NY Medicaid EHR Incentive Program LISTSERV

October 28, 2021

Security Risk Analysis

For Payment Year (PY) 2021, providers were able to state that they would complete their Security Risk Analysis (SRA) after they submitted their attestation in MEIPASS. If you or your practice selected this option, please keep in mind the final deadline to complete the SRA is **December 31st, 2021**. If you have not completed an SRA by this date, you will not be considered eligible for the incentive payment for PY2021.

In addition to ensuring that your SRA is completed by the deadline, please also ensure that you retain detailed documentation regarding the completion of the analysis to prepare for the possibility of Post-Payment Audit. This includes the analysis itself, the name of the person or entity completing the analysis, and that person or entity's relationship to the organization.

If you find that your practice will not be able to complete the SRA before the end of the year, please contact our support team using the contact information at the bottom of this communication. They will provide assistance and next steps based on your situation.

CMS Registration Updates

If you need to update your contact information (physical address, payee information, email address, etc.) in the CMS Registration and Attestation System, please do so today. It can take time for this information to appear in MEIPASS, and you will need to resubmit your attestation when it does.

If you need to make updates and have questions regarding this, please contact our support team.
