NEW YORK STATE | Department of Health

NY Medicaid EHR Incentive Program LISTSERV

September 23, 2021

Audit Report Card Download Reminder

To ensure program participants (Eligible Professionals (EPs) and Eligible Hospitals (EHs)) have access to their most accurate and up to date information regarding their registry reporting status, we encourage all Registration and Alternate contacts to review their Audit Report Card in Meaningful Use Registration for Public Health (MURPH) system.

Following the close of the MURPH system on **December 31st, 2021** your Audit Report Card will serve as the main source of proof for your engagement status with any registries housed in this system. For this reason, it is important to **download and save this documentation** in a secure location in case it is needed for a Post-Payment Audit. We recommend that these actions be taken **as soon as possible**, especially for large organizations, as it can be time consuming to download each individual* report card for Eligible Professionals.

Please note that our support staff cannot provide the Audit Report Card to you, nor is there a function to batch download all individual EP Audit Report Cards for your organization. Each Audit Report Card must be downloaded individually by the Registration or Alternate Contact for the practice.

Environmental Scan Survey

As the program comes to a close, the NY Medicaid EHR Incentive program is looking for your feedback. A final Environmental Scan Survey is being conducted to gather information about participant experience in the program, with a version for Eligible Professionals (EPs) and a separate version for Eligible Hospitals (EHs). The survey can be accessed online via SurveyMonkey using the included links.

The response deadline for the survey has also recently been extended. Responses will now be collected until **September 30th, 2021.** Participation is strongly encouraged, and all published data gained from these surveys will be compiled anonymously.
