) integrate members of the PPS IT/Data Governance Committee into the team developing the clinical integration strategy.

IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Page 131 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Interdependence of the Clinical Integration Workstream with other workstreams is high, including:

Practitioner Engagement: The PPS needs a strong and well-executed practitioner engagement strategy. The practitioner engagement training & education described in the Practitioner Engagement section will include education regarding clinical integration so clinicians can develop the skills and capabilities required to deliver integrated care across the continuum and with non-traditional partners in healthcare delivery.

Cultural Competency: Patients as well as practitioners will need to adapt to the new models of care, integration and population health. As such, we will incorporate Cultural Competency into the Clinical Integration approach.

IT Systems and Processes: Without a solid IT foundation to support data sharing and communication between and among providers and CBOs, clinical integration is manual and unsustainable. IT systems and processes will therefore need to be designed and built (a) with the goal of reducing administrative processes from their current levels and (b) with the input of clinical end users. Putting the resources in place to build this capability will be critical to Program Success.

Workforce Transformation: Shifting to a model of clinical integration requires both new kinds of workers as well as existing workers with new expertise and understanding. Teaming with the Workforce Sub-committee to ensure the skills and expertise required to work in an effective interdisciplinary manner are developed will be important.

Page 132 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 9.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
PPS Clinical Operations Committee Co-Chair	Emilio Carillo MD, NYP VP for Community Health	Provide overall community health and clinical integration expertise and leadership to the PPS Clinical Operations and Executive Committees for the development of the clinical integration strategy
Project Leads and Key Network Members	Elaine Fleck MD, Adriana Matiz MD, Peter Steel MD, Jordan Foster PD, Patricia Peretz, Peter Gordon MD, Sam Merrick MD, Veronica Lestelle, Craig Blinderman MD, Ronald Adelman MD, Barbara Linder, Dianna Dragatsi MD, David Albert DDS and Julie Mirkin RN plus key Network Members TBD	Provide expertise and leadership for the development of the clinical integration strategy, report on its progress to the PPS Clinical Operations Committee
CNA Team	Emilio Carillo MD and Victor Carillo	Support the identification of resource gaps in the community
РМО	Isaac Kastenbaum, DSRIP PMO Director	Provide project management coordination and facilitation so that strategy is consistent and efficient across projects
IT	Gil Kuperman MD, PhD, Director Interoperability Informatics	Provide IT expertise and facilitation to prioritize and streamline IT infrastructure needed for effective data sharing
PPS Finance Committee	Robert Guimento, Brian Kurz and others	Provide financial expertise and leadership to the PPS Clinical Operations and Executive Committees for the development of incentives to support clinical integration
Workforce Sub-committee	Eric Carr, VP HR and others TBD	Develop (re)training and recruitment appropriate to support clinical integration needs
Practitioner Groups	various	Provide feedback to Project Leads and to PPS Clinical Operations Committee regarding effectiveness of clinical integration strategy

Page 133 of 460 Run Date : 03/31/2017

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 9.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Practitionersincluding 4 FQHCs, 6 community physician practices	Users of new roles, processes, technology and data	Provide feedback including recommendations for streamlining and sustainability
Clinical Leadership at PPS Lead and Network Member organizations (post-acute: VNSNY, ArchCare, Isabella, Hebrew Home, Amsterdam, MJHS, Schervier and others; primary care: 4 FQHCs, 6 community physician practices, the NYP ACN, and others; behavioral health and substance abuse: The Bridge, ASCNYC, ACMH, NYSPI, Argus and others, etc.)	Champions for new roles, processes, technology and data	Participation in PPS Clinical Operations Committee, ad hoc work groups, the PAC and in other public forums to champion the change
External Stakeholders		
Groups that address the social determinants of health (e.g., DOHMH, End of the Epidemic Taskforce, NYS Quitline and others)	Social determinants of health and clinical integration	Resources, expertise and perspective on statewide approaches to addressing social determinants of health
Groups involved in care management/care coordination of populations (e.g., NY e-Health Collaborative)	Care management/care coordination and clinical integration	Resources, expertise and perspective on statewide approaches to addressing care management/care coordination for Medicaid population
Professional and Trade Groups (e.g., GNYHA, HANYS, PCDC and others)	Industry approaches to clinical integration	Resources, expertise and perspective on statewide approaches to achieving clinical integration across regions and providers
Civic/Community Advocacy Groups (e.g., Community Boards 12 and 1, United Way of NYC and others)	Community needs and clinical integration	Resources, expertise and perspective on local and regional approaches to addressing community needs

Page 134 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 9.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Effective clinical integration will require relevant information to be readily accessible for all providers across the patient care spectrum. For some providers this will mean becoming PCMHs or enhancing their level of certification, for others it will mean joining the RHIO, for still others it will mean learning and utilizing Allscripts Care Director and tracking and monitoring registries of Medicaid beneficiaries participating in the PPS. The development of the clinical integration strategy and the development of the project plans will help determine which IT infrastructure elements are high priority. Elements will include:

- Architecture
- Data sharing and confidentiality protocols
- Platforms
- Approach to automated and manual processes
- Data reporting and performance monitoring
- Secure messaging and alerts
- Role of portals

The State will play a key role in supporting clinical integration from an IT standpoint. In particular, accelerating the SHIN-NY will be critical to bridging geographical regions. In addition, if the State can redesign the RHIO consent process to streamline the consent to the PPS level (versus the provider level), that would materially facilitate integration.

IPQR Module 9.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Clinical integration done well has direct and measurable impact on the population served. The DSRIP Domain 1, 2 and 3 measures related to patient satisfaction, utilization and clinical process and outcome indicators will improve if clinically integrated care--people, process, technology, data sharing, etc.--is delivered. The strategy for measurement and monitoring is just now getting underway and will be an iterative process given its complexity and the inadequacy of many current systems and approaches in measuring clinical integration. Retention of providers in the Network will be one indicator of the success of the PPS in creating an administratively manageable and navigable strategy. Measurement of patient experience with respect to clinical integration will also become an indicator of success. That measurement approach, which may include patient surveys, has yet to be defined.

IPQR Module 9.9 - IA Monitoring:

Page 135 of 460 **Run Date**: 03/31/2017

Instructions:

Page 136 of 460 Run Date: 03/31/2017

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

Section 10 - General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions:

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

The overall approach to implementation is based on the Collective Impact model of social innovation. As described by the Stanford Social Innovation Review, collective impact is "the commitment of a group of important actors from different sectors to a common agenda for solving a specific social problem.... Unlike most collaborations, collective impact initiatives involve a centralized infrastructure, a dedicated staff, and a structured process that leads to a common agenda, shared measurement, continuous communication, and mutually reinforcing activities among all participants.

The centralized infrastructure is represented by the five-committee structure of the NYP PPS Collaborative Contracting Model of governance: Executive Committee, Finance, IT/Data Governance, Clinical/Operations and Audit/Corporate Compliance ("Governance Committees"). The Executive Committee is the entity from which all PPS functions receive their guidance and to which they ultimately report. The remaining four committees are responsible for executing the Executive Committee's vision and implementing and monitoring the projects.

The NYP PPS has established a Project Management Office (PMO) consisting of dedicated staff who will work across the PPS to provide the operational and project management aimed at ensuring all milestones and metrics are met as well as aligning the clinical and operational standards under which the entire PPS will operate. This staff will be led and managed by NYP's VP, Integrated Delivery System, who will also at as the PPS Executive Lead on the Executive Committee.

Work, however, will be done at the local level. Each of the 10 Project Leads (clinical, operational and administrative staff such as Service Line leaders and providers) will be supported by individual Project Managers sitting inside the PMO. This dyad will be responsible for designing the implementation plan in close collaboration with Network Members, executing day-to-day project operations and shepherding the projects through a structured process designed to ensure success of the program through a common agenda, shared measurement and mutually reinforcing activities among the Project Leads, Network Members and project teams. The PMO will continue regular meetings with all Project Leads to discuss ideas, issues and roadblocks as well as to ensure provider inclusion and commitment to the goals of the PPS.

The Project Managers and Project Leads will report regularly to the Governance Committee on implementation metrics (e.g., number of staff hired/trained, outreach efforts, encounters) and relevant quality and outcome metrics (e.g., HIV viral load suppression). All of the projects will be connected through the broader processes taking place across the PPS and monitored by the PPS Executive Committee. These broader processes include but are not limited to: IT infrastructure development; workforce training and management; and Medicaid MCO negotiations and contracting.

DSRIP Implementation Plan Project

Page 137 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions:

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

The most significant interdependency among projects has to do with the IT infrastructure necessary to support the development of an integrated delivery system for the NYP PPS's attributed Medicaid population. Ensuring that patients receive optimal care will require providers across the PPS to have the most accurate information about the current state of the patient—including the patient's clinical and utilization data and the names of other providers and CBOs involved in the patient's care—so that the care provider can make appropriate care decisions and use available resources most effectively. The NYP PPS IT/Data Governance Committee will be responsible for overseeing the implementation of the IT Infrastructure and reporting progress regularly to the NYP PPS Executive Committee.

The PPS's Workforce Strategy will provide an opportunity for cross-project collaboration. Two examples are technical training and cross-project hiring. First, most DSRIP projects depend on the successful implementation of new software systems, including EHRs, the care coordination platform Allscripts Care Director (ACD) and access to the RHIO. New and existing workers at all levels will need technical training and engagement support to ensure that impacted staff are ready, willing and able to succeed with the new system. To address this challenge, the NYP PPS will retain the 1199SEIU Training and Employment Funds (TEF) as the lead workforce development provider.

Cultural Competency and Health Literacy training is a key to the success of all projects. The NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the National Quality Forum's (NQF) framework, which we will expand to our Network Members. The NYP PPS will train frontline staff and physicians involved in DSRIP projects to provide care that respects patients' "Culture of One." This approach treats patients as individuals whose culture is unique and a result of multiple social, cultural and environmental factors and avoids racial or ethnic stereotyping. In addition, NYP and ASCNYC are partnering to develop a Peer Training Institute which will be a PPS center for Community Health Worker, Patient Navigator, Health Educator and Interpreter training serving.

