Quarterly Report - Implementation Plan for Staten Island Performing Provider System, LLC

Year and Quarter: DY1, Q4 Quarterly Report Status: Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	Completed
Section 02	Governance	Completed
Section 03	Financial Stability	Completed
Section 04	Cultural Competency & Health Literacy	Completed
Section 05	IT Systems and Processes	Completed
Section 06	Performance Reporting	Completed
Section 07	Practitioner Engagement	Completed
Section 08	Population Health Management	Completed
Section 09	Clinical Integration	Completed
Section 10	General Project Reporting	Completed
Section 11	Workforce	Completed

Status By Project

Project ID	Project Title	Status
2.a.iii	Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services	Completed
2.b.iv	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	Completed
2.b.vii	Implementing the INTERACT project (inpatient transfer avoidance program for SNF)	Completed
2.b.viii	Hospital-Home Care Collaboration Solutions	Completed
2.d.i	Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care	Completed
3.a.i	Integration of primary care and behavioral health services	Completed
3.a.iv	Development of Withdrawal Management (e.g., ambulatory detoxification, ancillary withdrawal services) capabilities and appropriate enhanced abstinence services within community-based addiction treatment programs	Completed
3.c.i	Evidence-based strategies for disease management in high risk/affected populations (adults only)	Completed
3.g.ii	Integration of palliative care into nursing homes	Completed
4.a.iii	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	Completed
4.b.ii	Increase Access to High Quality Chronic Disease Preventive Care and Management in Both Clinical and Community Settings (Note: This project targets chronic	Completed

✓ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The following identifies key challenges and risks to achieving the milestones in the above project plan and describes the SI PPS's ability to achieve outcome measure targets:

1. The SI PPS network is comprised of two co-lead hospitals and representation from a broad spectrum of providers and has elected to form a new limited liability company, the Staten Island Performing Provider System, LLC. The SI PPS has implemented a Delegated Governance Model to oversee the management and decision making process of the large diversified network. The development and implementation of the milestones and steps listed in the tables above will not occur over night and the SI PPS will require an appropriate amount of time to develop and implement policies, procedures, workflows, and an organizational structure that is rooted throughout the PPS network. The SI PPS has identified, as a risk, the requirement to develop and implement the governance structure and PMO while project implementation is underway. This will include hiring new staff to support PMO activities. In developing the implementation plan steps, the SI PPS allotted an appropriate amount of time in order to manage deliverables, expectations and deadlines.

2. The SI PPS anticipates that ensuring the appropriate level of participation in governance committees by PPS partner organizations including the Clinical Committee, Finance Committee, Steering Committee, and Workforce Committee, among others, will be a challenge to being able to execute the workplan steps identified in previous sections. To mitigate this risk, the SI PPS will appoint participants to the governance committees with experience and a history of participation in similar committees as well as consider providing incentives through the funds flow to ensure ongoing participation.

3. The milestone related to developing a workforce communication and engagement plan is dependent upon the completion of key milestones in the workforce workstream. If the SI PPS does not meet required milestones within the workforce workstream this might create a risk in meeting this and other governance milestone. The PMO in coordination with the PPS's governance will develop an overall approach to track/monitor risks on an ongoing basis, ensuring appropriate attention and resources are dedicated to developing and implementing strategies to mitigate risks identified by the PPS.

4. The SI PPS DSRIP valuation was not in line with previous estimates for DSRIP funding, and may not be sufficient to implement projects as they have been envisioned across the provider networks, creating a risk across workstreams including governance. The SI PPS has communicated this uncertainty around funding to the PPS network throughout the planning process, and has focused on creating efficiencies across project implementation as well as strategies to ensure project implementation is sustainable and not entirely dependent on DSRIP funding and will continue to be dependent to mitigate this risk.

5. The SI PPS anticipates that shared IT infrastructure is a gap for implementation. The SI PPS will mitigate this risk by developing interim procedures as the SI PPS advances through different stages of implementation. For example, the SI PPS anticipates that PPS providers will be

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

fully integrated into the IT platform in DY3. However, the SI PPS has develop interim procedures for reporting on a quarterly basis to the DOH beginning in DY1. The SI PPS has incorporated incremental steps prior to IT platform integration with the goal of ensuring a smooth transition.

✅ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The SI PPS's governance infrastructure is composed of several committees including Workforce, Compliance, Clinical, Finance, Data/IT, Communication & Marketing, and Diversity & Inclusion Committees. These committees are interconnected with the SI PPS's governance structure as well as various workstreams, such as IT systems & processes, performance reporting, practitioner engagement, population health management, and clinical integration. The development of a governance structure will serve as the foundation by which each of these workstreams is based.

The interdependencies between the workstreams, where various components of infrastructure are reliant on each other, have the potential to create a cascade of delays that will impact all workstreams. For example, a delay in identifying an appropriate funds flow model for PPS providers might delay their ability to hire and train key staff which will impact workforce milestones. Any delay in the development of an appropriate IT change management and governance mechanism will delay the development and implementation of an IT platform across the PPS network. This will impact PPS providers' ability to meet IT project requirements for the DSRIP projects, thereby impacting DSRIP funding.

The interdependent nature of the SI PPS's infrastructure increases the need for coordinated governance arrangements as well a strong PMO and a designated committee structure aimed at ensuring that the appropriate expertise and staff support is dedicated to meeting all workplan steps and milestones.

All workstreams are assigned to a committee with the intent that the committee oversees the development and implementation of incorporating the workstream into the SI PPS. The following list provides the workstreams and their assigned committees.

- Financial Sustainability – Finance Committee
- Cultural Competency – Diversity & Inclusion Committee
- IT Systems and Processes – Data/IT Committee
- Performance Reporting – Performance Reporting Workgroup made up of Finance, Clinical, and Data/IT Committee members
- Practitioner Engagement – Practitioner Communication & Engagement Workgroup made up of Communication & Marketing Committee members and key PPS practitioner stakeholders
- Population Health Management – Population Health Management Workgroup made up of Clinical, Finance, and Data/IT Committee members as well as key PPS practitioner stakeholders
- Clinical Integration – Clinical Integration Workgroup made up of Clinical and Data/IT Committee members
- Project Implementation Teams, Clinical Subcommittees and Leads and well as PMO Project Coordinators and Data Analysts will support all

✓ IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Lead Entity	SI PPS, LLC	Form all planned Governance Committees; define bylaws and policies to identify funding and staff resources; and establish a reporting structure and monitoring processes.
Overall SI PPS, LLC and Board of Managers Advisor	Steering Committee: Kim, David, Beacon Christian Community Health Center; Arneth, Diane, Community Health Action of Staten Island; Thompson, Henry, Community Health Center of Richmond; Rose, David, Eger Health and Rehabilitation Center; Mitzner, Irina, North Shore - LIJ Homecare; Buchsbaum, Philip, Richmond Center for Rehabilitation and Residential Healthcare; Salhany, Richard, RUMC; Patel, Pankaj, RUMC; Wolff, Elizabeth, Richmond University Medical Center; Zagor, Fern, Staten Island Mental Health Society; Pietro, Joanne, Staten Island University Hospital; Wong, Dina, Staten Island University Hospital; Gonzales, Diane, Staten Island University Hospital; Wexler, Amanda, YMCA Counseling Services; Soberman, Rhonda, VNSNY; Zagor, Fern, Staten Island Mental Health Society; Filis, Jacqueline, YMCA Counseling Services; Lindo, Benny, Community Health Center of Richmond; Litchi, Donna, VNSNY	Serve in an advisory role to overall PPS operations and the Board of Managers.
Overall SI PPS Advisor (including Workforce Advisory)	Project Advisory Committee (all SI PPS Partners)	Serve in an advisory role to overall PPS operations.
Major hospital partners	<ul style="list-style-type: none"> • Richmond University Medical Center • Staten Island University Hospital 	Appoint members to the Board and serve on governance committees.
Physician organizations and other representative PPS providers	<ul style="list-style-type: none"> • Beacon Christian Community Health Center • University Physicians Group • Victory Internal Medicine • Community Health Center of Richmond, Inc. • Community Health Action of Staten Island • Eger Health Care and Rehabilitation • North Shore Home Care 	Serve as Steering Committee members, and Clinical Committee members.

✔ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Staten Island University Hospital	Co-Lead Applicant and Co-Equity Contributor, Co-Leadership participant	Provide leadership personnel, committee chairs, and Board participation.
Richmond University Medical Center	Co-Lead Applicant and Co-Equity Contributor, Co-Leadership participant	Provide leadership personnel, committee chairs, Board participation.
Richmond County Medical Society	Participating Provider Organization	Committee member
Metro Community Health Centers/CP of NYS	Participating Provider Organization	Committee member
Carmel Richmond Healthcare and Rehabilitation Center	Participating Provider Organization	Committee member
Camelot of Staten Island	Participating Provider Organization	Committee member
Staten Island Partnership for Community Wellness	Participating Provider Organization	Committee member
Clove Lakes Health Care	Participating Provider Organization	Committee member
Coordinated Behavioral Care (CBC)	Participating Provider Organization	Committee member
Cerebral Palsy Association of NY / Metro Health Clinic	Participating Provider Organization	Committee member
Carmel Richmond Healthcare and Rehabilitation Center	Participating Provider Organization	Committee member
Project Hospitality	Participating Provider Organization	Committee member
External Stakeholders		
New York City Department of Health and Mental Hygiene	Participating Provider Organization	PAC member
Staten Island Foundation	Community Stakeholder	PAC member
Jewish Community Center of Staten Island	Community Stakeholder	PAC member
Wagner College	Community Stakeholder	PAC member
Staten Island Immigrants Counsel	Community Stakeholder	Committee member
El Centro del Immigrante	Community Stakeholder	Committee member
New York City Department of Education	Community Stakeholder	PAC member

✓ IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

The governance workstream serves as the mechanism by which members of the SI PPS develop accountability, make decisions around the development of IT infrastructure, and determine activities and resources required to execute the IT infrastructure plan. Further, the governance infrastructure provides the mechanism by which the IT Systems and Processes workstream integrate with other workstreams including Clinical Integration, Performance Reporting, and Workforce, among others.

The IT infrastructure provides the mechanisms by which standardized clinical, financial, and other operations data are collected and reported. The standardization of data collection and reporting enables the governance committees to quickly evaluate and adjust policies, procedures, and standards of care based on the rapid cycle evaluation approach which is grounded in the IT infrastructure. Similarly, the ability to collect, synthesize and report on data is critical to communicate progress and performance to PPS providers and other key stakeholders.

The following provides an overview of how the SI PPS will develop the IT infrastructure:

- Success of communication among different stakeholders in the various governance committees, including progress on milestones and provider level performance, is dependent on the implementation of a robust project management software that is delivered through a secure cloud-based server accessible by provider agencies and the SI PPS PMO. The SI PPS has implemented Performance Logic, to provide this support. This IT platform also allows governance committee members to have a two-way communication mechanism with the SI PPS PMO and providers, and allows for ongoing performance monitoring or Domain 1 milestones, among others.
- SpectraMedix has been selected as the health IT vendor for SI PPS. SpectraMedix works collaboratively with the SI-PPS PMO, IT/Data Committee, and the work stream teams (i.e. Information Technology Systems & Processes, Performance Reporting, Clinical Integration, Population Health and Practitioner Engagement) to provide an IT foundation for a clinically integrated healthcare delivery system.
- The PPS is in the progress of building an Enterprise Data Warehouse that integrates NYS Medicaid attribution roaster, claims data and pharmacy data.
- The PPS will promote and support integration of PPS partners into the RHIO (Healthix) through resource support and funds flow.
- The PPS implemented a healthcare analytics platform within the secure private cloud hosting environment described above, which allows SI-PPS to have visibility into Performing Provider System performance and to meet reporting requirements for the metrics associated with the System Transformation Projects (Domain 2), Clinical Improvement Projects (Domain 3) and Population-Wide Projects (Domain 4) that have been selected by SI-PPS. This platform includes the following functions and dashboards for performance management and identifying opportunities for program improvement.

Further details are provided in the IT Systems and Processes Workstream.

DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The New York State DOH has identified specific milestones related to the governance workstream that all PPSs must report on. These milestones include finalizing a governance structure and sub-committee structure; establishing a clinical governance structure; finalizing bylaws and policies and committee guidelines; establishing governance structure reporting processes; finalizing a community engagement plan; finalizing partnership agreements or contracts with CBOs; finalizing an agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels; and finalizing a workforce communication and engagement plan.

The SI PPS will provide Board approved plans for the milestones listed above to the DOH and will monitor the progress of the designated implementation plan steps to report to the DOH on a quarterly basis. The SI PPS has developed a detailed implementation plan with additional sub-steps under each milestone that captures the responsible resources needed to execute/coordinate the implementation of the steps under each milestone as well as designated timeframe estimates to complete the steps. The PMO will implement a standardized dashboard for the collection and reporting of progress as it relates to workplan implementation and milestones for reporting progress and risks for internal updates to relevant governance committees as well as for quarterly progress reports to the DOH.

The PPS PMO will also develop performance reporting dashboards, communication plans, and timelines associated with reporting progress to the PPS network and other key stakeholders. Reporting will be through the PPS website, public forums, among others.

Milestone Name	Narrative Text
Finalize PPS finance structure, including reporting structure	No updates to the Financial Structure for the DY1 Q4 reporting period.
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	
Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Our OMIG Compliance documentation is still up-to-date. Uploaded. DY 1 Q4 Compliance Training Uploaded as well.
Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.	Per the IA Informal Feedback given to the SI PPS during DY1 Q4: "Though the PPS marked this milestone as "Complete" guidance has not been circulated to all PPS regarding the minimum standards required to meet this milestone. As such, this milestone is returned and the PPS is directed to extend the deadline of this milestone and change the status to "In Process" to the prescribed deadline and await guidance which is forthcoming. " The SI PPS is marking this milestone as "In Progress." The Deadline has been extended to the DOH Required Deadline of 9/30/2016
Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest	Deadline to complete this milestone was moved to DY2 Q4 due to DOH guidance on when this milestone is due.
Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation	
Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher	
>=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher

✓ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

The Staten Island Performing Provider System, LLC (SI PPS) anticipates the following risks associated with implementing this workstream:

1. The ability to develop a funds flow model and achieve PPS network buy-in within the designated timeframe to incentivize providers and support project implementation. To mitigate this risk the SI PPS will involve PPS providers in the development of the funds flow model as well as receive buy-in at the organizational and practitioner level for operating agreements that detail the funds flow approach by clearly communicating the funds flow model, tying funds flow directly to project participation and meeting DSRIP goals, and being transparent with the PPS network.
2. The ability to develop an integrated information technology (IT) platform in a timely manner that is shared across the PPS network to track key performance metrics, evaluate PPS providers on their performance, measure project milestones for funds flow, track financially fragile providers, and to gauge performance of partners related to value based payment. To mitigate this risk, the SI PPS's Project Management Office (PMO) will design standardized data collection templates with standardized definitions and timelines as well as a Project Management software tool and provide training to PPS providers on all DSRIP reporting requirements.
3. The ability to identify and support financially fragile providers. The assessment of the financial health of PPS providers will help to mitigate this risk by identifying financially fragile providers early on, as well as determining a method to monitor these providers and collect needed data. In November 2014, the PPS began the process of assessing the financial health of its providers to begin to mitigate this risk. The Finance Committee will utilize the results from the assessment to develop a Financially Fragile Provider Sustainability Plan that will include considerations for training education and resources.
4. The ability to transition to value-based payments especially with providers that are accustomed to the more traditional fee-for-service environment and have not yet begun to experiment with risk sharing/shared savings agreements or do not have the infrastructure to enter into such arrangements. The SI PPS will begin an educational process for PPS providers which will be ongoing throughout DSRIP implementation. The SI PPS will also include provider representatives in the Value-Based Purchasing Workgroup to ensure the engagement of key stakeholders.

✓ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The success of the SI PPS's financial sustainability plan is interdependent on several workstreams including governance, clinical integration, IT

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

systems & processes, performance reporting, practitioner engagement, and individual project implementation.

The financial sustainability workstream serves as one of the key components in the SI PPS's overall goal of moving towards a value-based payment strategy. It also allows for the distribution of funds to incentivize provider and practitioner participation in DSRIP goals. Project implementation teams will help define the project specific accountability matrix and distribute it to providers as the basis for funds flow.

Clinical integration, performance reporting, and IT systems & processes will set the foundation for facilitating the collection and analysis of key data points to gauge provider performance, for funds flow purposes, as well as to monitor the financial performance for financially fragile providers. Data analysis will also set the foundation for value-based payment contracting and enable the PPS and MCOs to understand the total cost of care for specific services or provider groups.

The interdependent nature of the SI PPS infrastructure increases the need for coordination across all workstreams, especially the finance workstream which sets the foundation to enable project implementation. Although the Finance Committee has been assigned the primary role of developing and overseeing the financial performance and sustainability of the SI PPS, other SI PPS committees will collaborate and provide feedback and inputs to the Finance Committee, to enable coordination across the various workstreams. For example, key members from the Data/IT and Clinical Committees will be assigned to assist in the development of preferred compensation models and MCO strategy understand the total cost of care for specific services or provider groups.

