Hi, I'm Andy-Biotic.

My Specialty is fighting bacterial based sicknesses.

But I can't stop Viruses.

You can't stop me. I'm just a virus.

Dr. Viro

Do me a favor and stop wasting my powers!!!
Germ? Is that you?
Yes, it's me, Germy.
But how did you get so big?
I got so big because a friend of mine shared his strength with me by sharing his genes with me. He told me that he got big because farmers won't stop overusing antibiotics on their healthy animals.
Oh no! That's terrible!
We need to tell our friends, neighbors, and family about this and explain to them what will happen in the future if everyone thinks that they can just use antibiotics to kill viruses. We also need to stop people who stop taking their medications early!
But if you tell everybody I won't have my super powers anymore! Like, defeating antibiotics.
But it's the right thing to do because in the future we might not have anymore medicine to fight against bad bacteria.
