Protease Inhibitors

 Fosamprenavir (Lexiva)					X	X			X			X
 Atazanavir (Reyataz)												X
 Darunavir (Prezista)					X	X			X			X
 Lopinavir/Ritonavir (Kaletra)					X	X						X
 Nelfinavir (Viracept)					X	X						X
 Ritonavir (Norvir)					X	X						X
 Tipranavir (Aptivus)					X	X			X			X
 Invirase (Saquinavir)					X	X						X

Nucleoside Reverse Transcriptase Inhibitors

 Abacavir (Ziagen)						X		X				
 Didanosine, ddl (Videx, Videx EC)						X	X			X		
 Emtricitabine (Emtriva)						X						
 Lamivudine (Epicvir)						X	X*					
 Stavudine, d4T (Zerit, Zerit XR)				X		X†	X			X		X
 Tenofovir (Viread)		X				X					X**	
 Zidovudine, AZT (Retrovir)	Δ					X						

Non-Nucleoside Reverse Transcriptase Inhibitors

 Delavirdine, DLV (Rescriptor)								X				X
 Efavirenz (Sustiva)			X					X	X			X
 Etravirine, ETR (Intelence)								X				X
 Rilpivirine (Edurant)								X	X			
 Rilpivirine/emtricitabine/tenofovir (Complera)									X		X	
 Nevirapine, NVP (Viramune, XR)								X				X

	Anemia, other blood problems	Bone thinning	Depression, euphoria, anxiety, hallucinations	Increased cholesterol, fats	Increased blood sugar	Lactic acidosis	Pancreatitis	Rash	Insomnia (sleeping problems)	Tingling hands, feet (neuropathy)	Chronic renal insufficiency	Liver illness (hepatotoxicity)
--	------------------------------	---------------	---	-----------------------------	-----------------------	-----------------	--------------	------	------------------------------	-----------------------------------	-----------------------------	--------------------------------

Fixed-Dose Combinations

 Abacavir/lamivudine (Epzicom)						X*		X				
 Abacavir/zidovudine/lamivudine (Trizivir)	Δ					X*				X		
 Lamivudine/zidovudine (Combivir)	Δ						X*			X		
 Rilpivirine/emtricitabine/tenofovir (Complera)												
 Tenofovir/emtricitabine (Truvada)		X				X					X	
 Tenofovir/emtricitabine/elvitegravir (Stribild)	Δ					X					X	X

Fusion Inhibitors

 Enfuvirtide (Fuzeon)								X				
--	--	--	--	--	--	--	--	---	--	--	--	--

Entry Inhibitors

 Maraviroc (Selzentry)								X				X
---	--	--	--	--	--	--	--	---	--	--	--	---

Integrase Inhibitors

 Dolutegravir (Tivicay)												
 Raltegravir (Isentress)												

Headache, diarrhea, and nausea are possible side effects of **any** HIV medication, so they are not included in this chart. For a complete description of side effects, please go to www.health.ny.gov/publications/9408.pdf.
Symbol key: Δ = hepatitis B infection may worsen if patient stops use; X* = in children; X** = If patient has chronic hepatitis C or history of kidney illness; X† = most likely cause.

Side Effects of HIV Medications
