Appendix C. Regional Spending Data	25
Appendix D. State-Only Payments (YTD)	26
Appendix E. Medicaid Drug Cap	27
Appendix F. Additional Information	28

Overview

The Medicaid Global Spending Cap increased from \$22.3 billion in Fiscal Year (FY) 2022 to \$25.9 billion in FY 2023, a net increase of \$3.6 billion. The FY 2023 Enacted Budget included the modification of the Global Cap metric moving from the 10-year rolling average of the medical component of the Consumer Price Index (CPI) to the 5-year rolling average of the Medicaid annual growth rate within the National Health Expenditure Accounts produced by the Office of the Actuary in the Centers for Medicare and Medicaid Services (CMS).¹

This net increase primarily includes the updated Global Cap index growth of \$966 million (currently 4.7 percent trend), increased costs for minimum wage rate adjustments (\$262M), including the FY 2023 Enacted Budget Home Care minimum wage increases (\$363M), which is offset by Home and Community Based Services (HCBS) eFMAP (-\$363M), and the annual change in COVID-19 enhanced Federal Medical Assistance Percentage (eFMAP) (\$2.5 billion).

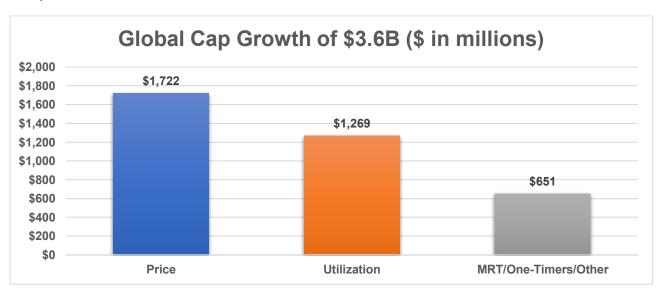

No changes were made to the FY 2023 Global Cap Target between the Financial Plan's Enacted Budget and the First Quarter Update.

Anticipated DOH Medicaid Spending Outside the Medicaid Global Cap Index:

(\$ millions)	FY22	FY23	\$ Change
Medicaid Global Cap Index	\$20,572	\$21,538	\$966
Medicaid Local Growth Takeover	\$1,465	\$1,648	\$183
Minimum Wage	\$1,961	\$2,223	\$262
Home Care Minimum Wage	\$0	\$363	\$363
Use of HCBS eFMAP	\$0	(\$363)	(\$363)
Medicaid Administration/Other	\$643	\$387	(\$256)
Health Conversion For-Profit Tax	\$261	\$261	\$0
Federal Health Care Reform	(\$120)	(\$120)	\$0
COVID eFMAP*	(\$2,487)	\$0	\$2,487
DOH Medicaid w/ Essential Plan	\$22,295	\$25,937	\$3,642

^{*}Additional COVID eFMAP passing through the Mental Hygiene Stabilization Fund. COVID eFMAP results in a cost shift from State to Federal funds, and does not result in a Medicaid program reduction.

The chart below breaks out the major components of the annual increase including higher costs associated with both price and utilization increases.

¹ https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and Reports/NationalHealthExpendData/NationalHealthAccountsProjected

Price (\$1.7B): Components of price growth include:

- Trend increases for Mainstream Managed Care rates (\$439M);
- Trend decreases for Long Term Managed Care rates (-\$70M);
- Directed Payment Template (DPT) payments to provide funding increases to financially distressed providers (\$581M);
- Home Care Minimum Wage (\$363M); and
- Various increases for fee-for-service (FFS) rates (\$355M).

<u>Utilization (\$1.3B):</u> The Medicaid Global Cap is currently assuming that Medicaid enrollment is projected to decrease by 76,000 New Yorkers or 1.0 percent, decreasing from 7.6 million enrollees as of March 2022 to 7.5 million enrollees by March 2023. This decline is in large part due to the assumption included in the First Quarterly Update to the Financial Plan that the COVID-19 pandemic public health emergency (PHE) would have expired on October 13th, 2022.² Due to the maintenance of effort requirements under the Families First Coronavirus Response Act (FFCRA), which has precluded most forms of involuntary disenrollment from Medicaid (e.g., eligibility redeterminations), and attendant loss of employer-sponsored coverage or changes in income, there will be continued growth in Medicaid enrollment through the end of the calendar year. Components of utilization growth include:

- Mainstream Managed Care enrollment including HIV Special Needs Plans (SNPs) & Health and Recovery Plans (HARPs) are projected to increase by approximately 257,000 individuals from March 2022 through the end of December 2022. Starting in January 2023, enrollment is projected to begin decreasing toward pre-pandemic levels by approximately 340,000 through the end of March 2023, resulting in an overall net decrease of 83,000 individuals for FY 2023.
- Long Term Managed Care enrollment is projected to increase 29,000 individuals (10.1 percent); and
- Utilization of services is expected to partially, but slowly, return to pre-COVID-19 levels in acute care, nursing homes, and transportation fee-for-service categories of spending. However due to the assumption that the PHE would have expired on October 13th, the total number of FFS recipients are expected to decrease by 22,000.

<u>Medicaid Redesign Team (MRT) II/One-Timers/Other (\$651M):</u> MRT budget actions, one-time costs/savings, or other payments that do not fall into price or utilization primarily include:

- Additional investments allocated to several groups of hospitals, to support operating needs while providers implement pandemic transformation plans (\$800M);
- Health Care and Direct Care Workers Bonuses (\$1.05B)
- Increases to Medicaid operating rates across-the-board (ATB) by an additional 1 percent to respond to market needs and compete in the labor market to attract qualified workers (\$318M):
- Restorations of the 1.5 percent ATB payment reduction that was originally effectuated on April 2, 2020 (\$141M);
- Allocated pools for distressed hospitals and nursing homes (\$200M);
- Home Care Minimum Wage HCBS eFMAP Offset (-\$363M);

² As of the date of this Report, HHS has extended the PHE from January 13th through April 11th, which provides an additional quarter of eFMAP through the end of June 2023.