Overlapping goals and requirements of different projects could lead to duplicate efforts without strong, centralized planning and management. For example, managing transitions of care more effectively will be a central part of multiple projects, and without a proactive approach to our Care Transitions Strategy there is a risk that different protocols will be developed at different sites or in different projects. Many projects also share same or similar project requirements (e.g. 30-day Care Transitions and Ambulatory ICU). To address this issue, the Clinical/Operations committee has been charged with defining standards.

In addition, we will map out all of the project requirements affecting our committed providers and develop a "heat map" of the project requirements that show where they cross-cut and which providers will be involved in the most projects. For those project requirements that are most pervasive, we will set up specific teams tasked with driving consistent, coordinated implementation.

There are three primary PPSs that overlap with ours: Mount Sinai, NYC HHC, and Advocate s. During the Design Grant phase we met with both Mount Sinai and HHC about potential project overlap and collaborations. In both instances it was agreed that starting in DY1 we would meet to explore operational and infrastructure opportunities.. In addition, we have met with Advocate Community Partners to understand their PPS and describe our projects/vision for the PPS, particularly with respect to the Lower Manhattan service area. We have also started conversations with the New York Hospital Queens Performing Provider System.

DSRIP Implementation Plan Project

Page 138 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 10.3 - Project Roles and Responsibilities

Instructions:

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Project Leads and Key Network Members	Elaine Fleck MD, Adriana Matiz MD, Peter Steel MD, Jordan Foster MD, Patricia Peretz, Peter Gordon MD, Sam Merrick MD, Veronica Lestelle, Craig Blinderman MD, Ronald Adelman MD, Barbara Linder, Dianna Dragatsi MD, David Albert DDS and Julie Mirkin RN plus key Network Members TBD	Provide expertise and leadership for development and implementation of projects
РМО	Isaac Kastenbaum, Director Strategy, NYP and Director of NYP PPS PMO	Provide project management coordination and facilitation so that strategy is consistent and efficient across projects
IT	Niloo Sobhani, Corporate Director IT, NYP and Gil Kuperman MD, PhD, Director Interoperability Informatics, NYP	Develop and implement IT infrastructure needed for success of projects
PCMH Certification Team	Emilio Carillo MD, VP Community Health, NYP	Drive the implementation of NCQA 2014 Level 3 PCMH certification across the PPS
Community Health Department	Emilio Carillo MD, VP Community Health, NYP and Victor Carrillo, Director Community Health, NYP	Design and implement cultural competency training across the PPS
NYP ACN	Rob Guimento, VP NYP ACN and Brian Kurz, NYP ACN Finance, NYP	Oversee the increase in capacity at ACN practices
Workforce Sub-Committee	Eric Carr, HR Director NYP and others TBD	Develop (re)training and recruitment; develop and implement change management strategy
Legal	Cheryl Parham, Lead Counsel, NYP	Pursue regulatory waivers and relief on behalf of projects; ensure contracts among Network Members and with vendors are sufficient
Managed Care Office	Dov Schwartzben, SVP Managed Care, NYP	Lead conversations and negotiations with MMCOs

DSRIP Implementation Plan Project

Page 139 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions:

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
David Alge, SVP Community and Population Health	DSRIP Executive Lead	Oversight of the DSRIP initiative for the PPS
Debora Marsden, Compliance Officer	"PPS Lead - Compliance PPS Lead - Audit "	Oversight of Compliance and Audit functions, staffing and deliverables
Clinical Leadership at PPS Lead and Network Member organizations (post-acute, primary care, behavioral health, substance abuse, etc.)	Champions for new roles, processes, technology and data	Participation in PPS Clinical Operations Committee, ad hoc work groups, the PAC and in other public forums to champion the change
Practitioners	Users of new roles, processes, technology and data	Provide feedback including recommendations for streamlining and sustainability
Eliana Leve, LCSW, MA, CASAC	Deputy Executive Director for Programs, AIDS Service Center NYC	Development of Community Health Worker Peer Training Institute in Upper Manhattan.
Ron Phillips	Chief Human Resources Officer, NYP	Support Workforce Strategy implementation in each project
Andrea Procaccino	Chief Learning Officer (Head of Training and Development), NYP	Support Workforce Strategy, Cultural Competency adoption in each project
Aurelia Boyer	Chief Technology Officer, NYP	Overseeing all IT implementation
Various PPS Network Members (rotating)	All PPS Standing Committees	Oversight of PPS Standing Committee Roles
PPS CBO Network Members	Provider of enhanced roles under population health	Bring expertise related to social determinants of health to PPS in design of population health strategy
PAC	PAC membership	Represent PPS members interests and understand community needs
Community Needs Assessment Team	Emilio Carillo MD and Victor Carillo	Support the identification of resource gaps in the community
External Stakeholders		1
1199 SEIU; NYSNA	Labor Representation	Expertise and input around job impacts resulting from DSRIP projects
1199 SEIU Training & Employment Funds (TEF)	Workforce Training - Lead Workforce Training Vendor	Technical training curriculum development; recruiting support
NYC DOHMH, Software Vendors	Training Vendors	IT Technical Training
RHIOs (Healthix, BRIC)	IT Infrastructure	PPS- and city-wide provider communication
Groups that address the social determinants of	Social determinants of health and clinical integration	Resources, expertise and perspective on statewide approaches to

Page 140 of 460 **Run Date**: 03/31/2017

DSRIP Implementation Plan Project

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
health (e.g., DOHMH, End of the Epidemic Taskforce, NYS Quitline and others)		addressing social determinants of health
Groups involved in care management/care coordination of populations (e.g., NY e-Health Collaborative)	Care management/care coordination and clinical integration	Resources, expertise and perspective on statewide approaches to addressing care management/care coordination for Medicaid population
NYS DOH	Driver of population health approach for Medicaid population	Facilitate population health collaboration statewide
MCOs	VBP stakeholder	Provide insight and expertise into population health management approaches that may be relevant to NYP PPS
Other PPSs	Beneficiaries of and contributors to pop health success	Collaborate to enable cross-PPS integration/visibility

Page 141 of 460 Run Date: 03/31/2017

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 10.5 - IT Requirements

Instructions:

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

Over five years, the NYP PPS plans to invest \$13.3 million of its DSRIP funds and \$6.5 million in capital funding through the CRFP Grant and a 100% NYP match (pending approval) to develop connectivity across the PPS. The work has seven main components:

- 1. Work Flow Support for Care Coordinators. The PPS will extend the Allscripts Care Director (ACD) care coordination platform to multiple Network Members. The application enables care coordinators to care for registries of patients; manage tasks related to those patients; and document assessments, care plans, problems, goals, interventions and future tasks.
- 2. EHR Enhancements. The inpatient and outpatient EHR at NYP, Allscripts Sunrise Clinical Manager (SCM), will be enhanced to support the work flows of physicians and nurses. Alerts and reminders will be created to notify these care providers about patients that are eligible for specialized services. For example, SCM will notify the physician and nurse when they are seeing a patient who is in the Ambulatory ICU program or who is eligible for ED triage services.
- 3. Support for Community Health Workers (CHWs). Culturally competent CHWs will serve as a link between patients and medical/social services. The CHWs will see patients in their homes and document their findings, e.g., psychosocial issues that may be hurdles to the delivery of optimal care and recommendations for referrals to community-based organizations. Because CHWs are mobile, a wireless-enabled tablet-based application is necessary for documentation. After a requirements-gathering process, hardware and software will be selected, the application will be implemented and CHWs will be trained in the use of the hardware and application.
- 4. Health Information Exchange. NYP currently connects to the State Health Information Network for New York (SHIN-NY) via its regional health information organization (RHIO), Healthix. Sixty-nine (69) Collaborators will join Healthix and participate in SHIN-NY-based health information exchange activities. Thirty-four (34) of those organizations will contribute their full clinical data set to Healthix so that other Collaborators can use those data. Twelve (12) organizations will contribute encounter data, so records of encounters can be tracked by the RHIO. The remaining 23 organizations will contribute patient lists to Healthix so they can view the data of other Healthix participants.
- 5. Data Interfaces. We will create additional data interfaces—including inter-application interfaces—to increase data availability to members of the care team.
- 6. Enhancements to Patient Portal. MyNYP.org, NYP's PHR, will serve as the patient portal for patients enrolled in Ambulatory ICU programs. We will create specialized, relevant content to improve health literacy such as asthma-related materials for parents of asthmatic children and information about managing multiple chronic diseases for adults.
- 7. Analytics Platform. The analytics platform will provide population health management capabilities for the PPS. The platform will identify eligible patients, receive identifying information from NYS and combine it with NYP medical records and PPS-wide care coordination platform data (see #2). Analysts will create data marts that—with graphical front-end tools—will provide management reports, quality reports, reports for regulatory reporting purposes, lists of patients meeting specific criteria that need care coordination services and predictive models that identify likely high utilizers of care. This process will be highly coordinated with the State's MAPP tool and other analytic platforms.

IPQR Module 10.6 - Performance Monitoring

Instructions:

Page 142 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

From NYP's population health experience, we understand that effective rapid-cycle evaluation (RCE) is critical to the success of the NYP PPS's DSRIP projects. Effective RCE requires: (1) clear definitions and benchmarks for performance measurements; (2) developing the appropriate data governance standards; (3) scheduling regular meetings to review performance data; and (4) focusing on both process and outcomes data. The NYP PPS Clinical/Operations Committee will be responsible for reporting on PPS performance, both at an individual project level and at a network level. This Committee will be led by one NYP representative and one community provider or CBO Collaborator, with membership including representation from all Collaborators. This group will report directly to the Executive Committee and receive analytical support from the IT/Data Governance Committee and the PMO. The Finance Committee will also monitor financial performance (revenue and expenses) of the PPS. Both committees will report on the "State of the PPS" at bi-monthly committee meetings and at Executive Committee meetings. The NYP PPS will use a variety of analytics tools (Microsoft Amalga, Tableau, SAS, etc.) to develop reports that monitor process and outcome measures with data from the Hospital EHR, Allscripts Care Director (care management platform), the Healthix RHIO and implementation reports. These reports, including baseline, current and target performance metrics, will be available on the PPS's intranet website. Performance data will be reviewed at weekly PMO meetings and bimonthly Clinical/Operations Committees; to achieve necessary targets, each group will develop a plan-do-study-act (PDSA) cycle for metrics that are not achieving their goals. Any major tweaks to project activities will be reviewed by the Executive Committee and the NYS DOH, when appropriate. We recognize that we will need to monitor performance starting April 1, 2015; clearly our reports will not be deployed at that point. To address this challenge, we will prioritize reporting needs and roll them out incrementally, likely beginning toward the end of DY 1. In the interim, we will rely on the State's data via the MAPP portal to benchmark ourselves against other PPSs as well as compare Network Members' progress internally.