✓ IPQR Module 3.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director	Joseph Conte	Oversight for the development and implementation of the Finance workstream.
Finance Director	Richard Olsen	Responsible for developing and managing the PPS's finance office and its specific functions; provide guidance and oversight around the Funds Flow Plan, the Financial Stability Plan, and other relevant processes and; ensure that funds are managed and distributed according to the PPS's approved plan, that reporting requirements are met and that communication regarding finance-related functions are timely and accurate.
Finance Committee	Beacon Christian Community Health Center, David Kim Community Health Center of Richmond, Benny Lindo Marianne D'Tommaso, St. Joseph's, Fern Zagor, Staten Island Mental Health Society, Eger Health and Rehabilitation Center, Gary de Leeiwek Richmond University Medical Center, Joseph Saporito Staten Island University Hospital, Thomas Reca	Develop, implement, and oversee the financial management process, fund distribution, fund status monitoring, fund reporting, budget and financial compliance, and preparation for value-based reimbursement.
Compliance Officer	Regina Bergren	Oversee compliance monitoring and compliance plan implementation.
Financial Analysts	North Shore-LIJ Finance Office (Administrative Financial Services Agreement)	Support the collection, analysis and reporting of financial and other performance metrics from PPS providers.
Accounts Payable Staff & Finance Business Office	North Shore-LIJ Finance Office (Administrative Financial Services Agreement)	Responsible for the day-to-day operations of the accounts payable function including updating policies and procedures, monitoring the accounts payable system, and developing protocols around reporting and AP check writing related to DSRIP funds distribution.
Financial Analyst	Lashana Lewis	Documents progress and maintains record of all financial transactions, financial sustainability deliverables and training materials.
Value-based Workgroup	Richard Miller, SVP Payer Reimbursements and Contracting, North Shore LIJ; Richard Olsen, Finance Director, Staten Island PPS; Lashana Lewis, Financial Analyst, Staten Island PPS; Joseph Conte, Executive Director, Staten Island PPS;	Oversee PPS's formulation value-based reimbursement strategy

✓ IPQR Module 3.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Irene Frohlich	PPS Director of Project Management	Provide guidance to PPS Finance Director and Financial Analyst to ensure all progress is documented correctly to substantiate progress to DOH
Richard Olsen	PPS Finance Director	Oversee and lead the finance-related projects, value-based reimbursement strategy, and overall implementation plan deliverables that impact finance function reporting.
Anyi Chen	Senior Director of Enterprise Data & Analytics	Oversee IT related requirements for the finance function and provide access to data for finance function reporting requirements.
Regina Bergren	PPS Compliance Committee	Oversee the PPS's Compliance Plan and the related training, education, and reporting requirements of the plan.
Salvatore Volpe, MD	PPS Chief Medical Officer	Identify and develop an approach to promote the use of quality measures for pay-for-performance programs.
North Shore-LIJ Finance Office (Administrative Financial Services Agreement)	Internal Audit	Oversee internal control functions; the completion of audit processes related to funds flow, network provider reporting, and other finance related control processes.
Beacon Christian Community Health Center, David Kim, MD Community Health Center of Richmond, Benny Lindo Coordinated Behavioral Care, TBD (Danika Mills) Eger Health and Rehabilitation Center, Gary de Leeiwek Richmond University Medical Center, Joseph Sapporito Staten Island University Hospital, Tom Recca	PPS Finance Committee	Provide board-level oversight and responsibility for the PPS finance function; review and approve finance related policies and procedures; oversee the PPS Lead role, responsibilities and deliverables; and oversee audit and compliance processes.
Bill Myhre	Senior Director of Workforce & Human Relations	Oversee HR related functions of the PPS's employees and provide guidance related to workforce strategies.
CEOs of PPS Network Providers	Overseeing party from Network Providers	Oversee their organizations' execution of DSRIP responsibilities to contribute to the success of the finance function and finance

Staten Island Performing Provider System, LLC (PPS ID:43)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		strategies.
CFO/Finance Team of PPS Network Partner	Coordinators from Network Providers	Serve as the primary contact for the PPS Lead finance function for conducting DSRIP related business and ensure their organizations' execution of DSRIP finance responsibilities and participation in finance strategies.
Boards of Directors for PPS Network Partners	Overseeing party from Network Providers	Oversee their organizations' execution of DSRIP responsibilities and contribute to the success of the finance function and finance strategies.
Lashana Lewis	Financial Analyst	Documents progress and maintains record of all financial transactions, financial sustainability deliverable and training materials.
External Stakeholders		
TBD	External audit	Perform external audits and report to the Finance Committee.
New York State Department of Health	NY DOH defines the DSRIP requirements	Responsible for the PPS Lead and PPS finance function overall administration of DSRIP reporting to the DOH and the funds flow process.
Managed Care Organizations	Healthfirst Amerigroup United Healthcare Fidelis (others to be determined)	Participate in the Value-Based Payment Workgroup and work with the Finance Committee and project implementation teams around project-specific reimbursement strategies.
TBD	Community Representatives	Contribute to the adoption and buy-in across the PPS network by incorporating the community's needs and interests and establish communication regarding DSRIP status, results, and future strategies to maintain their contribution and influence.
Office of Mental Health; Office of Alcoholism and Substance Abuse Services; New York City Department of Health and Mental Hygiene	Government Agencies/Regulators	Provide oversight and influence in a number of DSRIP related areas including the importance of waivers or regulatory relief, construction/renovation projects, and other items and establish communication regarding DSRIP status, results, future strategies and their role in DSRIP success.
Finance Consultant – BDO Consulting	Responsible for assisting PPS with value-based payment strategy development and execution.	Responsible parties will be determined pursuant to the development of Staten Island's baseline assessment and Value-Based Payment Adoption Plan.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The developed shared IT infrastructure across the SI PPS network enables the financial sustainability workstream to better communicate across the PPS network including on the required data collection, analysis and reporting.

The ability to collect performance data from PPS providers and track providers as they meet project requirements as well as the SI PPS's ability to implement processes and protocols in line with project goals is dependent on IT infrastructure. These performance measures will serve as the basis for the funds flow to PPS providers and also allow for rapid cycle evaluation of underperforming providers. The IT infrastructure has set the foundation to allow the SI PPS to quickly identify financial performance issues, specifically with regard to financially fragile providers.

The value-based payment system is highly dependent on the developed infrastructure to support the ability to track performance metrics including process metrics related to how care is delivered and outcome metrics related to patient experience and clinical outcomes. The ability for the SI PPS to collect such data from PPS providers and across the network will be highly dependent on how and when the IT infrastructure is developed.

Finally, the SI PPS utilizes the shared IT infrastructure to facilitate communication related to the financial sustainability workstream including providing an introduction and training programs on the SI PPS's financial sustainability plan including metrics and how to understand/interpret PPS provider financial sustainability metrics.

✓ IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The New York State DOH has identified specific milestones that all PPSs must report on. These milestones include finalizing the PPS's finance structure; performing network financial health current state assessments and developing a financial sustainability strategy to address key issues; finalizing a compliance plan consistent with New York State Social Services Law 363-d; developing a detailed baseline assessment of revenue linked to value-based payments, preferred compensation modalities, a Managed Care Organization strategy; and finalizing a plan towards achieving 90% value-based payments across the PPS network by Demonstration Year 5. The finance work stream will also monitor the distribution of funds to providers including collecting data relevant to provider performance related to meeting or exceeding project requirements and goals.

The SI PPS plans to provide Board approved plans for the milestones listed above to the DOH and will monitor the progress of the designated implementation plan steps to report to the DOH on a quarterly basis. The SI PPS has developed a detailed implementation plan with additional sub-

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

steps under each milestone to capture the responsible resources to execute/coordinate the implementation of the steps under each milestone as well as designated timeframes to complete interim steps. The SI PPS anticipates that the PMO will work under the guidance of the Finance Committee to monitor the overall progress of the SI PPS's implementation, monitor and report on the progress of financially fragile providers, and provide reports to key governance committees and stakeholders on an ongoing basis as well as ensure rapid cycle evaluation related to these milestones.

✓ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Staten Island is comprised of an ethnically diverse population, presenting linguistic and cultural barriers for Medicaid enrollees as well as for the uninsured population attempting to self-manage care as well as access and navigate the healthcare system. As indicated in the Staten Island Performing Provider System, LLC's (SI PPS) Community Needs Assessment, Staten Island's patients speak over 158 languages and one in five English speakers read at a 5th grade reading level. The following identifies key challenges and risks to achieving the milestones in the above project plan and describes the SI PPS's ability to achieve outcome measure targets:

1. The SI PPS recognizes the risk in effectively engaging and motivating this population to improve their own health literacy in addition to the development of culturally competent and linguistically appropriate materials for Staten Island's highly diverse population, which will be both challenging and costly. Training of providers and CBOs that are engaged with these populations will be the means by which the PPS addresses this risk. Add partnering, via an innovative Cultural Competency/Health Literacy circular responding to Staten Island's health desperations, with educational instructions to improve health literacy of the population.

2. The SI PPS also anticipates workforce recruitment/hiring, training, and adoption of the cultural competency/health literacy strategy as an implementation risk. Because there may not be the appropriate level of linguistically appropriate individuals to provide healthcare services on Staten Island, the SI PPS will offer a centralized language access service provider available to all PPS partners to mitigate this risk.

To further mitigate implementation risks, the SI PPS's strategic plan requires that the Diversity and Inclusion Committee conduct a baseline survey of healthcare workers to measure and identify workforce diversity needs, interests, and linguistic capabilities at each PPS provider facility and participating CBO sites. Incorporating findings from the assessment, the Diversity and Inclusion Committee will be responsible for the development of policies and initiatives including training, testing and the qualification process for language access, health literacy, diversity and inclusion and cultural competency, continuing education workshops, and the distribution of materials for healthcare workers.

Further, cross cultural staff training programs will be developed specific to the needs of each site and the communities served. The SI PPS's PMO will provide appropriate support and resources to CBOs and other PPS partners to ensure that cultural competency /health literacy training does not create a significant burden for participating organizations and that staff are able to adopt established practices.

✓ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The SI PPS's overall success in reducing avoidable readmissions on Staten Island is directly related to engaging its diverse population. As such,

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

all workstreams must incorporate a cultural competency and health literacy component into all strategic plans and implementation steps. Therefore, the cultural competency and health literacy workstream is interdependent on several organizational workstreams, including governance, population health management, practitioner engagement, workforce, and individual project implementation.

Although the Diversity and Inclusion Committee has been assigned the primary role of developing and overseeing the implementation of the SI PPS's cultural competency and health literacy strategy, the development of the strategy will be highly dependent on the needs and plans identified by other workstreams. A large focus of the SI PPS's strategy will include developing training programs, in conjunction with the Workforce Implementation Team and Training Workgroup, and the practitioner engagement workstream, to ensure the SI PPS workforce is appropriately trained on cultural competency and health literacy to address health disparities. To support collaboration across workstreams, the Diversity and Inclusion Committee will work with project implementation teams, the Practitioner Engagement Workgroup, the Communications and Marketing Committee, the Workforce Committee (including its Training Workgroup), and the Clinical Committee in developing and implementing the strategy.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

☑ IPQR Module 4.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Director of Health Literacy, Diversity and Outreach	Celina Ramsey	Lead development, implementation, and oversight for the PPS's cultural competency/health literacy strategy and corresponding training strategy, focused on addressing the drivers of health disparities.
Diversity and Inclusion Committee	Visiting Nurse Service of New York Home Care, Bonnie Lauder; Community Health Center of Richmond, Christina Tavarez; Community Health Action of Staten Island, Dawn Littlejohn; Archcare, Michael Guglielmo and Jim Williams; Project Hospitality, Terry Troia; Richmond University Medical Center, Kelly Navarro; Bridge Back to Life, Everett Miller; Staten Island Care Center, Rafi Motichen; University Physicians Group, Kevin Leo; Coordinated Behavioral Care, Deeanan Dobrer; Richmond Center for Rehabilitation and Health Care, Philip Buchsbaum; YMCA of Greater NY Counseling Services, Regina Marks; Staten Island University Hospital, Patricia Muniz; Seaview Hospital Rehabilitation Center and Home, William Burfeind; Staten Island Pride Center, Ralph Vogel; Borough President's Office, Ginny Mantello; Make the Road, Rebecca Telzalk; Camelot Counseling, Logan Lewis and Doris Valentin; Beacon Community Health Center, David Kim; Clove Lakes Nursing Home, Lillian McCormick	Develop, implement and oversee the cultural competency/health literacy strategy and its corresponding training strategy focused on addressing the drivers of health disparities.
Communications and Marketing Committee	Staten Island University Hospital, John Demoleas and Maria Ksvan Jewish Community Center, David Sorkin; Amerigroup, Anthony Woods; Richmond University Medical Center, William Smith and Amanda LoMonaco; Staten Island Borough President's Office, Ginny Mantello; Staten Island Partnership for Community Wellness, Adrienne Abbate;	Develop, implement, and oversee the communication related to cultural competency/health literacy across the PPS network.
Director of Workforce/Human Resources	Bill Myhre	Coordinate with the Training Workgroup and Workforce Committee to develop a training plan for the PPS's diversity and inclusion strategy; Provide quarterly reports to the DOH regarding the

✓ IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Director of Health Literacy, Diversity and Outreach	Ensure the successful implementation of the SI PPS's cultural competency/health literacy strategy on a daily basis	Provide oversight for the PPS's cultural competency/health literacy strategy including daily operations.
Celina Ramsey, Diversity and Inclusion Committee Chair	Lead the Diversity & Inclusion Committee	Provide oversight and approval on the PPS's cultural competency/health literacy strategy
Jessica Steinhart, Director of Ambulatory Initiatives Victoria Njoku-Anokam, Director of Behavioral Health Initiatives Mary Han, Continuing Care Initiatives	Oversee the daily operations of the SI PPS	Provide oversight and leadership for the PPS's diversity and inclusion projects and its overall implementation plan deliverables that impact diversity and inclusion policies and initiatives.
PPS DSRIP Project Leads/Coordinator	Serve as a project champion and representative for the PPS partners involved in the DSRIP projects	Support diversity and inclusion initiatives and operation and coordinate with CBOs to collect feedback and insights.
PPS IT Department	Ensure the development of IT systems and processes	Support the IT-related requirements for diversity and inclusion initiatives.
Representatives from PPS Network Members	Represent providers within the PPS network	Provide expertise and input on diversity and inclusion initiatives.
CEOs of PPS Network Providers	Oversight from Network Providers	Oversee their organizations' execution of DSRIP responsibilities to contribute to the success of the diversity and inclusion initiatives and their related strategies.
Boards of Directors for PPS Network Partners	Oversight from Network Providers	Oversee their organizations' execution of DSRIP responsibilities to contribute to the success of the diversity and inclusion initiatives and their related strategies.
External Stakeholders		
David Sorkin, Jewish Community Center	Represent community based organizations	Provide input and feedback to support the diversity and inclusion initiatives.
Ginny Mantello, MD, Staten Island Borough President's Office, Health & Wellness Department	Represent community based organizations	Provide input and feedback to support the diversity and inclusion initiatives.
Gonazalo Mercado, Staten Island Immigrants Counsel	Represent community based organizations	Provide input and feedback to support the diversity and inclusion initiatives.
Dulce Chuva, El Centro Del Immigrante	Represent community based organizations	Provide input and feedback to support the diversity and inclusion initiatives.
Bobbi Digi, Island Voice	Represent community based organizations	Provide input and feedback to support the diversity and inclusion

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		initiatives.
1199 Training and Employment Fund	Workforce vendor	Support the implementation of the training strategy
Cyracom Bridging the Gap Entercomm	Language Specialists/Vendors	Provide language skills and translation services to support the diversity and inclusion strategy operation.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

The development of a shared IT infrastructure across the PPS network enables the SI PPS's cultural competency and health literacy workstream to establish two-way communication across the PPS network. It also provides a defined standard for cultural competency and health literacy training assessments and tools and easily identifies and monitors community-based interventions to reduce health disparities and improve outcomes across the SI PPS.

The SI PPS has appointed a Health Literacy, Diversity and Outreach Committee to be responsible for the development, implementation, and oversight of its cultural competency/health literacy strategy focused on addressing the drivers of health disparities across Staten Island. This committee works with the IT Systems and Processes workstream to develop two-way communication across the PPS network and ensures effective integration with all involved organizations including CBOs. The shared IT infrastructure will also be used to continuously track the population's needs as they change, to distribute cultural competency materials and resources across the SI PPS, and to track training as well as the use of resources.

Overall, the SI PPS plans to leverage this shared IT infrastructure as a tool to ensure standardization of best practices across the PPS network and to monitor the effectiveness of the SI PPS's cultural competency/health literacy strategy.

The following provides an overview of how the SI PPS will develop the IT infrastructure:

- Success of communication among different stakeholders in the various governance committees, including progress on milestones and provider level performance, is dependent on the implementation of a robust project management software that is delivered through a secure cloud-based server accessible by provider agencies and the SI PPS PMO. The SI PPS has implemented Performance Logic, to provide this support. This IT platform also allows governance committee members to have a two-way communication mechanism with the SI PPS PMO and providers, and will allow for ongoing performance monitoring or Domain 1 milestones, among others.
- SpectraMedix has been selected as the health IT vendor for SI PPS. SpectraMedix works collaboratively with the SI-PPS PMO, IT/Data Committee, and the work stream teams (i.e. Information Technology Systems & Processes, Performance Reporting, Clinical Integration, Population Health and Practitioner Engagement) to provide an IT foundation for a clinically integrated healthcare delivery system. Through their system, the PPS is able to geomap health disparities across Staten Island.
- The PPS is in the progress of building an Enterprise Data Warehouse that integrates NYS Medicaid attribution roster, claims data and pharmacy data.
- The PPS will promote and support integration of PPS partners into the RHIO (Healthix) through resource support and funds flow.
- The PPS has implemented a healthcare analytics platform within the secure private cloud hosting environment described above, which has allowed SI-PPS to have visibility into Performing Provider System performance and meet reporting requirements for the metrics associated with the System Transformation Projects (Domain 2), Clinical Improvement Projects (Domain 3) and Population-Wide Projects (Domain 4) that have

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

been selected by SI-PPS. This platform includes the following functions and dashboards for performance management and identifying opportunities for program improvement.

Further details are provided in the IT Systems and Processes Workstream.

IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

PPSs are required to provide quarterly progress updates on specific cultural competency and health literacy workstream milestones, as identified by DOH. These milestones include finalizing a cultural competency/health literacy strategy and developing a training strategy focused on addressing the drivers of health disparities.

The SI PPS will provide Board approved plans for the milestones prescribed by the DOH and will monitor the progress of the designated implementation plan steps for quarterly reporting to the DOH. The SI PPS has developed a detailed implementation plan with additional sub-steps under each milestone to capture the responsible resources for executing/coordinating the implementation of steps under each milestone as well as designated timeframe estimates. The SI PPS anticipates that the Health Literacy, Diversity and Outreach Committee, in collaboration with other committees and workgroups, will develop these implementation steps. The Diversity and Inclusion Committee will oversee progress reporting for their respective metrics as well as interpret PPS provider, CBO, and patient feedback received on the cultural competency/health literacy program through community and web-based forums. The PMO will implement as well as report on progress updates and changes to the DOH on a quarterly basis. To substantiate progress pre-milestone completion, the PPS will submit on a quarterly basis any templates that the IA identifies are necessary, such as the Meeting Template.

IPQR Module 4.9 - IA Monitoring

Section 05 – IT Systems and Processes

✔ IPQR Module 5.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	Completed	Detailed IT current state assessment. Relevant QEs (RHIOs/HIEs) should be involved in performing this assessment.	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	NO
Task Establish a Data/IT Committee.	Completed	Board of Managers establishes a Data/IT Committee, as part of the SI PPS's governance structure, ensuring representation from key stakeholders.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Establish a Data/IT governance structure.	Completed	Establish a Data/IT governance structure including identifying the role of the Data/IT Committee and Board in IT governance and decision making.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Perform an assessment of current IT systems and processes through interviews and participating provider surveys.	Completed	Senior Director of Enterprise Data & Analytics and PMO BI Analysts in conjunction with Data/IT Committee perform an assessment of current IT systems and processes through interviews and participating provider surveys. The assessment will identify IT capabilities as well as gaps for achieving clinical data sharing and interoperable systems including: 1. Review of electronic health records (EHR) including whether providers have an EHR have plans to implement an EHR. 2. Review of data sharing and interoperability capacity, level of integration with the RHIO. 3. Review of other IT capabilities, e.g. use of care management systems, population health capabilities, etc.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

✓ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The SI PPS's IT systems and processes workstream is interdependent with all other organizational workstreams, and serves as the foundation of a clinically integrated healthcare delivery system.

A shared IT infrastructure that is integrated across the PPS network will enable a defined, standardized, and automated internal and external performance reporting system. This permits the SI PPS to evaluate both the overall and individual PPS provider performance progress and facilitate the ability for rapid cycle evaluation to adjust strategies and support providers as needed. Further, the ability to synthesize data into dashboards from management decision making and reporting while leveraging IT infrastructure to reduce paperwork and workflow inefficiency is a key driver for the SI PPS's success.

Further, clinical integration including sharing clinical and other data amongst providers, as well as coordinating and streamlining transitions of care through data exchange, is highly dependent on the SI PPS's IT systems and processes workstream.

Engaging practitioners in the implementation of evidence-based practices and protocols for DSRIP projects, the integration of care teams, and the proactive monitoring of patients will only be possible if practitioners are provided access to real-time data and notifications from across the PPS network. In doing so, the SI PPS plans to enable proper patient management.

Population Health Management, including the ability to perform population wide analytics and risk stratification to proactively identify patients and prioritize interventions will be dependent on the IT systems in place and in use by the SI PPS and the availability of Medicaid claims and other data. Additionally a population health focused strategy will be strengthened by patient portals and other technology that permits patients to proactively manage their own healthcare including scheduling appointments, receiving reminders regarding preventive care and prescription refills, and emailing with providers.

The SI PPS also recognizes that the workforce workstream is highly dependent on the IT systems and processes workstream as the development of workforce training around IT systems, data sharing and security, IT change management, among others, will be critical for the successful implementation of policies and procedures.

The SI PPS Data/IT Committee has been assigned the primary role of developing and overseeing the implementation of the IT change management strategy, clinical data sharing and interoperable systems roadmap, engagement of attributed members in qualifying entities, and data security and confidentiality plan. However, it is expected that all SI PPS committees will collaborate and provide feedback and inputs in the development of these plans to the Data/IT Committee. This will enable coordination across the various workstreams. For example, members from the Clinical Committee, Population Health Management Workgroup, Clinical Integration Workgroup, and Practitioner Engagement Workgroup will be assigned to inform and advise the Data/IT Committee in the development of clinical data sharing and interoperable systems roadmap.