- Supplemental Federal Revenue (i.e., 6% eFMAP) for Community First Choice Option (CFCO) services to
 expand home and community—based services and supports to individuals in need of long term care for
 help with everyday activities and health—related tasks that can be performed by an aide or direct care
 worker (-\$450M); and
- Health Care and Direct Care Workers Bonuses Offset with Financial Plan General Fund resources (-\$1.05B).

Projected Medicaid Spending (Medicaid Claims, Supplemental Programs & Offsets)

The \$25.9 billion projected Medicaid State Funds Spending can be organized into three major components:

- <u>Medicaid Claims:</u> Health care provider claim spending reflects the cost of FFS care and Managed Care capitation payments based on the price and utilization of services by sector (i.e., categories of spending) of the Medicaid program (e.g., hospitals, nursing homes, managed care, long-term care, pharmacy, transportation, etc.). These payments occur weekly **within** the Medicaid claiming system (eMedNY).
 - Projections for most categories of spending begin with the number of eligible recipients reported at the end of the previous fiscal year and the average spending per recipient for that period. Adjustments to spending projections are then made for anticipated rate (i.e., price) changes, transitions of populations/benefits to managed care (if any), fluctuations in the amount and type of service units (i.e., utilization), and any non-recurring or one-time payments/credits.
- <u>Supplemental Programs:</u> Payments through administrative or intergovernmental financial mechanisms occur <u>outside</u> the eMedNY billing system, such as Disproportionate Share Hospital (DSH), Upper Payment Limit (UPL), Medicare Clawback Part D, Medicare Supplemental Medical Insurance (SMI) Part A/B, Medicaid Local District Social Services Administration and State Operations. These supplemental programs are projected on an individual basis according to their historical spending trends and/or latest programmatic information.
- Offsets: Additional financial resources are used to offset State Medicaid, such as additional Federal
 funding, audit collections, drug manufacturer rebates, and Local County contributions, all of which also
 occur outside the eMedNY billing system. These offsets are projected on an individual basis according
 to their historical spending trends and/or latest programmatic information.

Forecasting Methodology/Data:

- State Medicaid disbursements are forecasted on a cash basis and updated on a quarterly basis, consistent with the schedule for revising the State's Financial Plan.
- The Medicaid forecast involves an evaluation of all major spending categories using a specific approach, depending on whether expenditures are based on monthly plan premiums for Managed Care or weekly feefor-service payments.
- The forecast uses spending category specific data. This includes detail on total paid claims and premiums, retroactive spending adjustments, caseload, and service utilization.
- This data is incorporated into a forecast modeling application that uses historical expenditure patterns, as well as price and utilization trends to provide time-series analyses that are used to project future expenditures.
- The models also consider non-claims data (e.g., managed care enrollment, Federal Medicare premiums, and trends in the pharmaceutical industry) in certain areas to generate program specific expenditure projections.

Factors Impacting the Medicaid Forecast:

- Medicaid spending is determined by:
 - o Price of services provided through the program (e.g., nursing homes, hospitals, prescription drugs);
 - Utilization of services (reflects both the number of individuals enrolled in Medicaid and the utilization of services); and
 - MRT budget actions, one-time costs/savings, or other payments that do not fall into price or utilization.
- Medicaid price and utilization are influenced by a multitude of factors, including:
 - Economic conditions;
 - o Total enrollment and population mix in Medicaid;
 - Changes in the health care marketplace;
 - Prescription drug pricing and product development by manufacturers;
 - Complex reimbursement formulas which themselves are affected by another set of factors (e.g., length of hospital stays);
 - o Behavior and composition of recipients accessing services, and
 - o Litigation.
- The State share of Medicaid spending is also dependent on two factors:
 - o Local government contributions toward Medicaid costs; and
 - Federal funding, which can be affected by both statutory and administrative changes at the Federal level.

The following table outlines the FY 2023 Medicaid projections by major health care sector (i.e., category of spending) for Medicaid claims, supplemental programs, and offsets.

Projected FY 2023 Medicaid Spending \$in millions)					
Category of Spending	Medicaid Claims	Supplemental Programs	Offsets	Total	
Medicaid Managed Care	\$22,599	\$1,193	(\$1,252)	\$22,540	
Mainstream Managed Care	\$14,127	\$667	(\$431)	\$14,363	
Long Term Managed Care	\$8,473	\$526	(\$822)	\$8,177	
Total Fee-For-Service	\$8,082	\$1,231	(\$1,517)	\$7,796	
Inpatient	\$1,835	\$842	(\$13)	\$2,664	
Outpatient/Emergency Room	\$342	\$0	(\$3)	\$340	
Clinic	\$498	\$3	(\$65)	\$436	
Nursing Homes	\$3,107	\$303	\$0	\$3,410	
Personal Care	\$613	\$23	(\$48)	\$588	
Home Health	\$139	\$0	(\$13)	\$126	
Other Long Term Care	\$167	\$8	\$0	\$175	
Pharmacy	\$393	\$3	(\$1,301)	(\$905)	
Transportation	\$308	\$46	(\$1)	\$354	
Non-Institutional	\$680	\$2	(\$73)	\$608	
Other State Agencies (OSA)	\$4,356	\$0	(\$3,168)	\$1,188	
Mental Hygiene Stabilization Fund (MHSF)	\$0	\$0	(\$762)	(\$762)	
Medicare Part A/B & D	\$0	\$2,854	\$0	\$2,854	
VAPAP	\$0	\$1,284	\$0	\$1,284	
All Other	\$13	\$1,787	(\$1,034)	\$765	
Medicaid Administration	\$0	\$439	\$0	\$439	
State Operations	\$0	\$382	\$0	\$382	
Local Cap Contribution	\$0	\$0	(\$6,566)	(\$6,566)	
COVID-19 eFMAP	\$0	\$0	(\$3,551)	(\$3,551)	
Audit Collections	\$0	\$0	(\$433)	(\$433)	
TOTAL	\$35,050	\$9,170	(\$18,282)	\$25,937	

Major Supplemental Programs:

Medicaid Managed Care (\$1.2 billion)

- Mainstream Managed Care: 2 Percent Encounter Withhold Repayments and HIV Special Needs Plans (SNP) Quality Pool.
- Managed Long Term Care: 1.5 Percent Encounter Withhold Repayments, 3 Percent Enrollment Withhold Repayments, and Quality Pools.

