

eBRFSS 2013-2014 Health Indicators: Yates

General Description	2
Improve Health Status and Reduce Health Disparities	3
Percentage of adults who did not receive medical care because of cost	3
Percentage of adults who have a regular health care provider	4
Percentage of adults who had a dentist visit within the past year	5
Percentage of adults living with a disability.....	6
Percentage of adults aged 18-64 years with healthcare coverage	7
Percentage of adults aged 18-64 years who saw a doctor for a routine checkup within the last year	8
Percentage of adults experiencing housing insecurity in the past 12 months.....	9
Percentage of adults experiencing food insecurity in the past 12 months.....	10
Percentage of adults with poor self-reported health	11
Percentage of adults who report 14 or more days of poor physical health.....	12
Prevent Chronic Diseases	13
Percentage of adults who are obese	13
Percentage of adults with an annual household income less than \$25,000 who are obese	14
Percentage of adults living with a disability who are obese	15
Percentage of adults overweight or obese	16
Percentage of adults who participated in leisure time physical activity in the past 30 days.....	17
Percentage of adults who consume one or more sugary drinks daily	18
Percentage of adults who consume fast-food three or more times per week	19
Percentage of adults with physician diagnosed diabetes	20
Percentage of adults who are current smokers	21
Percentage of adults with annual household income less than \$25,000 who are current smokers	22
Percentage of adults aged 18-24 years who are current smokers.....	23
Percentage of women aged 50-74 years receiving breast cancer screening based on recent guidelines	24
Percentage of women aged 50-74 years with annual household income of less than \$25,000 receiving breast cancer screening based on recent guidelines.....	25
Percentage of women aged 21-65 years receiving cervical cancer screening based on recent guidelines	26
Percentage of women aged 21-65 years with annual household income of less than \$25,000 receiving cervical cancer screening based on recent guidelines.....	27
Percentage of adults aged 50-75 years receiving colorectal cancer screening based on recent guidelines.....	28
Percentage of adults aged 50-75 years with annual household income less than \$25,000 receiving colorectal cancer screening based on recent guidelines.....	29
Percentage of adults who had a test for high blood sugar or diabetes within the past three years	30
Percentage of adults with physician-diagnosed prediabetes	31
Percentage of adults with physician-diagnosed high blood pressure.....	32
Percentage of adults with diagnosed high blood pressure taking high blood pressure medication	33
Percentage of adults with current asthma	34
Percent of adults with cholesterol checked.....	35
Percentage of adults 18 years and older with elevated cholesterol.....	36
Percentage of adults who have taken a course or class to learn how to manage their chronic disease or condition	37
Percentage of adults with arthritis	38
Promote a Healthy and Safe Environment	39
Percentage of adults who consider their neighborhood suitable for walking and physical activity.....	39
Percentage of adults aged 65+ years with at least one fall in the past 12 months.....	40
Among adults aged 65+ years with at least one fall in the past 12 months, percent that resulted in injury.....	41
Prevent HIV/STDs, Vaccine Preventable Diseases and Healthcare-Associated Infections.....	42
Percentage of adults aged 47-68 years reporting ever tested for Hepatitis C (HCV).....	42
Percentage of adults aged 18+ years with flu immunization in the past year	43
Percentage of adults aged 65+ years with flu immunization in the past year	44
Percentage of adults aged 65+ years with pneumococcal immunization.....	45
Promote Healthy Women, Infants, and Children	46
Percentage of women aged 18-44 years who had dental visit within the last year	46
Women aged 18-44 years who saw a doctor for a routine checkup within the last year.....	47
Percentage of women aged 18-64 years with health care coverage	48
Percentage of women aged 18-44 years whose health care provider discussed planning a healthy pregnancy	49
Promote Mental Health and Prevention Substance Abuse	50
Percentage of adults with poor mental health for 14 or more days in the last month	50
Percentage of adult binge drinking during the past month	51
Percentage of cigarette smoking among adults who report poor mental health.....	52

General Description

The New York State Expanded Behavioral Risk Factor Surveillance System 2013-2014 (2014 eBRFSS) was design to supplement the Center for Disease Control and Prevention (CDC) Behavioral Risk Factor Surveillance System (BRFSS), which is conducted annually in New York State. The purpose of the 2014 eBRFSS was to produce local information on key public health issues. Data for the project were collected from April 15, 2013 to May 10, 2014. The 2014 eBRFSS reached both households with landline telephones and households which only had cell phones. Like the annual BRFSS, New York State's 2014 eBRFSS was designed to be representative of the non-institutionalized adult household population, aged 18 years and older.

Reported Health Indicators

There are a total of 50 health indicators included in the report. The health indicators include 10 measures included in the New York State Department of Health's Prevention Agenda, NYS Health Innovation Plan (SHIP), Delivery System Reform Incentive Payment (DSRIP) Program, or the NYS Community Health Indicator Reports (CHIRS). An additional 40 important health indicators are also included. The indicators are organized by the Priority Area of the Prevention Agenda and are reported statewide, by region, and by county.

Data Collection Methodology, Sampling and Weighting

The data collection methods for the 2014 eBRFSS aligned with the CDC's standard annual BRFSS methods. The 2014 eBRFSS questionnaire used standard questions from the BRFSS. Survey interviews were conducted in both English and Spanish. There were 31,690 completed interviews.

The sampling plan for the eBRFSS was developed to result in valid health indicator estimates for New York City (NYC) and each of the 57 counties outside NYC. The sampling approach stratified landlines by county and implemented a disproportionate stratified sampling design that accounted for both listed-households and unlisted numbers. Cell phone households were accounted for through additional strata that covered contiguous groups of counties.

Data were weighted to represent the population using a methodology known as iterative proportional fitting (raking). Raking adjusted the data so that groups underrepresented in the sample were more accurately represented in the estimated rates. Raking also enabled surveys conducted by cell phone to be included in the weighting and to accurately match sample distributions of specified demographic characteristics of the population. The raking categories included in the eBRFSS were: age, gender, race/ethnicity, education, marital status, owner/renter status, telephone usage (i.e. landline and cell phone combinations), and county of residence.

Limitations of Data Use:

During data analysis, criteria were applied to suppress rates based on too few surveys to be reliable and to identify rates that are highly variable. Rates in which less than 10 respondents were in the numerator or less than 50 respondents were in the denominator were considered unreliable and suppressed from reporting. Rates considered to have high variability due to having confidence limits greater than $\pm 10\%$ are noted.

Yates

Improve Health Status and Reduce Health Disparities

Percentage of adults who did not receive medical care because of cost*