✓ IPQR Module 5.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director	Joseph Conte	Provide oversight and support for the implementation of IT Systems and processes workstream.
Senior Director of Enterprise Data & Analytics	Anyi Chen	Provide oversight and support for the implementation and monitoring of IT related projects and for the overall IT change management and data sharing/system interface.
Business Intelligence Analyst	Vitaly Druker	Support the analysis of data warehousing health, data analysis and programming.
Staff Analyst	Diana Kohlberg	Support the collection and reporting of data/IT reporting standards.
Board of Managers	Members of the Board	Provide overall governance and oversight over IT change management in conjunction with the Data/IT Committee.
Data/IT Committee	Beacon Christian Community Health Center, Philip Juliano; Community Health Action of Staten Island, Joshua Sippen; Community Health Center of Richmond, Monique Welbeck; Eger Health and Rehabilitation Center, Debra Alexander; Healthix, Todd Rogow; Richmond University Medical Center, Nancy Taranto; Saint Joseph's Medical Center, Elizabeth Woods; Staten Island University Hospital, Kathy Kania; University Physicians Group, Kevin Leo; Victory Internal Medicine, David Wortman; Community Health Action of Staten Island, John Mastellone; North Shore LIJ Care Solutions, Mohamed Humaid; Richmond University Medical Center, Apurvi Mehta; Visiting Nursing Services of New York, Timothy Peng	Provide overall governance and oversight over IT change management in conjunction with the PPS Board. Develop, implement, and oversee the integration of IT infrastructure, adherence to data collection and retention policies, and data privacy/security.
Compliance Director	Regina Bergren	Advise in the development of data sharing policies and procedures as well as drafting of data exchange agreements.
Clinical Director	Salvatore Volpe, MD	Support the clinical data sharing assessment and implementation plan with the Data/IT Committee
Training Lead	Vitaly Druker	Support education and training plans resulting from IT Change Management and infrastructure re-engineering.
Data Security Workgroup	Staten Island Performing Provider System, Anyi Chen, Salvatore Volpe, MD, Vitaly Druker, Mark Slavutsky; Spectramedix, Kenneth	Advise in development of security protocol and ensure that ePHI is being stored and managed securely.

☑ IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CIO's of PPS Co-Lead Hospitals: Kathy Kania, Site CIO, SIUH Nancy Taranto, VP of Quality and Health Informatics, RUMC	Oversee IT related projects	Provide the PMO with oversight and leadership for IT related projects and for the overall IT change management and data sharing/ system interface.
Communication and Marketing Committee: Fidelis, TBD; Jewish Community Center, David Sorkin; NAMI Staten Island, Linda Wilson; Richmond University Medical Center, William Smith; Staten Island Borough President's Office, Ginny Mantello; Staten Island Partnership for Community Wellness, Adrienne Abbate; Staten Island University Hospital, John Demoleas	Support development of marketing and communication strategies for the PPS	Support the Data/IT Committee in the design of a patient engagement and communication strategy around the implementation of the IT workstream.
Diversity and Inclusion Committee: El Centro Del Immigrante, Dulce Chuva; Make the Road New York, Rebecca Telzak; Mt. Sinai United Christian Church, Rev. Dr. Victor Brown; Port Richmond High School, TBD; Project Hospitality, Terry Troia; Richmond University Medical Center, Kelly Navoor; Stapleton UAME Church, Rev. Maggie Howard; Staten Island Immigrants Counsel, Gonazalo Mercado; Staten Island University Hospital, Celina Ramsey	Support development of diversity and inclusion strategies for the PPS	Support the Data/IT Committee in the design of a patient engagement and communication strategy around the implementation of the IT workstream.
Workforce Committee: Carmel Richmond Healthcare and Rehabilitation, Mary-Beth Francis; Community Health Center of Richmond, Christina	Support development of workforce training strategies for the PPS	Support the Data/IT Committee in the development of training materials around the IT workstream as well as identified IT workforce requirements.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Tavarez; Federation of Teachers, Ann Goldman; New York State Nurse Association, Julie Semente; Richmond University Medical Center, Pat Caldari ; Staten Island Mental Health, Rose Marie Belfini Staten Island University Hospital, Margaret Dialto 1199SEIU, Allison Cohen; 1199SEIU Training & Employment Fund, Eloisa Pelaez and Rebecca Hall		
Key PPS Provider Stakeholders	Provide input in the development of PPS strategies	Review assessment findings and provide input in the development of IT integration strategies.
Internal Audit	Ensure PPS compliance	Assess data security and confidentiality.
CEOs of PPS Network Providers	Oversight party from Network Providers	Oversee their organizations' execution of DSRIP responsibilities and contribute to the success of the IT system integration operation and related strategies.
IT Directors of PPS Network Providers	Oversight party from Network Providers	Serve as the primary contact for the PPS Lead IT function for conducting DSRIP related business and oversee their organizations' execution of DSRIP related IT responsibilities and participation in IT related strategies.
Boards of Directors for PPS Network Partners: Donna Proske, Staten Island University Hospital Tom Reca, Staten Island University Hospital Nicholas Caruselle, Staten Island University Hospital Dr. Matthew Weeks, Staten Island University Hospital Daniel Messina, Richmond University Medical Center Rosemarie Stazzone, Richmond University Medical Center Robert Ren, Richmond University Medical Center Dr. Peter Stathopoulos, Richmond University Medical Center	Oversight party from Network Providers	Oversee their organizations' execution of DSRIP responsibilities and contribute to the success of the IT system integration operation and related strategies.
External Stakeholders		
North Shore -LIJ CIO	Oversight and input on IT implementation	Provide input to the IT Director regarding overall IT implementation and achievement of clinical interoperability across the SI PPS.
Staten Island RHIO (Healthix)	IT Infrastructure Provider	Maintain the Healthix system and provide input in development of clinical integration strategies.
NYS DOH	Define data security and confidentiality standards	Define and administer data security and confidentiality

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		requirements and reporting.
IT Consulting firm	Support IT functions	Support IT infrastructure re-engineering, IT change management, and system maintenance.
Attorneys	Legal Assistance	Draft data exchange agreements.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The New York State DOH milestones related to IT systems and processes workstream include performing a current state assessment of IT capabilities across the network; developing an IT change management strategy; developing a roadmap to achieve clinical data sharing and interoperable systems across the SI PPS network; developing a plan for engaging attributed members in qualifying entities; and developing a data security and confidentiality plan.

To ensure that the milestones outlined above are effectively executed and implemented, the SI PPS has developed performance reporting measures to not only measure individual PPS providers but the SI PPS as a whole. The SI PPS plans to leverage data received from the DOH including Salient data and the MAPP tool to benchmark the PPS's performance against other PPSs within the State. Further, the SI PPS plans to conduct ongoing assessments to measure the SI PPS's effectiveness in achieving patient engagement techniques such as establishing two-way communication between the SI PPS and the community.

Through its Compliance and Data/IT Committees, the SI PPS will monitor PPS provider engagement in data exchange policies and procedures, ensure that all PPS providers sign data exchange agreements, and oversee the design of reporting metrics as well as conduct ongoing testing of IT controls to ensure data security. The Project Management Office (PMO) will work with the IT systems and processes workstream to implement standardized dashboards for the collection and reporting of progress as it relates to workplan implementation and milestones for reporting progress and risks for internal updates to relevant governance committees including, but not limited to, the following:

1. Implementation of electronic health records for PPS partners as well as meaningful use standards.
2. Progress around PCMH 2014 NCQA standards at participating primary care provider sites.
3. Patient engagement and communication plan.
4. Integration into the RHIO.

Further, with regard to any vendor relationships that the SI PPS utilizes for the implementation of the IT systems and processes workstream, the SI PPS will develop formal agreements that will address a commitment to meeting and reporting on key milestones and implementation steps.

IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The SI PPS performance reporting workstream is interdependent on several organizational workstreams, specifically population health management, practitioner engagement, IT systems and processes, clinical integration, and individual project implementation. As such, all workstreams must incorporate a performance reporting component within their strategic plans and implementation steps.

IT System and Processes: A shared IT infrastructure that is integrated across the PPS network will be the foundation of a defined, standardized, and automated internal and external performance reporting system. An analytics portal built for performance reporting will support reporting of project specific process metrics and outcome metrics for use in rapid cycle evaluation and reporting to DOH as well as to internal and external stakeholders.

Financial Sustainability and Funds Flow: The performance reporting workstream will be dependent on the finance workstream as to identify key financial data points to be collected and reported on an ongoing basis to monitor financially fragile providers as well as measure provider performance in meeting key milestones and performance metrics for funds flow purposes.

Project Implementation and Practitioner Engagement: Project implementation teams will be highly dependent on the information collected and reported through the performance reporting workstream to perform rapid cycle evaluation, gauge practitioner performance and overall project performance. This includes meeting outcome and process metrics and engaging underperforming or high performing providers in necessary training and learning collaboratives.

The SI PPS will designate a Performance Reporting Workgroup to serve in the primary role of developing and overseeing the implementation of the performance reporting strategy that includes establishing a reporting structure for SI PPS performance reporting and communication as well as training programs for organizations and providers throughout the PPS network. Additionally, other SI PPS committees will collaborate and provide feedback and inputs to the Performance Reporting Workgroup. This will enable coordination across the various workstreams.

IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The SI PPS performance reporting workstream is interdependent on several organizational workstreams, specifically population health management, practitioner engagement, IT systems and processes, clinical integration, and individual project implementation. As such, all workstreams must incorporate a performance reporting component within their strategic plans and implementation steps.

✓ IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director	Joseph Conte	Support the development and implementation of the performance reporting workstream.
Performance Reporting Workgroup (1 of 2)	Anyi Chen, SI PPS; Irene Frohlich, SI PPS; Salvatore Volpe, MD, SI PPS; Vitaly Druker, SI PPS; Rick Olsen, SI PPS; Lashana Lewis, SI PPS; Joseph Conte, SI PPS; Kenneth Atlee, SpectraMedix; Jeffrey Phruksaraj, Performance Logic; Diana Kohlberg, SI PPS; Elizabeth Wolff, MD, Richmond University Medical Center; Ariel Hayes, North Shore LIJ Care Solutions; Catherine Shih, North Shore LIJ; Dina Wong, SIUH; Kristin Derespinis, SIUH; David Kim, Beacon Christian Community Health Center; Janet Kim, Beacon Christian Community Health Center; Diane Arneth, Community Health Action of Staten Island; Benny Lindo, Community Health Center of Richmond; David Rose, Eger Healthcare and Rehabilitation Center; David Wortman, Victory Internal Medicine; John Schafer, University Physicians Group ; Kristen Derespinis, Staten Island University Hospital; Jenny Palaguachi, Community Health Center of Richmond; John Mastellone, Community Health Action of Staten Island;	Develop, implement, and oversee performance reporting processes.
Performance Reporting Workgroup (2 of 2)	Marty Piccochi, Coordinated Behavioral Care; Logan Lewis, Camelot of Staten Island; Kevin Leo, University Physicians Group; Tim Peng, Visiting Nurse Services of New York; Rosemarie Santoro, Victory Internal Medicine; Jessica Steinhart, SI PPS; Bill Leo, Beacon Christian Community Health Center	Develop, implement, and oversee performance reporting processes.
Senior Director of Enterprise Data & Analytics	Anyi Chen	Responsible for establishing and maintaining a performance reporting system and performance data collection system.
PPS Project Director – Reporting	Irene Frohlich	Support the overall performance reporting function of the PPS.
Data Analysts	Vitaly Druker Diana Kohlberg	Support data collection and analysis for performance reporting.
Finance Committee	Beacon Christian Community Health Center, David Kim; Community Health Center of Richmond, Benny Lindo; Eger Health and Rehabilitation Center, Gary de Leeiwek;	Identify metrics to be collected and reported to monitor financial sustainability. Utilize performance reports to monitor PPS provider performance in various projects for funds flow purposes.

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

A shared IT infrastructure that is integrated across the PPS network will enable a defined, standardized, and automated internal and external performance reporting system. This allows the SI PPS to evaluate both the overall and individual PPS provider performance progress and the ability for rapid cycle evaluation to adjust strategies and support providers as needed.

The SI PPS established a Performance Reporting Workgroup to be responsible for the development of a performance reporting structure. This workgroup will collaborate with the IT Systems and Processes workstream to develop the necessary IT design systems and protocols needed for a shared IT infrastructure that will facilitate the implementation of performance reporting across the PPS network. Additionally, shared IT infrastructure has been utilized in the disbursement of performance reporting training tools to ensure standardization across the PPS network. The SI PPS plans to utilize the RHIO (Healthix) to integrate health information between partners. The SI PPS might use additional data analytics IT platforms to support the analysis and reporting of data for this workstream.

The following provides an overview of the IT infrastructure being planned and implemented across the PPS.

Phase 0 - Partnership with 3rd party vendor

o SpectraMedix has been selected as the health IT vendor for SI PPS. SpectraMedix works collaboratively with the SI-PPS PMO, IT/Data Committee, and the work stream teams (i.e. Information Technology Systems & Data Integration, Performance Reporting, Clinical Integration, Population Health and Practitioner Engagement) to provide a solid IT foundation for a clinically integrated healthcare delivery system in a timely, efficient and cost effective manner.

Phase 1 - Build/Implement Enterprise Data Warehouse

o In the process of building an Enterprise Data Warehouse that integrates NYS Medicaid attribution roaster, claims data and pharmacy data.
o Develop a patient-centered Clinical Data Repository for storing all Member demographic, clinical, claims and survey data for the attributed SI-PPS Medicaid population, thus creating a longitudinal patient record.

Phase 2 - Data Integration / Health Information Exchange platform

o Promote and support integration of PPS partners into the Staten RHIO (Healthix) through resource support and funds flow
o Import clinical data from the Staten Island RHIO (Healthix) and/or SI-PPS participating providers' EHR systems, using CCD/C-CDA data files collected via secure DIRECT protocol, or other standard HL7 or proprietary interfaces and APIs
o Share patient care management information with the SI-PPS Care Management system (pending) and participating providers' care management systems

Phase 3 – Healthcare Analytics platform

o Implement a healthcare analytics platform within the secure private cloud hosting environment deployed in Phase 1, which will allow SI-PPS to have visibility into Performing Provider System performance and to meet reporting requirements for the metrics associated with the System Transformation Projects (Domain 2), Clinical Improvement Projects (Domain 3) and Population-Wide Projects (Domain 4) that have been selected by SI-PPS. This platform will include the following functions:

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

- Ad hoc Reporting and Dashboard tools for quick data visualization and knowledge discovery
- Population health intelligence and management tool to identify high risk populations, disease registries, gaps in care and predictive modeling for advanced analytics.
- Measures Framework to track and monitor custom DSRIP-specific measures to obtain optimal outcomes
- Role-based dashboards for performance management and identifying opportunities for program improvement.

IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The SI PPS will provide Board approved plans for the milestones that the DOH has specified. The milestones related to performance reporting include performing a current state assessment of IT capabilities across the network; establishing a reporting structure for PPS-wide performance reporting and communication, and developing a training program for organizations and individuals throughout the network that is focused on clinical quality and performance reporting. The SI PPS will monitor the progress of the designated implementation plan steps to report to the DOH on a quarterly basis.

The SI PPS has developed a detailed implementation plan for each DSRIP milestone that captures the responsible resources to execute/coordinate the implementation of the steps under each milestone as well as estimated completion dates and time durations to complete the steps. The SI PPS anticipates that the Clinical, Data/IT, and Finance Committees, in collaboration with other committees and workgroups, will oversee the successful implementation of the steps for this workstream. The Clinical and Finance Committees will oversee the progress reporting for their respective metrics.

The PMO will implement a standardized dashboard for the collection and reporting of SI PPS progress as it relates to workplan implementation and milestones for reporting progress and risks for internal updates to relevant governance committees as well as for quarterly progress reports to the DOH. SI PPS governance committees will utilize performance dashboards to monitor progress by provider and identify issues requiring additional attention or resources, as well as to reward/sanction providers.

If the SI PPS is utilizing vendor relationships for the implementation of the performance workstream, all formal agreements will include a commitment to meeting and reporting on key milestones and implementation steps.

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The Staten Island Performing Provider System, LLC (SI PPS) has identified several risks in implementing an effective practitioner communication and engagement plan as well as training/education programs to achieve and maintain practitioner engagement, participation, and buy-in for the DSRIP program.

1. The SI PPS views the diversity of provider types across the SI PPS with regards to developing an effective practitioner communication and engagement strategy as an implementation risk.
2. The SI PPS believes another risk to ensuring practitioner engagement is not being able to engage leaders among practitioner groups capable of reaching a diverse group of practitioners from across competitive organizations.
3. Staff turnover will also present an issue to ensuring new staff are continuously educated on information necessary for meeting DSRIP goals; as well as the time required on the part of practitioners to participate in related training programs and other activities related to meeting DSRIP goals and reporting requirements.

To mitigate these risks, the SI PPS plans to identify a "Champion" or "Lead" from each key practitioner group to provide input regarding the needs of all PPS provider types for the development of the SI PPS's strategy to engage practitioners as well as administer training/education programs. The SI PPS will also develop a Practitioner Communication and Engagement Workgroup made up of key practitioner stakeholders to develop a practitioner engagement plan that includes the development of provider accountability measures for realizing outcomes. Practitioners will also hold key positions in governance committees including the Clinical Committees and subcommittees to ensure practitioner buy-in. The SI PPS will make every effort to ensure physician alignment by creating a funds flow model that emphasizes bonus payments to incentivize practitioner participation in DSRIP programs, DSRIP related training as well as to meeting process and outcome measures. To address staff turnover or the hiring/recruitment of new staff, training/education sessions will be ongoing throughout the five year DSRIP program.

Finally, through the practitioner communication plan, the SI PPS plans to leverage the Communications and Marketing Committee to develop resources including presentations, handouts, online forums and web-based tools to ensure that information outside of the training/education program is readily available to PPS providers. In doing so, the SI PPS will ensure that PPS providers clearly understand their roles, the complex DSRIP requirements, and are supported through SI PPS resources.

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

The SI PPS recognizes that the practitioner engagement workstream is interdependent with all other organizational workstreams as practitioner engagement is a fundamental component of the successful implementation of the DSRIP program and meeting DSRIP goals.

In order for the SI PPS to achieve effective practitioner engagement, PPS practitioners must drive the development of clinical best practices and protocols as well as the population health strategy in conjunction with project implementation teams and clinical governance. PPS practitioners will drive the development of training programs in coordination with the Workforce Committee, Workforce Implementation Team/Training Workgroup. PPS practitioners must also be fully engaged in the performance reporting process including the development of key metrics to be used in the assessment of practitioner performance and overall PPS performance, and practitioners across the PPS must be trained in the performance reporting processes and timelines. The practitioner engagement strategy must also be aligned with and include a focus on clinical integration and the IT systems and processes. PPS practitioners must be fully educated in the overall network IT strategy and infrastructure to achieve clinical integration as well as the clinical data to be shared throughout the network.

Based on this understanding of the interdependencies of practitioner engagement among all workstreams, the SI PPS will seek valuable practitioner input across each of the organizational workstreams and will appoint practitioner representatives to key governance committees.