Fee-For-Service (\$1.2 billion)

- Inpatient: Disproportionate Share Hospital (DSH) and Voluntary Upper Payment Limit (UPL).
- Nursing Homes: Advance Training Initiatives, 2 Percent Supplemental Payments, Reform Initiative, and Young Adult Demonstration.
- Other Long-Term Care: Assisted Living Demonstration Vouchers, and Traumatic Brain Injury (TBI) and Nursing Home Transition and Diversion (NHTD) payments.

• Transportation: Supplemental Ambulance and Rural Transportation Investments.

Medicare SMI Part A/B & Clawback Part D (\$2.9 billion)

- Supplemental Medical Insurance (SMI) Part A/B: This voluntary Social Security insurance pays a
 substantial part of Medicare dual enrollees' expenses for hospital, physician, home health, and other
 medical health services. States must contribute to the Federal Government a portion of the total
 expenses.
- Clawback Part D: Under the Medicare Part D drug benefit program, most costs are paid by beneficiary
 premiums and general tax revenues. States must contribute to the Federal Government for beneficiaries
 who are eligible for both Medicare and Medicaid who receive drug coverage through Part D.

Vital Access Provider Assurance Program (VAPAP) (\$1.3 billion)

The VAPAP program provides State-only support for facilities in severe financial distress to enable these facilities to maintain operations and provision of vital services while they implement longer-term solutions to achieve sustainable health care service delivery.

All Other (\$1.8 billion)

The All Other category includes a variety of Medicaid payments and offsets, the largest components of which are described as follows:

- Health Care Worker Bonus (\$1.05 billion): Front line health care and mental hygiene practitioners, technicians, assistants and aides that provide hands on health or care services to individuals earning less than \$125,000 annually will receive a State-funded bonus payment of up to \$3,000 in FY 2023. The amount of the bonus will be based on hours worked and length of time in service. State employees in comparable titles will receive bonuses, as well.
- Vital Access/Safety Net Provider Program (\$186 million): The Vital Access/Safety Net Provider Program (VAP) supports projects for facilities that were selected due to their serious financial condition and critical role in providing services to New York State's fragile, elderly, and low-income population. These awards support multi-year projects submitted by hospitals, nursing homes, free standing clinics, and home health providers. The VAP funds are used primarily to improve community care including expand access to ambulatory services, open urgent care centers, expand services in rural areas, and provide more effective services that meet community needs.
- Affordable Care Act (ACA) Federal Financial Participation (FFP) Correction (\$154 million): As part of the ACA, CMS anticipated that states that adopted continuous eligibility for adults would experience a two percent increase in enrollment. Based on this estimate, CMS determined that 97.4 percent of Medicaid enrollee member months for newly eligible individuals in the Adult Group will be matched at the enhanced FMAP rate (90%) and 2.6 percent will be matched at the regular FMAP rate (50%). This liability began accruing on January 1, 2014, and accrues on a quarterly basis going forward. eMedNY is unable to carve out a portion of the Adult Group. As a result, the State claims for the entire group at the eFMAP rate and thus overclaims for 2.6 percent of the Adult Group, resulting in the liability which is then repaid manually to the Federal government.
- Patient Centered Medical Homes (\$116 million): The Medicaid Patient Centered Medical Home (PCMH)
 incentive program gives incentive payments to National Committee for Quality Assurance PCMHrecognized providers to support their ongoing efforts to deliver high-quality, coordinated care to Medicaid
 members.
- Affordable Housing (\$63 million): The Supportive Housing Initiative seeks to ensure that Medicaid members have proper housing that promotes a healthy environment and lifestyle.

Medicaid Administration (\$439 million)

The annual county Medicaid caps for Local Administration will remain at their historic/current levels during FY 2023, although it is anticipated that county Administration costs will continue to decreaseover time as the State assumes more administrative functions previously borne by local districts.

The State assumption of Medicaid administrative functions is behind schedule due to challenges with systems upgrades to the State's Welfare Management System (WMS). In addition, extensive attention has been given to refining the MAGI eligibility and enrollment rules for NY State of Health (NYSOH) applicants to ensure Medicaid coverage is correctly provided and continuity of care is maintained.

The Department of Health continues to work collaboratively with local governments and the Division of Budget to facilitate the transition of Medicaid administrative functions and associated costs to the State. The latest annual report detailing the Medicaid Administration Takeover can be found at: Medicaid Administration Annual Report.

State Operations (\$382 million)

The Office of Health Insurance Programs (OHIP) State Operations budget reflects the Non-Federal share of personal services (i.e., salaries of OHIP staff) and non-personal services costs (i.e., contractual services). The FY 2023 Budget is projected to total \$382 million which also includes Essential Plan administration costs.

Contracts for the Enrollment Center, the NYSOH Customer Service Center, eMedNY/MMIS, and various MRT initiatives comprise a significant portion of the total non-personal service budget.

State Operations FY 2023 Budget (\$ in millions)			
Service Costs	Annual Budget		
Personal Services	\$57.6		
Medicaid	\$53.0		
Essential Plan	\$4.6		
Non-Personal Services	\$324.8		
Medicaid	\$246.5		
Essential Plan	\$78.3		
OTAL	\$382.4		

Major Offsets:

Medicaid Managed Care (-\$1.3 billion)

- Mainstream Managed Care (MMC): Transfer of Child Health Plus (CHP) claims out of the Medicaid Global Cap to the General Fund. Historically, the cost of the CHP program has been paid by the General Fund; however, in the first instance those costs are paid by the Medicaid Global Cap and are then reimbursed.
- Managed Long Term Care (MLTC): Supplemental Federal Revenue (i.e., 6% eFMAP) for Community
 First Choice Option (CFCO) services to expand home and community-based services and supports to
 individuals in need of long term care for help with everyday activities and health-related tasks that can
 be performed by an aide or direct care worker.