For those providers with limited EHR connectivity, the NYP PPS will provide material financial support to help them integrate technology into their workflows. The NYP PPS will leverage its extensive experience bringing community providers to PCMH and MU standards, including training and education. In the interim, the NYP PPS will devote resources to ensuring that performance reporting occurs in low-tech ways (paper, interviews, etc.) to ensure that performance management and reporting includes all! PPS members.

DSRIP Implementation Plan Project

IPQR Module 10.7 - Community Engagement

Instructions:

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

The NYP PPS will drive community involvement in the DSRIP projects through the Provider Advisory Committee, or PAC. The PAC consists of 57 members, 23 from the community (e.g., local government, senior centers and churches), 31 from PPS provider (e.g., primary care, behavioral health and long-term care providers) and three members from two labor unions. The PAC met monthly through the design/planning period; it will continue to meet quarterly through the five DSRIP years.

Medicaid beneficiaries will be able to provide feedback on PPS performance, including the addition/removal of Collaborators through two methods: (1) submitting feedback through a regularly scheduled PAC meeting directly or through a representative; or (2) submitting feedback through the NYP PPS public website. All comments will be reviewed by the PMO and presented to the Executive Committee.

Network members are critical collaborators in the PPS. The PPS is contracting with between three and six CBOs to hire more than 35 Community Health Workers (CHWs), health educators and interpreters. CHWs are trained, local community members who provide diagnosis-specific education in a linguistically and culturally appropriate manner to patients and families. We expect to enter into contracts for CHW and related staff during DY1. Contracted CBOs for CHWs and related staff will be included in project delivery plans from inception.

The PPS may contract with other CBOs for non-CHW and related staff services. Contracted CBOs for non-CHW staff or services will be included in project delivery plans from inception. Involvement will include process flow, IT enablement, reporting needs, educational materials and other beneficiary collateral, compliance and quality expectations. These CBOs will help extend the reach of our PPS network in the communities we serve

Community engagement will contribute to the success of the projects in two ways:

- 1. Members of the PAC are often closer to the ground than are the members of the NYP PPS Executive Committee or even the project leaders. This forum will be critical to hearing feedback—positive and negative—about which aspects of our projects are working and which are not.
- 2. CHWs, contracted directly from CBOs, are a critical element of the NYP PPS DSRIP endeavor. Many of the gaps in access and navigation we identified in our Community Needs Assessment are not structural but the result of healthcare access barriers grounded in cultural and social determinants of health.

There are three primary risks associated with our community strategy:

- 1. Member Engagement. If the PPS does not communicate its vision effectively with Network Members and the Community, we may lose the interest and dedication of the very individuals and organizations who will ensure the projects are a success. That is why we are committed to providing a regular forum (the PAC) for feedback as well as informal feedback channels through the relationships we have developed in the community.
- 2. CBO Sustainability. We recognize that some of the CBOs with whom we will contract are financially fragile. The NYP PPS Finance Committee will develop a monitoring process for those providers identified as potentially vulnerable. 3. Competition for Resources. We anticipate high demand for capable Community Health Workers. For CHWs, the PPS will apply a "search-firm-like" approach to source and recruit top talent in collaboration with the host CBOs.
- 4. New Population. NYP has limited experience with the Asian population that lives in Lower Manhattan, home to its newest hospital, NYP/LM. The service area is 25% Asian. To ensure success with the Asian and Asian-American population in Lower Manhattan, the PPS will work with Charles B. Wang Community Health Center to find and source appropriate CHWs and Patient Navigators (for the EDs).

Section 11 - Workforce

IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions:

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

IPQR Module 11.2 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Please note some milestones include minimum expected completion dates.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Define target workforce state (in line with DSRIP program's goals).	There have been no changes to the target workforce state in DY2, Q3.
Create a workforce transition roadmap for achieving defined	
target workforce state.	
Perform detailed gap analysis between current state	
assessment of workforce and projected future state.	
Produce a compensation and benefit analysis, covering impacts	
on both retrained and redeployed staff, as well as new hires,	There is no update for this quarter. This survey/analysis will be repeated in-line with the State-required timeline.
particularly focusing on full and partial placements.	
Develop training strategy.

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The NYP PPS has a strong track record of collaborating with key stakeholders in both adapting the workforce to meet emerging care delivery needs and using non-traditional healthcare workers (e.g., CHWs) from the community to improve outcomes, cultural competency and health literacy.

Major risks to implementation of the Workforce Strategy and associated mitigation strategies include:

Competition for Human Resources. The risk of workforce shortages in the healthcare market is real. The national primary care physician shortage is projected to reach 12,500 to 31,100, according to a new study by the Association of American Medical Colleges and IHS. One role in particular that will be in high demand is that of the culturally competent peer providers, i.e., Community Health Workers (CHWs) and Patient Navigators (PNs). To mitigate our risk in this area, the NYP PPS will build on its solid relationships with such CHW organizations as Dominican Women's Development Center and Northern Manhattan Improvement Corporation, with whom we have been contracting for these kinds of positions for many years. We will also expand the number of organizations we source to a total of between three and six CBOs to hire the more than 35 peer providers needed. In addition, NYP and ASCNYC have applied for CRFP funding to develop a new Community Health Worker Training Center in Upper Manhattan.

Recruiting Specialized Workforce. Above and beyond general shortages in the healthcare market, a few of the NYP PPS projects require a very specialized workforce, which may be even more difficult to find immediately. For example, we will be looking for pediatric psychiatric NPs (Project 2.b.i) and palliative care specialists (Project 3.g.i). We will mitigate this risk by applying a search-firm approach to source and recruit top talent. This approach entails dedicated staff that will rigorously identify qualified candidates through networking, research and constant pursuit of a pipeline matching the position specifications. One example of NYP's innovative sourcing strategy leverages its electronic candidate relationship management (eCRM) tool in which email messages are sent directly to potential prospects with information on the Hospital, department and open position.

Technical Training. Most DSRIP projects depend on the successful implementation of new software systems, including EHRs, the care coordination platform Allscripts Care Director (ACD) and access to the Healthix RHIO. To address this challenge, the NYP PPS will collaborate with the 1199SEIU League Training and Employment Funds (TEF) as a lead workforce development provider. Using TEF's expertise in this area, the PPS will provide training to incumbent workers who need additional skills to do existing jobs and develop training for new staff. TEF will screen and contract with the most suitable educational vendors to deliver high-quality training conducted by expert clinical staff, experienced educators in adult learning theory and organizational development experts. Training will also be delivered by external resources from the community or by the NYP internal training department (Talent Development). For some projects, we plan to engage with the NYC Department of Mental Health and Hygiene to assist in technical training (see Project 4.b.i). Software vendors such as Allscripts and Healthix will also conduct their own user training. Workforce Buy-In. Change is difficult. The NYP PPS may have difficulty obtaining buy-in and support from frontline workers and key stakeholders given changes in roles and responsibilities, which in turn could impact DSRIP project success. To mitigate this risk, the PPS will continue to engage both senior and middle management and, where applicable, union representation (SEIU 1199, NYSNA) to gain worker support at all levels.

Page 155 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Workforce strategy and management touches, and is touched by, all aspects of a delivery system reform program like DSRIP. As such, workforce success will depend on a variety of other DSRIP workstreams, including:

Governance. The PPS Committees will likely each have to address workforce impacts and make decisions regarding strategy, financing and priorities. Having effective, trusted, appropriately confidential and "big picture" representation will be central to executing the workforce strategy successfully.

Financing Training and Development. Workforce management and (re)training across the PPS will require a material investment. Therefore, the connection between our PPS workforce transformation team and the NYP PPS Finance Committee is crucial. To that end, the Finance Committee will have a member of the Workforce Sub-committee embedded within it.

Cultural Competency and Health Literacy Training. Interdependence also exists between workforce training and our cultural competency strategy. The NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the National Quality Forum's (NQF) framework, which we will expand to our Network Members. In addition to role-specific training, the NYP PPS will train frontline staff and physicians involved in DSRIP projects to provide care that respects patients' "Culture of One." This approach treats patients as individuals whose culture is unique and a result of multiple social, cultural and environmental factors and avoids racial or ethnic stereotyping. The methodology stems from seminal research published by NYP's VP for Community Health, Dr. Emilio Carrillo, in 1999 and is used internationally as the basis for cultural competency training. Finally, providers (including Community Health Workers) and staff in certain projects will receive supplemental training on sensitivities related to specific target populations. For example, those involved in Project 3.g.i (Integration of Palliative Care into PCMHs) will receiving training on how to deal sensitively with patients facing advanced illnesses and their families. Those involved in Projects 3.e.i and 4.c.i (HIV/AIDS) will receive training that will include education on HIV as a disease, gender identity, substance abuse issues and disability issues.

IT Implementation & Technical Training. Most DSRIP projects depend on the successful implementation of new software systems, including EHRs, the care coordination platform Allscripts Care Director (ACD) and access to the Healthix RHIO. IT is only a tool; without appropriate technical training across the PPS, the tools will be ineffective in moving the DSRIP vision forward. As described above, the PPS has engaged TEF and others to assist with this training.