✓ IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Practitioner Engagement & Communication Workgroup	Jason Marino, Oceanbreeze Pharmacy; Boris Natenzon, Nate's Pharmacy; Amanda Wexler, YMCA; Laura Novacek, Project Hospitality; Denise Fazio, Carmel Richmond Healthcare and Rehabilitation Center; Salvatore Volpe, MD, SI PPS; Shye Wortman, Victory Internal Medicine; Phillip Leo, University Physicians Group; David Kim, Beacon Christian Community Health Center; Ginny Mantello, MD, Borough President's Office; Eileen Driscoll, Eger Lutheran Homes and Services; Mary Mangle, ArchCare HomeCare; Kate Lynn Chimienti, SI PPS; Steven Cottone, SI PPS	Develop and implement the practitioner communication and engagement plan.
PPS Chief Medical Officer	Salvatore Volpe, MD	Advise on the development of a practitioner communication and engagement plan.
Workforce/Human Resources Director	Bill Myhre	Responsible for the implementation and monitoring of various workforce initiatives.
Key Practitioner Groups	Theodore Strange, MD, United Physicians Group; David Wortman, Victory Internal Medicine	Assist in the development of the practitioner communication and engagement plan by participating in interviews, surveys and other information collecting methods.
Communications and Marketing Committee	Fidelis, TBD; Jewish Community Center, David Sorkin; NAMI Staten Island, Linda Wilson; Richmond University Medical Center, William Smith; Staten Island Borough President's Office, Ginny Mantello; Staten Island Partnership for Community Wellness, Adrienne Abbate; Staten Island University Hospital, John Demoleas	Oversee the development and implementation of the practitioner engagement communications strategies including developing training resources and materials, holding public forums, and releasing/drafting announcements, among other communication methods.
Workforce Committee	Carmel Richmond Healthcare and Rehabilitation, Mary-Beth Francis; Community Health Center of Richmond, Christina Tavarez; Federation of Teachers, Ann Goldman; New York State Nurse Association, Julie Semente; Richmond University Medical Center, Pat Caldari; Staten Island Mental Health, Rose Marie Belfini	Identify and work with key practitioner "Champions" or "Leads" to assist in the development of a training/education plan for practitioners.

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Irene Frohlich, Director of Project Management Jessica Steinhart, Director of Ambulatory Initiatives Victoria Njoku-Anokam, Director of Behavioral Health Initiatives Mary Han, Assistant Director of Continuing Care Initiatives Anyi Chen, Senior Director of Enterprise Data & Analytics Salvatore Volpe, MD, Chief Medical Officer Diana Kohlberg, Staff Analyst Kate Lynn Chimienti, Staff Analyst	Project Management Office	Provide oversight, leadership, and implementation support for practitioner engagement related projects and for the overall implementation plan deliverables that impact practitioner engagement reporting.
PPS Practitioners	Practitioners involved in the DSRIP program	Provide oversight, leadership, and implementation support for practitioner engagement related projects and for the overall implementation plan deliverables that impact practitioner engagement reporting. Provide input in the development of the practitioner engagement plan and strategy.
Anyi Chen	Senior Director of Enterprise Data & Analytics	Provide IT related requirements for practitioner engagement and develop, launch and maintain electronic survey tools.
Workforce Committee Chair	PPS Workforce Committee	Provide board level oversight and responsibility for the PPS workforce function to efficiently and effectively engage practitioners.
Richard Olsen, Finance Director	Develop funds flow and incentive payments model	Develop and describe the funds flow and incentive payments model for inclusion in training/education programs for participating practitioners.
Celina Ramsey Diversity & Inclusion Committee Chair	Develop a cultural competency and health literacy program.	Develop and describe the SI PPS's cultural competency and health literacy program as well as available resources for inclusion in the training/education program for practitioner engagement. Provide board level oversight and responsibility for the PPS diversity and inclusion function to efficiently and effectively engage practitioners.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
David Kim, MD Steering Committee Chair	PPS Steering Committee	Provide board level oversight and responsibility for the practitioner engagement strategy.
CEOs of PPS Network Partners	Oversight from Network Providers	Oversee their organizations' execution of DSRIP responsibilities and contribute to the success of their practitioner engagement and communication strategy.
Boards of Directors for PPS Network Partners	Oversight from Network Providers	Oversee their organizations' execution of DSRIP responsibilities and contribute to the success of their practitioner engagement and communication strategy.
External Stakeholders		
Rebecca Hall	1199 Training & Employment Funds	Provide training to practitioners.
Medical Society of the State of New York (MSSNY), New York State Society of Physician Assistants, Nurse Practitioner Association (Staten Island Chapter), Pharmacist Society of the State of New York (PSSNY)	Practitioner representative groups	Provide input on practitioner engagement strategies.
Eliza Carboni	New York State Nurses Association (NYSNA)	Provide input on practitioner engagement strategies.
Ann Goldman	Federation of Nurses, UFT	Provide input on practitioner engagement strategies.
President	Richmond County Medical Society	Provide input from community physicians on the development of a practitioner engagement strategy.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Practitioners will be engaged in the development of the IT Systems and Processes and Clinical Integration workstreams.

The ability to integrate systems (through use of the RHIO (Healthix) and other mechanisms) and aggregate data across multiple sites of care to allow providers access to key data is critical to driving the appropriate utilization of care and resources across the SI PPS. The use of integrated care teams and the proactive monitoring of patients will only be possible if practitioners are provided access to real-time data and notifications from across the PPS network to enable proper patient management.

Implementation of PCMH 2014 NCQA standards and meaningful use at participating practice sites is a requirement of multiple DSRIP projects and will be dependent on practitioner's engagement and implementation of the overall IT strategy.

Further a shared IT infrastructure that expands across the PPS network will enable the Practitioner Engagement workstream to develop standard performance reports to be distributed to professional groups and make practitioner training available and accessible across the SI PPS.

The Clinical Committee, in conjunction with other governance committees and project implementation teams, will develop standard performance reports, workflows, and training materials and will collaborate with the Data/IT Committee to translate these standard performance reports into the shared IT infrastructure to make them readily available and accessible across the PPS network. Additionally, the shared IT infrastructure will be utilized for the disbursement of practitioner training programs and tools to ensure standardization across the PPS network.

✓ IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The SI PPS has developed a detailed implementation plan with additional steps under each milestone, as designated by the DOH, that captures the responsible resources to execute/coordinate the implementation of the steps under each practitioner engagement and communication milestone as well as designated timeframe estimates to complete the steps. The DOH designated milestones related to the practitioner engagement and communication workstream include developing a practitioner communication and engagement plan and developing training/education plans targeting practitioners/other professional groups to educate them on DSRIP and the SI PPS's quality improvement

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

agenda.

The SI PPS will provide the Board approved plans for the milestones listed above to the DOH and will monitor the progress of the designated implementation plan steps to report to the DOH on a quarterly basis. The SI PPS anticipates that the Clinical and Communication & Marketing Committees, in collaboration with other committees and workgroups, will monitor the implementation of the plans. The Clinical Committee will also oversee the progress reporting of practitioners and will work with the Practitioner Engagement and Communication Workgroup to engage and communicate to PPS practitioners on progress updates and key issues identified through internal performance reports. The PMO will implement a standardized dashboard for the collection and reporting of progress as it relates to workplan implementation and milestones for reporting progress and risks for internal updates to relevant governance committees as well as for quarterly progress reports to the DOH and standard performance reports to professional groups.

Section 08 – Population Health Management

✓ IPQR Module 8.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Develop population health management roadmap.	Completed	Population health roadmap, signed off by PPS Board, including: -- The IT infrastructure required to support a population health management approach -- Your overarching plans for achieving PCMH 2014 Level 3 certification in relevant provider organizations --Defined priority target populations and define plans for addressing their health disparities.	07/01/2015	03/31/2016	07/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task Assemble Population Health Management Workgroup	Completed	Assemble a Population Health Management Workgroup that will be made up of members from the other committees, including the Clinical Committee.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Population Health Management Workgroup develops population health strategy	Completed	Executive Director, in conjunction with the Population Health Management Workgroup schedules and holds periodic meetings to conceptualize a population health strategy including how patients will flow in the care delivery system and identify the critical decision points.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Identify infrastructure and IT needs to implement population health management approach	Completed	Senior Director of Enterprise Data and Analytics and Executive Director as part of the population health strategy, Population Health Management Workgroup identifies infrastructure (e.g. workforce) and IT needs to implement a population health management approach for the SI PPS population including risk stratification capabilities.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Develop approach and timeline for utilization of Enterprise Data Warehouse (EDW)	Completed	As part of an overall IT systems and process strategy, Senior Director of Enterprise Data and Analytics and Executive Director, develops an approach and timeline for the utilization of an EDW that can aggregate and store data in one location	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

The Staten Island Performing Provider System, LLC (SI PPS) anticipates the following key challenges in implementing a population health management roadmap and PPS-wide bed reduction plan:

1. The SI PPS views the ability to operationalize a fully integrated IT platform with population health analytics capabilities including the ability to identify and proactively engage at risk patients in a timely manner as a key challenge to developing a population health roadmap as well as the reducing inappropriate hospital use. The SI PPS plans to utilize the Staten Island RHIO's (Healthix) infrastructure through an integrated IT platform to allow PPS partners to access/exchange relevant patient information in real-time. The results of the high-level IT assessment that SI PPS performed during the DSRIP planning phase indicated that a subset of PPS providers do not have EMR systems, while other PPS providers participate in Healthix in some capacity. The SI PPS is concerned that there will be delays in integrating the non-EMR providers into the IT infrastructure which could potentially delay standardizing clinical health data and performance measures across the SI PPS. The SI PPS anticipates that there will be a ramp up period for PPS providers in order to implement a shared IT infrastructure and will include this consideration in the development of the implementation plan. The SI PPS PMO facilitated the distribution and collection of interim reporting tools to the non-EMR providers until they are fully integrated into the SI PPS's IT infrastructure. IT support and training programs have been made available to PPS providers through each roll-out phase of the IT integration process including population health management and tools.
2. The SI PPS requires timely access to Medicaid claims data in order to enable population health analytics including risk stratification to begin the identification and management of high risk patients in Demonstration Year (DY) 1. To address this challenge, the SI PPS is implementing interim strategies into place which include generating an Enterprise Data Warehouse (EDW) with multiple data sources.
3. The SI PPS has included in its CRFP grant funding for IT projects related to population health IT capabilities and analytics. If the PPS partners do not receive the requested funding, this will impact the PPS's ability to implement IT interoperability. The SI PPS capital projects aimed at expanding outpatient capacity in its capital grant submission to further mitigate this risk were funded at well below the anticipated levels. Should another round of funding may be made available, new projects will be submitted.
4. Although a number of participating primary care providers have implemented or are in the process of implementing PCMH 2014 Level 3 standards, there are a number of providers that are early on in this process and will require additional support and time to meet PCMH standards. The timeline associated with meeting PCMH has been taken into account in developing project implementation timelines. The SI PPS developed a strategy to support providers as needed by providing training. Executing contracts for primary care partners to create a roadmap for PCHM 2014 Level 3 by March 2018.

✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The SI PPS's population health management workstream is interdependent with other organizational workstreams and serves as the DSRIP program's goals of reducing avoidable hospital use, shifting care to the community, and strengthening preventative care and appropriate utilization of services.

Population health management including the ability to perform population wide analytics and risk stratification to proactively identify patients and prioritize interventions will be dependent on the IT systems that are in place and used by the SI PPS as well as the availability of Medicaid claims and other data. Additionally, the population health strategy will be strengthened through patient portals and other technology that allows patients to proactively manage their own healthcare including scheduling appointments, receiving reminders regarding preventive care and prescription refills, and emailing with providers.

The PPS-wide bed reduction plan will be highly interdependent on the workforce workstream due to its impact on the workforce and the requirement for retraining, redeployment, and new hires.

Practitioners will be fully engaged in the development of the population health management strategy and implementation. Further, the practitioner engagement training strategy will include key components of the population health roadmap including understanding the IT infrastructure approach to population health, and the PPS approach and timeline for meeting PCMH 2014 Level 3 across participating providers.

The clinical integration strategy including the sharing of clinical and performance data is a foundation and driver of the SI PPS's population health strategy. Without appropriate information to manage the patient as a whole, rather than in silos, the SI PPS will not be able to achieve the desired population health outcomes.

The SI PPS Population Health Management Workgroup has been assigned the primary role of developing and overseeing the implementation of the population health management strategy as well as the PPS-wide bed reduction plan. However, it is expected that all SI PPS committees will collaborate and provide feedback on the development of these plans. This will enable coordination across various workstreams. For example, members from the Clinical Committee, Data/IT Committee, Clinical Integration Workgroup, and Practitioner Engagement Workgroup will be asked to inform and advise on Population Health Management Workgroup to facilitate the development of a strategy that achieves DSRIP program objectives.

✓ IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director	Joseph Conte	Oversee the day-to-day operations for the population health management strategy and bed reduction strategy.
Population Health Management Workgroup	Joseph Conte, SIPPS; Salvatore Volpe, MD, SIPPS; Gregory Pedro, DMD, SIPPS; Diana Kohlberg, SIPPS; Kris Smith, MD, Wagner College; Pat Tooker, Wagner College; Ginny Mantello, MD, Staten Island Borough President's Office; Sara Warren Gardener, Fund for Public Health in NY; Ning Jackie Zhang, MD, Seton Hall University; David Ackman, MD, Empire Blue Cross/Blue Shield Health Plus; Rajan Kumar, SpectraMedix; Jessica Steinhart, SIPPS; Victoria Njoku-Anokam, SIPPS	Develop a population health roadmap based on, but not limited to, the assessment of current infrastructure and IT needs, population health analytics, and clinical risk interventions.
Director of Ambulatory Initiatives, Chair of PCMH Workgroup	Jessica Steinhart	Support the development of the PCMH roadmap
Bed Reduction Workgroup	Salvatore Volpe, MD, SIPPS; Joseph Conte, SIPPS; Diana Kohlberg, SIPPS; Elizabeth Wolff, MD, Richmond University Medical Center; Brahimn Ardolic, MD, Staten Island University Hospital; Mansoor Khan, MD, Richmond University Medical Center; Sundee Naing, MD Richmond University Medical Center; Lori Howe, Richmond University Medical Center; Robert Blake, Staten Island University Hospital; Kristen Mouton, Staten Island University Hospital; Tom Reca, Staten Island University Hospital; Apurvi Mehta, Richmond University Medical Center	Develop a bed reduction plan based on, but not limited to, the assessment of outpatient expansion capability, inpatient admission/ER visits reduction, and current patient flow processes.
Chief Medical Officer	Salvatore Volpe, MD	Oversee the day-to-day clinical aspect of population health management implementation and operations.
Finance Director	Rick Olsen	Oversee the day-to-day finance aspect of population health management implementation and operations.
Senior Director of Enterprise Data & Analytics	Anyi Chen	Oversee the day-to-day data/IT population health management implementation and operations.
Compliance Officer	Regina Bergren	Oversee the day-to-day compliance aspect of population health management implementation and operations.
Data Analysts	Vitaly Druker Diana Kohlberg	Support population health management data/IT functions of the PPS.
Population Health Improvement Project (PHIP)	Patricia Mullen, MD, Island Medical Practice; Usha Thomas, MD,	Discuss a strategy to improve population health management and

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

The SI PPS has identified the following IT infrastructure elements that are required to support population health management capabilities:

1. A robust Health Information Exchange that allows providers to exchange clinical data for use in patient treatment and coordination of care.
2. Patient registries that are both project-specific and for use in the overall DSRIP program.
3. A patient portal that allows patients to begin to proactively manage their own healthcare including scheduling appointments, receiving reminders regarding preventive care and prescription refills, and emailing with providers.
4. Day-to-day care management capabilities.
5. An analytics portal to allow for the reporting of project specific process metrics and outcome metrics for use in rapid cycle evaluation and reporting to the State.
6. The ability to perform population wide analytics and risk stratification to proactively identify patients and prioritize interventions.

The following provides an overview of how the SI PPS will develop the IT infrastructure:

- Success of communication among different stakeholders in the various governance committees, including progress on milestones and provider level performance, is dependent on the implemented robust project management software that is delivered through a secure cloud-based server accessible by provider agencies and the SI PPS PMO. The SI PPS has implemented Performance Logic, to provide this support. This IT platform has allowed governance committee members to have a two-way communication mechanism with the SI PPS PMO and providers, and allows for ongoing performance monitoring or Domain 1 milestones, among others.
 - SpectraMedix has been selected as the health IT vendor for SI PPS. SpectraMedix works collaboratively with the SI-PPS PMO, IT/Data Committee, and the work stream teams (i.e. Information Technology Systems & Processes, Performance Reporting, Clinical Integration, Population Health and Practitioner Engagement) to provide an IT foundation for a clinically integrated healthcare delivery system.
 - The PPS is in the progress of building an Enterprise Data Warehouse that integrates NYS Medicaid attribution roster, claims data and pharmacy data.
 - The PPS will promote and support integration of PPS partners into the RHIO (Healthix) through resource support and funds flow.
 - The PPS implemented a healthcare analytics platform within the secure private cloud hosting environment described above, which allows SI-PPS to have visibility into Performing Provider System performance and to meet reporting requirements for the metrics associated with the System Transformation Projects (Domain 2), Clinical Improvement Projects (Domain 3) and Population-Wide Projects (Domain 4) that have been selected by SI-PPS. This platform includes the following functions and dashboards for performance management and identifying opportunities for program improvement.
- Currently, PPS providers are utilizing a number of these tools including the Health Information Exchange, the RHIO (Healthix), and various day-to-day care management technologies as well as several population wide analytics tools to risk stratify populations and direct resources. The SI PPS plans to utilize existing services which potentially build out additional capacity including a patient portal and an analytics portal for reporting and use in rapid cycle evaluation.

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Specific milestones and progress reporting metrics that the SI PPS must report on a quarterly basis have been identified by the DOH. The milestones related to population health management include developing a population health management roadmap for the PPS and finalizing a PPS-wide bed reduction plan.

The SI PPS will provide Board approved plans for the milestones listed above to the DOH and will monitor the progress of the designated implementation plan steps to report to the DOH on a quarterly basis. The SI PPS has developed a detailed implementation plan with additional sub-steps under each milestone to capture the responsible resources to execute/coordinate the implementation of steps under each milestone as well as designated timeframe estimates to complete the steps. The SI PPS anticipates that the Clinical Committee, in collaboration with other committees and workgroups, will develop the plans. The Clinical Committee will also oversee progress reporting for respective population health management metrics. The PMO will implement a standardized dashboard for the collection and reporting of progress as it relates to workplan implementation as well as for milestones progress reporting and identifying risks for internal updates to relevant governance committees. This will also be used to facilitate quarterly progress reporting to the DOH. If the SI PPS utilizes vendor relationships for the implementation of the population health management workstream, all formal agreements will include a defined commitment to meeting and reporting on key milestones and implementation steps.