Fee-For-Service (-\$1.5 billion)

- Inpatient: Similar to CHP, the transfer of Department of Corrections and Community Supervision (DOCCS) medical expenditures for inmates that are funded initially through the Medicaid Global Cap.
- Other Long Term Care: Supplemental Federal Revenue for CFCO services (see above for additional information regarding CFCO).

Pharmacy: OBRA and Supplemental Rebate collections from Drug Manufacturers.

Other State Agencies & MHSF (-\$3.9 billion)

Transfers from Other State Agencies (OSA) to support State-share Medicaid expenditures for services of the Office for People with Developmental Disabilities (OPWDD), Office of Mental Health (OMH), Office of Children and Family Services (OCFS), State Education Department (SED), Department of Corrections & Community Supervision (DOCCS) and Office of Addiction Services And Supports (OASAS).

All Other (-\$1.0 billion)

The All Other category includes a variety Medicaid offsets, the largest components of which are described as follows:

- New York City Health + Hospitals Budget Actions (-\$448 million),
- Supplemental Federal Revenue (-\$440 million): Includes claiming Federal revenue for Family Planning services, Home and Community Based Services, and School Supportive Health services.
- Accounts Receivable (-\$10 million): Represents the collection of Medicaid provider liabilities owed to the State resulting from processing retroactive rate adjustments.

Local Cap Contribution (-\$6.6 billion)

The Local Cap Contribution represents the contribution the State receives from Local Districts for their share of the Medicaid program. The Local share of Medicaid expenditures has been capped since FY 2016. However, Local Districts still share in the benefit of the COVID-19 eFMAP and contributions have been reduced in FY 2023.

COVID-19 eFMAP (-\$3.6 billion)

Refer to the "Impact of the COVID-19 Pandemic" section for additional details.

Audit Collections (-\$433 million)

The Department of Health collaborates with the Office of the Medicaid Inspector General (OMIG) and the Office of the Attorney General (AG) in recovering improperly expended Medicaid funds. OMIG conducts and coordinates the investigation, detection, audit, and review of Medicaid providers and recipients to ensure they are complying with all applicable laws and regulations. OMIG recovers any improper payments through cash collections and voided claim recoveries. Cash collections are recovered through three avenues: direct payments, payment plans, and withholds.

In addition to cash collections, OMIG finds inappropriately billed claims within Managed Care capitation payments or provider fee-for-service claims. To correct an error, OMIG and DOH process the current accurate claim, and reduce this claim by the inappropriate claim value to recoup the previous overclaim and decrease state spending. Beginning in FY 2017, void recoveries were included as part of the audit collections to more accurately reflecting accounting for cash collections. These cash audit collection recoveries are used to offset Global Cap spending.

First Quarter Update Model Changes

DOH, in collaboration with the Division of the Budget, updated the Enacted Budget Medicaid Global Cap Model for price and utilization trends based on actuals through July 2022, as well as other known factors. This First Quarter Update Model projects spending to be aligned with the Global Cap spending target of \$25.9 billion. The following table outlines the changes from the Enacted Budget Model outlined in the First Quarter Global Cap Report to the First Quarter Update Model of the 2nd Quarter Global Cap Report.

First Quarter Update Model Changes (\$ in millions)					
Category of Spending	FY 2023 Enacted Budget	FY 2023 First Quarter Update	\$ Change Higher / (Lower)		
Medicaid Managed Care	\$22,162	\$22,540	\$378		
Managed Care	\$14,069	\$14,363	\$294		
Long Term Managed Care	\$8,093	\$8,177	\$84		
Total Fee For Service	\$7,733	\$7,796	\$62		
Inpatient	\$2,657	\$2,664	\$6		
Outpatient/Emergency Room	\$342	\$340	(\$3)		
Clinic	\$432	\$436	\$4		
Nursing Homes	\$3,401	\$3,410	\$9		
Personal Care	\$580	\$588	\$8		
Home Health	\$100	\$126	\$26		
Other Long Term Care	\$168	\$175	\$7		
Pharmacy	(\$903)	(\$905)	(\$2)		
Transportation	\$347	\$354	\$7		
Non-Institutional	\$608	\$608	\$0		
Other State Agency/Transfer	\$1,355	\$1,188	(\$167)		
MHSF	(\$1,060)	(\$762)	\$298		
Medicare Part A/B & D	\$2,854	\$2,854	\$0		
VAPAP	\$1,284	\$1,284	\$0		
All Other	\$636	\$765	\$129		
Medicaid Administration	\$439	\$439	\$0		
State Operations	\$375	\$382	\$7		
Local Cap Contribution	(\$6,833)	(\$6,566)	\$267		
COVID-19 eFMAP	(\$2,576)	(\$3,551)	(\$975)		
Cash Audits	(\$433)	(\$433)	\$0		
TOTAL	\$25,937	\$25,937	\$0		

<u>Medicaid Managed Care (\$378 million):</u> The extension of the PHE is accompanied by cost increases for enrollees whose coverage has been extended due to Maintenance of Effort (MOE) provisions in FFCRA, as well as the State's 12-month continuous coverage mandate. The forecast also includes an update to the Managed Care and Long Term Managed Care April 2022 rates.

<u>Other State Agency/Transfer (-\$167 million):</u> Reflects additional Financial Plan resources to support Office of Mental Health related Medicaid expenditures associated with FY 2023 Enacted Budget Mental Hygiene actions.

<u>MHSF (\$298 million):</u> Reflects the additional quarter of COVID-19 eFMAP offset by the support for the cost increases for enrollees has been extended due to MOE provisions in FFCRA, as well as the State's 12-month continuous coverage mandate.

<u>All Other (\$129 million):</u> Increased funding for the Health Care Worker Bonus payments to health care and direct workers earning less than \$125,000 annually.

<u>Local Cap Contribution (\$267 million):</u> Decreased the contribution from localities as a means to provide counties their projected share of the COVID-19 eFMAP for the September 2022 to December 2022 quarter.

