

A close-up portrait of a Black woman with dark, wavy hair, looking directly at the camera with a slight smile. The background is dark and out of focus.

**Over 200,000
New Yorkers
have **Hepatitis C.**
Are you one of them?**

People at risk for hepatitis C include those who:

- Currently inject drugs.
- Injected drugs, even if it was once or many years ago.
- Received donated blood or organs before 1992.
- Have abnormal liver tests or liver disease.
- Have been exposed to blood on the job through a needlestick or injury with a sharp object.
- Have been on long-term hemodialysis.
- Were born between 1945 and 1965.