Section 09 – Clinical Integration

✓ IPQR Module 9.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform a clinical integration 'needs assessment'.	Completed	Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee, including: -- Mapping the providers in the network and their requirements for clinical integration (including clinical providers, care management and other providers impacting on social determinants of health) -- Identifying key data points for shared access and the key interfaces that will have an impact on clinical integration -- Identify other potential mechanisms to be used for driving clinical integration	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3	NO
Task Assemble Clinical Integration Workgroup	Completed	Executive Director, PPS Chief Medical Officer and Senior Director of Enterprise Data and Analytics assemble a Clinical Integration Workgroup made up of representatives from the Clinical and IT Committees as well as representative PPS providers.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Identify resources and capabilities across PPS network	Completed	Identify existing clinical integration platforms, care transition programs, capabilities, workforce, and processes across the PPS network (hospitals, SNFs, home care agencies, FQHCs, substance abuse and behavioral health providers, among others).	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Determine clinical integration requirements for key provider groups	Completed	Determine clinical integration requirements for key provider groups including care management/health homes, clinical providers, community based providers, etc.	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Determine clinical integration standards for PPS	Completed	Determine the clinical integration standards that the PPS network will need to implement, including requirements for clinical integration for providers.	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3

✓ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The Staten Island Performing Provider System, LLC (SI PPS) anticipates that the following key challenges in implementing its clinical integration strategy:

1. The SI PPS views the ability to operationalize a fully integrated IT platform in a timely manner as a key challenge and risk to developing a clinically integrated network in line with the implementation of the SI PPS's clinical integration strategy. The SI PPS plans to utilize the Staten Island RHIO's (Healthix) infrastructure through an integrated IT platform to allow PPS partners to access/exchange relevant patient information in real-time. The results of the high-level IT assessment that the SI PPS performed during the DSRIP planning phase indicated that a subset of PPS providers do not have EMR systems, whereas other PPS providers already participate in Healthix in some capacity. The SI PPS is concerned that there will be delays in integrating the non-EMR providers into the IT infrastructure which could potentially delay standardizing clinical health data and performance measures across the SI PPS. To mitigate this risk, the SI PPS has hired a Senior Director of Enterprise Data and IT. The Senior Director has worked in complex healthcare systems and is well-versed in building and integrating IT platforms across different providers. With her expertise, the SI PPS has clearly defined an integration roadmap. To start analyzing claims data before receiving the DOH data set, the SI PPS is finalizing data sharing agreements with the two main hospitals in the system to begin the work efforts in this workstream. Further, IT support and training programs will be designed and made available to PPS providers through each roll-out phase of the clinical integration process to enable providers to prepare for clinical integration.
2. The SI PPS has included in its CRFP, grant funding for IT projects related to clinical integration. If PPS partners do not receive the requested funding, the SI PPS's ability to implement IT interoperability will be impacted. The SI PPS is including in its funds flow model funding for projects to help mitigate this risk.
3. The success of the SI PPS's clinical integration strategy will be highly dependent on the level of engagement of practitioners involved in implementing the workflow and protocols included in the strategy (emergency room physicians, transition coaches, primary care physicians, and care managers, as examples). To ensure practitioner engagement in the clinical integration strategy, the SI PPS CMO has identified "Champions" from different practitioner groups to be included in the development of the SI PPS's strategy to ensure buy in. Engaged practitioners will also sit on the Clinical Committee. Further, a comprehensive practitioner engagement strategy will be developed (see Practitioner Engagement workstream).
4. The SI PPS has multiple providers of care management services that will continue to expand capacity through DSRIP project implementation. The SI PPS sees care management as a critical component to monitoring at risk patients and preventing avoidable ER visits and hospitalizations. However, with multiple providers, approaches, and IT systems in use, the SI PPS's governance and decision-making around the sharing of IT information across PPS providers will be a challenge. To mitigate this risk, the SI PPS has included all care management providers on critical governance committees and will involve all providers in the development of IT processes and a clinical integration strategy.

✓ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The SI PPS clinical integration workstream is interdependent on several organizational workstreams, specifically population health management, practitioner engagement, IT systems and processes, and individual project implementation. As such, all workstreams will incorporate clinical integration into their respective strategic plans and implementation steps.

As previously stated, the success of the clinical integration strategy will be highly dependent on the level of practitioner engagement involved in implementing the workflows and protocols included in the strategy. Further, IT systems and processes workstream will provide the foundation for the integration of the SI PPS's clinical data to move towards population health. The SI PPS will designate a Clinical Integration Workgroup to serve in the primary role of developing and overseeing the implementation of the clinical integration strategy that includes the sharing of clinical and non-clinical information, designing standard clinical integration elements, and developing a care transitions strategy throughout the SI PPS network.

Various components of the population health management workstream are highly dependent on the clinical integration workstream including collecting and analyzing data necessary to risk stratify the population, conduct predictive analytics, identify high risk patients for interventions, as well as the use of messaging and real time alerts to manage patients.

Additionally, other SI PPS committees will collaborate and provide feedback and inputs to the Clinical Integration Workgroup to facilitate coordination across various workstreams. The Clinical Integration Workgroup will be made up of representatives from across the governance committees including the Population Health Workgroup, the Practitioner Engagement Workgroup, the Data/IT Committee, and the Clinical Committee to enable an integrated strategy in the development of each workgroup's respective strategic plans.

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director	Joseph Conte	Support the strategic development of the Clinical Integration strategy.
Senior Director of Enterprise Data & Analytics	Anyi Chen	Support the PPS's clinical integration data/IT functions, including data mapping/sharing and IT infrastructure construction and maintenance.
Data Analysts	Vitaly Druker Diana Kohlberg	Assist in the operational continuity of data aspects pertaining to clinical integration and provide assistance to the Clinical Committee as it relates to data analysis, acquisition and reporting. This position will be responsible for analyzing clinical outcomes and reporting results to the Clinical Committee.
Chief Medical Officer	Salvatore Volpe, MD	Support the strategic development of the Clinical Integration strategy.
Clinical Committee	Beacon Christian Community Health Center, Janet Kim; Camelot of Staten Island, Logan Lewis; Cerebral Palsy Association of NY/ Metro Health Clinic, Azimah Ehr; Clove Lakes Health Care , Thomas Fealey; Community Health Action of Staten Island, Jennifer Lytton Hirsh; North Shore-LIJ Homecare, Meredith DeSimon; New York State Nurses Association, Julie Semente and Eliza Carboni; Richmond County Medical Society , Deborah Aanonsen; Richmond University Medical Center, Mansoor Khan, MD; Richmond University Medical Center, Michael Mathews; Richmond University Medical Center, Peter Stathopoulos, MD; Staten Island Borough President's Office, Ginny Mantello, MD; Staten Island Mental Health Society, Libby Traynor; Staten Island University Hospital, Brahim Ardolic, MD; Staten Island University Hospital, Russell Joffe, MD; United Physicians Group, Ted Strange, MD / John Shafer; Victory Internal Medicine, Louis Emmer; YMCA of Greater New York, Amanda Wexler; 1199SEIU, Fabienne Joseph	Collaborate with the Data/IT Committee to develop clinical data/IT elements.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Data/IT Committee (IT contacts from PPS partners)	Beacon Christian Community Health Center, Philip Juliano; Community Health Action of Staten Island, Joshua Sippen; Community Health Center of Richmond, Monique Welbeck; Eger Health and Rehabilitation Center, Debra Alexander; Healthix, Todd Rogow; Richmond University Medical Center, Nancy Taranto; Saint Joseph's Medical Center, Elizabeth Woods; Staten Island University Hospital, Kathy Kania; University Physicians Group, Kevin Leo; Victory Internal Medicine, David Wortman; Community Health Action of Staten Island, John Mastellone; North Shore LIJ Care Solutions, Mohamed Humaid; Richmond University Medical Center, Apurvi Mehta; Visiting Nursing Services of New York, Timothy Peng	Support development and execution of the clinical integration strategy.
Clinical Integration Workgroup	Salvatore Volpe, MD, SI PPS; Anyi Chen, PhD; Janet Kim, MD, Beacon Christian Community Health Center; Azimah Ehr, MD, Metro, CPA; Matt Kaufman, Richmond University Medical Center; Matthew Weeks, MD, Staten Island University Hospital; John Shafer, University Physicians Group; Mary Beth Francis, Carmel Richmond Healthcare and Rehabilitation Center; Thomas Fealey, MD, Clove Lakes Health Care and Rehabilitation Center; Amanda Wexler, YMCA; Everett Miller, Bridge Back to Life; Avraham Schick, Silver Lake Support Services; Tim Peng, Visiting Nurse Services of New York; Kate Nixon, Visiting Nurse Services of New York; Diana Kohlberg, SI PPS; Kristen Mouton, Staten Island University Hospital; Julissa Nunes, Visiting Nurse Service of New York	Perform a clinical integration needs assessment, as well as develop and implement a clinical integration strategy.
Compliance Officer	Regina Bergren	Oversee the development and implementation of the PPS's compliance plan and related compliance requirements, as defined by the PPS, including the PPS Lead compliance plan related to DSRIP. The Compliance Director role should report to the Executive Body.

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The IT infrastructure across the SI PPS is the foundation for the development of a clinically integrated network including data sharing systems, interoperability and the ability for providers across provider types and sites (hospitals, primary care providers, mental health and substance abuse providers, and homecare providers, among others) to share relevant data to support care transitions, care management, and drive the appropriate use of resources and utilization of care. The clinical integration workstream will work with the IT Systems and Processes workstream to determine the sharing of clinical data and other information.

Key IT considerations for clinical integration may include but are not limited to the following:

- The IT infrastructure to support a clinically integrated network
- Data reporting for performance monitoring
- Secure messaging and alerts
- Patient and physician portal through the use of items such as patient and physician portals and secure messaging and alerts, among others.

Members of the Data/IT Committee, Clinical Committee and Clinical Integration Workgroup are designing data elements and other requirements for IT interoperability. Data and dashboards are being developed for two-way reporting between the SI PPS and PPS providers to share key data for care delivery as well as for performance reporting. The SI PPS is planning to build and configure a data sharing exchange and interfaces for PPS providers to become clinically integrated into the shared IT infrastructure.

The PPS performed a high-level IT assessment during the planning phase and identified several providers who currently do not have EHR systems. The PPS is taking into consideration the needs of these providers in the development of the clinical integration interim reporting while these providers build these systems and become clinically integrated into the PPS.

IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Specific milestones and progress reporting metrics that the SI PPS must report on a quarterly basis have been identified by the DOH. The milestones related to clinical integration include performing a clinical integration 'needs assessment' and developing a clinical integration strategy.

The SIPPS will utilize the project requirements, such as provider progress on PCMH certification and meaningful use requirements, as well as practitioner and patient satisfaction surveys to assess the overall effectiveness of the PPS's clinical integration throughout the DSRIP program.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

The SI PPS has developed a detailed implementation plan with additional sub-steps under each milestone to capture the responsible resources for executing/coordinating implementation steps under each milestone as well as designated timeframe estimates to complete the steps. The SI PPS anticipates that the Clinical Committee, in collaboration with other committees and workgroups, will develop these plans. The Clinical Committee will also oversee progress reporting for respective population health management metrics. The PMO will implement a standardized dashboard for the collection and reporting of progress as it relates to workplan implementation and milestones for reporting progress and risks for internal updates to relevant governance committees as well as for quarterly progress reports to the DOH. If the SI PPS utilizes vendor relationships for the implementation of the clinical governance workstream, all formal agreements will include a commitment to meeting and reporting on key milestones and implementation steps.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Section 10 – General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

UPDATE for 9/30/2015 SUBMISSION: (There is a tech glitch on allowing PPS to enter data into narrative boxes for milestones completed in previous Quarter).

Section 02: M#1 and 2: No changes to the governance structure or bylaws.

Section 03: M#1: No changes to finance organizational structure.

The Staten Island Performing Provider System, LLC (SI PPS) will serve as the anchor to support the implementation of the 11 DSRIP projects including the substantial administrative, project management, reporting, and communication responsibilities required, as well as to provide technical assistance to PPS providers. The SI PPS's governance committees will include representation from an effective and engaged team of clinicians as well as operational and finance leaders from across the PPS provider network to position the SI PPS for success. SI PPS leadership including the Executive Director, the Board of Managers and governance committees will set the tone for project implementation by encouraging both individual and regional care transformation and collaboration.

Serving as the organizational anchor responsible for the substantial administrative activities required to implement the 11 DSRIP projects, the SI PPS's Project Management Office (PMO) will execute the following:

- Designate a strong leader to oversee the entire planning and implementation process.
- Designate a project champion and owner, from within the PPS provider network, for each DSRIP project to ensure provider collaboration and engagement for each project.
- Hold ongoing implementation meetings with representatives from the PMO and project champions/leads as well as project implementation teams to discuss progress towards meeting project requirements, achieving actively engaged targets, etc.
- Ensure appropriate coordination between project implementation teams and organizational work streams including IT systems and processes, population health, value based payments, and clinical integration, among others.
- Employ adequate project management staff with expertise in synthesizing information, coordinating many people and projects, and time management.
- Assign project coordinators, employed through the PMO, to project champions and project implementation teams to manage implementation steps and timelines.
- Assign data analysts to oversee specific projects/project groups to support the collection and analysis of key information from across the PPS network including executing rapid cycle evaluation.
- Develop a plan to incorporate and motivate practitioners and staff across PPS organizations.
- Ensure the availability of hands-on technical support to facilitate project development and design activities.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

- Ensure ongoing communication and transparency to the PPS provider network, key stakeholders, and the practitioner and patient community.

The SI PPS's infrastructure development will lay the foundation for delivery system reform and the implementation of all DSRIP projects. As such, the SI PPS will lay the foundation for project implementation through investments in staff with required expertise, processes and technology.

The SI PPS will foster a culture of engagement across the network by employing learning collaboratives and will place an emphasis on staff training as an ongoing initiative to engage participating providers in reaching common project and DSRIP goals. The SI PPS will leverage and build upon existing learning collaboratives to incorporate best practices for performance improvement and information sharing in order to accelerate project implementation. Through these collaboratives, the SI PPS will also emphasize the use and dissemination of evidence-based/standardized best practices for care delivery. The SI PPS will also emphasize the piloting, testing and replicating of innovative care delivery models across the PPS network

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

Project requirements across the 11 DSRIP projects are either the same or similar, and require similar approaches to achieving project outcomes. Many of the project specific requirements are also highly dependent upon the completion of organizational workstream tasks including IT systems and processes, workforce, performance reporting, clinical integration, and funds flow, among others. These organizational workstreams are also highly dependent on the work that is completed at the project level, including identifying individuals for training and identifying data/metrics to be collected and tracked to monitor project implementation and performance.

The SI PPS has developed project implementation teams and identified project champions/leads to coordinate with the PMO and organizational workstream committees and workgroups. The project implementation teams will consist of PPS partner representation from projects with similar or aligned project requirements, for example Project 2.b.iv Care Transitions to Reduce 30-Day Readmissions and 2.b.viii Hospital-Home Care Collaboratives, which both require the development of transitions of care processes for patients that are at risk for readmission. The need to develop PPS-wide clinical standards and care pathways around disease management, care management and medication management, all also require coordination across project implementation teams and clinical subcommittees.

For the DSRIP projects that have interdependencies across workstreams and other projects, their project plans have been developed to be shared across project teams to facilitate a streamlined implementation process. Project requirements that exist across projects and are interdependent with other workstreams include but are not limited to the following:

- Evidence-based care protocols and clinical practices. The development of these overlapping project requirements will be dependent on project implementation teams in coordination with the Clinical Committee and subcommittees.
- Training on evidence-based practices and protocols. Training programs will be developed and implemented in conjunction with the Workforce

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Committee and Workforce Implementation Team/ Training Workgroup as well as project implementation teams. Project teams and the Workforce Implementation Team will also coordinate with the IT systems and processes workstream and performance reporting workstream to identify training requirements for PPS organizations and practitioners in these workstreams.

- Community health workers, patient navigators, care managers, primary care providers, social workers, educators, and transition staff will be required to support multiple projects.
- Coordination with Medicaid Managed Care Organizations (MCOs). This project requirement expands across multiple projects and will be dependent on the involvement of the Finance Committee as well as the Value Based Payment Workgroup.
- The use of EHR, IT platforms to track patients engaged, and integration with the RHIO (Healthix). This project requirement, which is a common requirement across the selected projects, will be interdependent with the Data/IT Committee and overall clinical integration and information technology workstreams.

Workgroups including the PCMH Workgroup and Care Management Workgroup will also be utilized as needed to support specific areas that cross cut numerous DSRIP projects and will include stakeholder representation across workstreams and project teams.

This workstream is also highly dependent on the total valuation and the flow of funds. In order for the PMO to provide the necessary administrative support described in the overall approach, a specified amount of funds will need to be set aside to support these activities.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

☑ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Project Oversight	Joseph Conte, Executive Director, SI PPS LLC	Responsible for the overall execution of DSRIP projects including supervising PMO staff.
Project Oversight	Project Management Office	Oversight for execution of all DSRIP projects.
Regina Bergren	Compliance Officer	Responsible for developing and implementing the PPS compliance program.
Rick Olsen	Finance Director	Oversight of SI PPS Finance function.
Anyi Chen	Senior Director of Enterprise Data & Analytics	Develop and implement the overall PPS Information Technology strategy.
Celina Ramsey	Director of Diversity and Inclusion	Oversight of PPS Diversity and Cultural Competency strategy.
Project Implementation Teams	PPS partner organization members	Engage in meeting project requirements including developing clinical protocols for project implementation, assisting in the development of training, coordinating with project team members on implementation.
Data Analysts	Vitaly Druker Diana Kohlberg	Support data collection and reporting, and project progress analysis.
Overall Advisor	Project Advisory Committee (all SI PPS partners) Steering Committee: Beacon Christian Community Health Center, David Kim, MD; Community Health Action of Staten Island, Diane Arneth; Community Health Center of Richmond, Inc., Henry Thompson; Eger Health and Rehabilitation Center, David Rose; North Shore- LIJ Homecare, Irina Mitzner; Richmond Center for Rehabilitation and Residential Healthcare, Philip Buchsbaum; Richmond University Medical Center, Richard Salhany; Richmond University Medical Center, Pankaj Patel, MD; Richmond University Medical Center, Elizabeth Wolff, MD; Staten Island Mental Health Society, Fern Zagor; Staten Island University Hospital, Joanne Pietro; Staten Island University Hospital, Dina Wong; Staten Island University Hospital, Diane Gonzalez;	To serve in an advisory role to overall project execution.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
	YMCA of Greater New York, Jacqueline Filis; Visiting Nurse Services of New York, Donna Lichti	
Clinical Advisory	Clinical Committee 1 of 2: Beacon Christian Community Health Center, Janet Kim; Camelot of Staten Island, Logan Lewis; Cerebral Palsy Association of NY/ Metro Health Clinic, Azimah Ehr; Clove Lakes Health Care , Thomas Fealey; Community Health Action of Staten Island, Jennifer Lytton Hirsh; North Shore-LIJ Homecare, Meredith DeSimon; New York State Nurses Association, Julie Semente and Eliza Carboni; Richmond County Medical Society , Deborah Aanonsen; Richmond University Medical Center, Mansoor Khan, MD; Richmond University Medical Center, Michael Mathews; Richmond University Medical Center, Peter Stathopoulos, MD; Staten Island Borough President's Office, Ginny Mantello, MD ; Staten Island Mental Health Society, Libby Traynor; Staten Island University Hospital, Brahim Ardolic, MD; Staten Island University Hospital, Russell Joffe, MD; United Physicians Group, Ted Strange, MD / John Shafer; Victory Internal Medicine, Louis Emmer; YMCA of Greater New York, Amanda Wexler;	To serve in an advisory role related to the PPS's clinical needs.
Clinical Advisory	1199SEIU, Fabienne Joseph	To serve in an advisory role related to the PPS's clinical needs.
Financial Advisory	Finance Committee: Beacon Christian Community Health Center, David Kim Community Health Center of Richmond, Benny Lindo Coordinated Behavioral Care, TBD Eger Health and Rehabilitation Center, Gary de Leeiwek Richmond University Medical Center, Robert Ren Staten Island University Hospital, Tom Reca	To serve in an advisory role related to the PPS's finance needs.
Data/IT Advisory	Data and Information Technology Committee: Beacon Christian Community Health Center, Philip Juliano; Community Health Action of Staten Island, Joshua Sippen; Community Health Center of Richmond, Monique Welbeck; Coordinated Behavioral Care, Marty Piccochi; Eger Health and Rehabilitation Center, Debra Alexander; Healthix, Todd Rogow; Northshore-LIJ Care Solutions, Joseph Shulman;	To serve in an advisory role related to the PPS's IT/Data needs.