<u>COVID-19 eFMAP (-\$975 million):</u> Increased the anticipated COVID-19 eFMAP by an additional quarter due to the PHE extension.

Results April through September 2022 – Global Cap Target vs. Actual Spending

Through September 2022, total actual State Medicaid spending is \$83 million under the Medicaid Global Spending Cap projection. Spending through September resulted in total expenditures of \$12.4 billion compared to the allowable spending target of \$12.5 billion. However, due to the complex projected fluctuations in monthly spending, simply trending the variance in a linear fashion would not be an accurate method for gauging yearend results.

April to September 2022 Medicaid Global Cap Target vs. Actual Spending (\$ in millions)					
Category of Spending	Global Cap Target	Actual	\$ Variance Over / (Under)	% Variance Over / (Under)	
Medicaid Managed Care	\$11,972	\$11,970	(\$2)	-0.0%	
Mainstream Managed Care	\$7,811	\$7,799	(\$12)	-0.2%	
Long Term Managed Care	\$4,161	\$4,171	\$10	0.2%	
Total Fee-For-Service	\$3,829	\$3,800	(\$29)	-0.8%	
Inpatient	\$1,395	\$1,400	\$5	0.4%	
Outpatient/Emergency Room	\$163	\$163	(\$1)	-0.4%	
Clinic	\$207	\$227	\$21	10.0%	
Nursing Homes	\$1,500	\$1,516	\$16	1.1%	
Personal Care	\$353	\$351	(\$2)	-0.6%	
Home Health	\$79	\$82	\$3	4.1%	
Other Long Term Care	\$87	\$94	\$7	8.1%	
Pharmacy	(\$447)	(\$522)	(\$74)	-16.6%	
Transportation	\$184	\$184	\$0	0.1%	
Non-Institutional	\$309	\$305	(\$4)	-1.2%	
Other State Agencies	\$575	\$575	\$0	0.0%	
Mental Hygiene Stabilization Fund	(\$381)	(\$381)	\$0	0.0%	
Medicare Part A/B & D	\$1,489	\$1,507	\$18	1.2%	
VAPAP	\$948	\$940	(\$8)	-0.8%	
All Other	(\$384)	(\$445)	(\$61)	-15.8%	
Medicaid Administration	\$196	\$235	\$39	20.1%	
State Operations	\$156	\$140	(\$16)	-10.0%	
Local Cap Contribution	(\$3,329)	(\$3,329)	\$0	0.0%	
COVID-19 eFMAP	(\$2,329)	(\$2,362)	(\$34)	-1.4%	
Audit Collections	(\$214)	(\$206)	\$8	3.6%	
TOTAL	12,528	12,445	(\$83)	-0.7%	

The following explanations regarding the variances between the Global Cap Target through September and the actual spending are reserved for significant variances with the understanding that small variances do not require an explanation and equate to "being on target."

Medicaid Managed Care

Medicaid spending in major Managed Care categories was \$12 million, or 0.02 percent, under anticipated spending. The price and utilization assumptions were essentially on target through September.

Fee-For-Service

Medicaid spending in major fee-for-service categories was \$28 million, or 0.8 percent, under target.

- Clinic was \$21 million, or 10.0 percent, above anticipated spending, which is primarily due to the timing of transfers to support OSA Medicaid services that are charged to the Global Cap in the first instance.
- Nursing Homes was \$16 million, or 1.1 percent, under anticipated spending. The budget projected higher spending for rate appeals than what was processed through September.
- Pharmacy was \$74 million, or 16.6 percent, under anticipated projections. This variance is largely attributed to higher than expected rebate collections.

Medicare Part A/B & D

Medicare Part A/B & D was \$18 million, or 1.2 percent over budget through September. This variance is largely attributed to higher than expected Part D expenditures.

All Other

All Other spending underspent by \$61 million, or 15.8 percent, which is largely due to the timing of accounts receivable payments and collections. Variances from the projected budget throughout the year are commonly due to the timing of approvals/disbursements, but with an expectation that the annual targets will be achieved by fiscal year's end.

Medicaid Administration Costs

Medicaid Administration was \$39 million over the budget through September as a result of delays in the State assumption of Medicaid administrative functions.

State Operations

OHIP State Operations underspent by \$16 million, or 10.0 percent through September, which is due to the timing in processing contractual payments.

COVID-19 eFMAP

The drawdown of COVID-19 eFMAP slightly exceeded the target by \$34 million, or 1.4 percent, which is due to the timing fluctuations of cashflow variances in monthly spending projections.

Audit Collections

Audit collections received were \$8 million, or 3.6 percent, below projections through September, which is due to the timing in processing of audits and resulting recoveries.

Enrollment

Medicaid enrollment is expected to decrease to 7,449,154 individuals by March 2023, which is a decline of approximately 76,000 individuals from March 2022. This decline is in large part due to the First Quarter Update assumption that the COVID-19 pandemic expired on October 13th, 2022; however, HHS has extended the PHE through April 11th, 2023. Current enrollment assumptions used for this reporting period do not yet reflect the recent PHE extension; the next quarterly Global Cap Report will incorporate updated PHE changes.

Mainstream Managed Care (includes HIV/SNPs and BHO/HARPs): Mainstream Managed Care (MMC) enrollment including HIV Special Needs Plans (SNPs) & Health and Recovery Plans (HARPs) are projected to increase by approximately 257,000 individuals from March 2022 through the end of December 2022. Starting in January 2023, enrollment is projected to begin decreasing toward pre-pandemic levels by approximately 340,000 through the end of March 2023. This results in an overall net decrease of 83,000 individuals.

Managed Long Term Care (includes Partial Capitation, PACE, FIDA IDD and MAP): Managed Long Term Care (MLTC) enrollment reached 281,500 by the end of FY 2022, a net increase of 1,500 individuals. Two factors contributed to the modest growth, a slower return to pre-pandemic growth rate levels and the Nursing Home carveout initiative (implemented September 2020) that disenrolled long term stay individuals from MLTC plans and placed them into Medicaid fee-for-service. The FY 2023 projections assume that enrollment will grow by ten percent, approximately 29,000 individuals, over March 2022 levels.³ This growth rate is higher than last year's trends however it is still slightly lower than pre-pandemic growth rates.