Clinical Integration. Workforce is closely tied to clinical integration, as much of the retraining of the workforce will focus on creating more integrated multi-disciplinary teams that cross organizational boundaries. Redeployment will also be critical in ensuring that the right staff are placed in the right location to support better clinical integration and the success of projects such as 3.a.i and 2.a.i.

Page 156 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 11.6 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Workforce Sub-committee - PPS Lead	Shawn McCollister	NYP HR executive on point for design and execution of all workforce-related activities
Workforce Sub-committee	Various NYP and Network Members	Provides overall direction, guidance and decisions related to the workforce transformation agenda
Workforce Training Vendor	1199 SEIU League Training and Employment Funds (TEF)	Lead workforce development provider who recommend (re)training for new and emerging positions, provide training to incumbent workers who need additional skills to do existing jobs and develop training for new occupations and recommend vendors with substance abuse and behavioral health expertise.
ASCNYC	Provider of "Peer Training Institute" (if CRFP application granted)	Builds Peer Training Institute to develop workforce, including peer educators, community healthcare workers, patient navigators, care coordiantors and others TBD
Community Health Department	Emilio Carrillo, MD, VP Community Health, NYP	Responsible for developing and executing cultural competency and health literacy training.

Page 157 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 11.7 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders	'	
Shawn Smith	Chief Human Resources Officer, NYP	Support data collection of compensation and benefit information; current state workforce information and potential hiring needs.
Andrea Procaccino	Chief Learning Officer (Head of Training and Development), NYP	Provide oversight and input to development of training needs assessment, and subsequent training strategy and plan.
Eliana Leve, LCSW, MA, CASAC	Deputy Executive Director for Programs, AIDS Service Center NYC	Development of Community Health Worker Peer Training Institute in Upper Manhattan.
Gil Kuperman, MD, PhD	Director, Interoperability Informatics, NYP	Coordination of IT technical training.
NYP and Network Member Workforce(s)	Represent impacted workforce(s)	Collaborate with Workforce Sub-committee to provide input into training plan, future state vision, etc.
External Stakeholders		
1199 SEIU; NYSNA	Labor/Union Representation	Expertise and input around job impacts resulting from DSRIP projects
NYC DOHMH, Software Vendors	Training Vendors	IT Technical Training

Page 158 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 11.8 - IT Expectations

Instructions:

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

Shared IT infrastructure will support the workforce transformation. First, once our training strategy and plans are implemented, we will use IT to track training progress (e.g., who has been trained, the subject matter of the training, when the training took place, certification levels, etc.). Second, as the NYP PPS begins to execute the workforce transition roadmap, we will rely on IT capabilities to track staff movement and changes across the PPS (e.g., redeployed staff, net new hires, etc.). The NYP PPS will need support from IT to collect and report on changes to the PPS workforce to enable reporting on workforce process measures in quarterly progress reports. Finally, we will need IT support to track open positions and staffing needs across the PPS, essentially creating a job board, so that impacted workers (or those whose current jobs are at risk of elimination) have the ability to see job availability across the member organizations.

Technology is ever more critical to support the changing needs of the workforce. For example, the PPS IT infrastructure will enable retrained, redeployed and new hire staff to work efficiently and effectively in a variety of non-traditional settings through the development of tablet technologies that can be used in the field to support community-based staff. Such technologies will assist community-based workers in increasing health literacy, enable workers to share critical observations about risks which may have social and clinical implications, and allow for more handson, real-time connection with patients and caregivers. Developing and deploying such technology is a key component of the NYP CRFP IT Infrastructure application.

IPQR Module 11.9 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

There are several measures of the success of the Workforce workstream. One is how the NYP PPS delivers against the current targets of redeployed, retrained and hired staff. Second is how financially sustainable the workforce transformation is based on performance against budget. Finally, we will assess worker satisfaction by measuring employee turnover. The Workforce Sub-committee will present this data to the Clinical/Operations Committee so there is an up-to-date understanding of how the recruitment, redeployment and retraining efforts are affecting the individual projects. In this way, the PPS will be able to react to and manage potential issues before they negatively impact the projects in a significant way.

The PMO will be a key partner to the Workforce Sub-committee in measuring, monitoring and reporting quarterly progress and developing and monitoring other leading indicators of workforce performance. Similarly, we will look to the 1199TEF for leading practices across the State regarding all aspects of workforce progress reporting, including methods, frequency, proxies, data definitions, etc.

IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):

Instructions:

Please include details on workforce spending for DY2. The workforce spending actuals should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. The PPS can shift funding across categories; e.g., from Retraining to New Hires. Please note that the "Cumulative Percent of Commitments Expended through Current DSRIP Year (DY2)" section is calculated based on the total yearly commitments.

Benchmarks	
Year	Amount(\$)
Total Cumulative Spending Commitment through Current DSRIP Year(DY2)	511,200.00

For Providing	Workforce Spe	ending Actuals	Cumulative Spending to Date	Cumulative Percent of Commitments
Funding Type	DY2(Q1/Q2)(\$)	DY2(Q3/Q4)(\$)	(DY1-DY5)(\$)	Expended through Current DSRIP Year (DY2)
Retraining	0.00	0.00	0.00	0.00%
Redeployment	0.00	0.00	0.00	0.00%
New Hires	70,000.00	0.00	207,140.00	93.31%
Other	70,701.00	0.00	142,416.00	0.00%
Total Expenditures	140,701.00	0.00	349,556.00	68.38%

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

☑ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

See workforce, connectivity, PCMH, demand, and diversity risks in other projects' narratives.

Funding: The NYP PPS calculated its budgets based on communications from the State regarding both the PMPM and preliminary attribution. We conducted sensitivity analyses, including the effects of a lower PMPM, lower-than-expected Domain 1 achievement and lower-than-expected Domain 2 and 3 performances. The reduction in funding of 21% due to the change in attribution and, possibly, a change in PMPM has resulted in a contraction of a similar magnitude. There has also been no communication regarding relief from any reporting or performance requirements. Given that the fixed costs have not changed, we remain concerned about the negative impact on our ability to implement the projects, including the impact on collaborators. Mitigation strategies include encouraging the State to address requirements in light of this significant funding decrease and conservative planning and expectation-setting across the PPS.

Integration. The size of the NYP PPS will pose the classic management challenge of integration. In addition, DSRIP will entail several cultural shifts in how providers deliver care, such as a shift from fee-for-service to value-based payments and a shift from unit-based, acute care to collaborating across a continuum of care with a focus on preventive care. To mitigate this risk, the NYP PPS has a developed a multi-faceted engagement approach to Network Member, staff and provider integration. Specifically, the PPS will: 1) Establish a Workforce Sub-committee, which will provide overall direction, guidance and decisions related to the workforce transformation agenda. 2) Develop cross-project functional groups, project-specific groups, and stakeholder groups to gain buy-in from the Network. 3) Engage union representation to gain frontline support. Both 1199 SEIU and NYSNA have had seats on the PAC since its inception. We will also contract with 1199 SEIU Training and Employment Funds to assist with change management at the frontline worker level. 4) Collaborate with external resources, such as other PPSs to create common language related to delivery system change strategies and tactics or case studies of successful initiatives.

Technology. Technologies that support workflow, decision-making and record-keeping are frequently different within and across practitioner types. To mitigate this risk, a multi-pronged approach must be taken. One is a concerted effort to raise the level of all PCPs through the common requirements and language of PCMH and Meaningful Use. Another is to emphasize connection to the RHIO so that practitioners have a better connection to the overall care of the patient populations they serve. Finally, deploying a technology like Allscripts Care Director similarly helps build connections.

VBP. Network Members may lack the knowledge and experience of non-fee-for-service models puts at risk even starting the conversation. The preferred mitigation strategy is the State providing broad education for providers, including increasing levels of sophistication (and possibly including some sort of certification to demonstrate proficiency).

Performance Improvement and Practice Change. Practitioners may be resistant to changing practice in response to performance reporting. To mitigate this, the PPS may seek to: 1) collaborate with other PPS to create a common language related to delivery system change strategies and tactics; 2) draw on case studies of applicable initiatives that show success; 3) enlist change management techniques; and 4) develop evidence-based practices and case-studies to support rationale for change.

Competing Demands. To keep CBOs engaged, the PPS will ensure that Committees produce meaningful work and engage community providers and CBOs in substantive decision-making at the Committee level.

Page 164 of 460 Run Date : 03/31/2017

IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions:

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	DY3 Q4	Project	N/A	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community- based providers.		Project		Completed	04/01/2015	03/31/2016	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task PMO recommends an inventory of relationships that require contracts (e.g., service contracts, quality agreements, IT relationships, network participation minimum requirements, etc.) and categorizes Network members by contract type ("Agreement". Beyond medical and social service providers, the NYP PPS will include a wide variety of behavioral health providers, including community-based Article 31 and 32 providers, community-based organizations that provide transitional housing and counseling, HCBS, Medicaid MCOs, and all related downstream health home providers. Strong connections will be made with these organizations to ensure that the needs of the seriously mentally ill and substance using beneficiaries are addressed.		Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task PPS Finance Committee reviews Agreement inventory and categorization and provides feedback		Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
The IDS should include all medical, behavioral, post-acute, long-term	
care, and community-based service providers within the PPS network;	
additionally, the IDS structure must include payers and social service	
organizations, as necessary to support its strategy.	
Utilize partnering HH and ACO population health management systems	
and capabilities to implement the PPS' strategy towards evolving into an	
IDS.	
Ensure patients receive appropriate health care and community support,	
including medical and behavioral health, post-acute care, long term care	
and public health services.	
Ensure that all PPS safety net providers are actively sharing EHR	
systems with local health information exchange/RHIO/SHIN-NY and	
sharing health information among clinical partners, including directed	
exchange (secure messaging), alerts and patient record look up, by the	
end of Demonstration Year (DY) 3.	
Ensure that EHR systems used by participating safety net providers meet	
Meaningful Use and PCMH Level 3 standards and/or APCM by the end of	
Demonstration Year 3.	
Perform population health management by actively using EHRs and other	
IT platforms, including use of targeted patient registries, for all	
participating safety net providers.	
Achieve 2014 Level 3 PCMH primary care certification and/or meet state-	
determined criteria for Advanced Primary Care Models for all eligible	
participating PCPs, expand access to primary care providers, and meet	
EHR Meaningful Use standards by the end of DY 3.	
Establish monthly meetings with Medicaid MCOs to discuss utilization	
trends, performance issues, and payment reform.	
Re-enforce the transition towards value-based payment reform by	
aligning provider compensation to patient outcomes.	
Engage patients in the integrated delivery system through outreach and	
navigation activities, leveraging community health workers, peers, and	
culturally competent community-based organizations, as appropriate.