✓ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Irene Frohlich	Project Management Director	Responsible for overall PPS project execution and reporting.
Jessica Steinhart, Director of Ambulatory Initiatives Victoria Njoku-Anokam, Director of Behavioral Health Initiatives Mary Han, Assistant Director of Continuing Care Initiatives Anyi Chen, Senior Director of Enterprise Data & Analytics Diana Kohlberg, Staff Analyst Kate Lynn Chimienti, Staff Analyst	Project Directors and Support staff	PMO oversight and leadership for all PPS projects, and for the overall implementation plan deliverables.
David Kim, MD Steering Committee Chair	PPS Steering Committee	Board level oversight and responsibilities for all of the PPS projects.
CEOs of PPS Network Providers	Oversight party from Network Providers	PPS Network Provider partners' CEOs are responsible for their organizations' execution of DSRIP responsibilities; they will contribute to the success of all PPS project execution.
Boards of Directors for PPS Network Partners	Oversight party from Network Providers	PPS Network Provider partners' Board of Directors have overall responsibility for their organizations' execution of DSRIP responsibilities, they will contribute to the success of all PPS project execution.
Representatives from Community	Representatives from Community	Input to integrate patients and community to all of the PPS projects.
1199 Training and Employment Funds	Training Vendor	Support PPS related training programs.
External Stakeholders		
BDO	External Consultants	Provide professional and consulting services to support all PPS projects.
Ginny Mantello, MD	Represent Staten Island Borough President's Office, Health & Wellness Department	Provide input and feedback and support across various workstreams.
1199 Training and Employment Fund	Workforce vendor	Support implementation of the training strategy and workforce

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

The availability of structured, usable and accurate data is fundamental to the SI PPS's ability to implement DSRIP projects and meet project requirements. Usable data must be collected and analyzed in order to track implementation and drive performance improvement measures. The SI PPS has developed and will employ the following approach to ensure that the required IT infrastructure is available for project implementation:

- Many of the PPS providers participating in the selected DSRIP projects have not implemented EHR or are currently in the process of implementing EHR at their facilities. As part of its IT infrastructure development plan, for those providers without available electronic data, the SI PPS will prioritize implementing EHR and will employ interim strategies such as a standardized manual reporting and collection processes to collect needed data from providers.
- Identify data gaps and needs, in terms of technology and people, and develop plans to address these gaps.
- Ensure the ability to collect data from providers for the DSRIP projects early on in the DSRIP program, until EHR has been implemented.
- Engage the SI PPS's governance structure and project implementation teams and project leads in the development of an IT plan that includes the technology, processes, and resources to generate the data and performance reports required to implement and monitor DSRIP projects.

The SI PPS has identified the following elements required for the SI PPS's IT infrastructure to support project implementation:

- 1) A robust health information exchange that allows providers to exchange clinical data for use in patient treatment and coordination of care.
- 2) Patient registries that are both project-specific and for use in the overall DSRIP program.
- 3) A patient portal.
- 4) Day-to-day care management capabilities.
- 5) An analytics portal built to allow for reporting of project specific process metrics and outcome metrics for use in rapid cycle evaluation and reporting to the Department of Health.
- 6) The ability to perform population wide analytics and risk stratification to proactively identify patients and prioritize interventions.
- 7) A team of IT staff including data managers and data analysts employed by the SI PPS to collect, report, and provide support to PPS providers on the data to be reported.

Further, the DSRIP projects and program enables the development of disease registries and standardized quality data reports. Once data is accessible to the SI PPS, care teams will be able to utilize more sophisticated data than what is currently available for the purpose of population health management including personal health records for complex care management.

IPQR Module 10.6 - Performance Monitoring

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

Foundational to the development of the SI PPS's performance monitoring and reporting system will be the identification of performance reporting metrics required for the 11 DSRIP projects and the organizational workstreams.

The SI PPS's performance monitoring approach will be centered on the development of a standardized, well-defined process that includes training and education for all PPS providers responsible for performance reporting measures as well as a sufficient support from the PMO to coordinate the collection, synthesis, analysis, and dissemination of reported data points and metrics.

The SI PPS's governance structure, in coordination with key stakeholders, will establish goals, expectations and timelines for performance monitoring and include these in the operating agreements developed with and signed by PPS providers, community based organizations (CBOs), and any other entities that the SI PPS may partner with as part of project requirements.

A designated Performance Reporting Workgroup made up of members of the IT Committee, Finance Committee, Clinical Committee, and the PMO will be responsible for driving performance monitoring. The PMO, through data analysts and managers, will also develop standardized formats for the collecting and reporting of performance data to support performance monitoring and rapid cycle evaluation.

Performance dashboards will also permit project teams as well as the Clinical and Finance Committees, to manage tasks, share information, and track project implementation progress and achievement of milestones. The performance dashboards will also permit the PPS's network to quickly respond to performance issues that may inhibit project success through quality assessment and improvement activities in coordination with the SI PPS's Clinical Committee and project implementation teams.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

The SI PPS recognizes that a critical aspect of the implementation of DSRIP projects is the continued engagement of the community throughout the project implementation process. Incorporating this objective, the SI PPS will be continually mindful of the community that will be impacted but are not actively participating in the process while ensuring the inclusion of providers serving various members of the Staten Island population. The SI PPS is also leveraging the Community Needs Assessment completed during the initial planning phase and is continuing ongoing community engagement techniques (surveys, town hall meetings, etc.) as part of its ongoing approach to improve project implementation through community engagement.

Specific to the implementation of Project 2.d.i, Patient Activation Activities, community and patient engagement will be critical to the project's success. The engagement of CBOs, specific to project requirements, and their roles within the project will be determined through project implementation teams. However, the SI PPS plans to leverage CBOs to engage in and provide Patient Activation Measures (PAM) activities on behalf of the SI PPS through contracted relationships.

To further facilitate community engagement, the SI PPS through its PMO and its Communication and Marketing Committee, have been charged with ensuring transparency in all of the SI PPS's coordination and decision making activities through the development of both internal and external communications. The Diversity and Inclusion Committee, in conjunction with the PMO and Communication and Marketing Committee, will also coordinate with project implementation teams to develop strategies around the appropriate approach to dissemination and wording of key information and messaging to the community including two-way communication strategies.

Staten Island Performing Provider System, LLC (PPS ID:43)

Section 11 – Workforce

✓ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions :

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

Funding Type	Year/Quarter										Total Spending(\$)
	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)	DY2(Q1/Q2)(\$)	DY2(Q3/Q4)(\$)	DY3(Q1/Q2)(\$)	DY3(Q3/Q4)(\$)	DY4(Q1/Q2)(\$)	DY4(Q3/Q4)(\$)	DY5(Q1/Q2)(\$)	DY5(Q3/Q4)(\$)

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The following identifies key challenges and risks to achieving the milestones in the above project plan and describes the SI PPS's ability to achieve outcome measure targets:

1. The ability to hire needed positions to support project implementation including primary care physicians, psychiatrists, clinicians with expertise in palliative care, Credentialed Alcoholism and Substance Abuse Counselors (CASAC), and licensed clinical social workers, among others. Many of the DSRIP projects require specialized staff who are typically difficult to recruit. Further, Staten Island is a geographically isolated area with high commuting costs, creating an even greater barrier to recruiting needed staff. The SI PPS will develop appropriate incentives and dedicate recruitment efforts to mitigate this risk; however, the SI PPS will also consider using alternative clinical staff to implement project goals. Further, the SI PPS will reorganize the workforce into care teams with various levels of expertise and skills; incorporate varying types of skills and education levels within titles; and incorporate salary scales or steps to account for a variety of skill sets. The SI PPS is also considering working with local universities to support long term workforce needs as well as to subsidize training and certification for needed staff.
2. The ability to transition from an inpatient intensive, "traditional" workforce, to a "non-traditional" workforce includes hiring patient navigators, community health workers, transition coaches, etc. The SI PPS anticipates the ability to train and develop new positions with new skill sets as a challenge. To mitigate this risk, the SI PPS will provide centralized training support focused on preparing, training, and educating the workforce for this transition.
3. Currently there are significant disparities across participating provider organizations in human resources policies and procedures adding complexities to the development of strategies for retraining and redeployment. To mitigate this risk the SI PPS has included representation from across provider organizations on the Workforce Committee to ensure the SI PPS's approach includes consideration of various partner requirements. The Workforce Committee will develop a formal set of minimum standards to be utilized in relation to the SI PPS's DSRIP workforce.
4. The SI PPS's ability to fund the hiring of new staff for services not covered by traditional reimbursement include care managers, community health workers, transition coaches, and trainers or training vendors to support the implementation of DSRIP projects is considered a risk to project implementation. To mitigate this risk, the SI PPS has developed a budget and funds flow model that allows for multiple funding scenarios including limitations on funding. The SI PPS has also allocated funding to critical roles, including care managers and community health workers, and is working on approaches to create efficiencies in hiring to support non-reimbursable services.
5. In order for the SI PPS to meet workplan timelines and workforce project requirements training must be developed and completed across multiple workstreams including performance reporting, information technology (IT) processes, clinical integration, and training around new clinical protocols practices, and workflows. The SI PPS will mitigate the risks associated with not meeting training deadlines by working with training vendors and other resources including the SI PPS's workforce vendor, the 1199 SEIU Training and Employments Funds and will consider tying provider performance bonus payments to meeting workforce milestones.

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

To further mitigate risks in this workstream, the SI PPS Project Management Office (PMO) in coordination with the SI PPS governance are developing an overall approach to track/monitor risks on an ongoing basis.

✓ IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

There are several interdependencies between the SI PPS's workforce transformation and other organizational workstreams including IT systems & processes, governance, cultural competency, clinical integration, performance reporting, practitioner engagement, and population health as well as general project implementation. The SI PPS recognizes that workforce plays a critical role in the frontline delivery of care to patients and thus the successful implementation of DSRIP project and organizational implementation plans.

The IT systems & processes and clinical integration strategy, including the ability to share clinical data between PPS providers is critical to obtaining health information in real-time to provide appropriate preventative and quality care to the Medicaid patient population. Additionally, the organizational committees (Finance, Workforce, and Clinical Committees) will need to be able to receive data to appropriately monitor the workforce for rapid cycle evaluation, to adjust the needs of the workforce and PPS as needed, and to monitor the implementation of clinical protocols and training.

Governance interdependencies arise due to the need for formal approval of plans/activities and conformity with policies and procedures as set forth by the SI PPS bylaws. The SI PPS has established the Workforce Committee, with guidance from the Project Advisory Committee (PAC), to develop a training strategy across the PPS network to consider inputs to address cultural competency, use of IT systems, and use of clinical standards of care.

The Diversity & Inclusion, Data/IT, and Clinical Committees, Practitioner Engagement Workgroup, and project implementation teams are all responsible for designing training strategies specific to their areas and will collaborate with the Workforce Committee to implement appropriate trainings.

The SI PPS is designed for the sharing of several workforce positions across the PPS network. For example, data managers and project coordinators are shared. Further, the SI PPS anticipates having various committee members sit on more than one governance committee to better facilitate cross functionality of the SI PPS.

IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Senior Director of Workforce and Human Resources at the Staten Island PPS	William Myhre	Responsible for the implementation and monitoring of various workforce initiatives.
Workforce Implementation Team Project Lead	William Myhre	Accountable for implementing, leading and monitoring workforce initiatives and operations.
Workforce Implementation Team	William Myhre, Staten Island PPS Valbona Lajqi, Staten Island PPS Celina Ramsey, Staten Island PPS Karen Meador, BDO Seth Merksamer, BDO Alan Cooper, BDO Krysta Gamble, BDO Maureen Miller, BDO Mary-Beth Francis, Archcare Christina Tavarez, Community Health Center of Richmond Ann Goldman , UFT Julie Semente, NYSNA Patricia Caldari, RUMCSI Rose Marie Belfini, SIMHS Margaret Dialto, NorthShore LIJ Alison Cohen, NYSNA Eloisa Pelaez, 1199 Rebecca Hall, 1199 Eliza Carboni, NYSNA Julia Brusco, NYSNA Patricia Kane, NYSNA Samir D'Sa, xghealth Michelle Green, NYSNA Dell Smitherman, 1199 Ron Musselwhite, RUMCSI Patricia Coleman, NorthShore LIJ Charles Baumgart, xghealth Philip Wirtjes, xghealth	Provide guidance on how strategy formulation and create strategic planning documents to achieve Workforce Strategy

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
	Michele Miller, Archcare Georgina Weyhe, 1199TEF Nyasha Maddox, 1199TEF	
HR Leads of Provider Organizations	Margaret Dialto, SIUH Ron Musselwhite, RUMCSI Susan Wittich, Eger Christina Tavarez, CHCR Janice Maye, Camelot	Support data collection of compensation and benefit information as well as current state workforce information and potential hiring needs.
Director of Project Management	Irene Frohlich	Provides guidance to Sr. Director of Workforce/HR to ensure all progress is documented correctly to substantiate progress to DOH
Executive Assistant/HR Workforce Analyst	Valbona Lajqi	Documents progress and maintains record of all meetings, trainings, and training materials.
Consultants	BDO Consulting, LLP 1199 SEIU TEF	Provides PPS with data collection and strategy formulation. & Training Consultant Vendor
Workforce Committee	Carmel Richmond Healthcare and Rehabilitation, Mary-Beth Francis Community Health Center of Richmond, Christina Tavarez Federation of Nurses, UFT, Ann Goldman New York State Nurse Association, Julie Semente Richmond University Medical Center, Ron Musselwhite Staten Island Mental Health, Rose Marie Belfini Staten Island University Hospital, Margaret Dialto 1199 SEIU, Alison Cohen 1199SEIU Training & Employment Fund, Eloisa Pelaez and Rebecca Hall Georgina Weyhe, 1199TEF Nyasha Maddox, 1199TEF Patricia Coleman, SIUH Susan Wittich, Eger Healthcare Kristen Derespinis, SIUH Janice MAye, Camelot Logan Lewis, Camelot	Responsible for the overall direction, guidance and decision making related to the workforce transformation agenda, including defining the target workforce state, creating a workforce transition roadmap, producing a compensation and benefit analysis, and developing training programs.
Training Workgroup	William Myhre, Staten Island PPS Valbona Lajqi, Staten Island PPS Celina Ramsey, Staten Island PPS Jessica Steinhart, Staten Island PPS Alan Cooper, Tudor Group LLC Denise Fazio, Archcare	Define and monitor the training workplan in conjunction with project implementation teams and other work streams.

✓ IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Richmond University Medical Center, Human Resources Vice President; Staten Island University Hospital, Human Resources Vice President Carmel Richmond Healthcare & Eger Lutheran, Camelot, CHCR, Staten Island Mental Health,	HR Leads of the SI PPS	Support data collection of compensation and benefit information as well as current state workforce information and potential hiring needs.
1199SEIU Training Fund	Training Lead to be identified as part of implementation steps for Milestone 1	Provide oversight and input for the development of training needs assessments and subsequent training strategies and plans.
Senior Director of Workforce and Human Resources	Project Management Office	Oversee and lead workforce related projects.
Director of Project Management	Project Management Office	Provides support to Workforce Implementation Team to ensure all progress is documented correctly to substantiate progress to DOH
HR Directors from Network Providers	Coordinators from Network Providers	Serve as the primary contact for the PPS Lead workforce function for conducting DSRIP related business and responsible for their organization's execution of DSRIP related workforce responsibilities and participation in workforce related strategies.
Site HR/Administrators/ Labor Representatives/Clinical Leadership	Leads of larger PPS Member Organizations	Provide insight and information related sources and destinations for redeployed staff by projects.
Site HR/Administrators/ Labor Representatives/Clinical Leadership	Lead at large PPS Member Organizations impacted by DSRIP Projects	Provide data and information for current state assessment and future state workforce needs.
External Stakeholders		
1199 SEIU TEF	PAC Member, Workforce Committee Member, Clinical Committee Member	Advise on workforce strategy.
New York State Nurses Association	PAC Member, Workforce Committee Member, and Clinical Committee Member	Advise on workforce strategy.
Federation of Nurses	PAC Member and Workforce Committee Member	Advise on workforce strategy.
Continuing Care Leadership Coalition	INTERACT Training vendor	Assist in the implementation of INTERACT training at SNF's/Home

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		care providers.
PCMH vendor	Training vendor	Assist in the implementation of NCQA Level 3 PCMH 2014 .
Insignia Health	PAM Training vendor	Assist in the implementation of PAM training for providers involved in Project 2.d.i.
College of Staten Island Christopher Cruz Cullari	Training Partner	Working collaboratively with CSI to create the first ever Community Health Worker program on Staten Island for the shift in workforce.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

✓ IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

A shared IT infrastructure across the SI PPS network will enable the workforce to better communicate across the PPS network, enhance mobile capabilities, training capabilities, standardize usage and understanding of clinical care management standards, and enable monitoring and reporting of key milestones for rapid cycle evaluation.

The successful implementation of interoperability functions and the sharing of electronic health information and patient alerts will be critical to providing the current workforce and new workforce information needed for appropriate and coordinated patient care and for properly directing resources.

The IT processes workflow will support the development of standardized workflows and care management plans for use in various Electronic Health Records to support the training of the workforce across the SI PPS.

Clinicians, care managers and patient navigators will require access to electronic health information from PPS providers to better coordinate patient care. Further mobile resources such as tablets will support the ability for community health workers to engage patients in community settings.

An IT workforce training platform, HWApps, will offer centralized learning management system to provide and track training will be utilized by the PPS to implement its overall training strategy.

Finally, the PPS envisions that a Human Resource Information System (HRIS) or a variation of a payroll system will be implemented in the PPS's Project Management Office (PMO) as part of the shared IT infrastructure spanning the SI PPS network to enable monitoring and reporting of its workforce.

✓ IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Specific workforce milestones that PPSs are required to report on a quarterly basis have been developed by the New York State Department of Health (DOH) and incorporated into the SI PPS's implementation workplans. These requirements include the number of staff redeployed, retrained and hired staff as well as the milestones and timelines established in the workplans, and workforce budget updates. These milestones include

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

defining a target workforce state; creating a workforce transition roadmap; performing a detailed gap analysis between the current state assessment of workforce and the projected future state; producing a compensation and benefit analysis; and developing a training strategy.

The SI PPS's PMO in conjunction with the Workforce Committee and Training Workgroup have develop and distributed survey tools to collect baseline data from across the PPS network. The SIPPS has also created data collection processes, tools, and timelines to collect and report on the progress of workforce milestones and transformation metrics on an ongoing basis. The PMO is implementing as well as reporting on progress updates and changes to the DOH and other key stakeholders on a weekly basis.

Staten Island Performing Provider System, LLC (PPS ID:43)

Project 2.a.iii – Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services

✓ IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The project requirement for all participating PCPs to meet NCQA accredited Level 3 PCMH standards and/or APC accreditation by Demonstration Year 3 is a risk to achieving project implementation. Although many PCPs have met old NCQA PCMH standards, some still lack EHR or are early in the medical home transformation process. To mitigate this risk, the SI PPS is developing PCMH implementation plans and will provide PCPs with centralized resources, training, and technical assistance. The SI PPS will also track progress and contract with vendors to provide support, as needed.
2. Project requirements for providers to have EHR systems that meet MU standards, connect to the RHIO, and have an IT infrastructure for population health management have been identified as risks for implementation. Some SI PSS providers do not currently have EHR, impeding RHIO connection and tracking of engaged patients. To mitigate this risk, the SI PPS has prioritized implementation of EHR systems across all projects and requested funds through the Capital Restructuring Finance Program to assist providers with fully implementing EHR. The Senior Director of Enterprise Data and Analytics in conjunction with the Data/IT Committee will work with providers who have identified EHR implementation as a risk to help facilitate implementation.
3. Significant engagement is required from PCPs and other practitioner groups, including care management teams and implementation of evidence-based practice guidelines to address risk factor reduction and management of chronic diseases. To address this risk, the SI PPS is developing an incentive strategy to ensure provider participation and will include key provider groups in the development of care protocols and as representatives on the Clinical Committee to ensure engagement with adopted practices.
4. Significant hiring/training is required to support expansion of care management. To assist in accelerating this effort, the Workforce Committee will leverage providers with existing hiring/training resources to quickly ramp up capacity to serve the target population. The SI PPS plans to utilize partners including CBC (the SI Health Home) and NS-LIJ's Care Solutions as existing resources to achieve full implementation.
5. Staten Island has an ethnically diverse population presenting linguistic, cultural and other challenges for Medicaid enrollees and uninsured attempting to self-manage care and navigate the healthcare system. To mitigate this risk, the SI PPS will utilize current health home providers with expertise providing services to these populations to support project implementation. The SI PPS will develop culturally competent and linguistically appropriate and self-management materials to support this population.
6. The SI PPS has allocated a portion of funding for this project to support project implementation costs including the hiring/training of additional staff, development of IT infrastructure, and incentive/bonus payments to providers. The SI PPS has tied funds flow to providers based on meeting

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

specific project milestones within designated timeframes. The ability to support project activities through the current valuation is a risk, given that care management services for "at-risk" patients are not reimbursable and must be entirely supported through PPS funds. To mitigate this risk, the SI PPS will partner with existing Health Homes to support project implementation. The Health Homes will support project implementation activities and create efficiencies through alignment with existing health home models. Additional care management providers may be engaged for the project if the Health Home is unable to meet actively engaged targets with current project valuation.