Medicaid Enrollment to Date

Medicaid Enrollment Summary Medicaid Managed Care vs Fee-for-Service						
	March 2022	September 2022*	Net Increase / (Decrease)	% Change		
Mainstream Managed Care	5,521,680	5,599,516	77,836	1.4%		
Long Term Managed Care	281,538	294,858	13,320	4.7%		
Fee-For-Service	1,771,992	1,767,933	-4,059	-0.2%		
TOTAL	7,575,210	7,662,307	87,097	1.1%		

Medicaid Enrollment Summary by NYC vs Rest of State					
	March 2022	September 2022*	Net Increase / (Decrease)	% Change	
NYC	4,301,457	4,266,402	-35,055	-0.8%	
Rest of State	3,273,753	3,395,905	122,152	3.7%	
TOTAL	7,575,210	7,662,307	87,097	1.1%	

*Note: Enrollment counts are from the Medicaid Data Warehouse (enrollment database) and are reported on DOH's website: NYS Medicaid Enrollment Databook. Data is pulled monthly to account for any retroactive updates. These counts reflect the net impact of new enrollment and disenrollment that occurred from March through September based on data pulled 12/19/2022.

³ These enrollment assumptions will be adjusted, as necessary, through approved rate packages.

Impact of the COVID-19 Pandemic

In response to the COVID-19 pandemic, the Federal government increased its share of Medicaid funding (i.e. eFMAP) by 6.2 percent for each calendar quarter occurring during the Federal public health emergency declared by the Secretary of Health and Human Services (HHS). The enhanced funding began January 1, 2020, and has continued into Fiscal Year 2023.⁴ Certain expenditures, including expenditures for the Medicaid expansion population already eligible for enhanced federal match under the Affordable Care Act (ACA) and certain medical services already eligible for an enhanced Federal match did not qualify for the 6.2 percent eFMAP.⁵

The additional Federal resources reduced State and Local government costs and helped support the significant increase in Medicaid enrollment resulting, in large part, from individuals losing income and/or job-related insurance coverage because of the COVID-19 pandemic. Due to Federal MOE requirements under the FFCRA, states are precluded from terminating an individual's Medicaid enrollment, except in very limited circumstances (e.g., death, moving out of state, voluntary termination, etc.) and, for a period, making any changes in the amount, duration, and scope of Medicaid benefits, as a condition of receiving eFMAP.

The following table provides the projected and actual fiscal impacts attributed to the pandemic related to the additional COVID-19 eFMAP that is claimed on a one-month lag. There is a year-to-year decline of eFMAP due to the claiming of 11.5 months in FY 2022 (for the period of March 2021 to February 2022) and 10.5 months projected to be claimed in FY 2023 (for the period of March 2022 to December 2022). The eFMAP collections are projections and subject to reconciliation.

COVID-19 eFMAP \$ in millions				
	FY 2022	FY 2023	Annual Change	
State Share	\$2,983	\$2,919	(\$64)	
Local Share	\$646	\$631	(\$15)	
Total 6.2% eFMAP	\$3,629	\$3,550	(\$79)	

Increased Enrollment:

As stated previously, the COVID-19 pandemic resulted in the most significant one-year increase in Medicaid enrollment since the inception of the program. Increased enrollment resulted as individuals lost income and/or job-related insurance coverage and as the State was required to suspend termination of eligibility under federal law as a condition of receiving eFMAP.

Spending on Services:

The COVID-19 pandemic has impacted both the utilization of services and the intensity of services beneficiaries sought as compared to prior years, and as compared to expected spending during the reporting period. This was particularly the case for certain types of services discussed briefly below.

At the height of the pandemic, spending on Acute Care (Inpatient/Outpatient/Clinic) services increased significantly due to higher intensity COVID-19 related inpatient care (e.g., ventilation, intubation) and emergency related services. Spending has subsequently trended downwards as costs have declined with a decrease in COVID-19 hospitalizations and utilization remains below pre-pandemic levels.

⁴ As of the date of this Report, HHS has extended the PHE from January 11, 2023 through April 11, 2023, which provides an additional quarter of eFMAP through the end of March 2023. The next quarterly Global Cap Report will incorporate these updated PHE changes.

⁵ The ACA's Medicaid provisions allows New York to utilize Federal funding (90% Federal Share) to expand Medicaid to single and childless adults with incomes up to 138 percent of the Federal Poverty Limit.

Long-term care services that comprise a significant portion of Medicaid spending has risen significantly from pre-pandemic levels primarily attributable to increased costs for Nursing Homes, Personal Care, and Home Health services, partially offset by continued lower utilization compared to pre-pandemic usage.

Non-Institutional Fee-for-Service spending remains relatively flat compared to pre-pandemic levels with transportation utilization continuing to trend below pre-pandemic levels with the increased flexibility for telehealth services, including the expansion of telehealth options for clinics, optometrists and dentists and the ability of enrollees to seek certain telehealth services through alternate modalities, resulted in increases in utilization for certain types of services, with much of the telehealth spend during the COVID-19 period tied directly to behavioral health services.

Notable Events

MRT II: The FY 2021 Enacted Budget included \$2.2 billion in recommendations put forward by the MRT II to create efficiencies within the Medicaid program and address the Medicaid imbalance, including identifying efficiencies in long term care services, as well as administrative reforms. Over two-thirds of the \$2.2 billion in savings actions have been implemented, with the remaining savings pending due to ongoing litigation, and Federal government Maintenance-of-Effort (MOE) requirements associated with the Families First Coronavirus Response Act (FFCRA) enhanced Federal Medical Assistance Percentage (eFMAP) of 6.2 percent on Medicaid payment (see next paragraph for additional information) and the American Rescue Plan Act (ARPA) eFMAP of 10 percent for certain home and community-based services.

The Financial Plan assumes the remaining savings actions will be implemented in FY 2023, aside from those actions limited to the MOE requirements associated with the recent Federal public health emergency extension, which extends the eFMAP benefit through December 2022, and will be implemented through FY 2025.