Project 2.b.i – Ambulatory Intensive Care Units (ICUs)

IPQR Module 2.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risks. We are awaiting clarification from the IA regarding the provider requirements by provider-type given the inconsistency in provider typing, the fact that the roster will fluctuate throughout DSRIP, and the lack of understanding of the relationship between provider engagement and achievement values.

Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations. We request the waiver for providers licensed under Article 28, 31 and 32 as well as practitioners affiliated with the Article 28 institutions which will enable the PPS to provide necessary services to persons with medical and behavioral health needs with an integrated team approach. For 2.b.i, this waiver will support, for example, in-home patient medication education and reconciliation services by PPS Article 28 primary care nurse practitioners and physicians.

IT Investment. A major risk to this project is the current inability to connect and communicate with the patients' care team across the continuum. To mitigate this risk, as part of its five-year IT investment, NYP plans to invest in data interfaces that will allow these EHRs to "speak" to one another. Second, NYP will extend its care coordination application, Allscripts Care Director (ACD), to multiple Network Members and connect nearly 70 Network Members to the local RHIO and SHIN-NY for tracking patients city-wide. NYP will invest early in developing data interfaces between Amalga and the platforms used by Network Members. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Increased Demand. A major risk to this project lies in the fact that primary care capacity is constrained, both in terms of provider availability and space. Not only will it be difficult to accommodate increased demand at the Ambulatory ICUs, referrals to other providers in the PPS will also be thwarted. First, the nine Ambulatory ICUs will hire more practitioners, extend weekday hours and add weekend hours. Second, several Network Members have applied for funding from the CRFP to expand physical primary care capacity. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds and organizations' capital budgets on a reduced scale. This will slow down the development of capacity and may also negatively impact project outcomes.

Workforce. There is a risk in relying on hiring pediatric psychiatric NPs in the Ambulatory ICU, due to the relative scarcity of such professionals (and psychiatric professionals treating children and adolescents in general). To mitigate this risk, we will begin recruiting for this position early in DY1 but understand that a delay in hiring will delay the pediatric project's overall implementation. One example of NYP's innovative strategy leverages its candidate relationship management (eCRM) tool in which messages are sent directly to prospects with information on the Hospital, department and open position. NYP will also host career events dedicated to the type of human capital needed.

Patient Technology Adoption. A risk to the success of the project lies with the Ambulatory ICU target population, who might have difficulty accessing new tools made available via the internet, smartphones and tablets. To mitigate this risk, the Community Health Workers will be trained to provide basic "technical support" to patients.

Page 180 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 2.b.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks					
Actively Engaged Speed	Actively Engaged Scale				
DY4,Q4	21,170				

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4
	Baseline Commitment	2,117	5,293	7,410	10,585
PPS Reported	Quarterly Update	2,310	4,399	0	0
	Percent(%) of Commitment	109.12%	83.11%	0.00%	0.00%
IA Approved	Quarterly Update	0	4,399	0	0
IA Approved	Percent(%) of Commitment	0.00%	83.11%	0.00%	0.00%

Marning: PPS Reported - Please note that your patients engaged to date (0) does not meet your committed amount (7,410) for 'DY2,Q3'

Milestone Name	Narrative Text
Use EHRs and other technical platforms to track all patients engaged in the project, including collecting community data and Health Home referrals.	
Establish care managers co-located at each Ambulatory ICU site.	
Ensure that all safety net project participants are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including Direct exchange (secure messaging), alerts and patient record look up.	
Ensure that EHR systems used by participating providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	
Implementation of a secure patient portal that supports patient communication and engagement as well as provides assistance for self-management.	
Establish a multi-disciplinary, team-based care review and planning process to ensure that all Ambulatory ICU patients benefit from the input of multiple providers.	
Deploy a provider notification/secure messaging system to alert care managers and Health Homes of important developments in patient care and utilization.	
Use EHRs and other technical platforms to track all patients engaged in the project.

Project 2.b.iii – ED care triage for at-risk populations

IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risks. We are awaiting clarification from the IA regarding the provider requirements by provider-type given the inconsistency in provider typing, the fact that the roster will fluctuate throughout the DSRIP period, and the lack of understanding of the relationship between provider engagement and achievement values. We have made certain reasonable assumptions regarding the applicability of the requirements and have reflected those in our implementation planning.

Increased Demand. One of the Navigators' primary roles will be to connect non-emergent patients presenting to the EDs with PCPs if they don't have one and with timely follow-up appointments. We anticipate the risk of an increase in demand for these stressed services. First, we intend to expand primary, behavioral care and selected specialty care capacity through increased staffing levels, expanded practice hours and/or physical capacity expansion at four major PPS centers for outpatient care. Second, we will build additional IT capacity and capability in our Network Members, allowing them to manage their volume more effectively, reduce duplication in services and care for patients in the non-acute setting. If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds and organizations' capital budgets on a reduced scale.

Diversity. A risk to the success of the ED program, which is being implemented in five EDs across Manhattan, lies with the cultural diversity of the PPS population. Much the NYP PPS service area is comprised of linguistically isolated ethnic and racial minorities. To mitigate this risk, the NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the National Quality Forum's (NQF) framework. The ED Care Triage project will hire culturally competent PNs whose cultural and linguistic backgrounds are tailored to the patients they will be serving. Ultimately, we intend to integrate PNs in the PCMH, including participation in interdisciplinary rounds. Finally, we intend to co-invest with the State through the CRFP and with ASCNYC as the lead in a Peer Training Institute which will be a PPS center for CHW, Patient Navigator, Health Educator and Interpreter training serving all NYP PPS projects and Network Members.

Meeting PCMH Standards. This is a labor-intensive process. We will set up a dedicated PCMH Certification Team that will be responsible for all relevant providers meeting this project requirement according to the timetable set out in our speed of implementation forecasts. This team will be led by NYP's VP for Community Health, Dr. Emilio Carillo, who has significant experience transforming the 13 NYP Ambulatory Care Network practices to NCQA PCMH designation as well as supporting numerous community providers in their PCMH journey. One risk that is out of our hands is the amount of time the application will take to turn around once it is submitted. While we are hopeful that the State will fast-track these applications, we are counting the date of submission of the certification to NCQA as our commitment date, rather than the receipt of the certification.

Open Access Scheduling. The project will face the risk of ensuring open access scheduling across PPS clinics so that Patient Navigators can seamlessly provide appointments for patients. To mitigate this risk, the PPS has a plan in place with NYP's IT department, as part of its operational and capital plan, to implement infrastructure to ensure open access scheduling capability by the end of DY3. This plan will primarily entail working with Network Members to ensure they have the proper interfaces in place to receive external appointments. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Page 194 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Instructions:

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment. We are awaiting clarification regarding the provider requirements by provider-type given the inconsistency in provider typing, the fact that the roster will fluctuate throughout DSRIP, and the lack of understanding of the relationship between provider engagement and achievement values. We have made certain reasonable assumptions regarding the applicability of the requirements and have reflected those in our implementation planning. Second, our provider commitments reflect provider types as will be experienced by the actively engaged population.

Increased Demand. As a result of our transitions of care protocol, we anticipate the risk of an increase in demand for stressed outpatient services. First, we intend to expand primary, behavioral care and selected specialty care capacity through increased staffing levels, expanded practice hours and/or physical capacity expansion at four major PPS centers for outpatient care. The capacity expansion is dependent on funding applied for under the CRFP. If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds and organizations' capital budgets on a reduced scale.

Second, we will build IT capacity and capability in our Network Members, allowing them to manage their volume more effectively, reduce duplication in services and care for patients in the non-acute setting. The hard asset investments are dependent on funding applied for under the CRFP and will enable NYP as PPS lead to deliver necessary infrastructure and support Network Members.

Connectivity. There are a number of overlapping, nearby PPSs working on Project 2.b.iv. A risk to implementation includes coordinating and sharing patient visit information in a timely way across this large network. To mitigate this risk, the NYP PPS plans to invest \$13.3 million of its DSRIP funds and \$6.5 million in capital funding through the CRFP Grant plus a 100% NYP match (pending approval) to develop that connectivity across the PPS. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Diversity. A risk to the success of the Care Transitions program, which is being implemented in five hospitals across Manhattan, lies with the cultural diversity of the PPS population. Much the NYP PPS service area is comprised of linguistically isolated ethnic and racial minorities. The gaps in access and navigation identified by the NYP PPS Community Needs Assessment are often the result of healthcare access barriers grounded in cultural and social determinants of health. These barriers affect patients' use of the system and ultimately their health outcomes. To mitigate this risk, the NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the National Quality Forum's (NQF) framework. The PPS will train the new RN Care Transition Managers as well as existing staff and physicians involved in this project to provide care that respects patients' "Culture of One." This approach treats patients as individuals whose culture is unique and a result of multiple social, cultural and environmental factors and avoids racial or ethnic stereotyping. Finally, culturally competent Community Health Workers (CHWs) will serve as an important link between the hospital and outpatient care in the critical "transition phase." Through the CRFP, we intend to co-invest with with ASCNYC as the lead in a Peer Training Institute which will be a center for CHW, Navigator, Health Educator training.

MCO Discussions. We have professional and collegial relationships with our MMCOs and will be meeting with them to discuss coverage for services proposed by other projects. During those meetings, we will also work with MMCOs to modify transitions of care protocols to meet our new standards.

