How to Safely Dispose of Household Sharps

Millions of people use needles, syringes, and lancets at home to care for their health. These needles, syringes, and lancets are called sharps.

Used household sharps must be stored safely and disposed of properly to protect people from diseases. Used sharps may contain blood infected by HIV (the virus that causes AIDS) or hepatitis C. Someone who accidentally gets cut by a used sharp could get infected.

Safe Disposal of Used Sharps

- Protects children, pets, and workers who handle trash and recyclables from illness and injury.
- Prevents sharps from being re-used or shared, which can spread diseases.
- Protects the environment.

You can bring used sharps to any hospital or nursing home in New York State. Call first to find out hours, days, and a location where you can bring used sharps.

If you do not have a sharps container, use a plastic bottle that cannot be broken or punctured, such as a bleach bottle or laundry detergent bottle. Close the screw-on cap tightly. Put tape over the cap and write “Contains Sharps” on the bottle. Put sharps into your container as soon as you use them. Keep the container closed and away from children and pets. Bring an appropriate container with you when you travel.

What Not To Do:

Don't put your used sharps container in the trash.

Don't flush sharps down the toilet or drop them into a sewer drain.

Don't clip, bend, or put the cap back on used sharps.

Don't put sharps or sharps containers in with the recyclables.

Don't put used sharps in soda cans, milk cartons, glass bottles, or containers that can be broken or punctured. Coffee cans are not safe because the plastic lids come off easily and may leak.

Where to Obtain Sharps Containers

At your local drugstore.

At Syringe Exchange Programs. Visit:

<https://www.health.ny.gov/diseases/aids/consumers/prevention/>

At NYS Safe Sharps Collection sites. Visit:

[health.ny.gov/sharps-collection](https://www.health.ny.gov/sharps-collection)

The American Diabetes Association can provide you with additional information on how to obtain them.

Please call: (800) 342-2383.

Where to Dispose of Syringes

All hospitals and nursing homes in NYS are required by law to accept household generated sharps. Call first to find out hours, days, and a location where you can bring them.

NYS also has an alternative safe sharps collection program where large metal boxes called kiosks and/or wall mounted units, are placed in a variety of settings. These may be drugstores, health clinics, community-service agencies, police precincts, landfills, transfer stations and a variety of other settings.

To learn more, visit the NYS Safe Sharps Collection Program at: health.ny.gov/sharps-collection.

Syringe Exchange Programs also accept them.