FFCRA & ARPA MOE Requirements: Section 6008 of the March 2020 FFCRA imposed an MOE requirement conditioned on states receiving the 6.2 percent eFMAP during the Federal PHE. Additionally, Section 9817 of the March 2021 ARPA imposed an MOE requirement for the duration of the period over which states are able to spend the 10 percent eFMAP related to certain home and community-based services. As a result, several MRT II initiatives aimed at modifying eligibility (i.e., the 30-month lookback) and other Personal Care Services/Consumer Directed Personal Assistance Program requirements have been delayed. The MOEs additionally preclude states from utilizing most forms of involuntary disenrollment from Medicaid, which has also resulted in the suspension of eligibility redeterminations as was done previously.

<u>Financial Plan Enrollment Projections:</u> The First Quarterly Update to the Financial Plan reflects the extension of the PHE through October 13, 2022, and assumes that enrollment levels will peak at nearly 7.7 million through December 2022, declining to approximately 7.5 million in March 2023, and start to return to near pre-pandemic levels in FY 2024. As the economy recovers and unemployment trends towards pre-pandemic levels, costs associated with individuals temporarily enrolled, but entitled to twelve months of continuous coverage, are anticipated to persist into FY 2023 and decline in FY 2024.

Extension of the Public Health Emergency (PHE): The Secretary of Human Services has extended the COVID-19 PHE through April 11th, 2023, which extends COVID-19 eFMAP through at least June 30th, 2023 (the First Quarter Update Budget Global Cap Model assumed COVID-19 eFMAP through December 2022). The extension of the PHE (and COVID-19 eFMAP) is accompanied by cost increases for enrollees whose coverage has been extended due to CMS MOE provisions in the FFCRA, as well as the State's 12-month continuous coverage mandate.

However, on December 29th, 2022, the Consolidated Appropriations Act was signed into law. This legislation made the expiration of the continuous enrollment requirement separate from the end of the COVID-19 PHE. The continuous enrollment condition will end on March 31, 2023. States will have up to 12 months to initiate, and 14 months to complete, a renewal for all individuals enrolled in Medicaid, Child Health Insurance Program (CHIP), and the Basic Health Program (BHP) following the end of the continuous enrollment condition.

The FFCRA's temporary FMAP increase will be gradually reduced and phased down beginning April 1, 2023, and will end on December 31, 2023. The Department of Health is currently evaluating guidance provided by CMS in determining the impacts of the PHE unwind and resuming redeterminations.

Home & Community-Based Services (HCBS) eFMAP: In addition to the 6.2 percent COVID-19 eFMAP increase, the Federal ARPA bill provided a temporary 10 percentage point increase to the FMAP for certain Medicaid HCBS claimed through March 31, 2022. Such additional funding must supplement, not supplant, current Medicaid funding.

After a collaborative, multi-agency effort with the Department's partner agencies that touch on the categories of HCBS for which the eFMAP is being provided, the Department submitted New York's initial spending plan to CMS on July 9, 2021. CMS has approved all spending plan initiatives except for one, for which CMS has asked some clarifying questions. The Department is working with CMS to achieve approval for this final proposal. The Department may modify the spending plan, subject to CMS's approval, on a quarterly basis.

In its spending plan update from October 31, 2022, New York continued to recommend investments that will

support the needs of our most vulnerable populations, including children, individuals with intellectual and developmental disabilities (I/DD), those suffering from addiction, those with behavioral health needs, and older adults. New York's approach prioritizes investments with long-term sustainable benefits, including building workforce capacity and digital infrastructure to streamline service delivery, improving the quality and efficiency of services in the more immediate term and helping HCBS providers overcome pandemic-related expenses and service disruptions.

<u>1115 Medicaid Waiver:</u> The State submitted an 1115 waiver extension request to CMS that preserves current Medicaid Managed Care Programs, Children's HCBS, and self-direction of Personal Care services. This waiver renewal was approved on March 31, 2022, and is effective for five years.

Separately, DOH has developed a new programmatic amendment to the now-renewed 1115 waiver, titled *New York Health Equity Reform (NYHER): Making Targeted, Evidence-Based Investments to Address the Health Disparities Exacerbated by the COVID-19 Pandemic.* This amendment focuses on addressing health disparities that have been highlighted and exacerbated by the COVID-19 pandemic and achieving health equity in the State through the greater integration of physical health, behavioral health, and health-related social needs (HRSNs). This request seeks approximately \$13.5 billion in Federal funding over five years to invest in an array of multi-faceted and related initiatives that would change the way the Medicaid program integrates and pays for physical health, behavioral health, and HRSNs in NYS.

After working directly with CMS and stakeholders on concepts contained in this new programmatic waiver amendment and in accordance with federal transparency requirements, DOH submitted a Federal public notice to the NYS Registry on April 13, 2022, and hosted two public hearings on May 3, 2022, and May 10, 2022. The presentation slides, recordings, and transcripts from both hearings are available on the DOH website. The 30-day public comment period closed on May 20, 2022 and another public hearing was held on September 28, 2022.

During the public comment period, DOH received 358 written comment submissions and heard from 75 speakers at the three public hearings. DOH has worked with partner agencies to review and evaluate the approximately 1,800 unique comments received and incorporated feedback from stakeholders where possible and appropriate. DOH formally submitted the final waiver amendment application to CMS on September 2, 2022. CMS deemed the application submission complete on September 15, 2022; The Federal Public Comment period was open from September 19, 2022, to October 19, 2022, during which 298 written comment submissions were received via the Medicaid.gov portal.

After submission to CMS, the review and approval process can take several months or longer. However, DOH is actively working with CMS to achieve an approval as expeditiously as possible. DOH plans to begin the five-year waiver demonstration period upon approval from CMS. Program implementation will begin once the amendment, or components of the amendment, is approved and special terms and conditions (STCs) are agreed upon with CMS.

Appendix C. Regional Spending Data

The chart below represents total provider spending that occurs within the Medicaid claiming system (eMedNY) through September 2022 for each region. These values represent physically where the services were provided, but not necessarily where the recipient of the services reside.