DSRIP Implementation Plan Project

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks					
Actively Engaged Speed	Actively Engaged Scale				
DY4,Q4	1,777				

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4
	Baseline Commitment	221	445	665	888

Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	
Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	
Ensure required social services participate in the project.	
Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided

Project 3.a.i – Integration of primary care and behavioral health services

☑ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risks. First, we are awaiting clarification from the IA regarding the provider requirements by provider-type given the inconsistency in provider typing, the fact that the roster will fluctuate throughout DSRIP, and the lack of understanding of the relationship between provider engagement and achievement values. We have made certain reasonable assumptions regarding the applicability of the requirements and have reflected those in our implementation planning. Second, our provider commitments reflect provider types as will be experienced by the actively engaged population.

Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations. We request the waiver for providers licensed under Article 28, 31 and 32 as well as practitioners affiliated with the Article 28 institutions which will enable the PPS to provide necessary services to persons with medical and behavioral health needs with an integrated team approach. For 3.a.i, this waiver will support, for example, the provision of primary care services by PPS Article 28 and 31 providers at New York State Psychiatric Institute behavioral site of service, a member of our PPS.

Connectivity. Similar to other projects, there is a risk that we won't be able to appropriately communicate across the care continuum to provide care to these fragile patients. Specific challenges include: 1) enabling meaningful use/review of inter-specialty notes, 2) developing registries across Collaborators, and 3) developing protocols for new disciplines. To mitigate this risk, the PPS will work with the existing behavioral health team and newly hired/trained primary care staff to design and develop EHR workflows; develop a common care plan within EHRs and across ACD; leverage the RHIO and SHIN-NY to develop registries that can pool patients from the integrated sites; and build upon existing primary care flowsheets for the clinics. Over five years, the NYP PPS plans to invest in developing connectivity across the PPS. The PPS will provide additional technical assistance through its staff and vendors to organizations that need more assistance with technology implementation. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale. Definition of Co-location. On March 10, 2015, the DST provided the following guidance on the definition of co-location: "The DOH has explicitly not set a distance requirement to determine which facilities are collocated and which are not. The driver behind this project is the notion of warm handoffs and the ability to transfer patients seamlessly and offer integrated and shared care plans between behavioral health and primary care providers. There may be various models to achieve this, but the closer the physical proximity (and the closest possible is within the same department/physical space) the higher the opportunities for sharing information adequately, quickly and efficiently." As such, we believe that the PCP and Non-PCPs that practice on our NYP/CU, New York State Psychiatric Institute (NYSPI) and Columbia Doctors facilities—all sharing one campus and a connected EHR system, with easy transitions between providers of all types—will satisfy the co-location requirement. If the IA determines that co-location means something more significant, we will seek DOH's guidance as to how to adjust our network's composition.

Page 215 of 460 Run Date: 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks								
Actively Engaged Speed	Actively Engaged Scale							
DY4,Q4	1,581							

	Year,Quarter	Year,Quarter DY2,Q1 DY2,Q2		DY2,Q3	DY2,Q4
	Baseline Commitment	0	316	490	949

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Co-locate behavioral health services at primary care practice sites. All	
participating eligible primary care practices must meet 2014 NCQA level	
3 PCMH or Advance Primary Care Model standards by DY 3.	
Develop collaborative evidence-based standards of care including	
medication management and care engagement process.	
Conduct preventive care screenings, including behavioral health	
screenings (PHQ-2 or 9 for those screening positive, SBIRT)	
implemented for all patients to identify unmet needs.	
Use EHRs or other technical platforms to track all patients engaged in	
this project.	
Co-locate primary care services at behavioral health sites.

The New York and Presbyterian Hospital (PPS ID:39)

Project 3.a.ii – Behavioral health community crisis stabilization services

IPQR Module 3.a.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risks. See comments in other project sections.

Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations. We request the waiver for providers licensed under Article 28, 31 and 32 as well as practitioners affiliated with the Article 28 institutions which will enable the PPS to provide necessary services to persons with medical and behavioral health needs with an integrated team approach. For 3.a.ii, this waiver will support, for example, the provision of crisis stabilization services by Article 28, Article 31 and 32 PPS providers to street homeless. We are in dialogue with DOH and DOHMH the necessity of a waiver to provide Critical Time Intervention (CTI) services. The discussion includes licensure requirements, the interface with Mobile Crisis, the use of CBO-based staff, and the value of a pilot in consultation with DOH.

Connectivity. There is a risk that we won't be able to communicate across care continuum to provide care to these patients. To mitigate this risk, the PPS will establish alerts to notify providers when a patient is determined eligible. Once patients consent, the PPS will use Healthix technology to facilitate real-time notification of patient utilization. The NYP PPS plans to invest \$13.3 million of its DSRIP funds and \$6.5 million in capital funding through the CRFP Grant plus a 100% NYP match (pending approval) to develop that connectivity across the PPS. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Capacity. We expect the triage aspect of this project to generate increased demand for primary and behavioral health services. This is a risk because these services are already stressed. First, we intend to expand primary, behavioral care and selected specialty care capacity through increased staffing levels, expanded practice hours and/or physical capacity expansion at four major PPS centers for outpatient care. The PPS is developing a brand new psych triage unit, and Network Member ACMH has applied for funding to develop an 8-bed crisis respite unit. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds and organizations' capital budgets on a reduced scale.

Second, we will build additional IT capacity and capability in our Network Members, allowing them to manage their volume more effectively, reduce duplication in services and care for patients in the non-acute setting. The hard asset investments are dependent on funding applied for under the CRFP.

Diversity. A risk to successful implementation lies with the socio-economic and ethnic make-up of Upper Manhattan residents, where this project is focused..

To mitigate this risk, the NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the National Quality Forum's (NQF) framework, which we will expand to our Network Members. The NYP PPS will train frontline staff and physicians involved in this project to provide care that respects patients' "Culture of One."

MCO Agreements. Currently, many Medicaid MCO contracts do not allow us to provide coverage for the services proposed by this project, including billing for off-site, home visits. NYP is in active negotiations with Medicaid MCOs to modify contracts (pending waivers as appropriate) so that we will be able to provide coverage.

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.a.ii.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchn	narks
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	1,300

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4
	Baseline Commitment	100	400	500	800
PPS Reported	Quarterly Update	80	323	0	0
	Percent(%) of Commitment	80.00%	80.75%	0.00%	0.00%
IA Approved	Quarterly Update	0	323	0	0
IA Approved	Percent(%) of Commitment	0.00%	80.75%	0.00%	0.00%

Marning: PPS Reported - Please note that your patients engaged to date (0) does not meet your committed amount (500) for 'DY2,Q3'

IPQR Module 3.a.ii.3 - Prescribed Milestones

Instructions:

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.	DY2 Q4	Project	N/A	In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4

under this project.	
Develop written treatment protocols with consensus from participating	
providers and facilities.	
Include at least one hospital with specialty psychiatric services and crisis-	
oriented psychiatric services; expansion of access to specialty psychiatric	
and crisis-oriented services.	
Expand access to observation unit within hospital outpatient or at an off	
campus crisis residence for stabilization monitoring services (up to 48	
hours).	
Deploy mobile crisis team(s) to provide crisis stabilization services using	
evidence-based protocols developed by medical staff.	
Ensure that all PPS safety net providers have actively connected EHR	
systems with local health information exchange/RHIO/SHIN-NY and	
share health information among clinical partners, including direct	
exchange (secure messaging), alerts and patient record look up by the	
end of Demonstration Year (DY) 3.	
Establish central triage service with agreements among participating	
psychiatrists, mental health, behavioral health, and substance abuse	
providers.	
Ensure quality committee is established for oversight and surveillance of	
compliance with protocols and quality of care.	
Use EHRs or other technical platforms to track all patients engaged in	
this project.

Project 3.e.i – Comprehensive strategy to decrease HIV/AIDS transmission to reduce avoidable hospitalizations - development of a Center of Excellence for Management of HIV/AIDS

☑ IPQR Module 3.e.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risk. First, we are awaiting clarification from the IA regarding the provider requirements by provider-type given the inconsistency in provider typing, the fact that the provider roster will fluctuate throughout DSRIP, and the lack of understanding of the relationship between provider engagement and achievement values. We have made certain reasonable assumptions regarding the applicability of the requirements and have reflected those in our implementation planning. Second, our provider commitments reflect provider types as will be experienced by the actively engaged population.

Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations. We request the waiver for providers licensed under Article 28, 31 and 32 as well as practitioners affiliated with the Article 28 institutions which will enable the PPS to provide necessary services to persons with medical and behavioral health needs with an integrated team approach. For 3.e.i, this waiver will support, for example, the provision of chemical dependency services to PLWHA by a PPS Article 32 provider in a different PPS Article 28 clinic setting.

State-wide Program Funding Shift. The NYP PPS was the only PPS state-wide to select Project 3.e.i. We view this as reflective of the change in HIV/AIDS programs across the State, including the focus on the End of the Epidemic campaign. The risk of such a shift creates is the burden on existing providers, including those in the NYP PPS, to care for PLWH who were once cared for by other programs. As a result, PLWH may fall out of care at a higher rate than before. To mitigate this risk, the three clinics participating in this project are increasing staff, expanding hours to accommodate walk-in patients and modifying hospital protocols to make it easier to transfer PLWH from the EDs to the outpatient setting without admitting them ("Rapid HIV Consult Service"). In addition, the NYP PPS is establishing a city-wide HIV Project Advisory Committee to increase engagement/retention for PLWH. The Project will re-engage patients who have been lost to follow-up, test individuals who do not know their serostatus and provide prevention services for uninfected, high-risk populations. PLWH—whether or not they are in care or know their serostatus—access services such as needle exchanges, food pantries and substance abuse treatment centers. Through the Advisory Committee, leaders from such organizations will convene physically and electronically (via Allscripts Care Director and the RHIO) to track patients and alert one another of patients' whereabouts, with the goal of engaging or re-engaging them in care. However, a major risk mitigation strategy is outside of the PPS control and will be for new sources of funds to be made available to providers to offset the losses in some other programs and to support the goals of both DSRIP and the End of the Epidemic campaign.

