August is Immunization Awareness Month

FACEBOOK: Every year, babies and children get sick and die from illnesses that vaccinations could have prevented – the flu, meningitis, and whooping cough, to name a few. Vaccinations help make a child’s immune system strong so they can fight disease. Keep up to date on your child’s scheduled vaccines. 

TWITTER: Children still get sick & die from vaccine-preventable diseases -- #flu, #meningitis, & #whoopingcough, to name a few. Vaccines help make the immune system strong so they can fight disease. Keep up to date on your child’s scheduled vaccines. @HealthNYGov