 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	5,000

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4
PPS Reported	Baseline Commitment	0	250	500	750
	Quarterly Update	41	132	211	605
	Percent(%) of Commitment		52.80%	42.20%	80.67%
IA Approved	Quarterly Update	0	132	211	0
	Percent(%) of Commitment		52.80%	42.20%	0.00%

Warning: PPS Reported - Please note that your patients engaged to date (605) does not meet your committed amount (750) for 'DY1,Q4'

✅ IPQR Module 2.a.iii.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	DY2 Q4	Project	N/A	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task A clear strategic plan is in place which includes, at a minimum: - Definition of the Health Home At-Risk Intervention Program - Development of comprehensive care management plan, with definition of roles of PCMH/APC PCPs and HHs		Project		In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	
Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	
Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	
Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	
Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	
Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	
Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

✓ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. Project 2.b.iv requires various providers and provider types to agree, cooperate, and collaborate in developing and implementing standardized protocols for care transitions. However, these providers currently operate with a diverse set of resources, technology, infrastructure and practices. To enable collaboration, for the development of best practice care transitions and care protocols including the sharing of data across PPS providers, all key stakeholders will be involved in the development and implementation of care protocols (through a clinical subcommittee) to ensure buy-in and engagement. PPS practitioner engagement will be further supported through an overall practitioner engagement strategy and workgroup as well as a bonus/incentive funds flow model.

2. The SI PPS views the project requirement to actively track engaged patients through EHR as a project implementation risk. Many of the providers within the SI PPS do not have EHR at their facilities. This serves as a project implementation risk because it may take significant ramp-up time to implement the systems and begin tracking patients. To mitigate this risk and achieve full project implementation, the SI PPS has made implementing EHR systems a priority among project requirements. As part of the Capital Restructuring Finance Program budget, the SI PPS has requested funds to assist providers without EHR to fully implement these systems. Further the Senior Director of Enterprise Data & Analytics and PPS support staff will work with providers to further facilitate the implementation process.

3. A patient's non-adherence could be related to social and environmental determinants, such as lack of housing or related to behavioral health/substance abuse issues. Many patients identified as being readmitted to the hospital within 30 days have either a behavioral health or substance abuse diagnoses. To mitigate this risk, the PPS will ensure care transitions incorporate culturally appropriate, beneficiary-centric approaches, as well as specific methods to reach ethnically diverse beneficiaries, and incorporate community and social supports including community based organization (CBOs). Further, the PPS will include connections to current health home providers, experienced in supporting high risk populations, including patients with a substance abuse/behavioral health diagnoses in the overall approach. Additionally, PPS providers have identified patients' families as critical to patient compliance to transition protocols including medication adherence and post discharge follow-up with primary care/specialists. As a result, the PPS will involve families in care transition protocols, as needed.

4. The SI PPS has received its total valuation from the DOH and has allocated a portion of funding for this project to support project implementation costs including hiring/training of staff to support the Care Transitions Intervention Model, costs associated with the development of IT infrastructure, and costs related to incentive/bonus payments to providers involved in the project. The PPS has tied funds flow for this project to providers based on meeting specific project milestones within designated time frames. However, the initial budget and funds flow developed did not align with the actual valuation allocated to the PPS and will impact funds flow and funding allocated for project implementation. To ensure project implementation is not impacted, the SI PPS is modifying its implementation strategy and funds flow approach for providers involved in the project. Further, the SI PPS is streamlining appropriate workflows, restructuring project budgets, and building efficiencies across projects to mitigate this risk.

IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY2,Q4	1,000

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4
PPS Reported	Baseline Commitment	0	50	120	200
	Quarterly Update	39	78	539	1,383
	Percent(%) of Commitment		156.00%	449.17%	691.50%

Project 2.b.vii – Implementing the INTERACT project (inpatient transfer avoidance program for SNF)

✓ IPQR Module 2.b.vii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. Project requirements include an expectation that Skilled Nursing Facility providers have EHR in place that meet Meaningful Use requirements and that participating providers are connected to the RHIO (Healthix) to allow for the sharing of health information amongst providers. The SI PPS identifies this as a project risk because a number of participating SNFs do not currently have EHRs in place and have not started the implementation process. To mitigate this risk, the Senior Director of Enterprise Data & Analytics will perform an in-depth IT infrastructure assessment to identify gaps and inform the PPS's strategic IT plan to integrate the PPS providers into a shared IT infrastructure to meet the project requirements, as well as support providers that require assistance in EHR implementation. As part of the Capital Restructuring Finance Program, the SI PPS has requested funds to assist providers in implementing EHR systems.
2. The SI PPS views developing DSRIP reporting processes for PPS providers without EHR and then reworking these processes once EHR is implemented, as potentially creating a significant burden on providers as well as impacting reporting timelines. To support PPS providers with and without EHR, the SI PPS is dedicating staff from the PMO to track projects and provide required reporting documentation and implementing a Project Management Software, Performance Logic, assessable to PPS providers to support management and reporting. Further, the SI PPS plans to support PPS provider participation through incentive payments to assist in alleviating administrative burdens associated with DSRIP reporting.
3. The SI PPS views the completion of quality assessments and root cause analyses of transfer in a timely manner as a risk for implementing Project 2.b.vii. During project implementation meetings, SNF providers identified that the completion of root cause analyses targeted at SNF to hospital transfers will require both significant time and resources and are often inconclusive or provide limited results. To mitigate this risk, the SI PPS plans to collaborate with the SNFs through the Clinical Committee and project implementation teams to identify an efficient approach based on best practices to performing assessments across providers and effectively measuring results to identify additional interventions in efforts to reduce hospital transfers.
4. Patient and families may request transfer to the hospital when the SNF care team does not believe transfer is required. As a result, the INTERACT program will include focused efforts around patient/family education, an important component of the INTERACT toolkit including advanced care planning, to provide guidance around how to communicate with residents and families.
5. The SI PPS recognizes that full implementation of INTERACT principles requires the engagement of all SNF staff, at all levels, including physicians and other clinicians. Full implementation will also require significant time and resources as well as ongoing staff training. If the proper level of training is not achieved across all PPS partners, this will become an implementation risk for Project 2.b.vii. To mitigate this risk, the SI PPS has contracted with an INTERACT training vendor, Continuing Care Leadership Coalition, to support training across the SI PPS, in addition to developing PPS training teams. The Workforce Committee in conjunction with project implementation teams will choose training vendors to

support training across the PPS. Currently, the PPS is developing a contract with 1199 SEIU Training and Development Fund to assist with the identification of training programs as well as the vetting of various training vendors that have been successfully used by key PPS provider stakeholders.

IPQR Module 2.b.vii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task Project Director and PMO Director develops process/timeline for the collection of hospital transfer volume on a quarterly basis.		Project		Completed	09/30/2015	12/31/2015	09/30/2015	12/31/2015	12/31/2015	DY1 Q3
Task SNFs submit high level implementation plan/strategy to PMO including overall approach to implementation of INTERACT 3.0 toolkit and training approach/timeline.		Project		Completed	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task SNFs implement INTERACT at their facility leveraging approved implementation/staff training approach. SNF staff trained in the INTERACT principles/toolkit along with project champion will be responsible for implementing training/toolkit throughout provider site.		Project		In Progress	01/01/2016	09/30/2016	01/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task PMO provides ongoing support to SNFs as necessary, including providing follow up or additional INTERACT training sessions.		Project		In Progress	10/01/2015	03/31/2017	10/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Project Director develops assessment tool and schedule for on-site review/audit of participating SNFS as evidence of implementation of INTERACT toolkit.		Project		In Progress	10/01/2015	09/30/2017	10/01/2015	09/30/2017	09/30/2017	DY3 Q2
Milestone #2 Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.	DY2 Q4	Project	N/A	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Facility champion identified for each SNF.		Provider	Nursing Home	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task SNFs identify staff from organization to serve as facility champions (coach/leader) of the INTERACT program at designated facility.		Project		Completed	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1
Task Facility champions attend INTERACT training session, as needed (June 11 or 12, 2015).		Project		Completed	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1
Task Project Director works with Project Implementation Workgroup to develop role description for facility champion including identifying responsibility in the development of facility specific implementation plan/timeline.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Gain approval of INTERACT facility champion role description from participating SNFs.		Project		In Progress	09/30/2015	09/30/2016	09/30/2015	09/30/2016	09/30/2016	DY2 Q2
Task		Project		In Progress	10/01/2015	03/31/2017	10/01/2015	03/31/2017	03/31/2017	DY2 Q4

DSRIP Implementation Plan Project

Staten Island Performing Provider System, LLC (PPS ID:43)

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Participating SNFs identify facility champion; communicate champions responsibilities as coach/leader at their facility to facilitate INTERACT implementation and adoption of INTERACT 3.0 toolkit; and provide required documentation (CV) to PMO.										
Milestone #3 Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	DY2 Q4	Project	N/A	In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Care pathways and clinical tool(s) created to monitor chronically-ill patients.		Project		In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has developed and implemented interventions aimed at avoiding eventual hospital transfer and has trained staff on use of interventions in alignment with the PPS strategic plan to monitor critically ill patients and avoid hospital readmission.		Project		In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Project Director identifies clinical resource to review and document best practices, standardized care pathways and clinical tools in conjunction with SNF providers and Clinical Committee.		Project		Completed	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task Clinical PMO resource and support staff works with SNFs to collect and document existing protocols and best practices for care pathways and clinical tools used to monitor chronically ill patients including best practices that can be leveraged across providers.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Project Director/support staff identifies industry standard care pathways and clinical tools to monitor chronically ill patients and conducts gap analysis using existing protocols.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task PMO consolidates SNF best practices/protocols and documents methodology for monitoring of chronically ill patients and hospital avoidance.		Project		Completed	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task PMO shares methodology with Clinical Committee for review and approval.		Project		Completed	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task PMO shares methodology with SNFs for review and feedback around training needs.		Project		Completed	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3

Implement INTERACT at each participating SNF, demonstrated by active use of the INTERACT 3.0 toolkit and other resources available at http://interact2.net .	
Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.	
Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	
Educate all staff on care pathways and INTERACT principles.	
Implement Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	
Create coaching program to facilitate and support implementation.	
Educate patient and family/caretakers, to facilitate participation in planning of care.	
Establish enhanced communication with acute care hospitals, preferably with EHR and HIE connectivity.	
Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.	
Use EHRs and other technical platforms to track all patients engaged in the project.

Project 2.b.viii – Hospital-Home Care Collaboration Solutions

IPQR Module 2.b.viii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The implementation of agreed upon evidence-based guidelines and protocols for chronic condition management including training on care pathways by all participating home care providers has been identified as a risk to meeting project goals. The participating home care agencies are currently utilizing varying practices and protocols as well as different systems and tools for the management of at risk patients. However, to successfully implement Project 2.b.viii, all participating home care agencies will need to collaborate and agree upon a set of practices and INTERACT-like principles. In efforts to mitigate this risk, the SI PPS will utilize a clinical subcommittee with participation from all SI PPS home care agencies to establish protocols and procedures as well as assist in the development and implementation of a training strategy across organizations. The project implementation team will develop a roll-out timeline for each homecare agency, and overall, to monitor the speed of implementation across the providers.
2. The SI PPS identified timely implementation of a clinical interoperability system to enhance provider communication and coordination of care as a risk for meeting project requirements and goals. Integration of health data is critical to giving home care providers, primary care physicians, and care managers, among others, necessary information to avoid readmissions. However, the implementation of EHR, as well as building out interoperability capacity and training on the use and sharing of data will take significant time. To mitigate this risk, the SI PPS will work to build out agreed upon interventions and care transition protocols to be used across the SI PPS to begin to meet project goals in advance of meeting interoperability requirements. The Data/IT Committee, through the help of a focused PMO IT support team, will develop and implement a strategic plan to integrate providers' data exchange in the long term (as described in the IT workstream).
3. The SI PPS has received its total valuation from the DOH and has allocated a portion of the funding for this project to support project implementation costs including the hiring/training of additional staff, costs associated with the development of IT infrastructure and the expansion of telehealth capacity, and costs related to incentive/bonus payments to providers involved in this project. However, the initial budget and funds flow that was developed based on an estimated valuation do not align with the actual valuation allocated to the PPS and will impact funds flow and the funding allocated towards project implementation. To mitigate this risk and ensure project implementation is not impacted and that project milestones are met, the SI PPS is modifying its implementation strategy and funds flow approach for providers involved in this project. Further anticipating this risk, the SI PPS has included requests for the expansion of telehealth/telemedicine in its Capital Restructuring and Financing Program request to further support the goals of this project.

IPQR Module 2.b.viii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY2,Q4	250

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4

Milestone Name	Narrative Text
Assemble Rapid Response Teams (hospital/home care) to facilitate patient discharge to home and assure needed home care services are in place, including, if appropriate, hospice.	
Ensure home care staff have knowledge and skills to identify and respond to patient risks for readmission, as well as to support evidence-based medicine and chronic care management.	
Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	
Educate all staff on care pathways and INTERACT-like principles.	
Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	
Create coaching program to facilitate and support implementation.	
Educate patient and family/caretakers, to facilitate participation in planning of care.	
Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management.	
Utilize telehealth/telemedicine to enhance hospital-home care collaborations.	
Utilize interoperable EHR to enhance communication and avoid medication errors and/or duplicative services.

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

✓ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The SI PPS has set a significant goal to engage 80,000 uninsured and non/low utilizing Medicaid patients by DY4. This goal is close to the total number of all Medicaid patients over the age of 18 on Staten Island. Including super-utilizers, patients with multiple chronic conditions and patients eligible for Health Home at risk are all important subsets for engaging in care. To meet this goal, the SI PPS will train 250 people in PAM and develop partnerships with CBOs to assist in patient activation activities. The SI PPS has 37 people trained in PAM and it will require significant effort to develop a PAM team. The SI PPS will need to execute a coordinated strategy to implement PAM measures, connect patients to healthcare and social services and develop a system to track implementation progress. To mitigate this risk, the SI PPS will include key PAM providers on its Governance Committees including the Clinical, Data/IT, Finance, and Workforce Committees to ensure that measures are in place to effectively track and incentivize CBOs and providers to meet implementation timelines.
2. In order to increase the volume of non-emergent primary, behavioral and dental care provided to the uninsured and non/low utilizing Medicaid patients, the SI PPS will expand its primary care and behavioral health outpatient capacity, infrastructure, and staffing. The SI PPS has included capital projects through the Capital Restructuring Finance Program for expanding primary care and behavioral health outpatient capacity and to serve the uninsured. These include significant expansion of FQHCs, hospital outpatient behavioral health practices and other behavioral health sites. If adequate funding is not received, the SI PPS's ability to meet deadlines and serve engaged patients will be impacted. To mitigate this risk, the SI PPS has included multiple capital projects and prioritized these projects in the PPS's application as well as included funding within its funds flow approach to support expansion including recruitment, implementation costs, and incentive payments for PCPs.
3. There is a risk that targeted patients will be reluctant to participate in PAM surveys and connect to primary care. Staten Island is comprised of an ethnically diverse population, presenting linguistic and cultural barriers for many residents attempting to self-manage care, and navigate the healthcare system. To mitigate this risk the SI PPS will develop culturally competent and linguistically appropriate education materials and health literacy strategies for this highly diverse population. Further, providers and CBOs that are already serving these populations will be primarily responsible for engaging these patients to increase population participation.
4. The SI PPS has received its total valuation from DOH and has allocated a portion of funding for this project to support implementation costs including the hiring/training of community health workers, the development of IT infrastructure, and incentive/bonus payments to providers participating in the project. A potential risk to project implementation is the availability of funds to properly compensate and incentivize community providers engaging patients in PAM, given the large actively engaged commitments and limitation in valuation funding. To mitigate this risk, the SI PPS has developed a funds flow model that includes salary support where needed, but also provides payments "per PAM" to providers engaging patients. The SI PPS is working with providers to implement PAM within current workflows to gain implementation efficiencies as well as partner with providers experienced in community outreach and patient engagement.

☑ IPQR Module 2.d.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale

Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	
Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	
Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	
Survey the targeted population about healthcare needs in the PPS' region.	
Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	
Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). <ul style="list-style-type: none"> This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. Work with respective MCOs and PCPs to ensure proactive outreach to

beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	
Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	
Include beneficiaries in development team to promote preventive care.	
Measure PAM(R) components, including: <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 	
Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.

Milestone Name	Narrative Text
Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	
Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	
Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	
Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	
Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	
Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.

Project 3.a.i – Integration of primary care and behavioral health services

✓ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The project requirement for all participating PCPs to meet NCQA 2014 Level 3 PCMH standards by DY3 is identified as a risk to achieving project implementation. Although many PCPs have met old NCQA PCMH standards, some still lack EHR or are early in the medical home transformation process. To mitigate this risk, the SI PPS is developing PCMH implementation plans and will provide PCPs with centralized resources, training, and technical assistance. The SI PPS will also track progress and contract with vendors for support, as needed.
2. A key risk is the existing regulatory and financial framework which presents barriers to co-locating primary care and behavioral health services. To mitigate this risk, the SI PPS has requested waivers to allow for the provision of medical services at Article 31/32 providers, as well as the provision of behavioral health/substance abuse services in Article 28 clinics. Partners have begun to assess their need to pursue the integrated licensure being made available through DSRIP.
3. The SI PPS views prevailing attitudes and social stigma related to behavioral health services as a project risk to achieving integration goals. Existing primary care patients who are referred behavioral health services as a result of screenings conducted at PCMH sites, may not utilize these services due to negative social stigma associated with these services, or may not agree to the initial screening. To mitigate this risk, the project implementation team, in conjunction with the Clinical Committee and Workforce Implementation Team will develop and implement training for providers around co-location designed to help providers address stigma around these services, helping to ensure effective warm hand-offs and patient engagement.
4. The use of EHR to track engaged patients, document preventative care screenings, and integrate behavioral health and medical records is a project risk for PPS providers who do not currently have EHR or the ability to integrate records. The SI PPS recognizes this risk and will develop a strategic IT integration plan with interim steps for providers without her to ensure integration with the RHIO (Healthix). Additionally, as part of the Capital Restructuring Finance Program budget, the SI PPS has requested funds to assist providers without EHR to fully implement these systems.
5. In order to co-locate primary care services into behavioral health and substance abuse sites as well as co-locate behavioral health/substance abuse services at primary care sites, PPS providers will need to expand and renovate current facilities as well as build out staffing capacity. Within the Capital Restructuring Finance Program, the SI PPS has included numerous capital projects to support the co-location of primary care and behavioral health/substance abuse services, including expanding/renovating outpatient behavioral health and substance abuse facilities to integrate primary care as well as expanding/renovating primary care locations to allow for the integration of behavioral health services. If the Capital Restructuring Finance Program does not provide funding for this project, the SI PPS's ability to meet project deadlines and serve patients engaged through this project may be put at risk. To mitigate this risk, the SI PPS has also included multiple capital projects across various providers, to allow providers to serve recently engaged patients as the project progresses into later DSRIP years. Further, the SI PPS will include funding through its funds flow model to support co-location as well as the recruitment of physicians and an incentive system for primary care

IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Project 3.a.iv – Development of Withdrawal Management (e.g., ambulatory detoxification, ancillary withdrawal services) capabilities and appropriate enhanced abstinence services within community-based addiction treatment programs

✓ IPQR Module 3.a.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation this project:

1. Throughout the DSRIP planning phase, SI PPS substance abuse providers expressed concerns around the ability to recruit practitioners with the skill set required to implement this project successfully. Specifically, those providers believe it will be difficult to recruit a project medical director (board certified in addiction medicine) and additional staff needed to expand ambulatory detox/withdrawal management. To mitigate this risk, the SI PPS has allowed time for recruitment in project implementation timelines and is supporting recruitment efforts through resources and funds flow. The PPS project funds flow estimates include the allocation of additional funds to substance abuse providers to support recruitment efforts as well as support additional salaries for new positions. The SI PPS will also provide workforce/HR staff to assist PPS partners in recruitment efforts. Further, the SI PPS is considering developing partnerships with local colleges to develop training programs to support current and future staffing/certification needs for Project 3.a.iv.