Connectivity. A major implementation risk will be IT connectivity across the PPS Network Members involved in the care of PLWH. Many Network Members have different software platforms or limited IT capabilities. To mitigate this risk, the NYP PPS plans to invest heavily to develop connectivity across the PPS. \Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale. This will slow down the IT roll-out and may also negatively impact project outcomes.

Page 244 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.e.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Develop a consulting/referral/educational relation with a center of	
excellence for management of HIV/AIDS that ensures early access to and	
retention in HIV and HCV Care - Scatter Model; ensure medical and	
behavioral health consultation expertise are available.	
Identify primary care providers who have significant case loads of	
patients infected with HIV.	
Implement training for primary care providers which will include	
consultation resources from the center of excellence.	
Develop coordination of care services with behavioral health and social	
services within or linking with the primary care providers' offices.	
Ensure systems are in place that address patient partnerships to care,	
ensure follow-up and retention in care, and promote adherence to	
medication management, monitoring and other requirements of evidence-	
based practice for management of HIV/AIDS.	
Institute a system to monitor quality of care with educational services	
where gaps are identified.	
Use EHRs or other IT platforms to track all patients engaged in this	
project.	
Identify site location for a Center of Excellence (COE) which would	
provide access to the population infected with HIV (and/or HCV).	
Co-locate at this site services generally needed for this population	
including primary care, specialty care, dental care, behavioral health	
services, dietary services, high risk prenatal care and buprenorphine	
maintenance treatment.	
Co-locate care management services including Health Home care	
managers for those eligible for Health Homes.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop a referral process and connectivity for referrals of people who	
qualify for but are not yet in a Health Home.	
Ensure understanding and compliance with evidence-based guidelines	
for management of HIV/AIDS (and HCV)	
Ensure coordination of care between all available services preferably	
through a single electronic health/medical/care management record.	
Ensure that all PPS safety net providers are actively sharing EHR	
systems or other IT platforms with local health information	
exchange/RHIO/SHIN-NY and sharing health information among clinical	
partners, including direct exchange (secure messaging), alerts and	
patient record look ups, by the end of DY 3.	
Ensure that EHR systems or other IT platforms, used by participating	
safety net providers meet Meaningful Use and PCMH Level 3 standards	
and/or APCM by the end of Demonstration Year 3.	
Use EHRs or other IT platforms to track all patients engaged in this	
project.	
Seek designation as center of excellence from New York State	
Department of Health.

Project 3.g.i – Integration of palliative care into the PCMH Model

IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Provider Commitment Risks. See comments in other sections.

Connectivity. There is a risk that we won't be able to appropriately communicate across the continuum to provide care to these patients. Specific challenges include: 1) creating registries to identify potentially eligible patients; 2) creating an effective referral mechanism for physicians to refer to the; and 3) exchanging clinical information with community-based partners. To mitigate this risk, the NYP PPS plans to invest in developing connectivity across the PPS. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds on a reduced scale.

Capacity. Space is an issue at NYP's PCMHs, and there is a risk that the newly integrated palliative care team will not have adequate space to provide care. To mitigate this risk, NYP has applied for CRFP funding to redesign the PCMHs, where we will create rooms to accommodate additional volume. Note: If we receive less funding than expected from the CRFP, we will likely fund development out of DSRIP operational proceeds and organizations' capital budgets on a reduced scale.

Workforce. There is a risk inherent in hiring palliative care specialists due to the limited pool of qualified candidates and increasing demand for such. We have designed to program to be flexible, occupying swing space in several PCMHs across the ACN. Sharing resources will maximize providers' time. Second, we will begin recruiting for this position early but understand that a delay in hiring will delay implementation. NYP will also host career events, such as professional conferences and interview days, dedicated to the type of human capital needed.

Diversity. A risk to the success of the DSRIP program lies with the cultural diversity inherent in our PPS population. Much the NYP PPS service area is comprised of linguistically isolated ethnic and racial minorities. For example, minority patients often have poor access to adequate pain care in the U.S., and poorly aligned culture, religion and ethnicity may prevent physicians from offering palliative care to patients who need it. To mitigate this risk, the NYP PPS has adopted a patient-centered approach to cultural competency, aligned with the NQF's framework, which we will expand to our Network. The NYP PPS will train frontline staff and physicians involved in this projects to provide care that respects patients' "Culture of One." In recruiting staff, we are putting a significant emphasis on clinicians' expertise/experience with a culturally diverse population. PCMH Standards. This is a labor-intensive process. We will set up a dedicated PCMH Certification Team that will be responsible for all relevant providers meeting this project requirement according to the timetable set out in our project speed of implementation forecasts. This team will be led by NYP's VP for Community Health who has significant experience transforming the 13 NYP ACN practices to NCQA PCMH designation as well as supporting numerous community providers in their PCMH journey. The NYP Community Health department will work with providers closely to develop an aggressive timeline and roll-out schedule to ensure that they are on target to meet or exceed the DY 3 requirement. One risk that is out of our hands is the amount of time the application will take to turn around once it is submitted.

MCO Agreements. Currently, many MCO contracts do not allow us to provide coverage for the services proposed, including home-based palliative care services (usually separate from hospice services) and reimbursement for intensive post-discharge follow-up care, which can prevent future utilization if patients' goals and values can be clarified. NYP is in active negotiations with Medicaid MCOs to modify contracts so that we will be able to provide coverage for these services.

Page 262 of 460 Run Date : 03/31/2017

The New York and Presbyterian Hospital (PPS ID:39)

IPQR Module 3.g.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Integrate Palliative Care into appropriate participating PCPs that have, or	
will have, achieved NCQA PCMH and/or APCM certification.	
Develop partnerships with community and provider resources including	
Hospice to bring the palliative care supports and services into the	
practice.	
Develop and adopt clinical guidelines agreed to by all partners including	
services and eligibility.	
Engage staff in trainings to increase role-appropriate competence in	
palliative care skills and protocols developed by the PPS.	
Engage with Medicaid Managed Care to address coverage of services.	
Use EHRs or other IT platforms to track all patients engaged in this	
project.

Project 4.b.i – Promote tobacco use cessation, especially among low SES populations and those with poor mental health.

☑ IPQR Module 4.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

DY2Q2 Update: The Milestone on Developing 5A Documentation would not submit as "in-progress" due to a number of MAPP errors. This was changed to on-hold.

Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations. We request the waiver for providers licensed under Article 28, 31 and 32 as well as practitioners affiliated with the Article 28 institutions which will enable the PPS to provide necessary services to persons with medical and behavioral health needs with an integrated team approach. For 4.b.i, this waiver will support, for example, in-home patient medication education and reconciliation services by PPS Article 28 primary care nurse practitioners and physicians. Failure to receive a waiver would restrict our ability to place tobacco cessation services in the communities served by the NYPH PPS. Without a waiver it would be necessary to establish referral mechanisms to the NYPH tobacco cessation clinic and to services provided within NYPH ambulatory care network facilities.

Project 4.c.i – Decrease HIV morbidity

☑ IPQR Module 4.c.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Regulatory Waivers. We request a waiver of 10 NYCRR 401.2(b) which restricts an entity to provide services only at the sites designated in the operating certificate. In order to provide optimal access for patients whom DSRIP is designed to help the most, providers need to meet the patients where they are most likely to be found. Therefore, we request a waiver of this rule to allow providers to provide services, and to be reimbursed for those services, at off-site locations to support the following use cases: (1) As part of the NYS DSRIP project 3.e.i, the NYP PPS plans to embed Article 31 and Article 32 providers (e.g. Argus Community-employed CASAC) within an NYP Article 28 clinic setting to better engage/link people living with HIV and AIDS with comprehensive harm reduction programs (e.g. OASAS). (2) As part of the NYS DSRIP project 4.c.i, the project also plans to embed physicians, nurse practitioners, and physicians assistants (currently operating under NYP's Article 28 license) to provide PrEP, STI, HCV and HIV treatment in addition to medical care for substance use (e.g. buprenorphine) in community-based organizations to people living with, or at risk for, HIV who are currently receiving community-based services (Article 31, 32 or non-licensed community facilities). We understand that issues of reimbursement are being explored as part of the waiver process and that the Department is supporting a State Plan Amendment with the State Medicaid Plan as well as amendments to the associated regulations. Meeting DSRIP Requirements and Sustainability. The combined efforts of the NYS Health Home Program, DSRIP and End of the Epidemic (EtE) initiatives are all aimed at increasing linkage and engagement into primary care. The risk such a shift creates is the burden on existing providers, including those in the NYP PPS, to care for people at risk for, or living with, HIV or HCV who were previously undiagnosed and/or not engaged in routine care. As part of Project 4.c.i. Reducing HIV Morbidity, the NYP PPS is establishing an HIV Project Steering Committee with associated sub-contracts with a number of key community based organizations to support a team of peers and community health workers to increase engagement/retention for people at risk for, or living with, HIV or HCV. If successful, this will substantially increase demand for clinical services through the Center of Excellence (CoE). To improve access, DSRIP has funded a modest increase in staff (1 FTE NP, 1 FTE Psychiatric NP, 1.2 FTE Physician, 1 FTE Practice Care Facilitator, 1 FTE Care Manger and 0.5 FTE Analyst). However, with a projected scale and speed, this increase in CoE staff, even with improved efficiencies, is far from adequate to accommodate the projected increased demand if NYS Health Home, DSRIP and EtE initiatives are successful. Potential major risk mitigation strategies, outside of the PPS control, will be to 1) enhance existing NYS Health Home programs and revenue and 2) secure additional programmatic support through proposed Value Based Purchasing (VBP) initiatives. IT Connectivity. A major implementation risk will be IT connectivity across the PPS. Many Network Members have different platforms or limited IT capabilities. To mitigate this risk, the PPS plans to invest heavily to develop connectivity across the PPS. Plans include: a) extending NYP's care coordination application, Allscripts Care Director (ACD), to multiple Members; b) connecting nearly 70 Members to the local RHIO for tracking patients; and c) creating additional data interfaces between organizations that will increase data availability for members of the care team. If we receive less CRFP funding than expected, we will likely fund development out of DSRIP operational proceeds on a reduced scale. This will slow down the IT roll-out and may also negatively impact project outcomes.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

and that, following in	-	orting period as defined by NY DOH, chan	-	ly report is true and accurate to the best of my knowledge, ursuant only to documented instructions or documented

