Information Blocking

I have not knowingly and willfully taken action (such as to disable functionality) to limit or restrict the compatibility or interoperability of certified EHR technology. I have implemented technologies, standards, policies, practices and agreements reasonably calculated to ensure, to the greatest extent practicable and permitted by law, that the certified EHR technology was, at all relevant times -

i. Connected in accordance with applicable certification criteria.
ii. Compliant with all standards and certification criteria for the exchange of information, including the standards, implementation specifications, and certification criteria applicable to 45 CFR part 170;
iii. Implemented in a manner that allowed for timely access by patients to their electronic health information; and
iv. Implemented in a manner that allowed for the timely, secure, and trusted bi-directional exchange of structured electronic health information with other health care providers (as defined by 42 U.S.C. 300jj (3)), including unaffiliated providers, and with disparate certified EHR technology and vendors.