Medicaid Regional Spending (\$ in millions)		
Economic Region	Non-Federal Total Paid	
New York City	\$9,839	
Long Island	\$1,592	
Mid-Hudson	\$1,635	
Western	\$768	
Finger Lakes	\$650	
Capital District	\$512	
Central	\$367	
Mohawk Valley	\$325	
Southern Tier	\$282	
North Country	\$198	
Out of State	\$53	
TOTAL	\$16,220	

More detailed regional information can be found on the Department of Health's website at: http://www.health.ny.gov/health_care/medicaid/regulations/global_cap/

Appendix D. State-Only Payments (YTD)

State-only Payments (\$ in millions)	Non-FederalTotal Paid
Net VAPAP advances related to DPT	\$527
VAPAP	\$413
Supportive Housing	\$33
Rural Transportation	\$8
Alzheimer's Caregiver Support	\$13
End of AIDS	\$5
Assisted Living Voucher Demo	\$4
MLTC Ombudsman	\$1
CSEA Buy-in	\$1
TOTAL	\$1,005

Appendix E. Medicaid Drug Cap

- The FY 2018 Enacted Budget established a Medicaid Drug Cap that limits pharmacy spending growth in the Medicaid program tied to the annual growth rate of the Medicaid Global Cap, which is determined annually according to statute (4.7% in FY 2023).
- Prior to FY 2023, the Global Cap allowable growth was previously calculated using the ten-year rolling average
 of the medical component of the CPI for all urban consumers. The FY 2023 Enacted Budget modified the
 metric by which Medicaid Global Cap and Medicaid Drug Cap allowable spending growth is calculated, utilizing
 the five-year rolling average of health care spending, using projections from the CMS Actuary.
- If the Budget Director determines that expenditures will exceed the annual growth limitation imposed by the Medicaid Drug Cap, the Commissioner of Health may refer drugs to the State's Drug Utilization Review Board (DURB) for a recommendation as to whether a supplemental rebate should be paid by the manufacturer.
- If the Department intends to refer drugs to the DURB, it will notify affected manufacturers and will attempt to reach agreement on rebate amounts prior to DURB referral.
- In determining whether to recommend a target supplemental rebate for a drug the DURB must consider the cost of the drug to the NYS Medicaid program and may consider, among other things: the drug's impact on the Medicaid drug spending, significant and unjustified increases in the price of the drug, and whether the drug may be priced disproportionally to its therapeutic benefits.
- In formulating a recommendation, the DURB may consider, among other things: publicly available and DOH supplied pricing information, the seriousness and prevalence of the disease or condition being treated, Medicaid utilization, the drug's effectiveness or impact on improving health, quality of life or overall health outcomes, the likelihood that the drug will reduce the need for other medical care (including hospitalization), the average wholesale price, wholesale acquisition cost, and retail price of the drug, and the cost of the drug to Medicaid minus rebates.
- If after the DURB recommends a target rebate amount DOH and the manufacturer are unable to reach an agreement regarding supplemental rebate amounts, the manufacturer will be required to provide DOH with certain information including, but not limited to, marketing, research, and development costs for the drug.
- Over the past five years of implementation (FY 2018- FY 2022), the Medicaid Drug Cap has achieved over \$500 million in gross savings through spending reductions and additional supplemental rebate agreements with pharmaceutical manufacturers for over 60 high-cost drugs.
- In FY 2021, the COVID-19 pandemic significantly altered underlying assumptions historically used to project pharmacy specific utilization and spending in the Medicaid program. Specifically, the COVID-19 pandemic and associated Maintenance of Effort (MOE) requirements under Section 6008 of the Families First Coronavirus Response Act (FFCRA) resulted in a rapid (and unpredictable) escalation in Medicaid enrollment with newly eligible populations having different risk profiles or spending patterns than existing Medicaid enrollees. Given the uncertainty of underlying enrollment and spending assumptions it was not possible to accurately project whether Medicaid pharmacy spending would exceed the statutory growth rate. Therefore, the Medicaid Drug Cap was not triggered in FY 2021.
- Consistent with the statutory formula, the Medicaid Drug Cap for FY 2023 is \$1.9 billion (State share) and reflects a growth rate of 4.7 percent consistent with the Medicaid Global Spending Cap. The Department is still evaluating the projected net drug spend for FY 2023 which will be reported on in a future update.

Appendix F. Additional Information

- Fee-For-Service Rates for General Hospitals:
 - Inpatient Rates: https://www.health.ny.gov/facilities/hospital/reimbursement/apr-drg/rates/ffs/index.htm
 - Outpatient Rates: https://www.health.ny.gov/health_care/medicaid/rates/apg/rates/hospital/index.htm
- Fee-For-Service Rates of Pharmaceutical Drugs on the Preferred Drug List (PDL): https://newyork.fhsc.com/downloads/providers/NYRx PDP PDL.pdf
- Fiscal Intermediaries: Article VII HMH Part PP: At this time, there are 0 Fiscal Intermediaries contracted with the State, below is the current status:
 - The FY 2023 Enacted Budget revised Social Services Law Section 365-f with a material modification of the approach underlying the fiscal intermediary Request for Offers (RFO) issued in December 2019 and the Survey of Qualified Offerors issued in June 2021.
 - The new legislative provisions now require DOH to offer contracts to the 68 awardees from February 2021 and all other qualified offerors from the initial RFO if such other qualified offerors affirmatively attest that they served at least 200 consumers in NYC, or 50 consumers in other areas of the state, at any point during the first calendar quarter of 2020.
 - DOH developed and issued the attestation documents to the qualified offerors and OMIG is auditing the attestation supporting information. Once completed, awards will be made to additional offerors and the Department will contract with the original 68 awardees and those selected under the attestation process.
 - MLTC Policy 21.01 outlining the transition policies for non-contracted fiscal intermediaries remains in effect. Please note, DOH has not announced a "contract notification date" and therefore all fiscal intermediaries can continue to operate at this time.