2. Currently, Medicaid Managed Care Organizations (MCOs) have put limitations on reimbursement which impact substance abuse providers' ability to obtain authorization for Suboxone and other medications to treat patients in ambulatory detox. To mitigate this risk the SI PPS will involve MCOs in the development of best practices and care standards around ambulatory detox procedures to ensure care practices and protocols are in line with reimbursement agreements and to promote project care goals. Additionally, the Finance Committee, Finance Director and value based payment workgroup will work with the project implementation team to develop strategies for an MCO approach related to ambulatory detox.

3. Project requirements set the expectation that SI PPS providers have EHR systems in place that are connected to the RHIO (Healthix) to allow for sharing of health information amongst providers. The SI PPS has identified this as a project implementation risk as many of the PPS providers do not have EHR which limits their ability to fully integrate into the RHIO and track patients. To mitigate this risk, the SI PPS has made implementing EHR systems a priority among all project requirements. As part of the Capital Restructuring Finance Program (CRFP) the SI PPS has requested funds to assist providers without EHR to fully implement these systems. Further, the SI PPS PMO's Senior Director of Enterprise Data & Analytics will work with providers who identify EHR implementation as a risk to help facilitate the implementation process.

4. The SI PPS has identified that there is limited ambulatory detox capacity on Staten Island which requires significant expansion to support the goals of this project. Anticipating this need, the SI PPS has included capital projects in the CRFP to support expansion of ambulatory detox capacity. However, if the CRFP does not provide funding to support all of these projects (across multiple substance abuse providers), this may limit the SI PPS's ability to meet project deadlines and serve patients engaged through this project. To mitigate this risk, the SI PPS has included multiple capital projects and will allow flexibility in its implementation plan based on providers that are able to expand capacity through capital financing and other means within project timeframes. Some providers may not be able to expand until later DSRIP years and the PPS has included this risk in project planning strategies. Additionally, as required, the SI PPS will include funding through its funds flow model to support the expansion of ambulatory detox capacity including necessary facility renovations.

IPQR Module 3.a.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Staten Island Performing Provider System, LLC (PPS ID:43)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Include a project medical director, board certified in addiction medicine, with training and privileges for use of buprenorphine and buprenorphine/naltrexone as well as familiarity with other withdrawal management agents.	
Identify and link to providers approved for outpatient medication management of opioid addiction who agree to provide continued maintenance therapy and collaborate with the treatment program and care manager. These may include practices with collocated behavioral health services, opioid treatment programs or outpatient SUD clinics.	
Develop community-based withdrawal management (ambulatory detoxification) protocols based upon evidence based best practices and staff training.	
Develop care management services within the SUD treatment program.	
Form agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.	
Use EHRs or other technical platforms to track all patients engaged in this project.

Project 3.c.i – Evidence-based strategies for disease management in high risk/affected populations (adults only)

✓ IPQR Module 3.c.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The ability to engage 80 percent of PCPs in disease management evidence-based practices is viewed as a risk for meeting project requirements because it will require significant practitioner engagement and adoption of established protocols. Further, project success is dependent on further practitioner engagement in care coordination teams. To ensure practitioner engagement in disease management practices, the SI PPS will include representatives from practitioner groups in the development of the strategy to ensure buy in. To further mitigate this risk, the SI PPS will also develop a comprehensive practitioner engagement strategy to support project implementation (see practitioner engagement workstream). The SI PPS is also in the process of drafting operating agreements for all involved PPS partners to clearly define providers' roles, performance/reporting requirements, and the funds flow process to incentivize providers to meet project requirements.

2. Project requirements related to EHR use including actively tracking engaged patients, connecting to the RHIO (Healthix,) and meeting meaningful use Stage 2 CMS requirements are viewed as risks to achieving full project implementation within the established timelines. Full project implementation will require PPS providers to have a fully implemented EHR system in place to effectively track patients, report when patients are due for preventative services, and measure program effectiveness through project milestone reporting. During the planning phase of the DSRIP program, the SI PPS performed a high-level IT assessment to understand current IT capabilities of its PPS providers. The assessment indicated that a subset of PPS providers do not have EHR. This serves as a project implementation risk because it may take significant time for PPS providers without EHR to implement the systems and begin to actively track patients. To mitigate this risk and achieve full project implementation, the SI PPS has made implementing EHR systems a priority among project requirements. As such, the SI PPS will develop an IT integration strategic plan, which includes interim steps for PPS providers without EHR systems, to integrate them with the RHIO. As part of the Capital Restructuring Finance Program budget, the SI PPS has requested funds to assist providers without EHR to fully implement these systems. Through its Data/IT Committee, the SI PPS is working with providers to further facilitate the implementation process.

3. The project requirement for all participating PCPs to meet NCQA 2014 Level 3 PCMH standards by DY3 is identified as a risk to achieving project implementation. Although many PCPs have met old NCQA PCMH standards, some still lack EHR or are early in the medical home transformation process. To mitigate this risk, the SI PPS is developing PCMH implementation plans and will provide PCPs with centralized resources, training, and technical assistance. The SI PPS will also track progress and contract with vendors for support, as needed.

IPQR Module 3.c.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	
Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.	
Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.	
Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.	
Ensure coordination with the Medicaid Managed Care organizations serving the target population.	
Use EHRs or other technical platforms to track all patients engaged in this project.	
Meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3 for EHR systems used by participating safety net providers.

Project 3.g.ii – Integration of palliative care into nursing homes

✓ IPQR Module 3.g.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. This project requires the adoption of standardized service definitions and eligibility for palliative care across all participating skilled nursing facilities (SNFs). The SI PPS views varying definitions of palliative care services as a project risk. To mitigate this risk, the project implementation team will establish well-defined clinical guidelines by coordinating clinical teams and engaging with Managed Care Organizations (MCOs) around palliative care protocols and reimbursement. Further, the SI PPS will establish centralized training teams through the Workforce Committee and workforce implementation team to develop and implement a training plan to ensure clear and accepted palliative care use across the SI PPS.
2. The SI PPS has identified concern around recruitment of skilled palliative care practitioners to implement this project successfully. To mitigate this risk, the SI PPS has allowed time for recruitment in implementation timelines and is supporting recruitment efforts through resources and funds flow. The SI PPS will provide Workforce/HR staff to assist PPS partners in recruitment efforts and is considering partnering with local colleges to develop training programs to support current and future staffing/certification needs.
3. SI PPS providers have identified concerns around payment for services under MCOs. Currently there are limitations for billing of palliative care/hospice services provided by SNFs. To mitigate this risk, the SI PPS, through project implementation teams and the Finance Director/Finance Committee, will work with MCOs to develop a short/long term approach around palliative care reimbursement including pilot studies for reimbursement models. The PPS has also included funding for costs of services not covered.
4. During project implementation meetings, SNF providers discussed project deliverables around the use of DOH-5003 MOLST forms as a risk and expressed concern about the necessity/impact of using the MOLST form as opposed to other evidence-based practices. To mitigate this risk the SI PPS will utilize the Clinical Committee and project implementation team to better define practices and guidelines in line with project goals around the MOLST form.
5. Project requirements set the expectation that SI PPS providers have EHR systems in place that meet Meaningful Use requirements, are connected to the RHIO (Healthix), and are sharing health information across providers. This is a project risk as a number of SNFs do not have EHR or are just now starting the implementation process. To mitigate this risk, the SI PPS PMO's Senior Director of Enterprise Data & Analytics will perform a more in-depth IT infrastructure assessment and identify gaps to inform the IT Committee's strategic plan to integrate PPS providers into a shared IT infrastructure. Further, as part of the Capital Restructuring Finance Program, the SI PPS has requested funds to assist providers in implementing EHR.
6. The SI PPS views developing DSRIP reporting processes for PPS providers without EHR and then reworking these processes once EHR is implemented, as potentially creating a significant burden on providers as well as impacting reporting timelines. To support PPS providers with and without EHR, the SI PPS is dedicating staff from the PMO to track projects and provide required reporting documentation and implementing a

IPQR Module 3.g.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Integrate Palliative Care into practice model of participating Nursing Homes.	
Contract or develop partnerships with community and provider resources, including Hospice, to bring the palliative care supports and services into the nursing home.	
Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	
Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	
Engage with Medicaid Managed Care to address coverage of services.	
Use EHRs or other IT platforms to track all patients engaged in this project.

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementing this project:

1. The availability of patient-level data on the Medicaid attributed population with mental, emotional, behavioral health, and substance abuse issues is a key risk for the SI PPS in successfully implementing Project 4.a.iii. To mitigate this risk and ensure project success, the SI PPS is building upon existing partnerships with the Office of Mental Health and Office of Alcoholism and Substance Abuse Services, as well as PPS providers and existing behavioral health/substance abuse coalitions including the Staten Island Partnership for Community Wellness to identify project data needs and is developing infrastructure for data collection and reporting.
2. Domain 4 projects do not require the scale and speed commitments of the domain 2/3 projects. As a result, the PPS does not have similar project milestones and timelines to motivate initial project implementation success. To mitigate this risk the PPS has developed project implementation plans/timelines to track project milestones and PPS providers. Further, the SI PPS's PMO in conjunction with the Performance Monitoring Workgroup will develop performance metrics to effectively track project implementation. Further, the PPS will utilize the funds flow to incentive providers around the implementation of Domain 4 projects, as well as progress towards Domain 4 outcomes metrics.
3. The ability to recruit needed practitioners including psychiatrists, social workers, and Credentialed Alcoholism and Substance Abuse Counselors (CASAC), among others, to strengthen mental health and substance infrastructure and support collaborative care in primary care settings is a project risk. In order to strengthen the infrastructure to support this and other behavioral health/substance abuse projects as well as promote mental health and prevent substance abuse to improve the health of the population, new hires are required across providers. To mitigate this risk, the SI PPS has built in time for recruitment in the project timelines. The SI PPS is also considering developing partnerships with local colleges to develop training programs to support current and future staffing needs. The SI PPS will further support recruitment efforts on behalf of PPS partners by providing additional resources and funds for recruitment efforts through the funds flow model.
4. The SI PPS, through the Diversity and Inclusion Committee and Clinical Committee will address a project risk related to the development of a MEB health promotion programs to specifically address the specific needs/characteristics of patients with mental health and substance abuse diagnoses that may face language, cultural, financial, and education barriers and have inherent difficulties with compliance to treatment protocols and medication management. Further the PPS is in the process of recruiting a Diversity and Health Literacy professional to support this process.

DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

Project 4.b.ii – Increase Access to High Quality Chronic Disease Preventive Care and Management in Both Clinical and Community Settings (Note: This project targets chronic diseases that are not included in domain 3, such as cancer)

✓ IPQR Module 4.b.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The SI PPS views the following as major risks for implementation:

1. The implementation of a population-focused program to achieve the overall development and expansion of quality chronic disease preventive care and management requires the adoption of a comprehensive approach and the involvement of the PPS network and other key community stakeholders. To ensure the success of this approach, and because Project 4.b.ii does not have speed and scale requirements, the SI PPS is developing operating agreements for all PPS providers to ensure that partners are engaged, understand their roles in meeting DSRIP goals, and project implementation reporting requirements. Responsibilities established in operating agreements will be tied to a funds flow and incentive model. To further facilitate coordination, the SI PPS is utilizing a centralized, collaborative structure for program design and implementation to ensure that all involved parties have an opportunity to contribute to and provide feedback on the programs that are created to achieve project goals. The SI PPS is also pursuing partnerships with key community stakeholders already involved in comparable programs to help further mutual goals.
2. There are numerous cultural, health literacy, and financial barriers that exist for all populations across Staten Island. These barriers impact patients' ability to navigate the healthcare system and connect to primary, preventive care and disease management services. To address this risk, the SI PPS will utilize the resources developed for Project 2.d.i. to engage all residents and educate them about appropriate services. Further, the Diversity and Inclusion Committee and the Director of Health Literacy and Cultural Competency will work with project implementation teams to develop strategies to target hard to reach populations that might not otherwise engage in primary and preventive care. The SI PPS will also rely on providers currently serving the needs of targeted populations to engage them in project activities.
3. In order to increase the volume of non-emergent primary care as well as prevention and management services being provided, the SI PPS will need to significantly expand primary care capacity through infrastructure development and additional staffing. To assist in this effort, the SI PPS has included capacity expansion projects as part of the Capital Restructuring Finance Program. Further, through its Workforce Committee, the SI PPS is developing a recruitment strategy to support preventive care expansion.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'Staten Island Performing Provider System, LLC ', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

Staten Island Performing Provider System, LLC (PPS ID:43)

Project ID	Module Name / Milestone #	Review Status	
2.a.iii	Module 2.a.iii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.a.iii.3 - Prescribed Milestones		
	Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	Pass & Ongoing	
	Milestone #2 Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	Pass & Ongoing	
	Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Pass & Ongoing	
	Milestone #4 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Ongoing	
	Milestone #5 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Pass & Ongoing	
	Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Pass & Ongoing	
	Milestone #8 Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Pass & Ongoing	
2.b.iv	Module 2.b.iv.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.iv.3 - Prescribed Milestones		
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Ongoing	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Ongoing	
	Milestone #3 Ensure required social services participate in the project.	Pass & Ongoing	
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Ongoing	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Ongoing	
	Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
2.b.vii	Module 2.b.vii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.vii.3 - Prescribed Milestones		
	Milestone #1 Implement INTERACT at each participating SNF, demonstrated by active use of the INTERACT 3.0 toolkit and other resources available at http://interact2.net .	Pass & Ongoing	
	Milestone #2 Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.	Pass & Ongoing	
	Milestone #3 Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	Pass & Ongoing	
	Milestone #4 Educate all staff on care pathways and INTERACT principles.	Pass & Ongoing	
	Milestone #5 Implement Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	Pass & Ongoing	
	Milestone #6 Create coaching program to facilitate and support implementation.	Pass & Ongoing	
	Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.	Pass & Ongoing	
	Milestone #8 Establish enhanced communication with acute care hospitals, preferably with EHR and HIE connectivity.	Pass & Ongoing	
	Milestone #9 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.	Pass & Ongoing	
2.b.viii	Milestone #10 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
	Module 2.b.viii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.viii.3 - Prescribed Milestones		
	Milestone #1 Assemble Rapid Response Teams (hospital/home care) to facilitate patient discharge to home and assure needed home care services are in place, including, if appropriate, hospice.	Pass & Ongoing	
	Milestone #2 Ensure home care staff have knowledge and skills to identify and respond to patient risks for readmission, as well as to support evidence-based medicine and chronic care management.	Pass & Ongoing	
	Milestone #3 Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	Pass & Ongoing	
	Milestone #4 Educate all staff on care pathways and INTERACT-like principles.	Pass & Ongoing	
Milestone #5 Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Staten Island Performing Provider System, LLC (PPS ID:43)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #6 Create coaching program to facilitate and support implementation.	Pass & Ongoing	
	Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.	Pass & Ongoing	
	Milestone #8 Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management.	Pass & Ongoing	
	Milestone #9 Utilize telehealth/telemedicine to enhance hospital-home care collaborations.	Pass & Ongoing	
	Milestone #10 Utilize interoperable EHR to enhance communication and avoid medication errors and/or duplicative services.	Pass & Ongoing	
	Milestone #11 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.	Pass & Ongoing	
	Milestone #12 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
2.d.i	Module 2.d.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.d.i.3 - Prescribed Milestones		
	Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Pass & Ongoing	
	Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	Pass & Ongoing	
	Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	Pass & Ongoing	
	Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.	Pass & Ongoing	
	Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	Pass & Ongoing	
	Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	Pass & Ongoing	
	Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	Pass & Ongoing	
	Milestone #8 Include beneficiaries in development team to promote preventive care.	Pass & Ongoing	
Milestone #9 Measure PAM(R) components, including: • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot	Pass & Ongoing

Project ID	Module Name / Milestone #	Review Status	
	<p>spot" area for health service.</p> <ul style="list-style-type: none"> • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 		
	Milestone #10 Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	Pass & Ongoing	
	Milestone #11 Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	Pass & Ongoing	
	Milestone #12 Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	Pass & Ongoing	
	Milestone #13 Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	Pass & Ongoing	
	Milestone #14 Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	Pass & Ongoing	
	Milestone #15 Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	Pass & Ongoing	
	Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	Pass & Ongoing	
	Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.	Pass & Ongoing	
3.a.i	Module 3.a.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.a.i.3 - Prescribed Milestones		
	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Ongoing	
	Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing

		Module 3.a.iv.3 - Prescribed Milestones		
Milestone #1 Develop community-based addiction treatment programs that include outpatient SUD sites with PCP integrated teams, and stabilization services including social services.		Pass & Ongoing		
Milestone #2 Establish referral relationships between community treatment programs and inpatient detoxification services with development of referral protocols.		Pass & Ongoing		
Milestone #3 Include a project medical director, board certified in addiction medicine, with training and privileges for use of buprenorphine and buprenorphine/naltrexone as well as familiarity with other withdrawal management agents.		Pass & Ongoing		
Milestone #4 Identify and link to providers approved for outpatient medication management of opioid addiction who agree to provide continued maintenance therapy and collaborate with the treatment program and care manager. These may include practices with colocated behavioral health services, opioid treatment programs or outpatient SUD clinics.		Pass & Ongoing		
Milestone #5 Develop community-based withdrawal management (ambulatory detoxification) protocols based upon evidence based best practices and staff training.		Pass & Ongoing		
Milestone #6 Develop care management services within the SUD treatment program.		Pass & Ongoing		
Milestone #7 Form agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.	Pass & Ongoing

Project ID	Module Name / Milestone #	Review Status	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
3.c.i	Module 3.c.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.c.i.3 - Prescribed Milestones		
	Milestone #1 Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	Pass & Ongoing	
	Milestone #2 Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.	Pass & Ongoing	
	Milestone #3 Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.	Pass & Ongoing	
	Milestone #4 Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.	Pass & Ongoing	
	Milestone #5 Ensure coordination with the Medicaid Managed Care organizations serving the target population.	Pass & Ongoing	
	Milestone #6 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #7 Meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3 for EHR systems used by participating safety net providers.	Pass & Ongoing	
3.g.ii	Module 3.g.ii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.g.ii.3 - Prescribed Milestones		
	Milestone #1 Integrate Palliative Care into practice model of participating Nursing Homes.	Pass & Ongoing	
	Milestone #2 Contract or develop partnerships with community and provider resources, including Hospice, to bring the palliative care supports and services into the nursing home.	Pass & Complete	
	Milestone #3 Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	Pass & Ongoing	
	Milestone #4 Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	Pass & Ongoing	
	Milestone #5 Engage with Medicaid Managed Care to address coverage of services.	Pass & Ongoing	
Milestone #6 Use EHRs or other IT platforms to track all patients engaged in this project.	Pass & Ongoing		
4.a.iii	Module 4.a.iii.2 - PPS Defined Milestones	Pass & Ongoing	
4.b.ii	Module 4.b.ii.2 - PPS Defined Milestones	Pass & Ongoing