DSRIP Implementation Plan Project

Section	Module Name / Milestone #	Review Stat	us	
	Milestone #3 Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Pass & Complete		
	Milestone #4 Develop a Value Based Payments Needs Assessment ("VNA")	Pass & Ongoing	(
	Milestone #5 Develop an implementation plan geared towards addressing the needs identified within your VNA	Pass & Ongoing		
	Milestone #6 Develop partner engagement schedule for partners for VBP education and training	Pass & Ongoing		
	Milestone #7 ≥50% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and ≥ 8%* (blended for 15% target for fully capitated plans (MLTC and SNPS) and 5% target for not fully capitated plans) of total MCO payments captured in VBPs has to be in Level 2 VBPs or higher	Pass & Ongoing		
	Milestone #8 ≥80% of total MCO payments (in terms of total dollars) captured in at least Level 1 VBPs, and ≥ 20%* (blended for 35% target for fully capitated plans (MLTC and SNPS) and 15% target for not fully capitated plans) of total MCO payments captured in VBPs has to be in Level 2 VBPs or higher	Pass & Ongoing		
	Module 4.1 - Prescribed Milestones			
Section 04	Milestone #1 Finalize cultural competency / health literacy strategy.	Pass & Complete	(
	Milestone #2 Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	Pass & Complete		
	Module 5.1 - Prescribed Milestones			
	Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	Pass & Complete		
Section 05	Milestone #2 Develop an IT Change Management Strategy.	Pass & Ongoing		
	Milestone #3 Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	Pass & Ongoing		
	Milestone #4 Develop a specific plan for engaging attributed members in Qualifying Entities	Pass & Complete	B	
	Milestone #5 Develop a data security and confidentiality plan.	Pass & Ongoing	9 B	
	Module 6.1 - Prescribed Milestones			
Section 06	Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	Pass & Complete	(P)	
	Milestone #2 Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	Pass (with Exception) & Complete	0	
	Module 7.1 - Prescribed Milestones			
Section 07	Milestone #1 Develop Practitioners communication and engagement plan.	Pass & Complete		
	Milestone #2 Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	Pass & Complete		
Section 08	Module 8.1 - Prescribed Milestones			

Page 295 of 460 Run Date : 03/31/2017

DSRIP Implementation Plan Project

Section	Module Name / Milestone #	Review Status	
	Milestone #1 Develop population health management roadmap.	Pass & Ongoing	
	Milestone #2 Finalize PPS-wide bed reduction plan.	Pass (with Exception) & Ongoing	
	Module 9.1 - Prescribed Milestones		
Section 09	Milestone #1 Perform a clinical integration 'needs assessment'.	Pass & Ongoing	(
	Milestone #2 Develop a Clinical Integration strategy.	Pass & Ongoing	
	Module 11.1 - Workforce Strategy Spending (Baseline)	Pass & Ongoing	
	Module 11.2 - Prescribed Milestones		
	Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Pass & Complete	
	Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	Pass & Ongoing	<u> </u>
Section 11	Milestone #3 Perform detailed gap analysis between current state assessment of workforce and projected future state.	Pass & Complete	•
	Milestone #4 Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	Pass & Complete	
	Milestone #5 Develop training strategy.	Pass & Complete	D
	Module 11.10 - Staff Impact	Pass & Ongoing	
	Module 11.11 - Workforce Strategy Spending (Quarterly)	Pass & Ongoing	(

Page 296 of 460 Run Date : 03/31/2017

Project ID	Module Name / Milestone #	Review Status
	Module 2.a.i.2 - Prescribed Milestones	
	Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Pass & Ongoing
	Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Pass & Ongoing
	Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Pass & Ongoing
	Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	Pass & Ongoing
2.a.i	Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Ongoing
	Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing
	Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	Pass & Ongoing
	Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	Pass & Ongoing
	Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	Pass & Ongoing
	Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	Pass & Ongoing
	Module 2.b.i.2 - Patient Engagement Speed	Pass & Ongoing
	Module 2.b.i.3 - Prescribed Milestones	
	Milestone #1 Ensure Ambulatory ICU is staffed by or has access to a network of providers including medical, behavioral health, nutritional, rehabilitation and other necessary provider specialties that is sufficient to meet the needs of the target population.	Pass & Ongoing
2.b.i	Milestone #2 Ensure Ambulatory ICU is integrated with all relevant Health Homes in the community.	Pass & Ongoing
	Milestone #3 Use EHRs and other technical platforms to track all patients engaged in the project, including collecting community data and Health Home referrals.	Pass & Ongoing
	Milestone #4 Establish care managers co-located at each Ambulatory ICU site.	Pass & Ongoing
	Milestone #5 Ensure that all safety net project participants are actively sharing EHR systems with local health information	Pass & Ongoing

Page 297 of 460 Run Date : 03/31/2017

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review Status	
	exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including Direct exchange (secure messaging), alerts and patient record look up.		
	Milestone #6 Ensure that EHR systems used by participating providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Ongoing	
	Milestone #7 Implementation of a secure patient portal that supports patient communication and engagement as well as provides assistance for self-management.	Pass & Ongoing	
	Milestone #8 Establish a multi-disciplinary, team-based care review and planning process to ensure that all Ambulatory ICU patients benefit from the input of multiple providers.	Pass & Ongoing	
	Milestone #9 Deploy a provider notification/secure messaging system to alert care managers and Health Homes of important developments in patient care and utilization.	Pass & Ongoing	
	Milestone #10 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
	Module 2.b.iii.2 - Patient Engagement Speed	Pass & Ongoing	9
	Module 2.b.iii.3 - Prescribed Milestones		
	Milestone #1 Establish ED care triage program for at-risk populations	Pass & Ongoing	
2.b.jij	Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	Pass & Ongoing	
	Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Pass & Ongoing	
	Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	Pass & Ongoing	
	Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
	Module 2.b.iv.2 - Patient Engagement Speed	Pass & Ongoing	
2.b.iv	Module 2.b.iv.3 - Prescribed Milestones		
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Ongoing	

Page 298 of 460 Run Date : 03/31/2017

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review Status	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Ongoing	
	Milestone #3 Ensure required social services participate in the project.	Pass & Ongoing	
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Ongoing	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Ongoing	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Ongoing	
	Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
	Module 3.a.i.2 - Patient Engagement Speed	Pass & Ongoing	9
	Module 3.a.i.3 - Prescribed Milestones		
	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Ongoing	
	Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #5 Co-locate primary care services at behavioral health sites.	Pass & Ongoing	
3.a.i	Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #7 Conduct preventive care screenings, including physical and behavioral health screenings.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #9 Implement IMPACT Model at Primary Care Sites.	Pass & Ongoing	
	Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	Pass & Ongoing	
	Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	Pass & Ongoing	
	Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.	Pass & Ongoing	
	Milestone #13 Measure outcomes as required in the IMPACT Model.	Pass & Ongoing	
	Milestone #14 Provide "stepped care" as required by the IMPACT Model.	Pass & Ongoing	
	Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	

Page 299 of 460 Run Date : 03/31/2017

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Re	eview Status
	Module 3.a.ii.2 - Patient Engagement Speed	Pass & Ongoing	(
	Module 3.a.ii.3 - Prescribed Milestones		
	Milestone #1 Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.	Pass & Ongoing	
	Milestone #2 Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.	Pass & Ongoing	
	Milestone #3 Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.	Pass & Ongoing	
	Milestone #4 Develop written treatment protocols with consensus from participating providers and facilities.	Pass & Ongoing	
3.a.ii	Milestone #5 Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.	Pass & Ongoing	
J.a.II	Milestone #6 Expand access to observation unit within hospital outpatient or at an off campus crisis residence for stabilization monitoring services (up to 48 hours).	Pass & Ongoing	
	Milestone #7 Deploy mobile crisis team(s) to provide crisis stabilization services using evidence-based protocols developed by medical staff.	Pass & Ongoing	
	Milestone #8 Ensure that all PPS safety net providers have actively connected EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up by the end of Demonstration Year (DY) 3.	Pass & Ongoing	
	Milestone #9 Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.	Pass & Ongoing	
	Milestone #10 Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care.	Pass & Ongoing	
	Milestone #11 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Module 3.e.i.2 - Patient Engagement Speed	Pass & Ongoing	(9)
	Module 3.e.i.3 - Prescribed Milestones		
	Milestone #1 Develop a consulting/referral/educational relation with a center of excellence for management of HIV/AIDS that ensures early access to and retention in HIV and HCV Care - Scatter Model; ensure medical and behavioral health consultation expertise are available.	Pass & Ongoing	
3.e.i	Milestone #2 Identify primary care providers who have significant case loads of patients infected with HIV.	Pass & Ongoing	
	Milestone #3 Implement training for primary care providers which will include consultation resources from the center of excellence.	Pass & Ongoing	
	Milestone #4 Develop coordination of care services with behavioral health and social services within or linking with the primary care providers' offices.	Pass & Ongoing	
	Milestone #5 Ensure systems are in place that address patient partnerships to care, ensure follow-up and retention in care, and promote adherence to medication management, monitoring and other requirements of evidence-based practice for management	Pass & Ongoing	

Page 300 of 460 Run Date : 03/31/2017

Additional Project Scale Commitments

Instructions:

Please indicate the scale of the categories below that meet all of the project requirements committed to in the Project Plan Application. Documentation must be submitted in Excel format in the quarter when the PPS provider speed commitments for a particular project are due. This documentation should include the target category(e.g. Medical Villages, Emergency Departments with Care Triage, Community-based navigators, etc.), the project ID(e.g. 2.a.iv,2.a.v,3.a.ii, etc.), and the name of the providers/entities/individuals associated with this project, if applicable.

Project Scale Category	Project	Selected	Committed
Expected Number of Ambulatory ICUs Established	2.b.i	0	9
Emergency Departments with Care Triage	2.b.iii	0	5
Expected Number of Crisis Intervention Programs Established	3.a.ii	0	2
