1 in 3 teens have sex before they graduate high school.

Condom + birth control is the best way to reduce your risk of STIs, including HIV, and unintended pregnancy.

2 in 5 teens did not use a condom the last time they had sex.

33,000 STIs among teens were reported in New York State in 2017.

Under age 18? You can get tested & treated for STIs, including HIV without parent or guardian consent.
STI and HIV prevention is just one part of your sexual health.

**TALK** with your partner about sex & consent.

**LEARN** how to use & where to get condoms & birth control.

**THINK** about what sexual health means to you.

**TALK** to a medical provider about your health & testing for STIs & HIV.
